

Schroders Client Group Internship Programme 2027

Sales within Client Group, London. The role decoded, the team mapped, the firm from the inside, the industry from zero, the Cappfinity stages, a scenario playbook and a cheat sheet.

Read first: Nuveen (owned by TIAA) completes its £9.9bn takeover of Schroders on 1 October 2026. Schroders stops being a listed, family-controlled company this week. Every answer in this pack is written for the Schroders you will actually interview with.

Employer: Schroders plc group (hiring entity for UK staff: Schroder Investment Management Limited, 1 London Wall Place, London EC2Y 5AU; FCA FRN 119348, as stated on the Schroders legal page and not checked on the register)

Role: Sales Intern 2027, Department "Sales (within Client Group)", Oracle requisition 1943; 14 June to 20 August 2027; £37,000 pro rata

Process: application, Stage 1 cognitive, Stage 2 behavioural and motivational, Stage 3 work simulation and video interview (Cappfinity), assessment centre

Built 29 September 2026 from public sources only. Every non-obvious fact carries a source marker [Sxx] resolved in Part 15.

CONTENTS

What is in this pack

Page numbers match the running footer. The cover is unnumbered.

Part 0: How to use this pack, and the 10-minute version	4
0.1 The 10-minute emergency version	4
0.2 Reading plans	4
0.3 How to read the markers	5
0.4 What this pack assumes about you	5
Part 1: The role, decoded line by line, and the team mapped	6
1.1 The seat in one paragraph	6
1.2 The JD decoded, line by line	6
1.3 A worked day and the full list of activities	8
1.4 How work moves through the function	9
1.5 Internal clients and external counterparties	11
1.6 What the team is judged on	11
1.7 The compliance dimension	12
1.8 A realistic career path	12
1.9 The team, mapped	13
Part 2: The firm as a business, from the inside	16
2.1 The founding insight	16
2.2 How the firm makes money	16
2.3 The "contracts": who gives what, who gets what	20
2.4 The risk and control architecture	20
2.5 The operating model and the strategy	21
2.6 Public or private, and what that means	23
2.7 Leadership's view of the future, and what hiring says	23
2.8 What changed this week: the Nuveen deal	24
2.9 Recent moves, date-stamped	24
2.10 The skeletons, told straight	25
Part 3: Why Schroders is built this way	27
3.1 Why the business is structured this way	27
3.2 How the teams work together, in the firm's own words	28
3.3 What clients actually buy	30

3.4 The central side: how big, how organised, how wired	31
Part 4: How Schroders stands out, and what only it can claim	33
4.1 The peer table	33
4.2 The design choices that separate firms	34
4.3 What only Schroders can say	35
4.4 Where Schroders does not lead	35
4.5 The consolidation wave	36
Part 5: The industry from zero	37
5.1 What an asset manager does	37
5.2 Who the clients are	37
5.3 How the neighbours differ	38
5.4 The UK industry in numbers	39
5.5 How money moves: flows, fees and margins	40
5.6 The forces reshaping the industry	40
5.7 Where the industry goes next: four competing views	42
5.8 Core vocabulary in one place	42
Part 6: The role's own industry: fund distribution and its rules	44
6.1 What "distribution" means	44
6.2 How fund selling changed: five steps	45
6.3 How an institutional sale happens	45
6.4 The rules that bind a sales role	45
6.5 What is changing right now	46
6.6 What buyers value today	48
Part 7: What is happening right now	49
7.1 Your 60-second market view (as at 29 September 2026)	49
7.2 The story cards	49
7.3 Reading list: sources to follow	53
Part 8: Forming your own view: both sides of every argument	54
8.1 How to hold a view under pressure	54
8.2 Ten debates	54
Part 9: The interview: process, Cappfinity stages, question bank, questions to ask	56
9.1 The process, stage by stage	56
9B. Cappfinity: how the stages work and what could come up	57
9.2 The assessment centre	64
9.3 The question bank	65
9.4 Questions to ask them	69

Part 10: Interviewer briefing	71
10.1 Who might be in the room	71
10.2 Recruiter or practitioner? How to tell, and how to adapt	72
10.3 Reading the room live	72
Part 11: The scenario playbook	73
11.1 The four-step protocol: steady, sort, act, close	73
11.2 The priority order when good things collide	73
11.3 Eight ways assessors break a frame, and the counter to each	74
11.4 The scenario ladder: every JD line, three rungs	75
11.5 The composure set: five hard scenarios with decision trees	85
11.6 The CV grill	88
Part 12: "Why Schroders" in three lengths, and the counter-case	90
12.1 Thirty seconds	90
12.2 Two minutes	90
12.3 The close: one specific thing you want to work on	91
12.4 What most candidates say versus what you can say	91
12.5 The honest counter-case, and a reply to each	92
Part 13: Cheat sheet: Schroders Client Group Sales Intern 2027	93
Part 14: Glossary	94
Part 15: Source table	96
Part 16: Gaps, open questions and the final self-check	106
16.1 What could not be found	106
16.2 Open questions worth asking in the room	107
16.3 Final self-check	107

PART 0

How to use this pack, and the 10-minute version

Your next step is probably Stage 3 (the Cappfinity work simulation and video) and then an assessment centre. This page tells you what to read, in what order, depending on how much time you have.

0.1 The 10-minute emergency version

IF YOU READ NOTHING ELSE

1. **The ownership changed this week.** Nuveen, the asset manager owned by the US pension provider TIAA, buys Schroders for 590p cash plus up to 22p of dividends a share, about £9.9bn. The court sanctioned the deal on 29 September 2026; it takes effect on 1 October and the shares delist on 2 October ^[S75]. The brand stays, London becomes the combined group's non-US headquarters, and Schroders runs as a standalone business for at least 12 months ^[S76]. Never call Schroders "FTSE 100" or "family-controlled" in the present tense.
2. **What Schroders is.** An active asset and wealth manager founded in 1804, with record assets of £867.8bn at 30 June 2026 ^[S70]. Three businesses: Public Markets, Schroders Capital (private markets) and Wealth Management (Cazenove Capital) ^[S71].
3. **What Client Group is.** The central function that "integrates expertise in product, marketing, and sales", in three areas: Value Proposition, Sales Activation and Delivery ^[S263]. Led since August 2025 by Matt Oomen, Global Head of Client Group, who sits on the executive committee ^[S306].
4. **Why it was rebuilt.** In 2025 Schroders "designed a new sales and marketing model where central support is focused on fewer core propositions" ^[S72]. More than 16% of the public markets fund range is being merged or closed ^[S71].
5. **The number that shows commercial sense.** Fee margins range from 6bp in core solutions to 57bp in private markets ^[S71]. So what Client Group sells matters as much as how much.
6. **Latest results (H1 2026).** Profit up 46% to £459.8m; cost:income 68%; net outflows of £8.3bn, including one £6.6bn low-margin redemption; intermediary gross inflows up more than 40% ^[S70].
7. **Your market view.** Energy-driven inflation is back. The Bank of England held at 3.75% on 17 September 2026 with three votes to raise; the next decision is 5 November ^[S232]. Schroders' economists see global growth of about 2.5% and name a spike in long-term yields as the main risk ^[S242].
8. **Your rule for every scenario.** "I won't trade the rules or the client's interest for speed. Inside those, I'll be as fast and helpful as I can, and I'll tell people early." (Part 11)
9. **Your video answer shape.** Energy (what you enjoy), evidence (one real example), learning, link to Client Group. About two minutes. One take, no pause ^[S262].
10. **Your question to ask.** "Since Client Group moved to fewer core propositions, how do regional sales feed what they hear from clients back into Value Proposition?"

0.2 Reading plans

Time you have	Read
1 hour	Part 0; Part 9B (Cappfinity video and simulation); Part 12 (why Schroders); Part 13 (cheat sheet).
Half a day	Add Part 1 (the role), Part 2 (the firm), Part 7 (what is happening now) and the scenario protocol at the start of Part 11.
Before the assessment centre	Everything. Parts 5 and 6 first if the industry is new to you. Then rehearse the question bank in Part 9 out loud, and draw the five decision trees in Part 11 from memory.

0.3 How to read the markers

Every non-obvious fact has a source marker such as ^[S71] that resolves to Part 15, with outlet, date, URL and whether the page was read in full. Claims are tagged **Confirmed** (primary source or two credible outlets), **Reported** (one credible source, or a search summary only) or **Inferred** (the author's reasoning). Estimates are labelled as estimates, including on charts.

KEY TERM

Blue boxes define a word the first time it matters.

SAY THIS IN THE INTERVIEW

Green boxes are lines you can adapt. Put them in your own words: Schroders prohibits using AI to create or edit application answers ^[S262].

DON'T SAY THIS

Red boxes are traps that date or damage an answer.

YOUR OPINION GOES HERE

Purple boxes give both sides and a model view. Replace the model view with yours.

SOURCE UNCERTAIN

Amber boxes flag facts that rest on a single source, a search summary, or a date that may move. Check them in the week of your interview.

0.4 What this pack assumes about you

The brief did not include your degree, prior knowledge, interview date or interviewers. So the pack assumes a second-year undergraduate of any subject, starting near zero in asset management, facing Stage 3 within weeks and an assessment centre between late October 2026 and January 2027 ^[S260, S261] **Inferred**. The CV grill in Part 11 is a drill you apply to your own CV bullets, not a script about a CV the author has not seen.

SOURCE UNCERTAIN: THE DEADLINE

The brief says applications closed on 16 September 2026. Schroders' Oracle recruiting site showed requisition 1943 ("2027 Client Group Internship Programme", Department "Sales (within Client Group)") as posted on 18 September and still live on 29 September ^[S2]. If you have not yet applied, check the live posting today.

PART 1

The role, decoded line by line, and the team mapped

What a Sales intern in Schroders' Client Group actually does, who they work with, how they are judged, which rules bind them, and a reconstruction of the team they sit in.

1.1 The seat in one paragraph

You would join the London office at 1 London Wall Place for ten weeks, from Monday 14 June to Friday 20 August 2027, on £37,000 pro rata [S263]. Your formal department is "Sales (within Client Group)" [S2]. Client Group is the part of Schroders that sits between the investment teams and the clients: it decides what to offer, takes it to clients and keeps the data and processes running [S263]. You get introductory training, a live project, shadowing, a graduate buddy, "Coffee Hours" with senior leaders and the chance of a place on the 2028 graduate programme "subject to performance feedback" [S263]. Schroders calls the internship "the key feeder to our graduate programme" but says a place "isn't guaranteed" [S260].

10 weeks

14 Jun to 20 Aug 2027 [S263]

£37,000

annual rate, paid pro rata [S263]

Req 1943

"Sales (within Client Group)", posted 18 Sep 2026 [S2]

1.2 The JD decoded, line by line

Each line below is quoted from the advert [S263]. Under it: what it means in practice, who you deal with, what good looks like, the tools, and the structural fact it reveals about Schroders.

The team lines

"Client Group is a central function that integrates expertise in product, marketing, and sales."

DAY TO DAY	Your work crosses team lines constantly. A salesperson's request needs Product's data and Marketing's approved material.
WHO	Product Strategy and Product Development, Central Global Marketing and the UK marketing hub, relationship managers [S4, S5].
GOOD	You know who owns what and route a request correctly the first time.
TOOLS	Salesforce, Outlook, Teams, PowerPoint, Excel [S7].
REVEALS	Product and Marketing report to the same Global Head as Sales, Matt Oomen, who "leads our client-facing teams across all our regions: Sales, Client Services, Product and Marketing" [S306]. Distribution is one unit, not three silos.

Value Proposition: "Develops tailored investment offerings by analysing market trends, reviewing competitor activity, and working alongside investment teams..."

DAY TO DAY	Competitor fund screens, flow-trend slides, input to launches such as active ETFs, and propositions for client segments such as DC pensions, insurers and wealth.
WHO	Product Strategy (which aims to "better inform Schroders' sales activity, improve product positioning"), investment desks, Client Research & Experience ^[S4, S5] .
GOOD	A one-pager: "Peers are raising X in Y. We have Z. The gap is W."
TOOLS	Excel, PowerPoint, fund databases (the specific vendors are not confirmed) Inferred .
REVEALS	The "fewer core propositions" model ^[S72] . Product Development also "runs the value assessment processes ... for the fund Boards" ^[S4] , so Value Proposition is tied to the FCA's value rules (Part 6).

Sales Activation: "Delivers local sales strategies and deepens client relationships, focusing on growth opportunities and ensuring high standards of client service across regions."

DAY TO DAY	Meeting packs, call notes into the CRM, RFP and DDQ coordination, the team inbox, tracking client orders, events and follow-ups. The Zurich Sales Activation intern posting lists all of these ^[S7] .
WHO	Relationship managers, "their Sales Support Specialist", investment specialists, client service, the marketing hub ^[S7] .
GOOD	Fast, accurate turnaround; anticipating the next question; a clean CRM.
TOOLS	"Salesforce and other internal tools to support pipeline visibility, meeting preparation and accurate record-keeping" ^[S7] .
REVEALS	Regional heads run the local strategies: UK Phil Middleton, Europe Patrick Schwyzer, Asia Gopi Mirchandani ^[S24, S21, S18] .

Delivery: "Partners with technology and operations to drive efficient, data-driven processes, leveraging insights and tools to continuously enhance client engagement."

DAY TO DAY	Data hygiene, campaign tracking in Salesforce, pipeline and engagement dashboards, submissions to consultant databases.
WHO	CRM platform technologists, operations, Business Development Services ^[S9, S10] .
GOOD	You spot a manual process and template or automate it, without breaking a control.
TOOLS	Salesforce; Schroders is hiring a Salesforce Platform Architect and a Principal Business Analyst for CRM platforms ^[S12, S10] .
REVEALS	A new role, Head of Client Group Strategy Execution and Delivery, was created in September 2025 (Ed Mitchell, ex-BNY) ^[S20] . Linking that title to the JD's "Delivery" pillar is an inference.

"Our clients range from central banks and pension schemes to family offices and wealth advisors globally."

DAY TO DAY	Tailor tone and content. Official institutions care about safety and liquidity; DB schemes about paying pensions; wealth managers about model-portfolio fit.
WHO	Institutional and intermediary teams. In the UK, Rachel Harris leads UK Institutional ("a trusted partner to over 600 UK pension schemes and insurers") and Jamie Fowler leads UK Wealth for advisers, wealth managers, family offices and discretionary investors ^[S27, S25] .
GOOD	You show you understand what each segment needs before you speak.
TOOLS	Segment pages and client research.
REVEALS	Schroders reports flows as Institutional versus Intermediary, with Wealth separate ^[S70] .

The skill lines

JD line (shortened)	In practice	What good looks like	What it reveals
"genuine interest in asset management and current market trends ... impact of economic events on investments"	A morning read of markets, then talking points before client calls. Schroders' FAQ suggests showing this by discussing "a recent market trend or industry news story" and why it is relevant [S260] .	Say what moved, why, and what it means for a client holding X.	Schroders sells an "Active Edge" [S71] , views on active versus passive and concentration risk matter.
"moderate understanding of finance ... discuss macro-level topics with clients"	Explaining rates, inflation, currencies and equity concentration in plain words.	A two-minute macro view that ends in an investment implication.	Sales is expected to carry the house narrative, not just product facts.
"self-starter ... leading or launching projects, societies, or volunteering"	Picking up unowned work, such as a stale competitor tracker.	Finished work plus a suggested next step.	The 2025 redesign aimed "to enhance accountability for sales" [S72] .
"composure and methodical thinking under pressure"	RFP deadlines, quarter-end reporting, client questions on a volatile day.	Checklists; no errors when rushed; early warnings.	RFP and DDQ work is deadline-driven [S5, S7, S9] .
"confident, authentic communicator ... adapt style to different audiences ... in person, over the phone"	Phone and email with clients' teams, internal presentations, an end-of-internship presentation.	Clear, short and confident without over-promising.	Everything client-facing is a "communication" under COBS 4 [S401] .
"manages time, tasks, and expectations ... event or project coordination ... diary management"	Booking meetings, seminar logistics, webinars.	No dropped logistics; timely follow-ups.	Events support is in the Zurich posting and an Events Manager post is live [S7, S12] .
"analytical and resourceful ... listens actively ... using available tools and networks"	Turning a vague client ask into a precise data request and knowing whom to ask.	Right answer, right source, approved.	London is a hub that serves local offices: Madrid's intern is "the entry point for ... requests to the London HQ" [S8] .
"works well in teams, prioritises client needs ... trust-based relationships"	Many hand-offs across sales, product and marketing.	The teammate people want on their deal.	Client Group is explicitly "integrated" [S263] .

