

COMPANION TO THE COMPLETE INTERVIEW PACK

Round 2 Technical Brief

Tuesday 29 September 2026, 10:30 to 11:00 BST, Webex.

Interviewer: Joanna Chinappen. Organiser: Jessica Cresswell.

"Similar format to your previous discussion, but more technical and tailored to the specific teams who are considering you."

Prepared: Friday 25 September 2026, four days before the interview.

What this is: Part 1 decodes the invite and the email and corrects the Round 2 picture in the earlier guides (this is a thirty-minute round, not two one-hour interviews). Part 2 is what could be confirmed, from public professional sources only, about the people in the room and the entity that wrote to you. Part 3 is the point of the document: what "more technical" means for a corporate access seat, as forty-five questions across the eight lines of the job description, each with the answer, the follow-up probe and the trap. Part 4 is the thirty-minute plan, the shape of a technical answer, the questions to ask, the four-day preparation plan and the reply to the coordinator.

Honesty note: "More technical" is the recruiter's phrase; what the team will actually ask is not public. Part 3 is built from the posting, from what desk practitioners describe, and from what Round 1 revealed. Every non-obvious claim carries a source marker [Sxx] resolved in Part 5.

Contents

■ Part 1. The invite and the email, decoded: what changed	3
■ Part 2. Who is in the room, and who wrote to you	6
■ Part 3. "More technical": forty-five questions across the eight lines of the job	10
A. Formats and channels; B. Requests and allocation; C. Portal, data, Excel; D. Brokers and the vote; E. Compliance and regulation; F. EMEA and the calendar; G. Process walk-throughs; H. Commercial awareness	10
■ Part 4. The thirty minutes, the answer shape, your questions, the four days, the reply	20
■ Part 5. Sources	23

Figures

1. What was assumed, what the invite says	4
2. The technical map: eight job-description lines, eight question domains	10
3. A worked consumption table: the numbers they could put in front of you	13
4. The thirty-minute clock	20
5. The shape of a technical answer	20
6. Four days: Friday to Tuesday	21
7. Platform Solutions: the three teams that touch corporate access	8

Confidence tags: **Confirmed** a source states it **Reported** single source or anecdote **Inferred** the author's reasoning
[S12] source marker, see Part 5.

PART 1

The invite and the email, decoded: what changed

Two documents arrived: a calendar invite for Tuesday 29 September, 10:30 to 11:00, and Eve Mallabar's scheduling email of 23 September. Between them they correct three things the earlier guides assumed and add one phrase that sets the agenda: "more technical".

1.1 The email, line by line

Eve Mallabar wrote	What it means
"we're pleased to move forward with scheduling the next round of interviews"	The decision to progress was already taken (Jessica Cresswell's email of 16 September); this is the coordinator executing it. Eve Mallabar also coordinated Round 1, so the process is running through the same team.
"These interviews will follow a similar format to your previous discussion"	The format is the Round 1 format: thirty minutes, video, a conversation led by the team rather than a test. The invite confirms it: 10:30 to 11:00.
"but more technical"	The one word that sets your preparation. For a business-services seat, "technical" does not mean a market quiz or a case. It means the mechanics of the work: what corporate access is and how it is paid for, how a request becomes a meeting, how allocation works, what the portal and the consumption report contain, how the broker vote runs, what compliance requires, and how you would handle specific situations. Part 3 is built on that reading; the evidence for it is in 1.3.
"and tailored to the specific teams who are considering you"	Plural. Either more than one team is interested (the Corporate Access Services desk plus an adjacent team), or the phrase is the coordinator's template. Prepare for the desk, and have a two-minute bridge ready for adjacent teams (Part 2).
"select a time that will work for you"	Done: Tuesday 29 September, 10:30. A calendar invite followed with the Webex details.
"If you have any competing timelines we should be aware of, please feel free to reply"	The standard question, asked a second time. Answer it honestly and briefly by reply (Part 4.6). Do not invent pressure; do not hide real dates.
Signature: "Senior Talent Acquisition Coordinator, Millennium Capital Management, 14 Ryder Court, London SW1Y 6QB"	A different entity name and address from the FCA-authorised firm in the earlier guides (Millennium Capital Partners LLP, 50 Berkeley Street). Part 2 checks both. Do not raise it in the interview; it is a recruiting signature, not a fact about the desk.

1.2 The invite, and the three corrections

What was assumed after Round 1, and what the invite says

ASSUMED (from what you were told at the end of Round 1)

Format: two separate one-hour interviews

Interviewers: "Joe", a member of the team, and Chris, the Head of the Desk

Content: a head of desk testing judgement; a team member testing mechanics

Timing: the week of 21 September

The earlier guides (Round Two Prep; Part 9 of the Complete Pack) were built on this. Their question sets still hold; their format does not.

THE INVITE (calendar, Webex)

Format: one thirty-minute interview, 10:30 to 11:00 BST, Tuesday 29 September

Attendees: Jessica Cresswell (Campus Recruiter, the organiser) and Joanna Chinappen; the agenda line names only Joanna Chinappen

Content: "similar format... but more technical and tailored to the specific teams who are considering you"

Reading: "Jo" from Round 1 is most likely Joanna. Chris is not on this invite; a separate conversation may follow, or the format changed. Prepare for one intense half hour with a practitioner, and keep the head-of-desk material ready in case a second slot is added.

Thirty minutes changes the maths: after introductions and your questions, about eighteen minutes of technical content. Short, exact answers beat long ones. Every answer under ninety seconds.

Basis: the calendar invite and Eve Mallabar's email of 23 September (both provided by the candidate); the Round 1 debrief of 7 September. The identity of "Jo" as Joanna is an inference; Part 2 gives what could be confirmed.

Figure 1. What changed. The invite is the fact; the earlier assumption came from what the Round 1 interviewers said. Where they conflict, the invite wins.

THE THREE CORRECTIONS, IN ONE PLACE

One. Thirty minutes, not two hours: the question sets in the earlier guides are still right, but you will get six to eight questions, not twenty, so each answer must be tight. **Two.** Joanna Chinappen, a team member, is the interviewer of record; the Head of the Desk is not on the invite. Prepare the practitioner's hour, keep the head-of-desk material warm. **Three.** "More technical" is now the brief. Round 1 tested motivation and judgement; Round 2 will test whether you understand the work.