1.3 A worked day and the full list of activities

07:45	Market read: 3 moves, 3 client implications; check team inbox
08:30	Team huddle: Salesforce pipeline, today's meetings, open RFPs
09:00	Build meeting pack: approved figures, labels, disclaimers, sign-off
10:30	RFP/DDQ: chase owners, quality-check numbers
11:30	Competitor snapshot for Value Proposition
12:00	Lunch; buddy or Coffee Hour
13:00	Shadow a client call; log notes and actions in Salesforce
14:00	Event logistics: invites, RSVPs, hospitality within limits
15:00	Client requests: performance queries, documents, reporting tracker
16:00	Intern project (for the end-of-programme presentation)
17:00	Follow-ups, CRM updates, tomorrow's list

Figure 1. A worked day for a Sales intern in UK Client Group. Built from Schroders' Zurich and Madrid sales-intern task lists and London marketing and consultant-database postings [\[S7, S8, S5, S9\]](#) **Inferred**: no first-person London account was found.

Activity family	What it includes	Evidence
Business development	RFPs, proposals, DDQs, consultant database submissions, pitch books.	[S5, S7, S9]
Client coverage	Meeting preparation, call notes, follow-ups, relationship reviews, ad hoc requests on "performance, product and market-related updates".	[S7, S8]
Client reporting	Monthly and quarterly client documents; bespoke reports distributed "through the relevant sales representative".	[S7, S9]
Flows support	"ensuring client orders are correctly identified, followed up on, accepted and booked".	[S7]
Marketing activation	Campaigns, webinars, branded emails, podcasts, contact lists.	[S5, S7, S8]
Events	Seminars, conferences, roadshows and their logistics.	[S7, S12]
Product	Fund launches (active ETFs), mergers and closures, value assessments, competitor analysis.	[S4, S71]
Data and CRM	Salesforce hygiene, pipeline visibility, campaign tracking, dashboards.	[S7, S10, S12]
Control	Compliance approval of promotions; due diligence on distributors ("Know Your Distributor") in Luxembourg; suitability oversight.	[S11, S12, S401]

1.4 How work moves through the function

Intern touchpoints: competitor screens, pitch-book updates, DDQ chasing, meeting notes into Salesforce, event logistics

Figure 2. The role's value chain, from client need to outcome, using the JD's three pillars [S263]. The LTAF example is modelled on the Mercer mandate [S71]; the sequence is the author's **Inferred**.

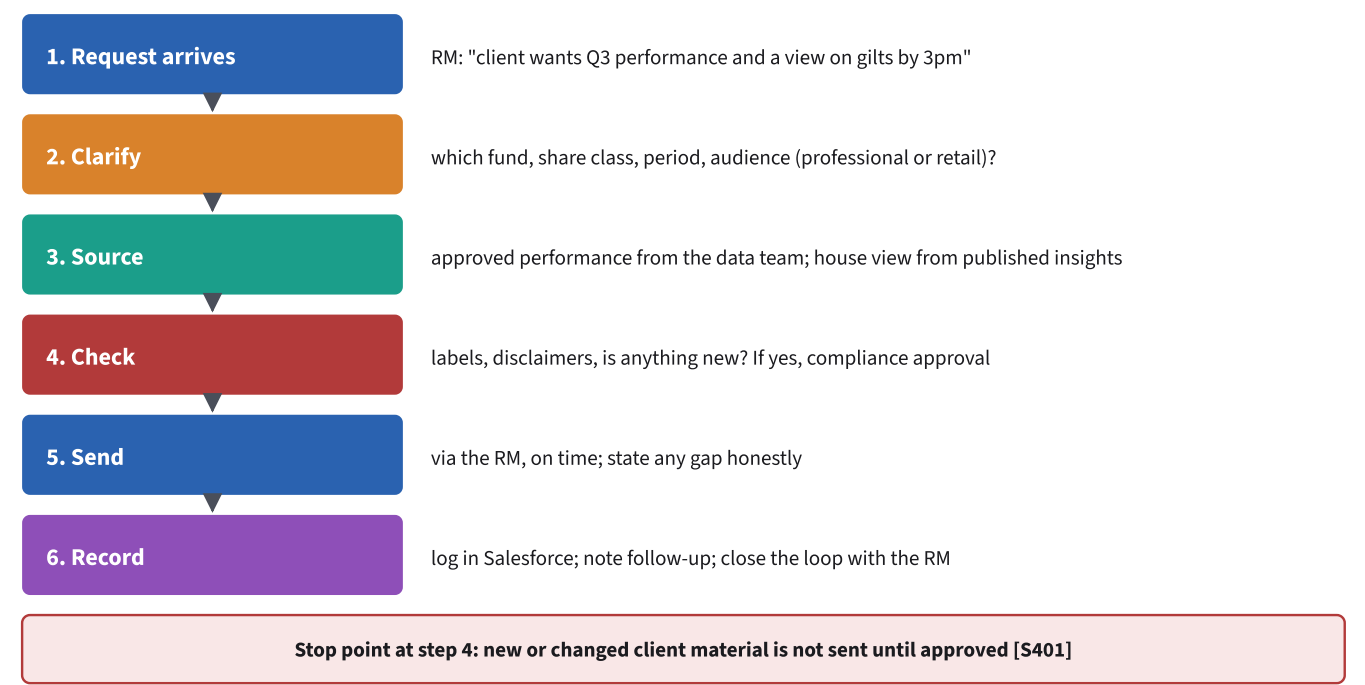

Figure 3. The life of a request through Client Group, from an RM's ask to a logged outcome. Built from the Zurich and Madrid postings [S7, S8] and COBS 4 [S401]; step names are the author's **Inferred**.

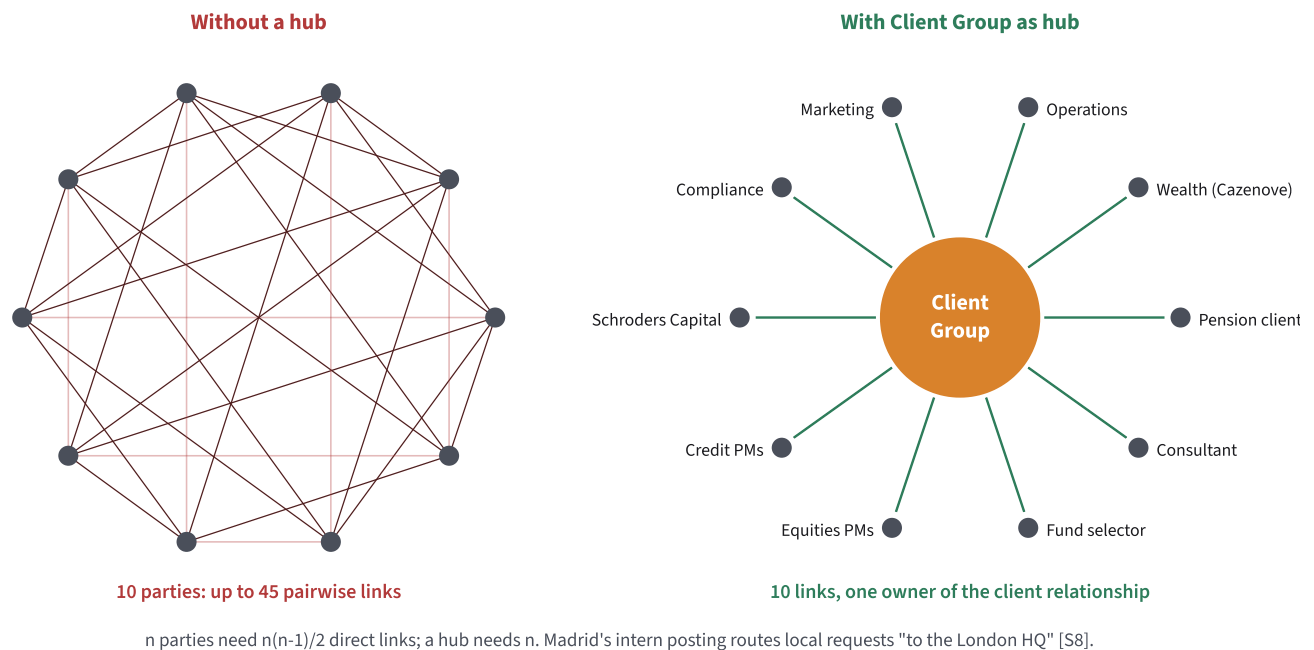

Figure 4. Why a central function exists: the tangle without it and the wheel with it. The arithmetic is standard; the application to Client Group is the author's **Inferred**, supported by Schroders' "fewer core propositions" model [S72].

The hub logic explains a lot about the seat. Ten parties who all talk to each other need up to 45 separate links. Put one team in the middle and they need ten. That is why a Madrid intern routes requests "to the London HQ" [S8], and why interns in London spend so much time routing, checking and recording rather than pitching.

1.5 Internal clients and external counterparties

Inside Schroders

- Relationship managers and client directors (your main internal clients).
- Investment specialists and portfolio managers in the nine leading public markets capabilities [S71].
- Schroders Capital's 40-person specialist business development team for private markets [S71].
- Product Strategy and Product Development [S4].
- Central Global Marketing, the UK marketing hub, Business Development Services (RFPs, DDQs, consultant databases) [S5, S9].
- Client service hubs, operations, the CRM technology team [S72, S10].
- Compliance and Risk, the second line of defence [S72].

Outside Schroders

- Pension trustees and in-house teams; LGPS pools; insurers [S27].
- Investment consultants (Mercer, WTW, Aon, LCP, Hymans Robertson) [S198].
- Fund selectors at wealth managers, discretionary managers, private banks and platforms; IFAs [S25].
- Official institutions: central banks and sovereign funds [S263].
- Distribution partners, such as Söderberg & Partners after the Benchmark sale [S231].
- Event venues, agencies and suppliers (Marketing's agency management) [S5].

1.6 What the team is judged on

- **Net new business.** The headline measure. +£11.2bn in 2025; -£8.3bn in H1 2026 excluding joint ventures [S71, S70].
- **Gross sales.** £69.3bn in H1 2026; intermediary gross inflows up more than 40% year on year [S70].

- **Mix and margin.** The firm itself contrasts "higher-margin intermediary" inflows with a "low-margin institutional" redemption ^[S70].
- **Retention.** Average client duration rose from 4.3 to 4.6 years in 2025 ^[S72].
- **Sales effectiveness.** "Sales effectiveness was a central topic of the Client Group transformation", and the remuneration committee discussed linking performance ratings to pay ^[S72].
- **Engagement.** "client engagements increasing by more than 30% year on year" in 2025 ^[S71].
- **Client experience.** Oomen is "Responsible for client experience" ^[S306]. No specific satisfaction metric was found.

1.7 The compliance dimension

Every piece of paper that leaves Client Group is regulated. Part 6.4 gives the full table. The bright lines for an intern are these:

Bright line	Rule behind it
Never send new or changed client material before it is approved.	Communications must be "fair, clear and not misleading" (COBS 4.2.1R) ^[S401] . UK intermediary material carries the label "for professional clients or advisers only" ^[S27] .
Never guess performance, forecast returns or promise recovery.	COBS 4; Consumer Duty's consumer understanding outcome ^[S401, S161] .
Know whether the audience is professional or retail.	Pension funds and central banks are "per se professional" clients under COBS 3.5.2R; the end clients of a wealth adviser are usually retail ^[S39] .
Keep hospitality modest and recorded.	Acceptable minor benefits include "hospitality of a reasonable de minimis value, such as food and drink during a business meeting" (COBS 2.3A.19R) ^[S40] .
Never repeat, forward or trade on price-sensitive information.	UK MAR: insider dealing and unlawful disclosure ^[S402] . Schroders plc was a listed issuer until 2 October 2026 ^[S75] .
Keep client personal data accurate and inside approved systems.	UK GDPR accuracy and security principles ^[S403] .
Behave to the conduct rules.	SM&CR conduct rules; the FCA's PS26/6 reforms took effect mostly from 24 April 2026 ^[S43] .

SAY THIS UNPROMPTED, ONCE

"In a sales seat I'd expect anything I send a client to be fair, clear and not misleading, approved, and right for the audience, whether professional or retail. If I'm unsure, I'd ask before I send, not after."

1.8 A realistic career path

The graduate programme lasts two years with one global intake a year, usually in mid-September; graduates then take "a permanent role in the team that best suits your skills and interests" ^[S15]. Graduate hiring covers "Client Group (including Sales, Marketing, Product)" ^[S16]. All graduates sit a Level 4 qualification (IMC), and "the majority of our graduates in front office roles (such as ... Client Group) will go on to be supported to study for and sit the CFA qualification (Level 1)" ^[S15]. Past Client Group graduate adverts described rotations across Sales, Client Service, Product and Marketing ^[S52] **Reported**.

Titles in live postings include Sales Support Specialist, Relationship Manager, Client Manager and Client Director ^[S7, S12]. A typical ladder of analyst, associate, then director is common in the industry but is not published by Schroders **Inferred**.

SOURCE UNCERTAIN

No 2027 London Client Group graduate programme was posted on 29 September 2026. Graduate postings found were for Finance, People & Culture, Internal Audit and Wealth Management ^[S12]. The 2028 conversion route in your advert stands, but ask how it works (Part 9).

1.9 The team, mapped

Schroders publishes no Client Group org chart. The chart below is reconstructed from the executive committee page, appointment releases and live job postings. The set of open roles is an org chart in disguise.

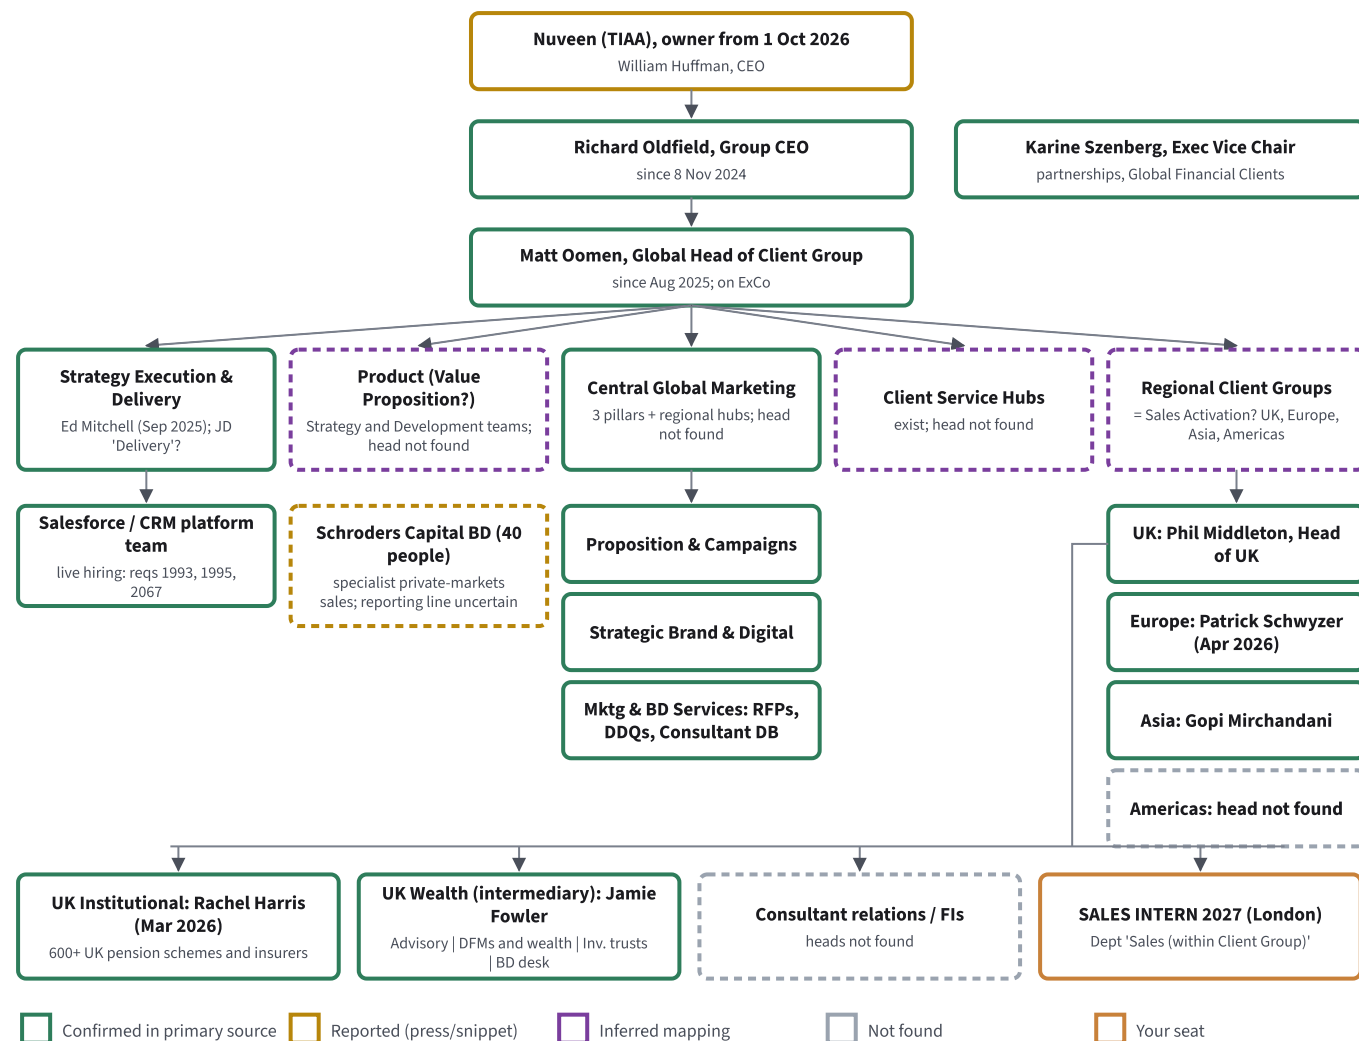

Figure 5. Reconstructed Client Group org chart, colour-coded by confidence. Built from the ExCo page, appointment releases and live job postings ^[S17, S18, S20, S21, S22, S23, S24, S25, S5, S9, S10, S12, S71]. No official org chart is published; mapping of teams to the JD's three pillars is inferred.

Headcount: an estimate, with the method shown

Schroders discloses headcount by segment only: 6,110 average employees in 2025, of whom 4,801 in Asset Management, 1,288 in Wealth and 21 at group level ^[S73]. Client Group is inside Asset Management. Two methods **Inferred**:

- **Ratio.** Distribution, product and marketing are commonly 20 to 30% of an active manager's asset management staff (an industry rule of thumb, not sourced). Applied to 4,300 to 4,800 people gives about 900 to 1,400.
- **Bottom-up.** About 36 locations, most with 5 to 20 client-facing staff (300 to 500), plus hubs in London, New York, Zurich, Singapore, Hong Kong and Luxembourg with 100 to 300 each (600 to 900). Total about 900 to 1,400.

ESTIMATE

Client Group is roughly 1,000 to 1,200 people worldwide (range 900 to 1,400), of whom perhaps 300 to 450 in London. Order of magnitude only **Inferred**.

How the work splits

- **By channel.** Intermediary AUM £157.5bn, net inflows +£3.3bn in H1 2026; Institutional AUM £478.6bn, net outflows £14.1bn ^[S70].
- **By region.** 2025 management fees by client location: UK £974.9m, Continental Europe and Middle East £870.2m, Asia Pacific £557.4m, Americas £343.3m ^[S72].
- **UK sub-channels.** Intermediary splits into Advisory; Discretionary and Wealth Managers; Investment Trusts; and a Business Development Desk ^[S27]. UK Institutional is being repositioned "around long-term strategic partnerships" for "fewer, but far larger, pots of pension capital" ^[S23].
- **Overlays.** Schroders Capital's private markets sales team ^[S71]; strategic partnerships and Global Financial Clients under Karine Szenberg ^[S306]; client service hubs ^[S72].

Where the team sits, and who owns it

Client Group reports to the Group CEO through Matt Oomen, who joined from BNY Investments, where he was global head of distribution ^[S91, S306]. Karine Szenberg, who led Client Group before him, is now Executive Vice Chair ^[S306]. From 1 October 2026 the chain continues up to Nuveen: Richard Oldfield "will report to William Huffman, CEO, Nuveen" ^[S76].

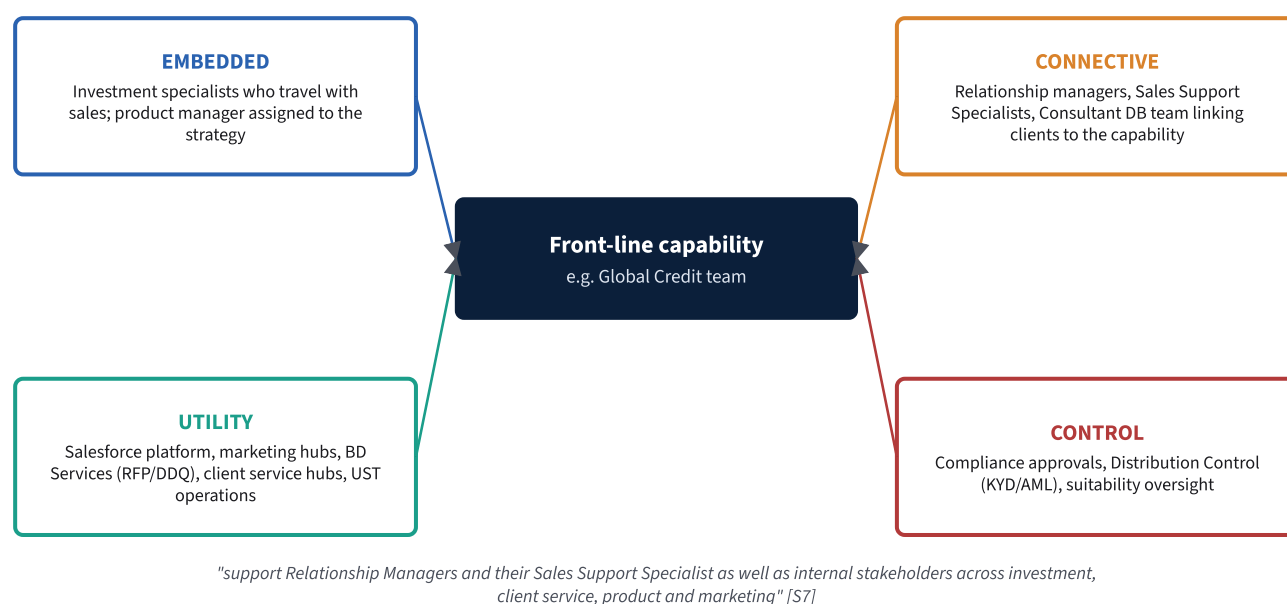

Figure 6. How a front-line unit is wired into the centre: embedded, connective, utility and control roles. Role types from Schroders postings ^[S4, S7, S9, S10, S11]; the four-way classification is the author's **Inferred**.

Sales and client coverage (6)

London	Sales Intern 2027 (req 1943)
Zurich	Sales Activation intern (2049)
Madrid	Sales Support intern (2046)
Hong Kong	Client Director, Wealth
Taipei	Client Manager
Cape Town	Senior BD Manager

Product and marketing (5)

London	Product Intern 2027 (1952)

----------	----------------------------

Named postings read on 29 Sep 2026 (a sample). Oracle search counts that day: 42 results for "client group", 17 "sales", 63 "client service" (overlapping). n/c = city not captured.

Figure 7. What Schroders is hiring for around Client Group, by department and city. Source: Schroders' Oracle recruiting site and Voyse early-careers board, 29 Sep 2026 [\[S1, S2, S4, S5, S7, S8, S9, S10, S11, S12\]](#) **Confirmed**.

Are your interviewers on this team?

Schroders says assessors are trained and use "an assessment skills framework" [\[S262\]](#). Candidate reports describe an interview with someone from early careers plus a manager from the business area; one says "two members of the team you have applied for" [\[S49, S288\]](#) **Reported**. Expect at least one practitioner from UK Client Group at the assessment centre. Part 10 covers the people.

Benchmark against peers

Firm	How distribution is organised
Schroders	One Client Group under a Global Head reporting to the CEO, with regional heads; product and marketing inside it [S306, S129] .
BlackRock	A 2.5-year Client and Product graduate rotation across "Client Business and Global Product Solutions" [S47] .
M&G, Jupiter, Amundi	Report and organise by channel: institutional versus wholesale or retail [S131, S134, S130] .
Janus Henderson	A "Global Distribution" function; also runs Client Group internships [S138, S48] Reported .
aberddeen	Organised by business line: Investments, Adviser platform, interactive investor [S132] .

PART 2

The firm as a business, from the inside

Where Schroders came from, how money moves through it, what each party gives and gets, how risk is controlled, what the strategy is, and what changed this week.

2.1 The founding insight

The history starts in 1804, "when JH Schröder became a partner in J.F. Schröder & Co, a London-based firm founded by his brother JF Schröder" ^[S72]. J. Henry Schröder & Co was set up in London in 1818 ^[S81] **Reported**. For most of the next two centuries Schroders was a merchant bank: it financed trade and "became one of London's leading merchant banks, arranging bonds for transformative infrastructure", including an 1870 bond for Japan's first railway ^[S80].

Asset management grew out of that banking business. Schroders launched its first investment trust in 1924, set up an Investment Department in 1926 and won its first UK pension fund mandate in 1947. It listed on the London Stock Exchange in 1959, "oversubscribed eighteen times" ^[S80].

The decisive pivot came in 2000. Schroders sold its investment banking arm to Citigroup for about £1.35bn (US\$2.2bn), with around 3,000 staff moving to Citi ^[S81, S82] **Reported**. Schroders' own history page says the sale was to focus on "asset and wealth management" ^[S80]. It then built out by acquisition:

- **2005.** Joint venture with Bank of Communications in China ^[S80].
- **2013.** Cazenove Capital, for about £424m ^[S81] **Reported**.
- **2019.** A majority stake in BlueOrchard ^[S80].
- **2022.** River & Mercantile's UK solutions business, which became Schroders Solutions (enterprise value £230m) ^[S106] **Reported**.
- **Announced December 2021.** 75% of Greencoat Capital, for an initial £358m ^[S105] **Reported**.

WHY THE HISTORY MATTERS FOR A SALES ROLE

A merchant bank lives on relationships and reputation over decades. That DNA survives in the client model. The annual report notes 13 agreements with 12 institutional clients that are more than 25 years old, and one wealth family "served for over 75 years, across four generations" ^[S72] **Inferred**.

In the firm's own words today ^[S72]:

- Purpose: "Creating prosperity together."
- Vision: "We partner with our clients to provide trusted advice and invest in the assets and markets that matter to them, building their future prosperity through delivering excellent investment outcomes."
- Values: "We strive for excellence. We promote innovation and teamwork. We have passion and integrity."

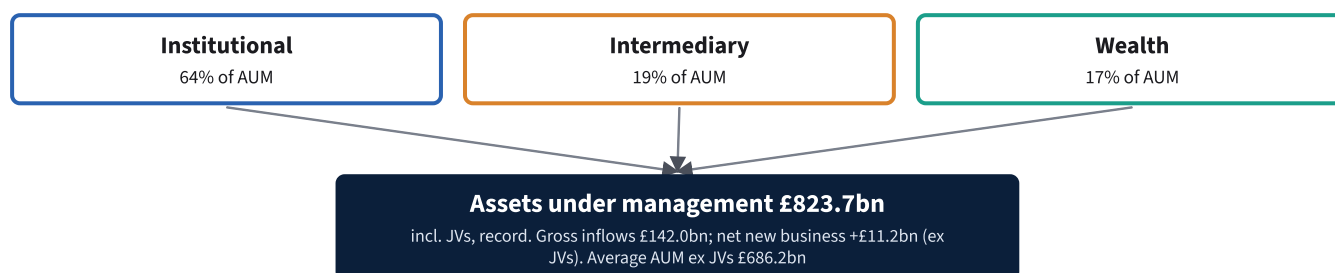

The brand campaign since 2025 is "Active Edge" ^[S71]. The JD's older line, "excellent investment performance to clients through active management", is still on the advert ^[S263].

2.2 How the firm makes money

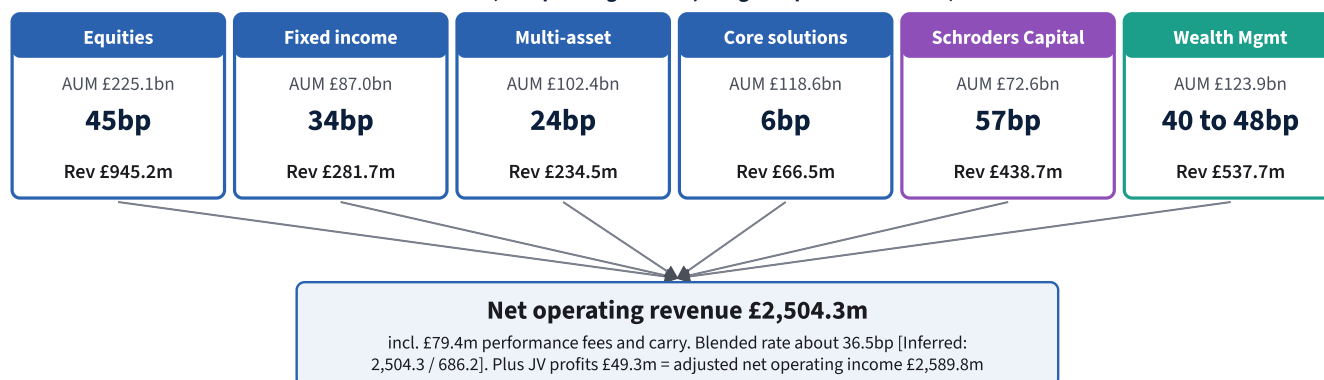

In its own words: "We generate revenue by charging fees as a percentage of the assets we manage, and for the use of our platform or advisory services, where relevant. We also sometimes earn performance-based revenues, transaction fees and returns on seed and co-investments" ^[S72]. The next page traces every pound for 2025.

FY2025, year to 31 December 2025. All figures adjusted unless marked. Source: Schroders annual results 2025 [S71] and AR 2025 [S72].

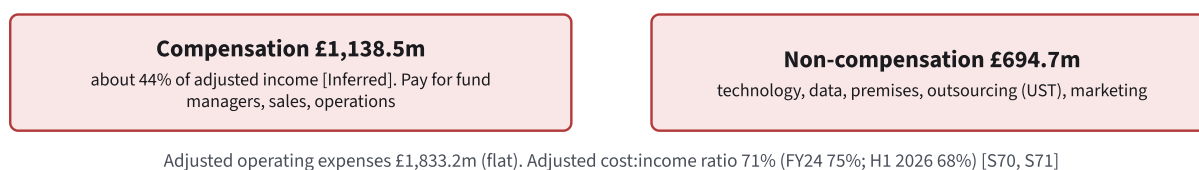

1 CLIENTS HAND OVER CAPITAL

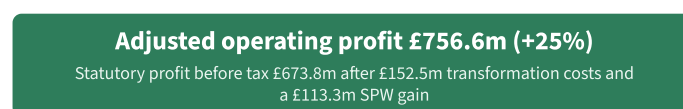

2 EACH BUSINESS CHARGES A FEE RATE ON ITS ASSETS (net operating revenue, margin ex performance fees)

3 COSTS COME OUT FIRST

4 WHAT IS LEFT

5 WHERE PROFIT GOES

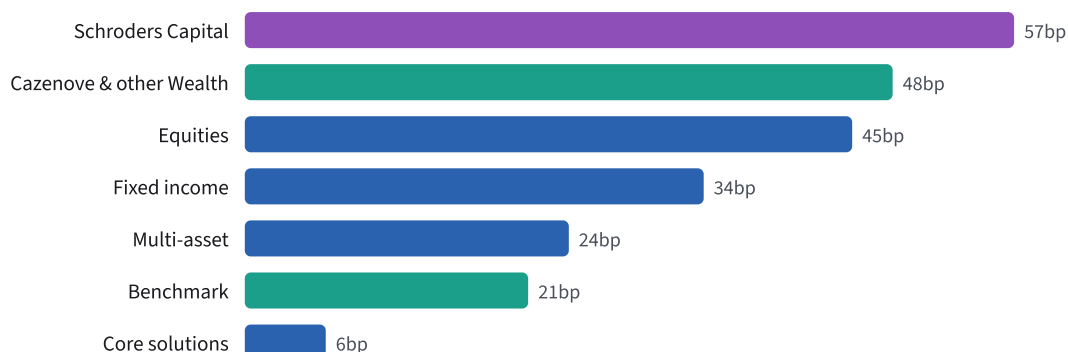

From 1 Oct 2026 the shareholder layer changes: Nuveen (TIAA) owns 100% after paying 590p cash plus up to 22p of dividends per share, about £9.9bn [S75, S76]. The family receives roughly £4.2bn to £4.4bn [Inferred] [S77].