1.3 What "more technical" means for this seat, and the evidence

Millennium's own students page describes the interview stage as "technical and behavioral interviews" and says the firm assesses "areas of interest, applicable skillsets, and potential"; it advises candidates to review the posting and the website and to "draw upon prior experiences, projects, and coursework" [S261] **Confirmed**. Candidate reports for other Millennium non-investing seats describe second conversations that go deeper into the work and sometimes include a question on market conditions [S262][S263] **Anecdote**. The posting itself lists the skills a technical round can check: Excel, Word and PowerPoint "including the ability to work with and manipulate data"; "prioritize and execute in a fast-paced, changing environment"; "communicate confidently with stakeholders at all levels" [S40] **Confirmed**. And Round 1 showed the desk's own idea of the hard parts: saying no to PMs, organisation, conference season, allocation, colour-coding, the record.

Put together, "more technical" for a corporate access intern most likely means four kinds of question, in roughly this order of likelihood:

1. Mechanics

"What is an NDR?" "How does a one-on-one get allocated?" "What is in a consumption report?" "How does the broker vote work?" Definitions and processes. Part 3, domains A, B and D.

2. Walk-throughs

"Walk me through what you would do if..." A request arrives; a seat is lost; a conference opens; a PM wants a company in closed period. Process questions with a compliance edge. Part 3, domains G, E and F.

3. Data and tools

"How would you build the tracker?" "Which Excel functions?" "Here is a table; what does it tell you?" Possibly a small numeric example read out or shared on screen. Part 3, domain C, with a worked table.

A fourth kind, commercial awareness ("what is going on in markets", "why does this desk exist at a multi-manager"), is possible in any Millennium round [S263] and is covered in domain H. What is unlikely, on the evidence: a case study, a live Excel test, a market quiz with numbers, or a brainteaser. If one appears, the answer shape in Part 4.2 still holds.

IF THEY OPEN WITH "THIS ROUND IS A BIT MORE TECHNICAL, IS THAT OKAY?"

"Yes. I've tried to understand the mechanics since we last spoke: how a request becomes a meeting, how allocation works at conferences, what the consumption report has to show, and where compliance sits in all of it. I'll tell you where I'm inferring rather than know, because I haven't sat on the desk yet."

PART 2

Who is in the room, and who wrote to you

Public, professional information only, checked on 25 September. The honest result on the interviewer is "not found", and this part says what to do with that. It also settles the entity name in the coordinator's signature, lists the adjacent teams that "teams" could mean, and records what candidates say about non-investing second rounds.

2.1 Joanna Chinappen: nothing public, and what that means for Tuesday

No public professional source connects anyone named Chinappen to Millennium, to corporate access, or to a London finance role: not LinkedIn page titles or snippets, not TheOrg's Millennium page, not mlp.com, not conference agendas, the IR Society, the press, Companies House or the FCA register [S482]

Confirmed absent from the sources searched . The name matches that did surface were different people in medicine, law, technology and music, and were excluded. Her title, team, tenure, prior employers and any public writing or speaking: not found.

What can be said, and how confidently: the invite and the agenda name her as the Round 2 interviewer, which is a primary document you hold; the Round 1 interviewers said Round 2 would involve "Jo", a member of the Corporate Access team, and Chris, the Head of the Desk; the two are consistent with "Jo" being Joanna Chinappen **Inferred** . Whether she sits on Corporate Access Services rather than an adjacent team cannot be established. Chris is not on the invite; he may join under her booking, or he may not be part of this slot.

WHAT TO DO WITH "NOT FOUND"

Reference nothing about her background, because nothing is verified. Treat her as a desk practitioner until the first three minutes tell you otherwise: if she introduces herself by team and asks how you would do things, she is the team member from Round 1's description; if she introduces herself from another Platform Solutions team, use the bridge in 2.4. Near the end, ask her own path into the desk; it is the only safe way to learn it, and practitioners like the question. Say her name on hand-over: Joanna, unless she offers Jo.

2.2 Jessica Cresswell and Eve Mallabar

Person	What is confirmed, and from where	Role in your process
Jessica Cresswell	Campus Recruiter, Millennium, UK. Three independent public indicators agree: her LinkedIn page title; Millennium's own campus events portal, which shows two March 2026 university events "created by Jessica Cresswell" (Warwick on 2 March; a UCL evening at the London office on 4 March); and the campus careers API, which lists her as recruiter on REQ-30183 and on eleven of the fourteen live 2027 London intern postings [S482][S480][S481] Confirmed . Millennium's own description of the London campus recruiter job is "full-cycle recruiting for undergrad and graduate candidates across European universities" [S484].	Owens scheduling and the outcome conversation. On the invite as organiser; may or may not join the call. She is the person who hears about competing offers, so what you tell Eve reaches her.

Eve Mallabar	Senior Talent Acquisition Coordinator, per her own signature. Not independently confirmed: LinkedIn's directory is behind a login and no snippet gives an employer; Millennium does advertise Talent Acquisition Coordinator roles, which confirms the job family, not the person [S483] Per signature only .	Logistics and scheduling; coordinated Round 1 too. Reply to her on timelines; ask her, not the interviewer, about process questions.
--------------	--	--

2.3 The entity and the address in the signature

The signature reads "Millennium Capital Management, 14 Ryder Court, London SW1Y 6QB". The earlier guides described Millennium Capital Partners LLP at 50 Berkeley Street. Both are real, and they are related.

Entity	What the public record says
Millennium Capital Management Ltd (company 04403936)	A private limited company incorporated in 2002, active, registered at 50 Berkeley Street, filing group accounts; directors Martin Pabari and Pansy Wong [S470] Confirmed . It is the sole person with significant control of Millennium Capital Partners LLP, with the right to more than half the surplus assets and to appoint or remove members [S471].
Millennium Capital Partners LLP (OC312897, FCA FRN 439327)	The FCA-regulated sub-adviser that holds the permissions and the portfolio managers; incorporated 2005, authorised 2006 [S471][S474]. Its own regulatory disclosure says it "utilises the resources, systems, and personnel of other entities within the Millennium group, including those of its managing member, Millennium Capital Management Limited" [S473]; mlp.com calls MCML "an affiliate of MCP, with the same registered office" [S472] Confirmed .
So, the signature	Uses the correct name of the UK parent and services company. Support functions being employed through MCML rather than the regulated LLP is consistent with that disclosure, though the accounts that would confirm it are scanned images and could not be read Inferred, moderate confidence .
14 Ryder Court, SW1Y 6QB	A five-storey, roughly 75,000 square foot, multi-let office in St James's, bought by M&G Real Estate in January 2022 for £132m and refurbished; other tenants include a search firm [S477] [S478] Confirmed for the building . No public source links Millennium to it: mlp.com still lists 20 Grosvenor Street as the London office, Companies House shows 50 Berkeley Street, and the Evening Standard reported the long-term lease on 50 Berkeley Street in December 2023 [S475][S476]. Overflow space for a firm that added 400 staff in six months is plausible [S479] but unproven Unresolved .