Figure 8. How money flows through Schroders, from client capital to dividends. Revenue by business sums to the group net operating revenue. Colours: Public Markets blue, private markets purple, Wealth green (40bp excluding adviser fees; Cazenove 48bp). Estimates are labelled. Sources: FY25 results [S71], AR 2025 [S72], H1 2026 [S70], deal documents [S75, S76, S77].

What the money flow shows.

1. Clients hand over £823.7bn ^[S71].
2. Each business charges a different rate on its assets. The rates range from 6bp for core solutions to 57bp for Schroders Capital ^[S71].
3. That produced net operating revenue of £2,504.3m ^[S71].
4. Pay is the largest single cost: £1,138.5m, or about 44% of adjusted income ^[S71] **Inferred**.
5. Adjusted operating profit was £756.6m ^[S71].
6. Dividends of £335.8m were paid in 2025, about 44% of them to the Schroder family group ^[S73, S72] **Inferred**.

Revenue from £1bn of new money: Schroders Capital ≈ £5.7m a year; core solutions ≈ £0.6m ^[Inferred].

Source: Schroders annual results 2025, net operating revenue margins excluding performance fees ^[S71].

Figure 9. Why the mix matters: fee margins by business, FY2025, in basis points **Confirmed**. This is the economic logic behind reinvesting in private markets and wealth ^[S71].

The latest half year (to 30 June 2026)

By business in H1 2026 ^[S70]:

- **Public Markets:** net outflows of £11.7bn. Equities lost £8.7bn and core solutions £7.5bn, while fixed income gained £1.9bn and multi-asset £2.6bn.
- **Schroders Capital:** raised £5.5bn, with £3.3bn in the second quarter, its best quarter in more than three years.
- **Wealth:** took in net £2.5bn. Cazenove Capital grew at an annualised 5%.

Target below 70% met within 18 months. Sources: FY25 results [S71]; H1 2026 results [S70]; H1 25 comparative from [S70].

Figure 10. Revenue stability: flows swing year to year while the cost base has been cut. Separate panels, not a dual axis **Confirmed**.

2.3 The "contracts": who gives what, who gets what

Party	Gives	Gets
Institutional clients (64% of AUM)	Large mandates, often for many years; for example a £3.3bn PGGM sustainable equity mandate won in 2025 [S72].	Active performance against a comparator; low fees at scale (core solutions 6bp); fiduciary and outsourced CIO services [S71].
Intermediaries (19%)	Shelf space and access to their end clients: platforms, wealth managers, IFAs, fund selectors.	Funds, active ETFs, LTAFs (for example on Hargreaves Lansdown), research and service. Schroders gets higher-margin flows [S70, S72].
Wealth clients (17%)	Family and charity assets, long relationships.	Discretionary management, planning and banking through Cazenove Capital at about 48 to 52bp [S71].
Staff and fund managers	Skill and track record.	Pay (about 44% of income Inferred); deferred awards in Schroders shares; under the deal Nuveen funds at least £175m of retention awards [S70, S304].
JV partners (Bank of Communications, Axis, Nippon Life, Phoenix)	Local distribution.	Schroders' investment capability; Schroders books a share of profit (£49.3m in 2025) [S71].
Family (until 1 Oct 2026)	Patient capital; board representation. The Principal Shareholder Group held 44.27% [S72].	About £149m a year in dividends Inferred ; about £4.2bn to £4.4bn in cash from the sale Inferred [S77].
Nuveen (from 1 Oct 2026)	£9.9bn in cash; US distribution; private markets scale [S76].	A London platform with a trusted brand, European and Asian clients, and wealth management [S76].

2.4 The risk and control architecture

Asset managers do not risk their own balance sheet the way banks do. The main risks are to clients' money, to reputation and to revenue. Schroders' structure, from the 2025 annual report [S72]:

- **The Board** has "ultimate accountability for identifying, managing and monitoring the firm's principal risks". A combined Audit and Risk Committee reviews a quarterly risk dashboard.

- **The Chief Risk Officer** chairs the Group Risk Committee, which meets five times a year. Its sub-committees cover conflicts, financial crime and information security.
- **Three lines of defence.** The first line is the business, including Client Group. The second line was narrowed in 2025 to Risk and Compliance only. The third line is Internal Audit.
- **Principal risks for 2025.**
 - Business model disruption
 - Financial risk
 - Information security and technology
 - Investment performance
 - Operational process
 - People and conduct
 - Regulatory (including financial crime)
 - Sustainability
 - Third-party risk: new in 2025 "as a result of our increased use of outsourcing"
 - Transformation risk
- **Liquidity rules for private-market funds.** The liquidity risk framework was updated for open-ended private-market vehicles such as evergreen funds and LTAFs.

KEY TERM: THREE LINES OF DEFENCE

A control model. The first line owns and manages risk day to day: the people doing the work, including you. The second line sets rules and checks them: Risk and Compliance. The third line independently audits both: Internal Audit.

Why this produces the firm's characteristic result. An active manager's product is trust over many years. The controls that matter most to Client Group are the ones that protect that trust: approvals for anything a client sees, conflicts management, and the liquidity rules that stop a fund promising more access than its assets allow Inferred.

2.5 The operating model and the strategy

Figure 11. Schroders' operating model as five layers, and what flows between them (blue down, orange up). Layer names follow the firm's own wording in the annual report and ExCo page [S72, S306], the arrows are the author's reading **Inferred**.

Richard Oldfield, a former PwC partner who joined as CFO in October 2023, became Group CEO on 8 November 2024 [S306, S90]. His plan, set out on 6 March 2025 as "simplify, scale and deliver", set these targets [S86, S87]:

- £150m of annualised net cost savings by the end of 2027, with about £200m of costs to achieve them **Reported**.
- An adjusted cost:income ratio below 70%.
- £20bn of cumulative net new business for Schroders Capital over three years.
- Wealth Management net new business of 5 to 7% a year.
- Public Markets focused on nine "leading capabilities" [S71]. The 23-person management committee was replaced by a nine-member executive committee [S301].

Delivery so far. More than 98% of the £150m savings had been delivered by H1 2026, and cost:income was 68% [S70]. The headcount measure fell 10% in 2025 [S72]. Technology and operations were outsourced further to UST [S71].

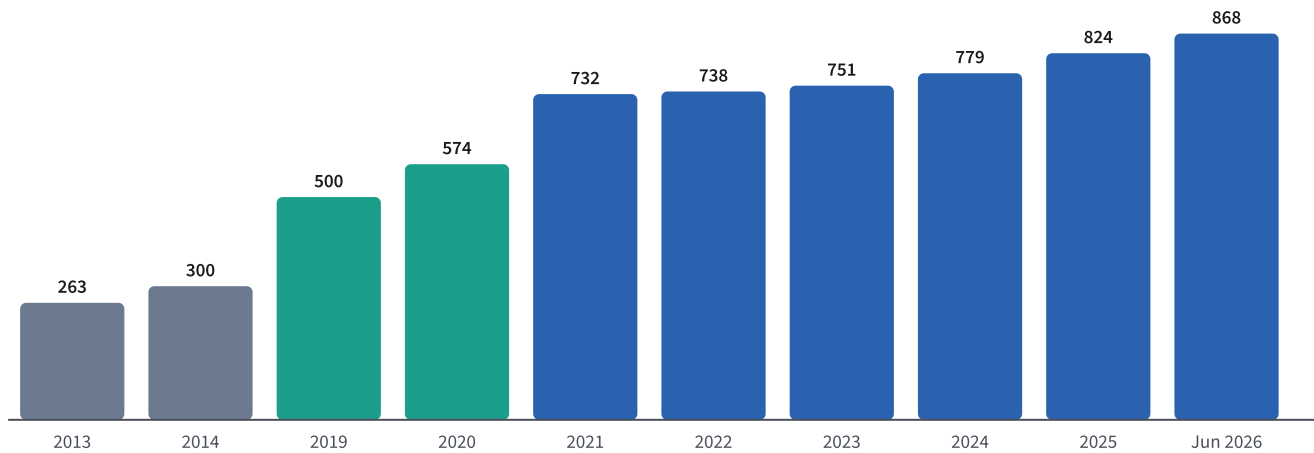

What was sold or closed.

- The 49.9% stake in Schroders Personal Wealth was swapped with Lloyds for full ownership of Cazenove Capital (9 October 2025) [S94].
- Benchmark was sold to Söderberg & Partners for about £215m (agreed 4 July 2026) [S70, S231].
- The businesses in Brazil and Indonesia were exited [S70].

What was added.

- European active ETFs, which reached \$4.3bn by 21 September 2026 [S230].
- A bespoke LTAF for Mercer (December 2025) [S71].
- A partnership with Apollo (9 February 2026) [S96].
- New Client Group leaders [S91, S93].

AUM, £bn, year end (bars change colour where the reporting basis changes)

Grey: group AUM (2013-14) [S100]. Green: excluding JVs (2019-20) [S98, snippet]. Blue: including JVs (2021 on) [S99, S101, S71, S70]. 2015 to 2018 not verified, so not shown.

Employees (different bases, not a continuous series)

Sources: [S99] 2021-22; [S73] 2024-25 monthly averages; [S108] website figure, basis unstated. The internship advert says around 5,500 people in 36 locations [S263].

Figure 12. Schroders' growth: assets more than tripled from 2013 to mid-2026 while headcount has recently fallen. Bases differ and are colour-coded **Confirmed** except where marked.

2.6 Public or private, and what that means

Schroders plc was a FTSE 100 company until the takeover. FTSE Russell confirmed it leaves the index from the start of trading on 1 October 2026 **[S85]** **Reported**. The half-year results of 30 July 2026 are very likely its last as a listed company **Inferred**. From here, public information will come from Nuveen and TIAA reporting, Companies House filings for UK subsidiaries such as Schroder Investment Management Limited, and fund documents **Inferred**.

DON'T SAY THIS

"Schroders' share price", "FTSE 100 constituent", "family-controlled" or "the UK's largest listed asset manager", in the present tense, after 1 October 2026.

2.7 Leadership's view of the future, and what hiring says

Oldfield in July 2026: "we are excited about the future potential of the combined business" **[S70]**. In February: "With a simpler, more scalable operating platform in place, our focus now is to embed the changes we have made and reinvest selectively to accelerate growth, particularly in Wealth Management and Schroders Capital" **[S71]**. The 2025 outlook: "clients need active management most" **[S71]**.

What the hiring pattern says **Inferred**:

- Senior hires are concentrated in client-facing roles:
 - Oomen, Global Head of Client Group (2025) **[S91]**
 - Schwyzer, Europe (April 2026) **[S21]**
 - Harris, UK Institutional (March 2026) **[S22]**
 - Mitchell, Strategy Execution and Delivery (September 2025) **[S20]**

- a new Head of ETFs [\[S230\]](#)
- Schroders Capital's business development team [\[S71\]](#)
- Back and middle office work is being outsourced.
- Cazenove "significantly increased its graduate intake for 2026" [\[S70\]](#).

Read together, the money is going into distribution and wealth.

2.8 What changed this week: the Nuveen deal

Figure 13. The Nuveen deal timeline and where the internship falls. Dates from the court sanction RNS and deal announcements [\[S75, S76, S77, S309\]](#). The standalone period and employment intention are stated intentions, not guarantees.

- **Terms.** 590p cash plus up to 22p of permitted dividends, about £9.9bn and a premium of about 34% to the undisturbed price [\[S223, S76\]](#).
- **Support.** The family's trustee companies, holding about 41%, backed it. More than 99% of votes were in favour [\[S76, S77\]](#).
- **Rationale.** "one of the world's largest global active asset managers with a scaled public-to-private investment platform and approximately \$2.5 trillion of assets under management" [\[S70\]](#).
- **What stays.** "The Schroders brand will be retained, and London will serve as the Combined Group's non-US headquarters and largest office" [\[S71\]](#). There will be "more than 3,100 professionals" in London [\[S76\]](#).
- **People.** "For a period of two years following the Effective Date, Nuveen and Bidco do not intend to make any material reductions in the employee base of Schroders, other than reductions arising from the removal of listed company-focused roles" [\[S309\]](#).
- **Governance.** Matthew Westerman replaces Dame Elizabeth Corley as chair, and Nuveen executives join the board [\[S228\]](#).
- **Dissent.** JO Hambro, a top-25 shareholder, said the price was "10 to 15% below fair value" [\[S223\]](#) **Reported**.

YOUR OPINION GOES HERE

Was selling right? For: "In a competitive landscape where scale can help deliver benefits, in Nuveen we see a partner that shares our values" (Oldfield) [\[S76\]](#). Scale matters when margins fall and technology costs rise [\[S150, S154\]](#). Against: the premium partly reflected five weak years for the shares [\[S125\]](#), and independence is gone. Model view: "The family chose scale over independence. For Client Group that means a much bigger shelf to sell, provided integration after the first year doesn't distract from clients."

2.9 Recent moves, date-stamped

Date	Event	Source
26 Sep 2024	Meagen Burnett named CFO; Johanna Kyrklund, Group CIO, joins the board	[S90]
8 Nov 2024	Richard Oldfield becomes Group CEO	[S306]
16 Jan 2025	About 200 roles (roughly 3%) cut; executive committee more than halved	[S88, S89] Reported
6 Mar 2025	Strategy update: £150m savings, cost:income below 70%, nine leading capabilities	[S86, S301]
2 Jun 2025	Oliver Gregson (ex-JP Morgan Private Bank) named CEO, Wealth Management	[S92]
16 Jun 2025	Matt Oomen named Global Head of Client Group; joins August	[S91, S72]
Sep 2025	First European active UCITS ETFs; Ed Mitchell appointed to new Delivery role	[S97, S20]
9 Oct 2025	SPW stake swapped for full ownership of Cazenove Capital	[S94]
Dec 2025	Mercer UK DC mandate with a bespoke LTAF	[S71]
9 Feb 2026	Strategic partnership with Apollo	[S96]
12 Feb 2026	FY25 results; recommended £9.9bn Nuveen offer	[S71, S76]
Mar to Apr 2026	Rachel Harris heads UK Institutional; Patrick Schwyzer heads Client Group Europe; shareholders approve deal	[S22, S21, S77]
4 Jul 2026	Benchmark sale to Söderberg & Partners agreed	[S70, S231]
30 Jul 2026	H1 results: record AUM, profit +46%, net outflows £8.3bn	[S70]
22 Sep 2026	All regulatory approvals; board changes announced	[S228, S77]
29 Sep 2026	Court sanctions the scheme; two fixed income active ETFs listed	[S75, S230]
1 and 2 Oct 2026	Deal effective; shares delisted	[S75]

2.10 The skeletons, told straight

- **Hong Kong, 2016.** The Securities and Futures Commission fined Schroder Investment Management (Hong Kong) HK\$1.8m for failing to disclose notifiable interests between 2005 and 2013. Schroders self-reported and was credited for cooperating [S102] **Reported**.
- **Insider dealing by an employee.** A former Schroders equities trader, Damian Clarke, was jailed for two years for insider dealing between 2003 and 2012 [S103]. This was individual misconduct, prosecuted by the FCA.
- **1863.** Schroders issued £3m of bonds for the Confederacy in the US Civil War [S81] **Reported**.
- **Performance, not misconduct.** The shares fell 25% in 2024, a third straight annual fall [S87]. Net outflows were £10.8bn in 2024 and £8.3bn in H1 2026 [S71, S70]. Wealth net new business was 2.7% in 2025 against a 5 to 7% target, "below our expectations" [S71].
- **Job cuts.** About 200 roles in January 2025, and headcount down 10% over 2025 [S88, S72].
- **Head office.** An unexpected £20m charge in 2025 for remedial building works at 1 London Wall Place [S71].
- **Not found.** No SEC settlement and no FCA fine specific to Schroders Personal Wealth turned up in searches. That is absence of evidence, not proof [S71].