DON'T

Do not raise the entity or the address in the interview. Tuesday is on Webex, so it is immaterial; if you are later asked to come in, confirm the building with Jessica Cresswell rather than assume Berkeley Street. Do not describe Millennium Capital Management as "the hedge fund"; it is the UK parent and services company, and neither UK entity offers investor products [S472].

2.4 "Teams" plural: the adjacent teams, and a two-minute bridge for each

On 25 September the campus API listed fourteen live 2027 London internships, all created in late July; the Corporate Access Services posting is unchanged since 27 July and its department field reads "Execution Services" [S480][S481] **Confirmed** . Three of the fourteen touch corporate access directly, and one of them is the most likely second "team considering you".

Platform Solutions, as the London 2027 intern postings describe it: the three teams that touch corporate access

Figure 7. The three Platform Solutions teams that touch corporate access, from the live London postings [S480][S481][S42]. If a second team is "considering you", the origination team is the likeliest.

If the room turns out to be	The two-minute bridge
Sector Specialist Origination	"The desk and the origination team are two halves of one supply line: you secure the company relationship directly, sector by sector, and the desk turns the demand of hundreds of teams into one clean request and one fair allocation. What I found interesting after Round 1 is how long origination takes to build and how some sectors resist; the desk's data on what teams actually consume is what tells you where origination is worth the years. I'd be as happy on the origination side of that as on the services side, and I'd want to understand how the two hand work to each other." Then be ready for: which sectors are under-covered by brokers (small and mid caps, where brokers withdrew after MiFID II [S34]), and why a company would take a direct meeting (the buy side prefers it; companies expect it [S4][S35]).
Content Solutions	"Content Solutions and the desk answer the same question for the pods from different sides: what is worth paying for. You evaluate data and research providers; the desk evaluates access and brokers, through the consumption record and the vote. The common skill is turning usage into evidence. I'd want to learn how the two teams share the picture of what each pod actually uses." Then be ready for: how you would evaluate a data provider (who uses it, for what, at what cost, versus what), and the research-payment rules [S181].
Trading Services or another business-services team	"What I understand of the centre is that every one of these teams exists because 350 independent pods cannot each run their own onboarding, access, data or execution, and the firm would rather build one excellent version of each. I applied to the desk because it is where the firm meets the outside world; I'd be interested to hear how your team's version of the same problem differs." Then listen.

2.5 What candidates say about non-investing second rounds

Millennium's own students page describes the interview stage only as "technical and behavioral interviews" and lists Business Services as a track that plays "a central role in managing operations, driving strategic projects and delivering scalable solutions" [S485] **Confirmed**. Its campus recruiting leads' public advice is to "do your research on Millennium, the financial markets and current events to prompt an insightful conversation" and to "be curious to learn about the work you're doing" [S486]. No Millennium page describes what a second-round business-services interview contains. The anecdotes, none of them corporate access and none London:

- A middle-office operations intern (Miami, October 2024): a video round with three VPs or directors, "mainly behaviorals", with "questions about global market conditions" relevant to the desk, then a fit

conversation with the group's managing director [S487] **Anecdote** .

- A Wall Street Oasis reply on the process: "Teams all run their own process, so hard to generalize" [S487] **Anecdote** .
- An aggregator of candidate reports (July 2026): a short intro, a longer team session, a final round; a personality test sometimes between rounds; "technical depth is tailored to the track you applied to" [S488] **Aggregator** .
- A prep guide: non-investment interviews "focus on process judgement and role-specific skills" and test "why you want that function inside a multi-manager platform rather than a bank or consultancy" [S489] **Aggregator, uncited** .

Glassdoor, Team Blind and Reddit were blocked and are recorded as unread. The synthesis, which is what Part 3 is built on: process and prioritisation questions, an Excel talk-through rather than a live test, EMEA market and calendar awareness, the payment rules, and "why this function inside a multi-manager". Not a modelling test.

PART 3

"More technical": forty-five questions across the eight lines of the job

The posting has eight "What you'll do" lines. A technical round for this seat is those eight lines turned into questions. Each question below carries the answer in the length you have (under ninety seconds), the probe the interviewer is likely to add, and the trap. Answers use the mechanism, name the record, and say where you are inferring.

The technical map: the eight posting lines and the question domain each produces

1. "Client service to PMs and Analysts, with prioritization and urgency, across EMEA"

Domain G: process walk-throughs. Domain F: EMEA and the calendar.

2. "Support internal sales and target marketing efforts"

Domain B: how events reach the right pods before the window closes.

3. "Communication channels and processes for broker-sourced and originated events"

Domain A: formats and channels. Domain G: the templates and the record.

4. "Update and maintain the proprietary Corporate Access portal"

Domain C: what the portal holds, the tracker, the status states.

5. "Booking and confirming rooms and attendees; requests; calendar invites"

Domain G: the confirmation, the invite, the in-office day. Domain F: time zones.

6. "Conference attendance strategy: high volume of requests and allocations"

Domain B: the six-week arc, pooling, ranking, the no with an alternative.

7. "Build and maintain relationships with brokers"

Domain D: what brokers want, the broker vote, the ranked request.

8. "Consumption reports for strategy sessions with PMs and Analysts"

Domain C: the log, the pivot, the slide, the worked table.

UNDERNEATH ALL EIGHT: DOMAIN E, COMPLIANCE AND REGULATION

Why access cannot be bought with commission (2014, 2018, 2024); inside information and MAR; closed periods; the restricted list; why the desk logs everything. Any technical question can be given a compliance twist, and the twist is usually the real question.

ACROSS THE TOP: DOMAIN H, COMMERCIAL AWARENESS

Why a multi-manager needs this desk; what Millennium is doing now (\$22bn closing 1 October; flat August; teams added); what is happening in markets; what the desk must solve next. Asked in Millennium rounds for non-investing seats [S263]; one view, with a date on it.

The eight lines are quoted from the posting [S40]. The mapping to domains is the author's. Domain letters match the sections that follow.

Figure 2. The technical map. Eight posting lines [S40] become eight question domains, with compliance underneath and commercial awareness across the top.