IF ASKED ABOUT A WEAKNESS AT SCHRODERS

"Flows have been the weak spot. There were outflows in 2024 and again in the first half of this year. But the H1 outflow was mostly one £6.6bn low-margin mandate, and intermediary gross sales were up more than 40%. So the question for Client Group is keeping institutional clients through the ownership change while growing the higher-margin channels."

PART 3

Why Schroders is built this way

The mechanism behind the structure: why one central Client Group, how teams actually work together, what clients are really buying, and how big and how wired the centre is.

3.1 Why the business is structured this way

Schroders runs three businesses: Public Markets (£533.1bn at end-2025), Schroders Capital, its private markets arm (£72.6bn), and Wealth Management (£123.9bn). Joint ventures add £94.1bn ^[S71]. A single Client Group sells across them, and a corporate centre (technology, operations, finance, risk and compliance, people, legal, audit, tax) supports all three ^[S72].

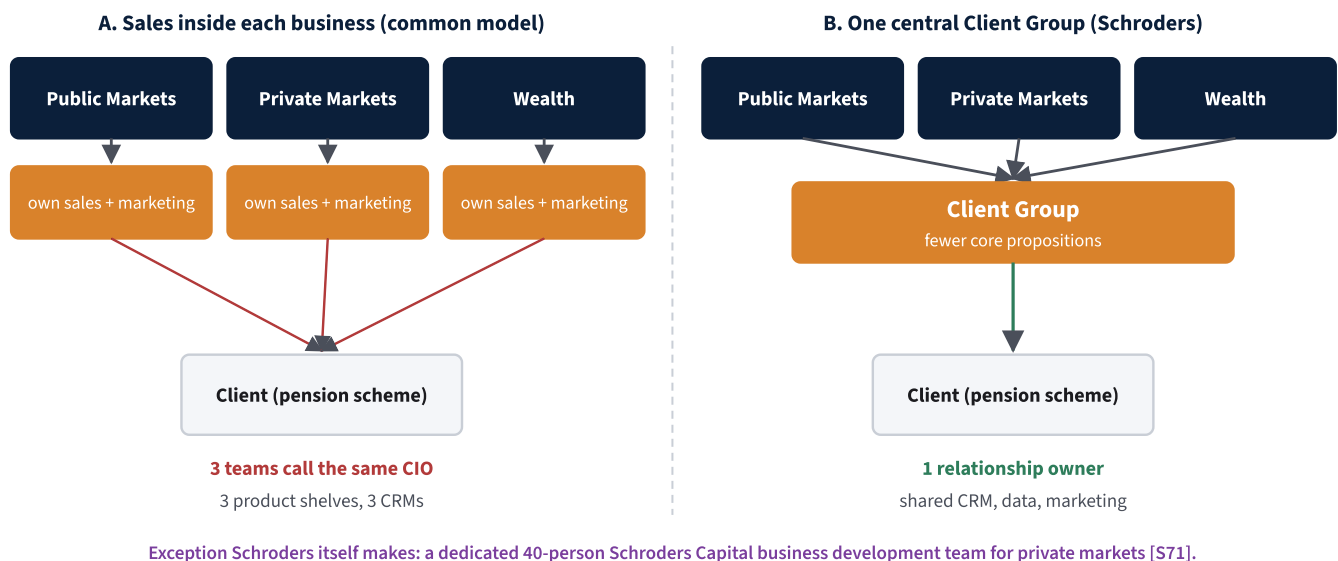

Figure 14. Two ways to organise selling. Schroders chose a central Client Group and in 2025 refocused it on "fewer core propositions" ^[S72]. The contrast is the author's illustration ^{Inferred}.

The theory: five reasons for one central Client Group

This argument is the author's reading of the firm's own words ^{Inferred}. It is not stated in one place.

- 1. Concentrate support on a few propositions.** The nine "leading capabilities" produce more than 85% of Public Markets revenue ^[S301]. More than 16% of the fund range is being merged or closed ^[S71]. A central team can decide where marketing money and sales time go. Sales teams inside each business would each push their own long tail. The JD calls this area Value Proposition.
- 2. One client, many capabilities.** "By sharing insights and expertise across public and private market capabilities globally, we are able to deliver bespoke solutions" ^[S72]. A pension scheme may want fiduciary management, private credit and global equities at once. One relationship owner stops three business lines calling the same chief investment officer. The Mercer LTAF and the Apollo partnership are cross-capability products ^[S71, S96].
- 3. Global centre, local execution.** "We engage with clients through specialist teams based in regional hubs around the world ... delivering dedicated support through Client Service Hubs" ^[S72]. The centre designs; the regions sell. The JD calls this Sales Activation.

4. **Scale in the plumbing.** The CRM, data and marketing technology are shared. The sales enablement team sits "in a virtual network with Distribution & Marketing, Technology, Finance, Product Management" and drives "consistent adoption of CRM (Salesforce) across Distribution teams" ^[S317]. The JD calls this Delivery.
5. **Cost.** The 2025 strategy named "focused sales and marketing" and removing "duplication and overlapping processes" as sources of the £150m saving ^[S301]. Adjusted cost:income fell from 75% to 68% ^[S71, S70].

What the structure costs

- **Distance from complex products.** Schroders made an exception for private markets. It built a dedicated Schroders Capital team of "40 sales specialists" ^[S71]. That concedes a generalist salesforce is not enough for complex products. Whether that team reports into Client Group is not confirmed.
- **Wealth runs its own client model.** Cazenove's advisers own their client relationships ^[S72] **Inferred**.
- **Disruption.** Job cuts, market exits and fund closures mean some clients lose products and some staff lose roles ^[S88, S71].
- **A single point of failure.** If the centre picks the wrong propositions, every region sells the wrong thing **Inferred**.

Why combine asset management, private markets and wealth

The margin table in Part 2 is the answer in numbers. Private markets earn about 57bp and Cazenove about 48bp, against 6bp in core solutions ^[S71]. Wealth adjusted operating profit grew at a compound 15% a year for three years to £198.3m ^[S71]. Schroders Capital's strategy is to "enhance access to the Wealth segment" with evergreen and semi-liquid funds ^[S301]. So wealth gives stable, high-margin revenue and a captive route to market for private assets, while public markets gives scale **Inferred**.

HONEST CAVEAT

Wealth net new business was 2.7% in 2025, against a 5 to 7% target ^[S71]. Selling Benchmark narrows Wealth to Cazenove in the UK and Schroders Wealth Management internationally ^[S70]. The combination works best at the high-net-worth end, not through adviser platforms.

Figure 15. Anatomy of one front-line investment capability and what it draws from the centre. Functions from the AR 2025 and the Client Group JD ^[S72, S263]; the example capability and the arrows are illustrative **Inferred**.

3.2 How the teams work together, in the firm's own words

Read these precisely. Each phrase tells you something about the seat.

Quote	What it tells you
"Within Client Group we restructured teams and designed a new sales and marketing model where central support is focused on fewer core propositions. The goal is to anticipate clients' requirements and improve our speed to market" [S72]	"Central support" means marketing and product effort is rationed centrally. "Speed to market" means launches and campaigns are measured.
"Simplified the Client Group operating model to enhance accountability for sales and to create capacity to grow in a scalable way" [S72]	Clear ownership of each client and target. Growth without adding headcount in proportion.
"Sales effectiveness was a central topic of the Client Group transformation" [S72]	Salespeople are measured more tightly than before, and pay is linked to ratings.
"working alongside investment teams to create innovative solutions that our clients value" [S263]	Value Proposition co-designs with portfolio managers. It does not just package what they already run.
"support Relationship Managers and their Sales Support Specialist as well as internal stakeholders across investment, client service, product and marketing" [S7]	Collaboration lives in the support layer. The intern is a connector.
"The team sits within the Business Development Services function, partnering with colleagues across the Client Group, as well as Public and Private Markets" [S9]	RFP and consultant data are shared utilities across public and private markets.
"We are taking deliberate steps to embed our teams even more closely with our clients, to collaborate, innovate, co-create" (Oldfield, June 2025) [S307]	"Co-create" points to bespoke mandates, such as the Mercer LTAF.
"Schroders is repositioning its UK institutional business team around long-term strategic partnerships" [S23]	The UK institutional sale is becoming a partnership, not a product push.

Where collaboration actually lives Inferred:

- In three shared tools: the CRM, the RFP library and the approved-content library.
- In the roles that sit between client and investment team: relationship managers, investment specialists and sales support specialists.
- In one routine: the product governance cycle, where Product Development runs value assessments for the fund boards [S4].

SHARED FREELY	SHARED WITH CARE	NEVER SHARED
• Approved fund performance and factsheets • House economic views and published insights • Brand, templates, approved pitch material • CRM activity (who met whom, when) • Product shelf and share-class data	• Client holdings and mandates: need-to-know only • Pipeline and fee negotiations • Unapproved drafts (internal only until signed off) • Wealth clients' personal data (Cazenove) • Nuveen integration plans (as disclosed)	• Inside information about listed companies (UK MAR) • One client's confidential data with another client • Portfolio trades before they happen • Personal data outside approved systems (UK GDPR) • Anything that would mislead a client (COBS 4)

Figure 16. The boundaries around Client Group information: what is shared, what is shared with care, and what never crosses. Rules from UK MAR, UK GDPR and COBS 4 [S402, S403, S401]; the grouping is the author's Inferred.

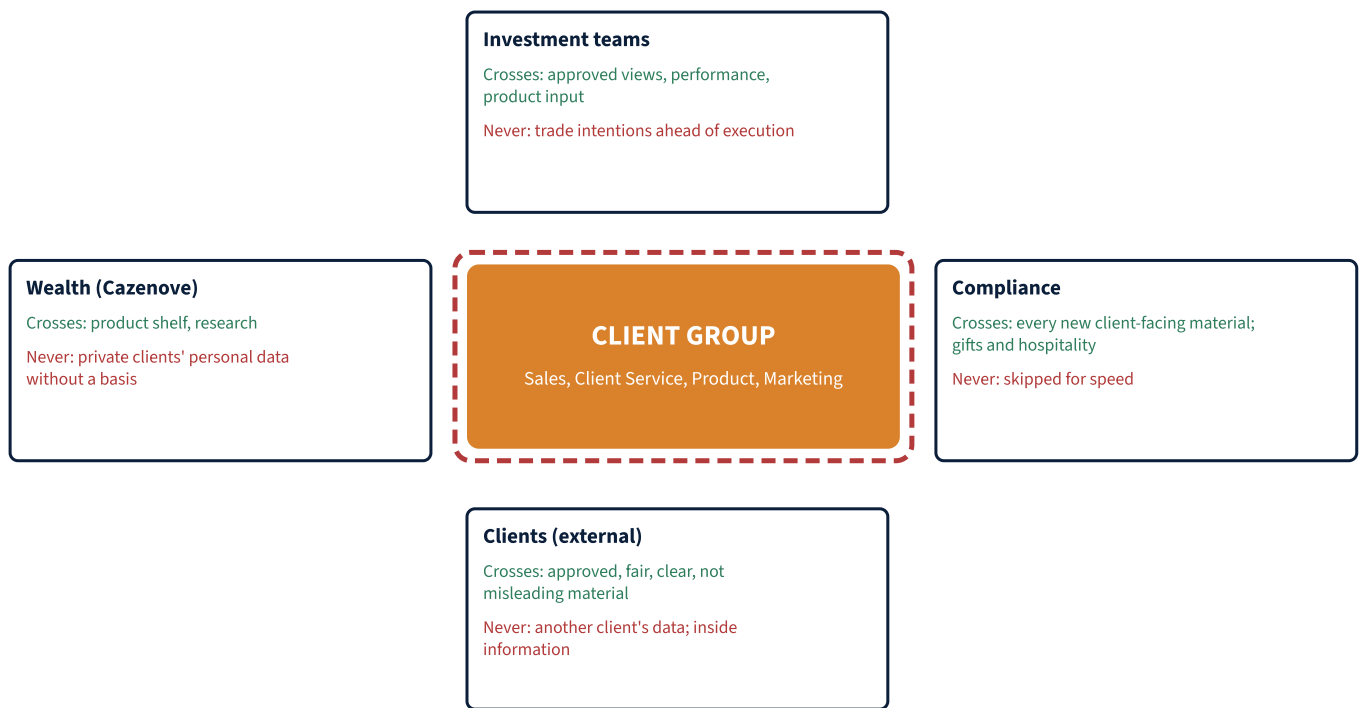

Figure 17. The walls around Client Group and what crosses each (green) or never crosses (red). Rules from COBS 4, COBS 2.3A, UK MAR and UK GDPR [S401, S40, S402, S403]; layout is the author's **Inferred**.

3.3 What clients actually buy

Who they are (end-2025, by AUM) [S72]:

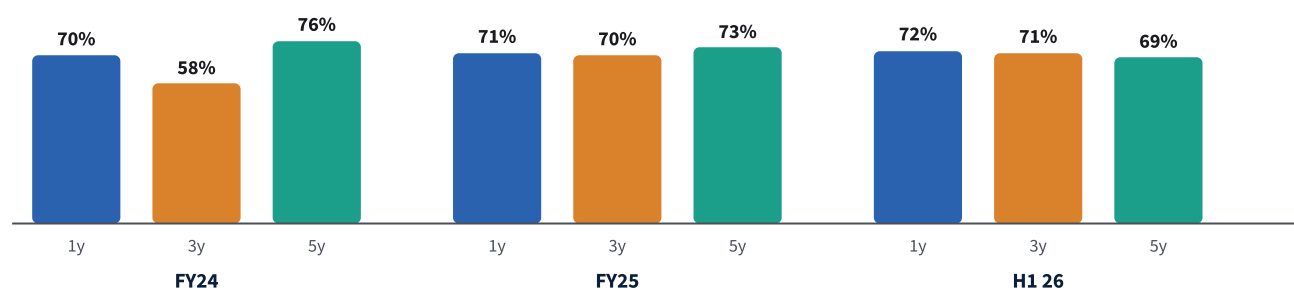

- **By channel:** institutional 64%, intermediary 19%, wealth 17%.
- **By region:** UK 47%, Asia Pacific 25%, Europe, Middle East and Africa 16%, Americas 12%.
- **By asset class:** equities 31%, wealth 17%, core solutions 16%, multi-asset 14%, fixed income 12%, private markets 10%.

What they are buying.

1. **Active returns in chosen areas.** "We are unashamed advocates of the power of active management to address our clients' complex needs" [S301].
2. **Solutions.** Core solutions took £8.1bn of net inflows in 2025, "underpinned by continued success in partnering with pension clients on outsourced CIO and fiduciary management solutions" [S71]. This business was scaled by buying River & Mercantile's solutions arm [S106].
3. **Access to private markets.** Schroders Capital raised £10.9bn in 2025 and £5.5bn in H1 2026 [S71, S70].
4. **Sustainability tools and stewardship.** Proprietary tools such as SustainEx and CONTEXT; £42.9bn in sustainability-focused portfolios; votes at 7,042 companies. The £3.3bn PGGM mandate was won "leveraging our proprietary research platform, including SustainEx" [S72].
5. **Research and insight.** "More than 11,000 company research pieces a year" [S72].
6. **Brand and trust.** Ranked fifth of 2,770 asset managers in NMG Consulting's brand study and the top non-US firm, for seven years running [S72].

Why they accept the fees: Schroders' evidence. 71% of assets beat their comparator over three years at end-2025, up from 58% a year earlier. The figure was 71% at H1 2026 [S71, S70]. Read the method: the figures are internal, mostly before fees, and exclude £86.9bn of assets. Only 70% of the measured assets are compared with a benchmark; the rest are compared with peers, absolute targets or cash [S71].

A. Schroders: share of assets beating their comparator (internal, mostly gross of fees)

Source: FY25 results [S71], H1 2026 [S70]. Excludes £86.9bn of assets; 70% measured vs benchmark, rest vs peers, absolute or cash targets [S71].

B. Industry: share of European active equity funds that survived and beat passive peers (Morningstar)

Source: Morningstar European Active/Passive Barometer via DIY Investor [S319]. Not like-for-like with panel A: different measure, period and universe.

Figure 18. The client's view of the record. Panel A is Schroders' own measure; panel B is the industry base rate a sceptical client will quote. Do not compare the bars directly; use them to hold both sides of the argument.

The counter-case, with numbers.