3.1 Domain A: formats and channels (five questions)

Question	Answer, under ninety seconds	Probe and trap
A1. What is corporate access, in your own words?	"Arranging contact between the people who run listed companies and the investors who follow them: one-on-ones, group meetings, conferences, roadshows, site visits [S1]. On this desk it means two supply lines, the broker channel and the originated channel, serving internal clients, the pods. Since 2014 in the UK it is a service that cannot be bought with trading commission, which is why it is managed, recorded and allocated deliberately [S180]."	Probe: "Why does it need a desk?" Because pods compete and cannot see each other's demand; the desk pools it. Trap: "networking" or "getting an edge".
A2. Broker-sourced versus Millennium-originated: what is the difference, and when would you use each?	"Broker-sourced is access a bank provides: its conference slots, its roadshows, its IR introductions. Originated is access the firm secures directly from a company's IR team, which the origination team does sector by sector [S42]. Use the broker channel for conferences and post-results roadshows, where the bank owns the grid; use the direct channel for companies the pods need outside those windows, for under-covered names, and where a bank would just be a middleman. The buy side is far more likely	Probe: "Which is cheaper?" Direct has no broker to reward, but it costs the desk's time and the firm's reputation with IR. Trap: saying origination replaces brokers; practitioners say the opposite [S10].

to take a direct meeting [S4]; companies increasingly expect it [S35]. Direct takes years to build, and some sectors resist."

A3. Name the meeting formats and tell me which are hardest to get.	"One-on-one, group meeting or fireside, conference slot, non-deal roadshow, site visit or field trip, capital markets day, IR call, and each of those virtually. Hardest: the one-on-one with a CEO or CFO at a conference in season, because there is one management team and hundreds of investors; 82% of buy-siders rank one-on-ones as the top item in the broker vote [S39]. Easiest: an IR call, and a capital markets day, which is open to anyone who registers."	Probe: "What is a fireside chat?" A moderated group session; the moderator asks the questions. Trap: confusing an NDR with a deal roadshow.
A4. What is an NDR, and how does the desk get onto one?	"A non-deal roadshow: management touring investors' offices over a few days with no transaction attached, usually right after results; about two-thirds are broker-sponsored [S38]. The sponsoring bank and the company's IR decide the list of investors; the desk gets Millennium on it by asking early, ranking its request, and being the client the bank remembers as easy. The buy side can also ask a broker to build a bespoke 'reverse roadshow' [S467]."	Probe: "When do NDRs happen?" Post-results for the numbers; mid-quarter for the equity story [S440]. Trap: thinking the desk chooses the cities.
A5. How much of this is virtual now?	"Most meetings were virtual in late 2021, 93% by one survey; by 2023 virtual had fallen to about 13% of activity, and one broker reports about a quarter of its meetings virtual and stable [S460] [S458][S459]. So in-person is the default again, which is why rooms, invites and hand-overs are back in the job description."	Probe: "Does virtual change anything for the desk?" Same rules, easier logistics, and a multi-manager head asks for cameras on [S10]. Trap: guessing Millennium's own mix; not public.

3.2 Domain B: requests, allocation and conference mechanics (seven questions)

Question	Answer, under ninety seconds	Probe and trap
B1. A bank announces its November European industrials conference. Walk me through what the desk does.	"About two months out the bank confirms the companies and slot counts. Booking for one-on-ones opens four to six weeks before [S30]. I would load the event into the portal, tell the pods whose names are attending, collect requests with each requester's own ranking, pool duplicates across pods, and send the bank one ranked Millennium list per company with context that helps the allocator without revealing positions [S28]. When the allocation comes back, I would allocate internally by the desk's rule, attach an alternative to every no, and keep watching the last two or three days when banks release held-back slots [S30]. After the event, log who attended what."	Probe: "How early is early?" The day the window opens. Trap: starting the story at the conference.
B2. How does a bank decide who gets the one-on-one?	"By tiering its investor clients on size, commission relationship and relationship depth, by fit with what the company wants to see, and by the company's own must-see list; top-tier accounts get first pick and residual slots go last [S438][S436]. Some slots are held back for the final 48 to 72 hours [S30]. Broker events are often one seat per firm, which is what makes the internal allocation the hard part."	Probe: "So how does Millennium get more?" Being a client that matters, and being early and clean. Trap: assuming size alone wins.
B3. One seat, three pods. How do you decide?	"I wouldn't, as an intern; I'd apply the desk's rule and record it. The rule has to be one the losing team could accept as fair: coverage relevance, a live position or live work, when the team last met the company, and the requester's own ranking are the	Probe: "And if the rule is unclear?" Ask the associate before allocating, not after.

	kinds of criteria I'd expect. Then the two teams that miss get an alternative I have already secured, a group slot or an IR call, and a route to escalate that isn't me. None of the three hears who else asked."	Trap: inventing the rule and defending it.
B4. What does "internal sales and target marketing" actually mean?	"The desk knows the forward calendar and the pods do not. Marketing means telling the right teams, the ones covering the names attending, about an event before the booking window closes, through the portal and by email [S40]; the New York posting calls it making 'pro-active corporate access suggestions based on investment team's coverage' [S431]. Target means the right pods, not all pods. Requests that arrive after the window are the ones that fail."	Probe: "How do you know who covers what?" The portal's coverage data and the relationships the desk keeps with PMs and analysts [S431]. Trap: sounding like a newsletter.
B5. What is a "no with an alternative"?	"The desk's standard answer when a seat is lost: the rule in one line, an alternative already secured, and an escalation path that is not me. Never who got the seat, never why they ranked higher. The AllianceBernstein head's version is 'no, not right now, and here's why' [S433]. The consumption report is what makes it credible, because the PM can see what the desk did get him."	Probe: "What if there is no alternative?" Say so, and say when the next chance is. Trap: apologising for the rule.
B6. How do you rank requests when a PM says everything is priority one?	"I'd ask the PM to rank them, because a list with no order gives the bank nothing to work with, and banks allocate ranked requests [S28][S438]. If he won't, I'd rank by the desk's criteria and tell him the order I submitted, so he can change it before the deadline rather than complain after."	Probe: "What if two PMs' rankings conflict?" That is the pooling problem; the desk's rule decides, and both are told. Trap: submitting everything as priority one.
B7. A conference's booking closed yesterday and an analyst asks today. What do you do?	"Ask the bank anyway, politely and once, for the waitlist and for the group session; banks release held-back slots late and cancellations happen [S30]. Tell the analyst the honest odds today, offer the IR call as the fallback, and log the request so the next window on that name is marketed to that pod early."	Probe: "Would you push the bank hard?" No; you need them next month. Trap: promising the seat.

3.3 Domain C: the portal, the data and Excel (eight questions, with a worked table)

Question	Answer, under ninety seconds	Probe and trap
C1. What do you think the proprietary portal has to do?	"Four things, from the posting: hold the forward calendar of broker and originated events; capture requests by pod, format and priority; record allocations and attendance; and produce the reports [S40]. I'd expect compliance fields too: a restricted-list check, closed-period dates, whether a chaperone is needed. I don't know its screens; I know what it must contain."	Probe: "What would you add?" Nothing in week one; after learning it, the field that is most often typed inconsistently. Trap: claiming to know it.
C2. Design a request tracker for me.	"One row per request. ID, received time, pod and PM, requester, company and ticker, sector, format, event or channel, the requester's priority, status, slot and date, a compliance flag, and one owner. Status runs Received, Checked, Pooled, Submitted, Allocated or Waitlisted or Declined, Confirmed, Attended, Logged, each with a timestamp. Duplicates across pods are linked, not deleted, because each pod's request is a fact the report needs."	Probe: "Why an owner column?" Nothing on the desk is owned by 'the team'. Trap: forgetting status or owner.
C3. Which Excel functions would you use, and for	"XLOOKUP to bring the pod's sector and PM onto the attendance log from a pod table, and market cap onto the	Probe: "VLOOKUP or XLOOKUP?" XLOOKUP:

what?	company from a company table; COUNTIFS and SUMIFS to count meetings by broker, format, PM and quarter; a pivot table for the report, with brokers as rows and formats as columns; data validation drop-downs so nobody types '1-on-1' and '1x1' both; remove duplicates on ID; conditional formatting to flag a broker's no-show rate above the desk's average."	any direction, a not-found value, survives inserted columns. Trap: naming functions you cannot explain.
C4. What is in a consumption report, and what is it for?	"What each team actually consumed: meetings attended by broker, format, sector and company over a period, plus what was requested and not obtained. It serves three masters: the strategy session with the PM (what did you use, what did you miss, what is coming), the semi-annual broker vote (which bank delivered), and compliance (who met whom, when) [S40][S432][S39]."	Probe: "Counts or something else?" Counts first, then quality: PM feedback and hit rate on priority names. Trap: presenting volume as value.
C5. Here is a table (Figure 3). What does it tell you?	See the worked answers under the figure.	Trap: answering with the biggest number.
C6. How would you present this to a PM in a strategy session?	"One slide, three panels: what the team used this quarter by broker and format; what it asked for and did not get, with the alternative it received; what is coming next quarter for the team's names, with the booking deadlines. Numbers from the pivot; one message per panel; the detail in an appendix table."	Probe: "What is the message?" Usually: your hit rate on priority names, and the two brokers doing the work. Trap: a twenty-row table on a slide.
C7. How do you keep a shared spreadsheet clean when five people use it?	"Drop-downs for every categorical column, an ID that never changes, dates stored as dates, one owner per row, a weekly duplicate check, and a rule that a request is not real until it is in the tracker, whatever channel it came by. Where I can, I'd move the table into the portal so the rules are enforced rather than remembered."	Probe: "What breaks first?" Free-text formats and pasted dates. Trap: "I'd just be careful".
C8. What does "increase efficiencies" look like in your first month?	"First I'd learn why each step exists; on this desk a step that looks slow is often where duplicates or compliance flags get caught. Then one change, undoable, measured: a request template that captures everything the first time, a drop-down that stops mistyped formats, or a report that builds itself from the log. Last summer I turned hundreds of emails a day into a colour-coded list nothing fell out of, and got senior people to adopt an AI workflow by showing the time saved on their own work first."	Probe: "How would you measure it?" Minutes per request, errors per week, or time to first reply. Trap: proposing to rebuild the portal.

A worked consumption table for one quarter (illustrative numbers; the kind of thing they could put in front of you)

Broker	1x1s requested	1x1s obtained	Group slots given	Attended	No-shows	1x1 hit rate	Share of attended	No-show rate
Bank X	40	12	15	25	2	30%	40%	7%
Bank Y	25	10	5	14	1	40%	23%	7%
Bank Z	30	4	12	13	3	13%	21%	19%
Bank W	10	6	2	8	0	60%	13%	0%
Bank V	15	2	1	2	1	13%	3%	33%
Total	120	34	35	62	7	28%	100%	10%

Hit rate = 1x1s obtained / 1x1s requested. Share = attended / total attended. No-show rate = no-shows / (attended + no-shows). Requested counts are after pooling duplicate pod requests.

WHAT IT TELLS YOU (say these, in this order)

- The firm asked for 120 one-on-ones and got 34: a 28% hit rate. That is the number the head of desk watches, and the first thing to say.
- Bank X did the most work (40% of everything attended) but only a 30% hit rate; Bank W gave the firm six of ten one-on-ones asked, the best conversion, on low volume.
- Bank Z converted 13% and pushed the firm into groups; Bank V barely delivered and a third of what it did deliver was missed by our side, which is our problem, not theirs.
- Seven no-shows out of 69 confirmed is a 10% no-show rate. That is the firm's reputation with brokers and companies; find the pattern before the next vote.
- Then ask: which of the 34 were the priority-one names? Volume is not value.

THE PROBES, AND WHAT TO SAY

"Which bank should rank higher in the vote, X or W?" Depends on the criteria: the vote scores "access quality, meeting quality, and overall effectiveness" [S432]. On access, W converts best; on effectiveness, X carried the quarter. I'd show both and let the voters weigh them.

"What would you do about Z?" Ask Z why: were our requests on names it didn't host, or did we rank badly? Fix our list before blaming their allocation.

"What would you do about the no-shows?" Pull the seven rows: which pods, which brokers, which days. If it is one pod, a quiet word through the associate; if it is conference days, a confirmation call the morning of. Then re-run the rate next quarter.

"What is missing from this table?" Priority rank, sector, and PM feedback scores.

Figure 3. A worked consumption table. The numbers are invented for practice; the structure follows the posting's report, the Tokyo posting's vote criteria and the broker-vote literature [S40][S432][S39]. Practise reading it aloud in under a minute.