- Morningstar's European Active/Passive Barometer (2024 data): 29.1% of active equity funds survived and beat passive peers over one year, and 14.2% over ten years. Bond managers did better: 53.5% and 26.0% [\[S319\]](#).
- S&P's SPIVA reportedly found 88% of broad UK equity funds underperformed in 2025 [\[S321\]](#) **Reported**, search summary only.

What follows. Schroders' case is strongest where active has an edge: credit, emerging markets, smaller companies, private markets and solutions. It is weakest in large developed equity markets. That matches the mix the firm is steering towards **Inferred**.

YOUR OPINION GOES HERE

Is active worth paying for? For: dispersion and concentration are high, and a third of a US index tracker is a handful of tech stocks [\[S241\]](#). Schroders' own survey finds institutions adding active to reduce concentration [\[S244\]](#) **Reported**. Against: the ten-year base rate for active equity is poor [\[S319\]](#). Model view: "Active is worth paying for where the index is a poor answer to the client's problem, which is why solutions, credit and private markets matter more to Schroders than a UK large-cap fund."

3.4 The central side: how big, how organised, how wired

Measure	Figure	Source
Average employees 2025 (Asset Management / Wealth / Group)	6,110 (4,801 / 1,288 / 21)	[S73]
Employees in deal documents; London	c.5,700 in 38 locations; London c.3,100	[S309, S76]
Headcount change in 2025	-10%	[S72]
Figure on the internship advert	around 5,500 in 36 locations	[S263]

Measure	Figure	Source
Client Group (estimate)	about 1,000 to 1,200 (range 900 to 1,400)	Inferred , Part 1.9

Against peers, Schroders runs about £150m of assets per employee (estimate), more than wealth-heavy firms and far less than passive giants (Part 4). Part of the gap is the product mix. Active and wealth businesses need more people per pound managed than index funds do **Inferred**.

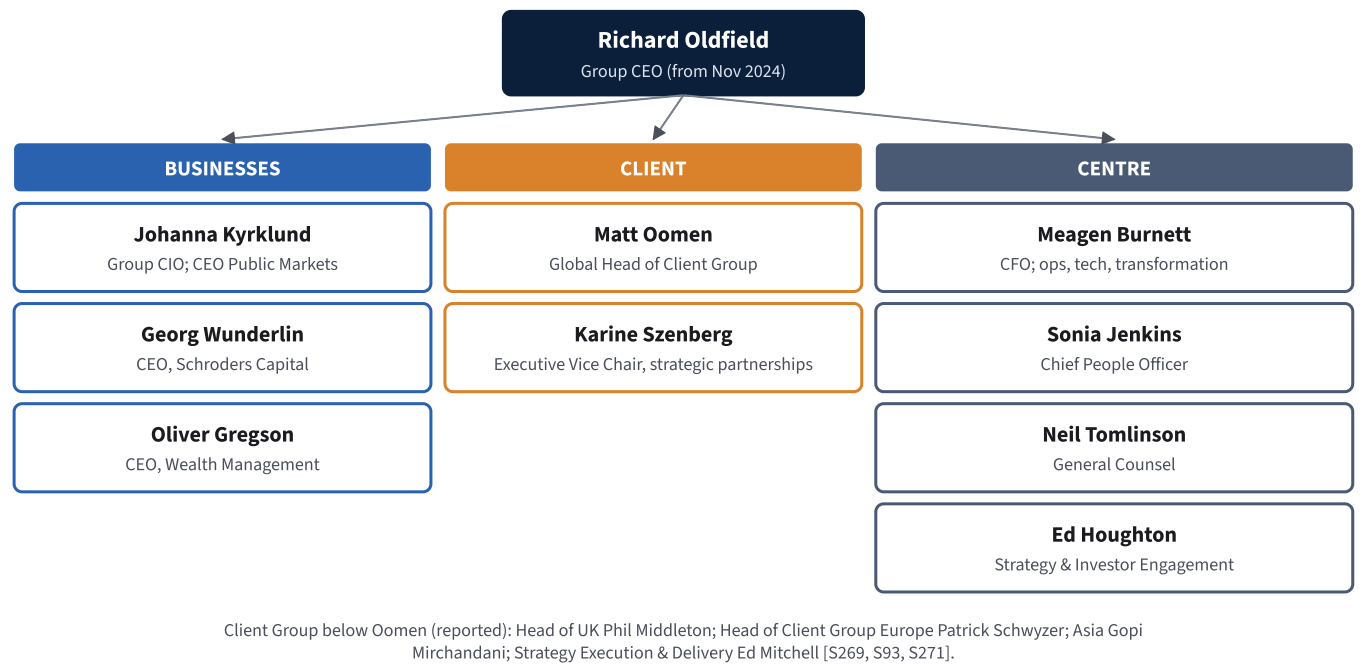

Figure 19. The centre as the firm publishes it: the Group Executive Committee, grouped by the author into businesses, client and centre. Names and titles from the ExCo page as read on 29 Sep 2026 [S306], groupings **Inferred**. Post-completion changes under Nuveen not yet published.

How the centre is wired to the front line. Postings show four kinds of connection:

- **Embedded roles.** Product managers attached to strategies [S4].
- **Connective roles.** Relationship managers, sales support specialists and the consultant database team, "coordinating distribution through the relevant sales representative" [S7, S9].
- **Utility roles.** The Salesforce platform, marketing hubs and Business Development Services [S5, S10].
- **Control roles.** Distribution Control in Luxembourg does "initial and ongoing AML due diligence on intermediary's business partners" [S11].

Part 1.9 has the diagram.

PART 4

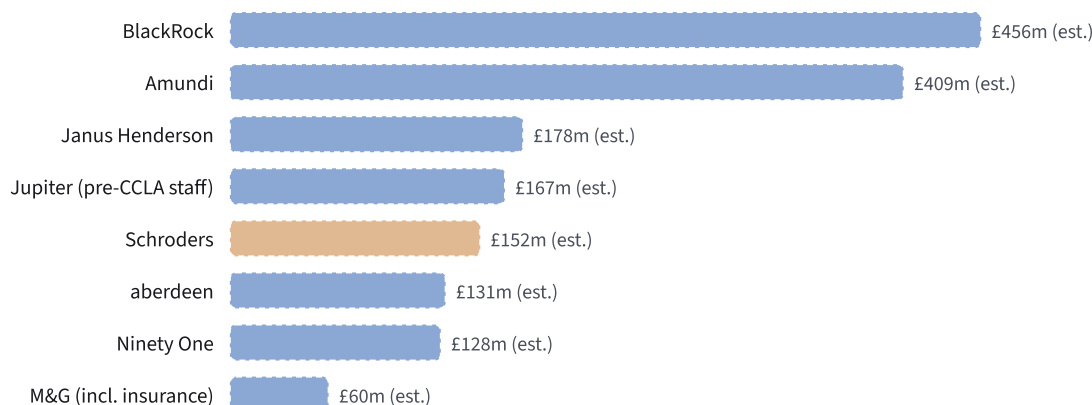

How Schroders stands out, and what only it can claim

Schroders against eight peers, the design choices that separate them, the claims no rival can make, and where Schroders does not lead.

4.1 The peer table

Firm	Ownership (Sep 2026)	AUM (date)	Model	Margin	Staff	Recent flows	Distribution
Schroders (1804)	Listed until 2 Oct 2026; Nuveen/TIAA from 1 Oct ^[S75]	£867.8bn (Jun 26) ^[S70]	Active only; private markets £74.1bn; Wealth £129.8bn ^[S70]	~36.7bp blended (est.) Inferred	6,110 avg 2025 ^[S73]	H1 26 -£8.3bn ex JVs ^[S70]	One Client Group under a Global Head ^[S306]
Amundi	Listed, Paris; Crédit Agricole majority Reported	€2,581bn (Jun 26) ^[S130]	Active plus passive at scale; ETF and index €624bn ^[S130]	n/f	~5,400 ^[S148]	H1 26 +€56.4bn ^[S130]	By client channel ^[S130]
BlackRock	Listed, NYSE	\$15.34trn (Jun 26) ^[S136]	Passive-led (iShares) plus private markets ^[S136]	n/f	~24,900 ^[S137]	H1 26 ~\$321bn ^[S136] Reported	Global client businesses
L&G Asset Management	Part of listed L&G (insurer)	£1.2trn (H1 26) ^[S133]	Index-heavy institutional and DC; private markets £79bn ^[S133]	9.6bp ^[S133]	Group 10,500 ^[S147]	Workplace + £6.2bn ^[S133]	Insurer channels Inferred
aberddeen	Listed, widely held	£579.4bn AUMA (Jun 26) ^[S132]	Active manager plus UK platforms (interactive investor, Adviser) ^[S132]	n/f	4,435 ^[S147]	ii +£6.8bn; Investments - £5.6bn ^[S132]	By business line ^[S132]
M&G	Listed; Dai-ichi ~15% ^[S149]	£387bn AUMA (Jun 26) ^[S131]	Active plus life and annuity balance sheet; private markets £83bn ^[S131]	n/f	6,455 ^[S147]	AM external + £2.2bn ^[S131]	Institutional vs wholesale ^[S131]
Janus Henderson	Private since 30 Jun 2026 (Triam, General Catalyst, QIA) ^[S138]	~\$480bn (Mar 26) ^[S138]	Active, US-heavy	n/f	>2,000 ^[S138]	Not public	Global Distribution Reported
Fidelity International	Private; Johnson family and staff ^[S139]	\$1,086bn (Dec 25) ^[S139]	Active funds, platforms, workplace pensions	n/f	7,600+ (2018, stale) ^[S139]	Not public	n/f
Jupiter	Listed, widely held	£73.7bn incl. CCLA (Jun 26) ^[S134]	Active only, retail-led	~63bp legacy; 42bp CCLA ^[S134]	442 pre-CCLA ^[S147]	H1 26 +£0.7bn ^[S134]	By channel ^[S134]

n/f = not found in sources read. Founding dates and ownership for peers other than Schroders are general knowledge and not verified in this research **Reported**. Figures are in each firm's reporting currency.

AUM per employee, £m. All values are estimates: native AUM converted at an assumed £1 = \$1.35 = €1.17, divided by the latest headcount found. Headcount bases differ (year-end vs average; group vs asset management). Sources: [S147, S137, S148, S120, S130, S131, S132, S134, S136, S138, S140].

Figure 20. Size against staffing: passive-heavy scale players run roughly 2.5 to 3 times the assets per employee of active managers. Schroders sits mid-pack. Estimates, labelled on the chart **Inferred**.

4.2 The design choices that separate firms

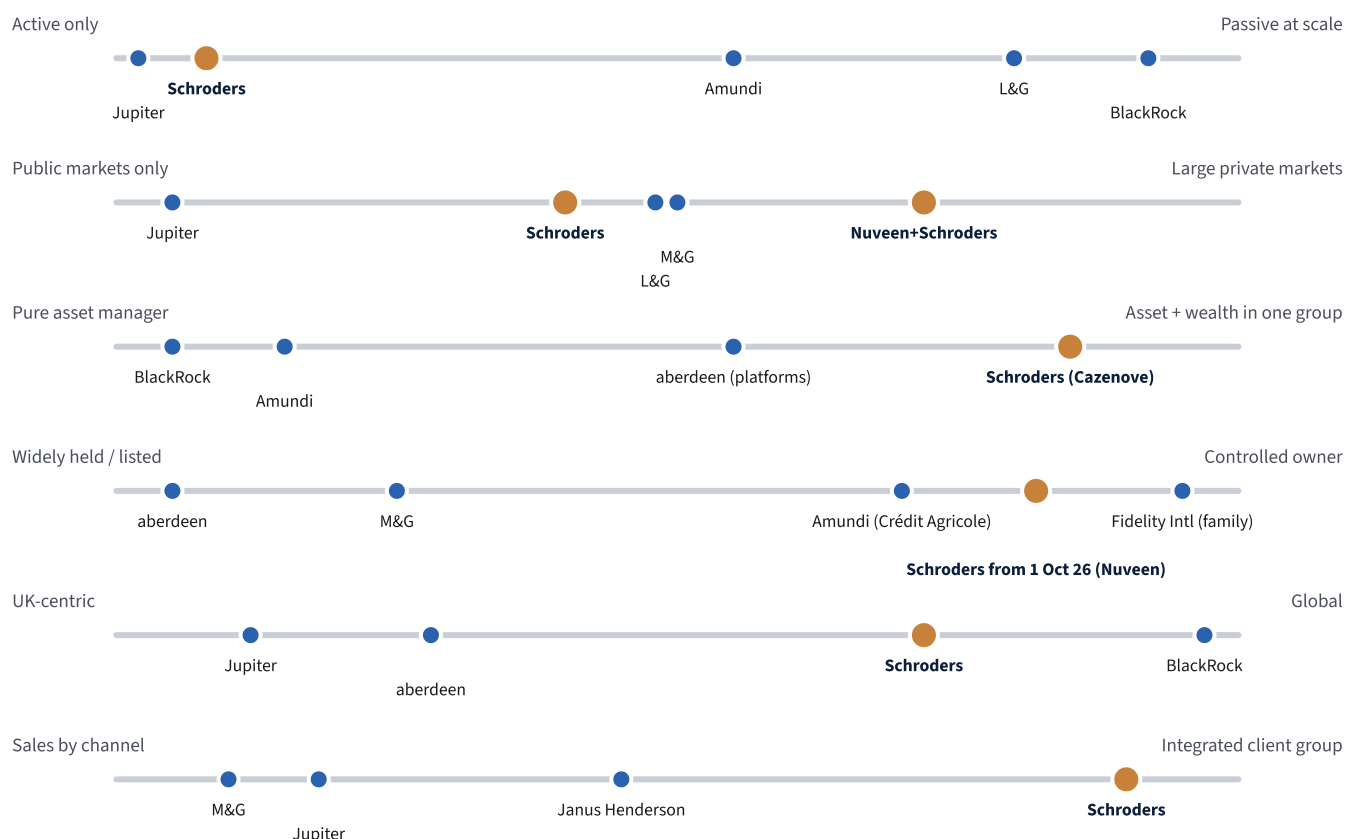

Figure 21. Design choices on which firms sit at different ends. Positions are the author's judgement from the facts in Part 4 **Inferred**; Schroders in orange. Sources for the underlying facts: [S70, S130, S131, S132, S133, S136, S139].

- 1. Active or passive.** Schroders is fully active, pitched as "Active Edge" ^[S71]. Its nearest thing to passive economics is core solutions at 6bp. Its European active ETF range reached \$4.3bn by September 2026 ^[S230]. BlackRock, L&G and Amundi run passive at scale ^[S136, S133, S130].
- 2. Public or private.** Schroders Capital is about 9% of assets but about 17.5% of revenue ^[S71] **Inferred**. It is smaller than M&G's (£83bn) or L&G's (£79bn) private markets books ^[S131, S133]. After the Nuveen deal the combined group has

about \$414bn in private markets ^[S125].

3. **Asset manager plus wealth manager.** Schroders owns a UK private bank and wealth manager, Cazenove Capital. aberdeen owns platforms; M&G and L&G own insurance balance sheets ^[S132, S131, S133].
4. **Owner.** Family-controlled until this week; now owned by a US pension and insurance group. Fidelity International stays family-controlled; Janus Henderson is now owned by private equity and activist investors ^[S139, S138].
5. **Global or UK-centric.** Schroders operates in more than 40 markets, with 53% of assets outside the UK ^[S126, S72]. Jupiter and aberdeen are more UK-centric.
6. **How selling is organised.** One Client Group integrating product, marketing and sales, against channel-based sales at M&G, Jupiter and Amundi ^[S306, S131, S134, S130].