3.4 Domain D: brokers and the broker vote (five questions)

Question	Answer, under ninety seconds	Probe and trap
D1. What do brokers want from a desk like this?	"To be remembered at the vote. A bank's corporate access desk allocates scarce slots among hundreds of investor clients [S29]; it wants clean, ranked, early requests, prepared attendees who turn up, feedback it can pass to the company, and a fair score at the end. The multi-manager head's line is 'our job isn't to replace brokers' [S10]; the posting's is 'build and maintain relationships with brokers to support smooth and effective communication' [S40]."	Probe: "What annoys them?" Duplicate requests from one firm, late asks, no-shows. Trap: treating brokers as suppliers to be squeezed.
D2. How does the broker vote work?	"The buy side periodically scores each bank's services and uses the result to decide how it rewards them [S39]. Industry-wide it runs quarterly, semi-annually or annually, with traders, PMs, analysts and broker liaison all voting [S453]; one-on-one company meetings are the most cited item at 82% [S39]. At Millennium the corporate access vote is semi-annual and the desk runs it, collecting feedback on 'broker access quality, meeting quality, and overall effectiveness' and compiling the results [S432]."	Probe: "What does the desk contribute?" The consumption data that turns opinion into evidence. Trap: saying the vote is how access is paid for.
D3. A broker calls: "why did you rank us lower this time?" What do you say?	"Nothing about the ranking on my own; that is the associate's conversation. What I can do is have the evidence ready: our requests to them, what they gave, what was attended, the no-shows on our side. The right tone is the one the desk uses with PMs: the rule, the record, and the relationship intact for next quarter."	Probe: "Is the vote confidential?" Treat it as such unless told otherwise. Trap: defending or leaking the score.
D4. What goes in a broker request email?	"One list, ranked, per event; format and any flexibility, such as 'one-on-one preferred, group acceptable'; context that helps the allocator without revealing positions, like coverage; the deadline I need an answer by; and thanks. Nothing I would not want the bank to hold, because it will."	Probe: "Would you tell them the pod?" Not the position; the team designation is normal [S28]. Trap: copying a PM on it.
D5. What is the UK corporate broker, and why does it matter here?	"UK listed companies retain a house broker, and AIM companies must have a nominated adviser; the broker runs the company's roadshows and reports investor feedback to the board [S36] [S37]. So for a UK plc the desk usually goes through IR and the house broker's calendar, and how the firm's analysts behave in the room gets reported back."	Probe: "Does that exist in Germany?" The named preferred access providers there were Berenberg, ODDO BHF and Jefferies [S34]. Trap: confusing the house broker with the research analyst.

3.5 Domain E: compliance and regulation (seven questions)

Question	Answer, under ninety seconds	Probe and trap
E1. Why can't we pay a bank for a meeting through our trading?	"Because the FCA found in 2012 that no firm could justify corporate access as research, and from 2 June 2014 it cannot be bought with dealing commission [S180]; MiFID II from January 2018 applied the same logic across the EU, calling it 'a discrete service' [S185]. When the FCA re-allowed bundled research payments from August 2024 it kept corporate access out of scope [S181]. So it is paid from the firm's own resources, accepted where the rules allow, or arranged directly."	Probe: "What is the exception?" Companies under £200m market cap: an acceptable minor non-monetary benefit [S15]. Trap: "MiFID II banned corporate access."

E2. What is inside information, and why does the desk care?	"Precise, non-public, price-sensitive information under MAR Article 7; trading on it or passing it on is a crime, and the FCA says analysts in a private meeting are 'not the public' and private shareholder calls are 'dissemination' [S21][S22]. The desk cares because it arranges exactly those private forums, and its log is the evidence of who was in which room on which day."	Probe: "Give me an example." Einhorn, 2009: a broker-arranged call, an equity raise mentioned, a sale, a £7.3m fine, and declining the NDA was no defence [S19]. Trap: calling public information "MNPI".
E3. An analyst tells you after a meeting that the CFO said the quarter is "well ahead". What do you do?	"Treat it as a possible unlawful disclosure. Tell my associate and Compliance now, with the log entry: company, broker, attendees, date. Forward nothing, summarise nothing, and do not go back to the broker. What happens next is Compliance's decision."	Probe: "What if the analyst says it's fine?" It is not the analyst's call, and the FCA criticised firms that left that judgement to others [S20]. Trap: "checking" with the broker.
E4. What is a closed period, and what does it mean for a request?	"Thirty calendar days before an interim or year-end report, when the company's directors may not deal in its shares [S447]. It is a dealing ban, not a gag, but the FCA tells issuers to avoid private investor calls in it and ESMA has warned about pre-close calls [S449][S448]. Companies also set their own quiet periods, typically the last two to four weeks of a quarter [S451]. For a request: expect a no, do not push, ask for the first post-results slot, and log the dates."	Probe: "Is a meeting in a closed period illegal?" No; it is usually declined and unwise. Trap: saying it is illegal.
E5. What is a restricted list, and what does the desk do with it?	"The names the firm may not trade or discuss because someone inside holds inside information. A request on a restricted name goes to Compliance, not to a broker [S20]. Checking it is a step in the request process, before submission."	Probe: "Who maintains it?" Compliance. The desk checks; it does not decide. Trap: not knowing it exists.
E6. Why does the desk log every meeting?	"Four reasons. To evidence what a PM did or did not hear on a given date [S20][S22]; to prove access was not bought with commission or subsidised by research payments [S181]; to attribute consumption for the vote [S39]; and because the FCA suggests documenting discussions [S22]. If it is not logged, the firm cannot defend a decision."	Probe: "Isn't that just admin?" It is the substance; the no is only credible because of it. Trap: giving one reason.
E7. What is the difference between UK and US rules here?	"In the UK and EU, MAR binds both the company that discloses and the investor who receives; in the US, Regulation FD binds the issuer to disclose publicly what it told investors selectively, at once if intentional and within a day if not [S17], and the fund's risk is insider-trading law. And research payment rules differ: the UK re-allowed joint payments in 2024, the EU followed in 2026, and the US never unbundled in the same way [S181][S199]."	Probe: "Does Reg FD apply to a UK company?" Not unless it is a US issuer. Trap: mixing the two regimes.

3.6 Domain F: EMEA, the calendar and time zones (four questions)

Question	Answer, under ninety seconds	Probe and trap
F1. When is this desk busiest, and why?	"The four to six weeks before each conference cluster, because that is when booking windows open [S30], and the days after results, which is the highest-demand window of the quarter [S441]. In 2026 the September cluster alone had nine named European conferences between 2 and 20 September [S446]; July is quiet. You have just come through the peak."	Probe: "Name one." Goldman's European Medtech on 9 September; Bernstein's Pan European on 10 September [S446]. Trap: saying the conference days are the peak.

F2. What does "primarily across EMEA" mean for the day?	"Europe, the Middle East and Africa: London to Dubai, three hours ahead in autumn, with pods in New York five hours behind who also want European companies. Every invite carries the right zone and the other zone in the body; a wrong one is a missed meeting with the desk's name on it. UK results land at 07:00, so the morning is the spike; US results arrive after 21:00 and are picked up next day."	Probe: "Where do European companies report?" Full-year February to March, half-year July to August; many mid-caps half-yearly only. Trap: not knowing New York is five hours behind.
F3. A PM in Dubai wants a London meeting at 09:00 London. Any issue?	"It is noon in Dubai, fine for him; the question is whether the company's people are in London or dialling in from Zurich, which is 10:00 there. I'd put all three zones in the invite and confirm the dial-in works from the Dubai office."	Probe: "And a New York PM?" 04:00 for him; offer the recording or a follow-up call. Trap: assuming everyone is in London.
F4. What is the marketing-calendar report?	"A report of each company's results dates, closed-period start (results minus thirty calendar days), its own quiet-period policy, and its upcoming events, used to plan originated access; the New York posting names exactly this report [S431]. It tells the pods who is dark and when the door opens."	Probe: "How would you build it?" A company table, the results date, a formula for minus thirty days, and the IR page's quiet-period line. Trap: not knowing what it is for.

3.7 Domain G: process walk-throughs (five questions)

These are the most likely technical questions from a team member, because they are what the team member does all day. The scenario cards in the Complete Interview Pack give the pressure versions; these are the plain versions, answered as process.

G1. "An analyst emails asking for a call with a company's IR team next week. Walk me through it."

EASY

SAY

"Reply within the hour so she knows it is in hand, and ask two things: what she needs to cover, and whether a group call would do if a one-on-one is not available. Put it in the tracker with an ID, her priority and my name. Check the company's results date and closed period, and the restricted list. Then the channel: if a broker has the company on a calendar this month, ask the broker; if not, go to IR directly through the origination team's contact. Chase, confirm, send the invite with the zone and the dial-in, and log it. If the answer is 'not this week', she hears that today, with the next available window."

PROBE

"Why check the results date?" Because a company in its closed period will say no, and asking wastes the IR relationship. "Why the restricted list?" Because a meeting on a restricted name is Compliance's call, not mine.

G2. "You have forty open requests and a conference deadline at noon. How do you order the morning?"

MEDIUM

SAY

"Deadline first: everything for that conference gets pooled, ranked and submitted by eleven so there is slack. Then anything with a compliance flag, because those cannot wait. Then confirmations for meetings happening today or tomorrow, because a missed invite is a missed meeting. Then new requests, oldest first, each acknowledged even if not actioned. Colour-coded in the tracker so the associate can see the state at a glance. Anything I cannot get to by four, I say so by two."

PROBE

"A senior PM's request is in the last group. Do you move it up?" Seniority changes how I communicate, not the order; I'd tell him when I will get to it, and if it is for the conference it is already in the first group.

G3. "A company is visiting the office next Tuesday: CFO and head of IR, two hours. What do you do this week?"

MEDIUM

SAY

"Confirm the format with the host: how many slots, one-on-one or group, who from the company. Check the name against the restricted list and its closed period. Market the visit to the pods covering the name and collect requests; allocate the slots by the rule, on separate invites so no pod sees another. Book the room, reception and any dial-in. Reconfirm with the host the day before. On the day, be at the room, run the hand-overs to the minute, and record attendance. Afterwards, log the same day and route any feedback through the associate."

PROBE

"Is the broker in the room?" Not my decision; AllianceBernstein keeps brokers out by design [S433], and I'd follow the desk's practice. "A pod asks who else is attending." I don't say.

G4. "The portal shows a conference on the wrong date and three requests were made against it. Fix it."

HARD

SAY

"Check the source first, the broker's invitation, so I am sure which date is right. Fix the date. Then the three requests: tell each requester the corrected date and confirm they still want it; if the new date clashes with something, offer the alternative now. Check whether the same broker's other entries came in wrong, because a wrong date rarely travels alone. Tell the associate what happened and what I changed. And look at how the date got in wrong: if it was typed, that is the field to validate."

PROBE

"You caused the error. Do you still tell?" Yes, faster; a hidden mistake costs more than a visible one. "The bank moved it and did not tell you." Then I'd ask the broker for a confirmation email whenever a date changes, and add a weekly check of upcoming events against broker calendars.

G5. "A PM wants a company that reports in ten days. He says it's urgent."**HARD****SAY**

"The company is inside its closed period and almost certainly its own quiet period, so IR will not book management and I would not press them; the FCA tells issuers to avoid private calls in that window [S449]. I'd tell the PM that today, not after trying, and ask what he needs to cover. Then I'd request the first post-results slot, the IR call the day after or a place on the post-results roadshow, and get the ask in before the spike, because that is the most contested window of the quarter. And I'd log the company's dates so the next request on that name is timed right."

PROBE

"He says another firm got a meeting last week." Maybe before the closed period began, maybe an IR call on public information only; either way it does not change what IR will do today, and I'd say so politely and offer to ask IR for the earliest post-results slot now.

3.8 Domain H: commercial awareness (four questions)

Question	Answer, under ninety seconds	Probe and trap
H1. Why does a multi-manager need this desk when a long-only fund might not?	"Because the teams are independent and compete; they cannot see each other's demand and will not share it, so without a desk the firm sends a bank three hundred conflicting requests and looks disorganised. Long-only funds need 'one or two substantive annual one-on-one meetings' per company; hedge funds want more frequent contact and shorter feedback loops [S11]. Fewer than a quarter of buy-side firms had a dedicated desk in 2021 [S461]; the ones that do are the ones with many teams and many requests."	Probe: "What does the desk sit inside?" Execution Services within Platform Solutions [S42]. Trap: "because PMs are busy".
H2. What is happening at Millennium right now that matters for the desk?	"Capital and teams are growing: about \$97bn of assets by Bloomberg's count, and \$22bn of new commitments closing on 1 October under a five-year restriction, with Jain Global and Albar now exclusive to the platform [S400][S407]. That is more teams to serve and more requests to pool. Performance is steady rather than spectacular: flat in August, up 8.2% for the year [S402], which is the product doing its job. For the desk, the question is how to serve more teams without losing the record or the service."	Probe: "Is 8% good?" Against a market up more, no; against the firm's promise of low volatility, yes. Trap: quoting AUM as fact.
H3. What is going on in markets that a PM would want a meeting about?	"One view, with a date. The AI trade drove July's fall for the platforms, so pods in technology and its suppliers want to hear how companies describe demand now; and the September conference cluster has just given them a chance to. In the UK, enforcement on conduct is live: the Upper Tribunal upheld the FCA's ban on Crispin Odey on 10 September [S413]. Check Hedgeweek for the September numbers on the morning; the central bank decisions of mid-September post-date my sources."	Probe: "Rates?" Give the last figure you verified, with its date, and say so. Trap: forecasting.
H4. Why this desk, and not the investing side?	"Because the desk is the only seat that sees every team, and I want to learn the firm from the centre before I understand any one part of it. The work is judgement under scarcity, with a record behind it, and Round 1 confirmed that the hard part is saying no well, which is a skill I want. I'm not using it as a route to a pod."	Probe: "Where does it lead?" Senior desk roles, broker relations, business management, IR. Trap: hinting at a move to the investing side.