4.3 What only Schroders can say

Claim	Evidence	Why it matters in the interview
1. A 222-year London franchise that is now the international headquarters of a ~\$2.5trn manager.	Founded 1804; London to be "the Combined Group's non-US headquarters and largest office"; brand retained ^[S72, S71] .	It replaces the outdated "family-owned" line with a current, accurate one.
2. One brand spanning global institutional asset management, private markets and a UK private bank.	Cazenove Capital £90.1bn, growing 5% annualised in H1 2026 ^[S70] . None of the main listed UK peers pairs a global institutional manager with a discretionary private bank ^[S120] . Inferred .	It explains why Client Group can sell private assets into wealth, and why it talks to families as well as pension schemes.
3. A unit literally called Client Group that puts product, marketing and sales under one head on the executive committee.	Oomen "leads our client-facing teams across all our regions: Sales, Client Services, Product and Marketing" ^[S306] . Peers generally say "distribution" and organise by channel ^[S129] .	You can describe your own future team's design and why it exists.
4. Published margins for each business line.	Six capability margins plus wealth, disclosed each period ^[S71] .	It lets you talk about revenue per pound sold, which few candidates can.
5. A turnaround on the record.	Cost:income from 75% to 68%, below the 70% target within 18 months; profit up 46% in H1 2026 ^[S70, S71] .	It shows the firm can execute change: useful when discussing the integration.
6. China joint ventures in both fund management and wealth management with Bank of Communications.	JVs added £4.1bn of flows in H1 2026 ^[S120] . Amundi also has large Asian JVs.	It explains why Asia Pacific is 25% of AUM ^[S72] .
7. A founding member of the UK's "Invest for the Future" retail campaign.	Launched 23 April 2026 with 20 founding firms ^[S189] .	It links Schroders to the ISA and targeted support story in Part 6.

CLAIMS THAT EXPIRED THIS WEEK

"Family-controlled since 1804." "FTSE 100 member." "The largest London-listed independent asset manager." All three stop being true between 1 and 2 October 2026 ^[S75, S85].

4.4 Where Schroders does not lead

- **Organic growth.** Net outflows of £8.3bn in H1 2026, against inflows at Amundi (+€56.4bn), BlackRock (about \$321bn), M&G (+£2.2bn) and Jupiter (+£0.7bn) ^[S70, S130, S136, S131, S134].

- **Share price, before the bid.** Down about 25% over the five years to February 2026 ^[S125]. Value was realised through a sale, not a re-rating.
- **Scale.** About a third of Amundi and under a tenth of BlackRock ^[S130, S136]. Smaller than L&G Asset Management's £1.2trn ^[S133].
- **Passive.** No index business at scale ^[S71].
- **Private markets size.** Smaller than M&G's or L&G's ^[S131, S133]. Schroders Capital's net new business fell to £0.9bn in H1 2026 from £2.3bn ^[S120].
- **Fee pressure.** The equities margin slipped from 46bp in 2024 to 44bp at the 2025 exit rate ^[S121].
- **Independence.** Schroders chose to sell rather than buy. Jupiter bought CCLA; Ninety One took on Sanlam assets ^[S134, S140].

SAY THIS IF ASKED "WHAT WOULD YOU CHANGE?"

"Flows are the gap. Profit is up because costs came down and markets rose, but net new business has been negative this year. The job now is the one Client Group was rebuilt for: fewer propositions, sold harder, especially in the higher-margin intermediary and private markets channels."

4.5 The consolidation wave

European asset managers face "the stark choice...bulk up or sell out" (Reuters analysis) ^[S127]. Recent deals:

- Nuveen buys Schroders for £9.9bn (effective October 2026) ^[S75].
- Triam, General Catalyst and QIA take Janus Henderson private for about \$7.8bn (completed 30 June 2026) ^[S138].
- Jupiter buys CCLA (completed February 2026) ^[S134].
- Dai-ichi Life takes about 15% of M&G (May 2025) ^[S149].
- Talks between Generali and Natixis, and between Amundi and AllianzGI, fell through or stalled ^[S127].

Analysts name Jupiter, Liontrust and GAM as possible targets ^[S127].

BCG's line sums up why this matters to Client Group: "Distribution now defines who wins. Firms that secure access to capital through platforms and partnerships will have a structural advantage" ^[S144].

PART 5

The industry from zero

What asset management is, who pays for it, how firms make money, and the forces reshaping it. Written for someone starting at zero. Read this before Parts 2 and 3 if the words "AUM" or "basis point" are new.

5.1 What an asset manager does

An asset manager invests other people's money for a fee. It does not own the money. A pension scheme, an insurer or a saver owns it, and a separate bank (the custodian) holds the assets safely. The manager makes the decisions: what to buy, what to sell, how much risk to take ^[S150].

The fee is almost always a small percentage of the money managed, charged every year. It is not a share of the profit. So an asset manager earns more when it manages more money, whether that money grew because markets rose or because new clients arrived.

KEY TERM: AUM

Assets under management (AUM) is the total market value of the money a manager runs for clients. Schroders reported £867.8bn at 30 June 2026 ^[S220]. AUM is the base on which fees are charged, so it is the single most watched number in the industry.

KEY TERM: BASIS POINT (BP)

One basis point is one hundredth of one percent. 0.45% is 45 basis points. Worked example: a client with £100m in a fund that charges 45bp pays £450,000 a year. If the fund's value rises to £110m, the fee rises to £495,000 without any extra sales effort.

Inside every asset manager there are two halves ^[S150]:

- **The investment side.** Fund managers, analysts and traders who decide what to own.
- **The client side.** The people who design products, market them, sell them, and look after clients once they have invested. At Schroders this half is called Client Group ^[S306]. The internship sits here.

Neither half works without the other. A brilliant fund nobody hears about gathers no money. A brilliant salesperson with poor funds loses clients within three years, because that is how long most professional buyers wait before judging a track record.

5.2 Who the clients are

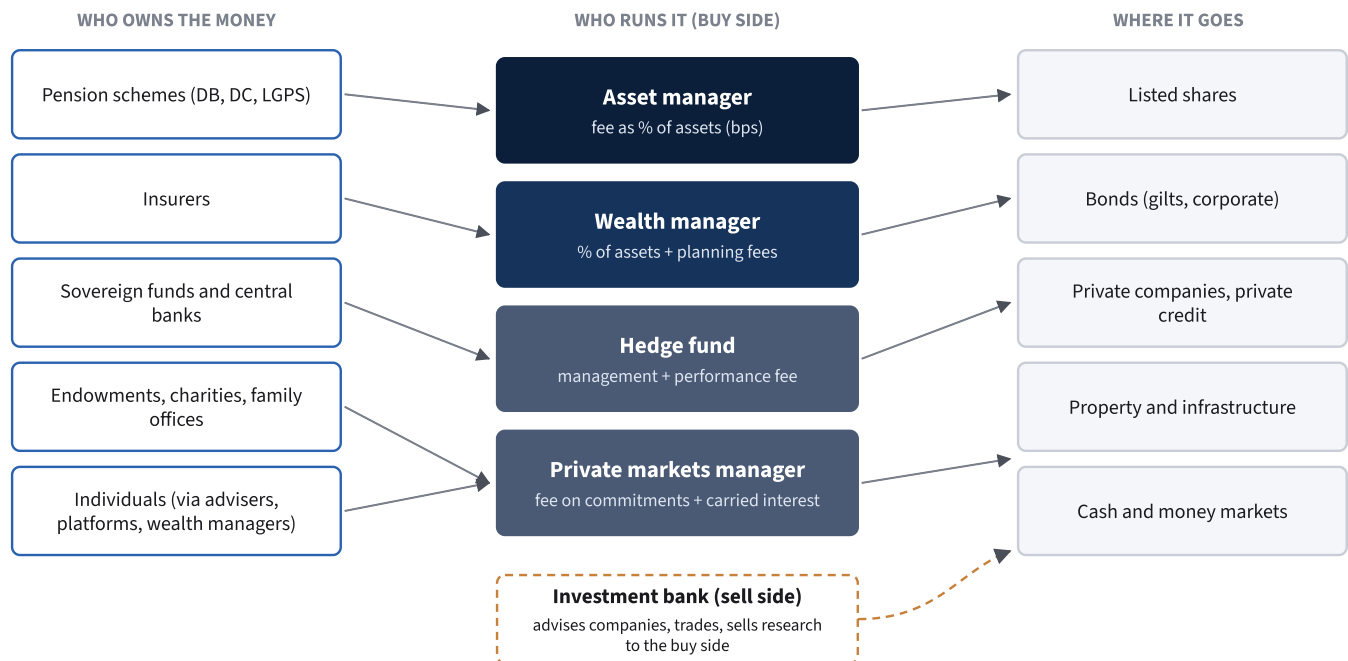

Client type	What they need	How they buy
Defined benefit (DB) pension schemes	To pay pensions they have promised. Most UK DB schemes are closed to new members and are reducing risk, often ending with a transfer to an insurer (a "buyout") ^[S150] .	Trustees advised by an investment consultant; formal tenders.

Client type	What they need	How they buy
Defined contribution (DC) schemes	To grow each member's pot at low cost. Members carry the investment risk. Growing fast because of auto-enrolment, and consolidating into very large "megafunds" [S183] .	Large providers and master trusts, very price-sensitive.
Local Government Pension Scheme (LGPS)	Council workers' pensions. Now invested through six pools rather than about 86 separate funds [S185] .	Pool investment teams with in-house expertise.
Insurers	To back life policies and annuities with steady, well-matched assets.	In-house investment teams; segregated mandates.
Sovereign wealth funds and central banks	To invest national savings or reserves safely and for the long term. Schroders calls these "official institutions" [S303] .	Direct relationships, long due diligence.
Endowments, charities, family offices	Long-term growth with an income to spend.	Investment committees; often via wealth managers.
Individuals (retail)	Savings, ISAs, pensions. Retail is now the largest single client group in UK assets (28%), just ahead of pensions (27%) [S150] .	Through advisers, platforms, wealth managers and model portfolios.

WHY THIS MATTERS FOR CLIENT GROUP

Each client type needs a different conversation. The JD names "central banks and pension schemes to family offices and wealth advisors" [\[S263\]](#). A salesperson who talks to a DB trustee about "beating the market" has misread the room: the trustee cares about paying pensions on time.

5.3 How the neighbours differ

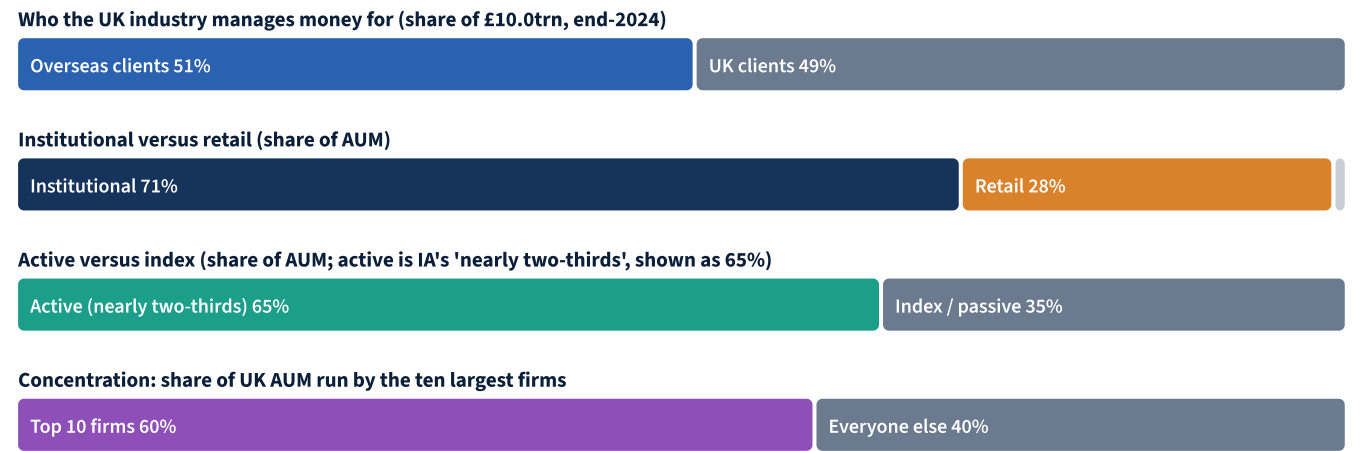

Schroders sits in the middle column: asset manager, wealth manager and private markets manager in one group.

Figure 22. Who is who in investment. Owners hand money to managers, who invest it in markets. Fee models from the IA and industry sources [\[S150, S154\]](#). Schroders' business mix from its annual report (see Part 2).

Type	What it does	How it earns	Example
Asset manager	Runs pooled funds and single-client portfolios in listed and, increasingly, private markets.	A percentage of assets (bps). Sometimes performance fees.	Schroders, BlackRock, L&G, aberdeen
Wealth manager	Manages whole portfolios for individuals and families, often with financial planning.	A percentage of client assets plus planning fees.	Cazenove Capital (Schroders), Rathbones, St James's Place
Hedge fund	Absolute-return strategies using borrowing, short selling and derivatives.	Management fee plus a share of profits.	Millennium, Man Group
Private markets manager	Buys unlisted companies, loans, property and infrastructure through funds that lock money up for years.	Fee on committed money plus "carried interest", a share of profits.	Schroders Capital, Apollo, Blackstone
Investment bank	Advises companies, underwrites share and bond issues, trades securities and sells research. It serves the buy side rather than being part of it.	Advisory fees, trading spreads.	Goldman Sachs, Barclays

Asset managers, wealth managers, hedge funds and private markets firms are the **buy side**: they invest. Banks and brokers are the **sell side**: they sell services to the investors ^[S150]. Schroders is unusual because it runs three of the four buy-side models in one group: public markets asset management, private markets (Schroders Capital) and wealth management (Cazenove Capital) ^[S300].

5.4 The UK industry in numbers

Source: Investment Association, Investment Management in the UK 2024-2025, data at end-2024, published Oct 2025 ^[S150]. Next edition (end-2025 data) not yet found.

Figure 23. The UK asset management industry in four bars. Figures are IA survey data at end-2024 ^[S150] **Confirmed**.

£10.0trn
UK-managed assets, end-2024, up 10% ^[S150]. The IA's August 2026 update reports £11.1trn for 2025 ^[S146].

18%
Industry operating margin in 2024, a record low, down from 31% in 2019 ^[S150].

44,900
People directly employed in UK investment management; 123,300 jobs supported in total ^[S150].

Three facts stand out. First, London is a global hub: more than half of the money is managed for clients outside the UK ^[S150]. Second, the hub is mostly run by foreign-owned firms: North American groups oversee 54% of UK-managed assets and UK-headquartered firms 35% ^[S150]. Third, the business is getting harder: revenue rose 10% in 2024 but costs rose 14% ^[S150].

SAY THIS IN THE INTERVIEW

"The UK industry manages about £10trn, over half of it for overseas clients, but margins have fallen from 31% to 18% in five years. So the firms that win are the ones that can grow net new money, not just ride markets."

5.5 How money moves: flows, fees and margins

AUM changes for three reasons. Markets move the value of what clients already own. Currency moves change the sterling value of overseas assets. And **net flows** (money in from clients minus money out) show whether clients are choosing the firm. Only the third one is earned by Client Group.

KEY TERMS: GROSS FLOWS, NET FLOWS, NNB

Gross inflows are all new money received. **Net flows** or **net new business (NNB)** subtract redemptions. Schroders took £69.3bn of gross inflows in H1 2026 but had net outflows of £8.3bn, most of it one £6.6bn low-margin institutional redemption ^[S220].

BCG found that more than 80% of the industry's revenue growth in 2025 came from rising markets, not from new money ^[S154]. That is the uncomfortable truth behind every results statement. It also explains why a firm like Schroders reorganised its sales and marketing: when markets stop rising, only distribution grows the business.

Fee margins differ hugely by product. Schroders publishes them. In 2025 private markets (Schroders Capital) earned 57bp, Cazenove Capital wealth 48bp, equities 45bp, fixed income 34bp, multi-asset 24bp and core solutions 6bp ^[S300]. So £1bn won in private markets brings in roughly ten times the revenue of £1bn won in core solutions. Salespeople who understand this talk about *revenue* won, not just assets won.