HOW TO DRILL THIS IN FOUR DAYS

Do not memorise forty-five answers. Learn the ten mechanisms underneath them (two channels, the request lifecycle, the six-week arc, the desk's rule and the alternative, the consumption report, the vote, the three regulation dates, MAR and the log, closed and quiet periods, the answer shape) and let each question pull the mechanism it needs. Then say ten answers aloud a day, timed, in a different order each time.

PART 4

The thirty minutes, the answer shape, your questions, the four days, the reply

Thirty minutes with a practitioner is six to eight questions. The plan below allocates them, gives every technical answer one shape, lists the questions to ask a team member, lays out Friday to Tuesday, and drafts the reply the coordinator asked for.

4.1 The thirty-minute clock

The thirty-minute clock, 10:30 to 11:00 (model; Round 1's shape, "more technical" in the middle)

Figure 4. The thirty-minute clock. A model built on Round 1's shape and the coordinator's email; the interviewer sets the real clock.

4.2 The shape of a technical answer

Every technical question in Part 3 can be answered in the same five moves. The shape is worth more than any single answer, because it survives a question you did not prepare.

The shape of a technical answer: five moves, ninety seconds, then stop

Figure 5. The answer shape. Purpose, steps, record, risk, limit. Practise it on the five walk-throughs in Part 3 until the shape is automatic.

4.3 Questions to ask a team member (choose two)

Question	Why it is a good one for a practitioner
"You've just come through the September cluster. What broke, if anything, and what held?"	Shows you know the desk's clock [S446]; invites a real answer; tells you what the desk is fixing, which is what an intern would work on.

"When the bank gives one seat and several teams asked, how does the desk explain the outcome to the teams that missed?"	The desk's own hardest part, asked as process, not as a hypothetical. Listen for the rule, the record and the alternative.
"What does the consumption report look like when it works, and what do PMs actually do with it?"	Shows you see the data as the product; the answer tells you which cut matters in strategy sessions.
"How do requests actually arrive, and what share of them get into the portal cleanly the first time?"	The intern's own territory: channels, templates, the record. The answer is your first improvement project.
"How much of EMEA access now comes through origination rather than brokers, and where do you want it to go?"	Strategy, asked at practitioner level; the buy side prefers direct [S4] and Millennium runs both streams [S42].
"What did the last intern do that made your job easier?"	Tells you the bar and the culture in one answer. Ask it last.
"Is there anything from my first conversation with Katherine and Ollie you'd like me to expand on?"	Invites the note she is holding. Only if time allows.

DON'T ASK

Anything about pay, hours or return offers; anything about Chris or a second interview unless she raises it; anything you could have read on the careers site; anything about the entity name or address in the coordinator's signature.

4.4 Four days: Friday to Tuesday

Four days: Friday 25 to Tuesday 29 September

FRIDAY: THE MECHANISMS Reply to Eve (4.6). Read Part 3 once, then write the ten mechanisms on one page in your own words: two channels, the lifecycle, the six-week arc, the rule and the alternative, the report, the vote, the three dates, MAR and the log, closed and quiet periods, the shape. Read The Work, From Zero Part 1 (the day) and Part 2.9 (Excel). Evening: Figure 3, read aloud, timed, until under a minute.	SATURDAY: ALOUD, TIMED Domains A, B, C: say every answer aloud, ninety-second timer, in the answer shape. Record two and listen back for the first sentence: does it carry the mechanism? Build a tiny tracker in Excel: ten rows, the columns from C2, a drop-down on Status, an XLOOKUP to a pod table, a pivot by broker. Thirty minutes. You will describe it better having done it. Evening: the five walk-throughs (G).	SUNDAY: THE EDGES Domains D, E, F, H: brokers and the vote, compliance, the calendar, commercial awareness. Aloud, timed. Get someone to fire Part 3 questions at you out of order for twenty minutes, with follow-ups. Stop at ninety seconds whether or not you have finished. Read Part 2 (who is in the room) and prepare the two-minute bridge for an adjacent team, in case. Evening: nothing. Rest.	MONDAY AND TUESDAY MORNING Monday: check Hedgeweek for the September numbers and any Millennium item; note the mid-September central bank decisions with their dates. Choose your two questions. Test Webex on the machine you will use. One page of notes. Tuesday 09:30: the cheat sheet, the ten mechanisms page, Figure 3 once. Camera at eye level, water, notes off-camera. 10:20: join. 10:30: say her name. After: write down every question asked, within the hour, for the next round.
--	--	--	---

The plan assumes about two hours a day. If you have less, do Saturday's aloud work and Sunday's out-of-order drill; those two produce most of the value.

Figure 6. Four days. The mechanisms first, then everything aloud and timed, then the edges, then rest.

4.5 Checklist

- ☐ Replied to Eve Mallabar on competing timelines, honestly and briefly (4.6).
- ☐ The ten mechanisms written on one page in your own words.
- ☐ Every Part 3 answer said aloud at least once, under ninety seconds, in the answer shape.
- ☐ Figure 3 read aloud in under a minute, with the five points in order.
- ☐ A ten-row tracker built in Excel, with a drop-down, an XLOOKUP and a pivot.
- ☐ The five walk-throughs rehearsed with follow-ups from someone else.
- ☐ The two-minute bridge for an adjacent team ready (Part 2).
- ☐ Two questions chosen for Joanna; the names of both people on the invite known.

- ☐ Hedgeweek checked Monday; one markets view with a date.
- ☐ Webex tested; camera at eye level; one page of notes; join at 10:20.

4.6 The reply to Eve Mallabar

She asked about competing timelines a second time. Reply the same day, three sentences, true. Two versions.

IF YOU HAVE NO LIVE COMPETING PROCESS

Hi Eve,

Thank you, and thank you for arranging Tuesday at 10:30; I'm looking forward to speaking with Joanna. I don't have any competing timelines that affect this process at the moment, and I'll let you know straight away if that changes.

Best regards,
Janak

IF YOU DO

Hi Eve,

Thank you, and thank you for arranging Tuesday at 10:30; I'm looking forward to speaking with Joanna. For your planning: I am in a process with [one other firm], currently at [stage], with a decision expected around [date]. Millennium is my first choice and I wanted you to have the timing, not to press for anything.

Best regards,
Janak

DON'T

Do not invent an offer to create urgency; recruiters compare notes and dates. Do not name the other firm's people. Do not ask Eve what the interview will cover beyond what she has said; the answer is in her email.

PART 5

Sources

Every [Sxx] marker above resolves here. IDs are shared with the Complete Interview Pack and the earlier guides. Sources accessed between 4 and 25 September 2026 as recorded in each row.

"Fetched" means the full text was read; "Snippet" means only a search excerpt was seen;

"Paywalled" means the headline was recorded and nothing was inferred from unread text.