5.6 The forces reshaping the industry

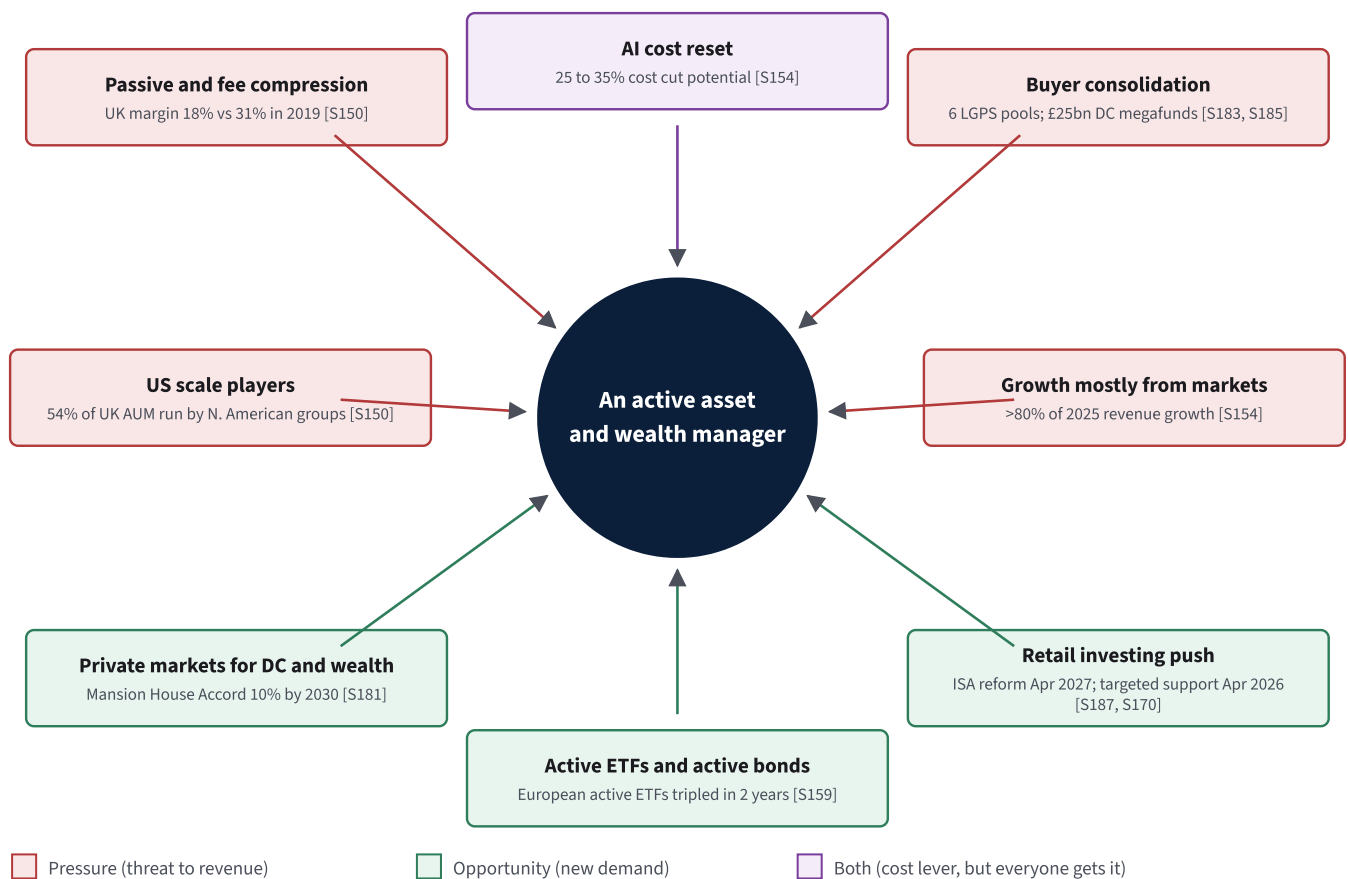

Figure 24. The industry shift map: eight forces acting on a firm like Schroders, 2025 to 2027. Classification as threat or opportunity is the author's **Inferred**; each figure is sourced in the box.

Passive investing and fee pressure. Index funds buy every share in an index at very low cost. They held 35% of UK-managed assets in 2024 [S150]. In 2025 UK retail investors put £12.8bn into trackers and pulled £15.1bn from active funds [S152]. Institutional fees are falling about 3% a year [S154].

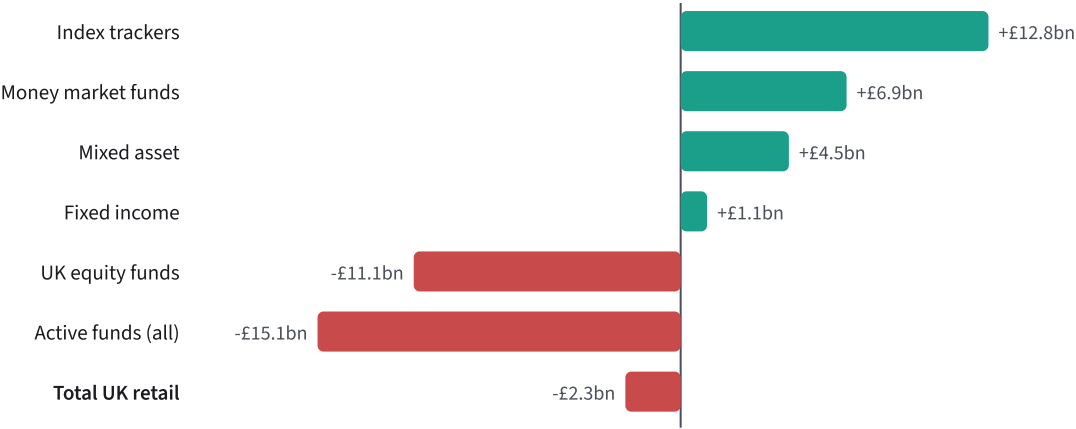

Fewer, bigger buyers. The Pension Schemes Act 2026 (Royal Assent 29 April 2026) requires multi-employer DC default funds to reach £25bn by 2030 [S183]. The LGPS now invests through six pools [S185]. A salesperson now has fewer doors to knock on, each far bigger and more expert.

Private markets for everyone. The Mansion House Accord (13 May 2025) saw 17 DC providers aim for at least 10% of default funds in private markets by 2030, with 5% in the UK [S181]. That creates demand for products such as the Long-Term Asset Fund (LTAF). The Bank of England's July 2026 Financial Stability Report is the counterweight: "Redemption requests have been elevated in several retail funds, with some limiting redemptions" [S196].

The retail push. From 6 April 2027 the cash ISA limit falls to £12,000 for under-65s, inside the unchanged £20,000 total [S187]. Targeted support, a new form of help between guidance and advice, went live on 6 April 2026 [S170]. The "Invest for the Future" campaign launched on 23 April 2026, and Schroders is a founding member [S189].

Active ETFs. An exchange-traded fund (ETF) trades on a stock exchange like a share. Most track an index, but an active ETF has a manager picking investments. European active ETFs took \$33.9bn in the first eight months of 2026, already beating 2025's full-year record [S251]. Schroders' own range reached \$4.3bn by 21 September 2026 [S230].

AI and cost. BCG estimates AI could cut costs by 25 to 35% over three to five years and let one relationship manager cover three to five times more clients [S154].

Categories overlap (UK equity and trackers both sit inside 'all funds'); read each bar on its own. Source: IA press release, 5 Feb 2026 [S152].

Figure 25. UK retail fund net flows in 2025: money went to trackers and cash-like funds and left active and UK equity funds [S152] Confirmed.

5.7 Where the industry goes next: four competing views

1. Barbell

Passive giants and private-markets specialists win. Mid-sized active houses merge or niche.

Evidence: top-10 share 60%, margins 18% [S150]; institutional fees -3% a year [S154].

2. Great convergence

Public and private markets blend and move into wealth and DC pensions.

Evidence: retail drove 61% of 2020-25 growth [S154]; Mansion House 10% target [S181].

3. Active rebound, private caution

Private markets over-sold; active bonds and active ETFs recover.

Evidence: BoE warns on retail fund redemptions [S196]; 81% of fund selectors see bigger active bond role [S194].

4. AI operating reset

Lower cost-to-serve; one salesperson covers 3 to 5 times more clients.

Evidence: BCG 2026 [S154]. Winners personalise at scale.

Schroders, with public, private and wealth arms, is in effect betting on views 2 and 4 while defending against view 1 [Inferred].

Figure 26. Four competing views of the industry over the next three to five years. Views summarised by the author from the sources cited in each box.

YOUR OPINION GOES HERE

Pick one view and defend it with one number, then name the view you find strongest against yours. A model: "I lean to view 2, convergence, because retail drove 61% of the industry's growth from 2020 to 2025 [S154] and UK policy is pushing DC money into private assets [S181]. The strongest counter is view 3: the Bank of England is already seeing redemption limits in retail funds [S196]. So the winners will be firms that can offer private assets with honest liquidity terms."

5.8 Core vocabulary in one place

- Active vs passive.** Choosing investments by judgement versus copying an index.

Alpha. Return above the benchmark that comes from the manager's skill.

Benchmark. The index or target a fund is measured against.

Mandate. The written instructions under which a manager runs a client's money: objective, limits, fee.

Segregated account. A portfolio run for one client only.

Pooled fund. A fund shared by many investors, such as an OEIC or unit trust.

OCF. Ongoing charges figure: the yearly cost of a fund as a percentage.

LDI. Liability-driven investment: using gilts and derivatives so a DB scheme's assets move with its pension promises. UK LDI assets have fallen to £860bn from a £1.5trn peak in 2019 [\[S150\]](#).

Fiduciary management. A pension scheme hands day-to-day investment decisions to one provider. Schroders Solutions does this [\[S300\]](#).

Model portfolio service (MPS). Ready-made portfolios that advisers use on platforms. Over £214bn at end-2025 [\[S193\]](#).

Platform. An online service holding investors' funds, ISAs and pensions, such as Hargreaves Lansdown or AJ Bell.

Semi-liquid fund. A private markets fund that allows limited, periodic withdrawals.

PART 6

The role's own industry: fund distribution and its rules

How asset managers get their products to clients, how that changed, who the gatekeepers are, and the regulations that shape every sales conversation. The regulatory dates here are the highest-leverage technical facts in the pack.

6.1 What "distribution" means

Distribution is everything that gets a fund from the investment team to the client: product design, marketing, sales, client service and the platforms and intermediaries in between ^[S150]. In most firms it is called "distribution". Schroders calls it Client Group and puts product, marketing and sales under one global head ^[S306, S91].

Channel	Who the buyer is	What wins	Share of Schroders AUM (FY25)
Institutional	Pension schemes, insurers, sovereign funds, LGPS pools, often advised by an investment consultant.	Consultant "buy" rating, 3 to 5 year record, team stability, fees, stewardship evidence. Sales cycles of 6 to 18 months ^[S150] .	64% ^[S72]
Intermediary (wholesale)	Fund selectors at wealth managers, private banks, platforms and model portfolio providers; independent financial advisers.	Fund ratings, platform availability, cheap "clean" share classes, marketing content, adviser events ^[S193] .	19% ^[S72]
Wealth	Families and individuals served directly by the group's own wealth manager (Cazenove Capital).	Trust, planning advice, long relationships ("one family for over 75 years, across four generations") ^[S72] .	17% ^[S72]
Direct and listed	Individuals on direct platforms; exchange buyers of ETFs.	Brand, price, ease of access.	Small; active ETFs \$4.3bn at 21 Sep 2026 ^[S230]

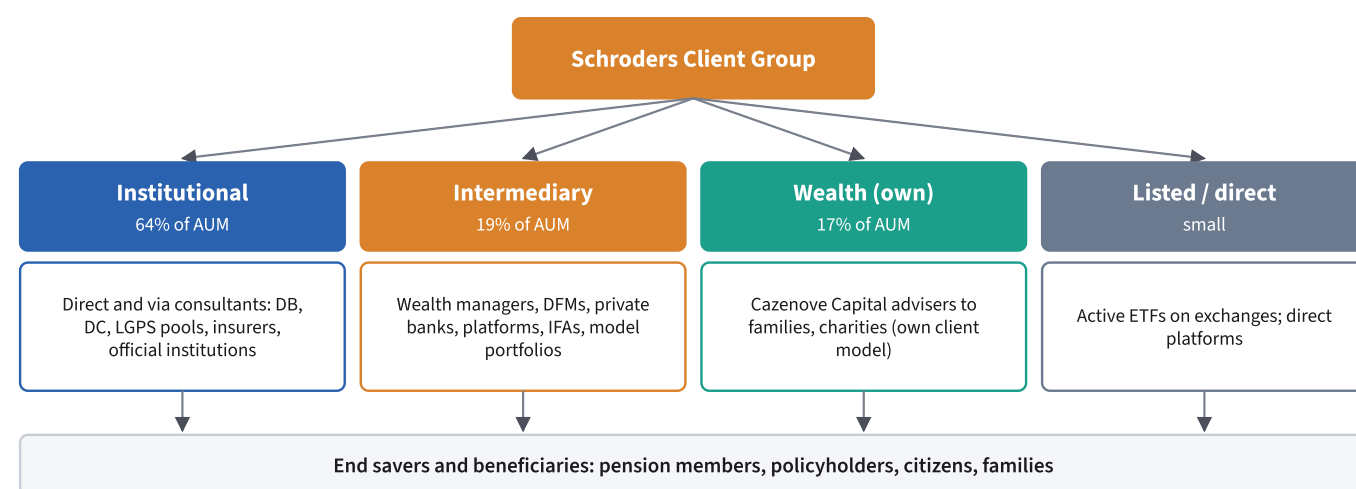

Figure 27. The channels through which Client Group's work reaches clients. AUM shares FY25 from the annual report ^[S72], ETF size ^[S230]. Wealth is shown for completeness: Cazenove runs its own adviser model ^{Inferred}.

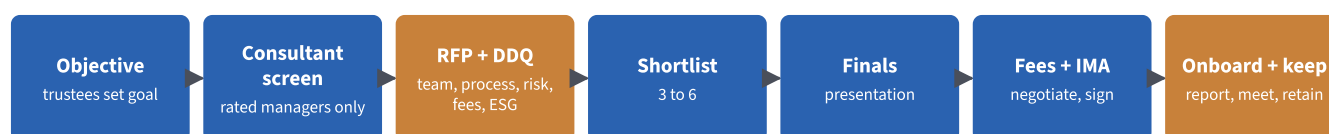

6.2 How fund selling changed: five steps

1. **The commission era (before 2013).** Fund houses paid advisers commission for recommending their funds. Part of sales was about who paid more.
2. **The Retail Distribution Review (RDR), in force 31 December 2012.** It banned product providers from paying commission to advisers and raised adviser qualifications. The FCA found in 2014 that "commission is no longer a driving factor in advisers' recommendations" [S177].
3. **The platform rebate ban, 6 April 2014.** Platforms had to be paid by explicit charges; legacy payments ended in April 2016 [S178]. This created "clean" share classes and pushed fees down.
4. **Gatekeepers take over.** Investment consultants (Mercer, WTW, Aon, LCP, Hymans Robertson) now shortlist managers for pension schemes using their own ratings [S198]. On the wholesale side, central fund-selection teams and model portfolios decide. Platform model portfolios passed £214bn at end-2025 [S193].
5. **The gatekeepers are regulated too.** The Competition and Markets Authority's Order, made 10 June 2019, forced pension trustees to tender fiduciary management covering 20% or more of their assets and to set objectives for their consultants [S179].

SAY THIS IN THE INTERVIEW

"Since RDR removed commission in 2012, fund houses win on performance, value and service to professional buyers. That's why Consumer Duty and assessments of value matter so much to sales today."

6.3 How an institutional sale happens

Typical cycle 6 to 18 months [S150]. Orange = where interns most often help (DDQ coordination, reporting) [S7, S9].

Figure 28. How an institutional mandate is typically won. General industry practice **Inferred**; consultant gatekeeping and the CMA Order in Part 6.2 [S179, S198].

The steps are general industry practice, not a single published Schroders process **Inferred**. A trustee board sets an objective. Its consultant screens the managers it rates. The shortlisted managers answer a request for proposal (RFP) and a due diligence questionnaire (DDQ) covering team, process, risk, fees, operations and sustainability. Three to six managers present in person (the "beauty parade"). One wins, negotiates fees and signs an investment management agreement. Then the real work starts: reporting, meetings and keeping the client for years.

WHERE AN INTERN HELPS

Interns rarely pitch. They make pitching possible: updating pitch books with approved figures, drafting DDQ answers from the library, preparing meeting briefs, logging activity in the CRM (Salesforce at Schroders [S317]), organising events and researching prospects. Every one of these touches a rule described below.

6.4 The rules that bind a sales role

A salesperson at a UK asset manager works inside a thick rulebook. You do not need to know it like a compliance officer. You do need to know the six rules below well enough to spot when to stop and ask.

Rule	What it says, in plain English	What it means for you on day one
Fair, clear and not misleading FCA COBS 4.2.1R	"A firm must ensure that a communication or a financial promotion is fair, clear and not misleading." Firms must "take into account the nature of the client" [S401] .	Never improvise performance claims or forecasts. Use approved, dated figures. Material for retail audiences is held to a stricter standard than for professionals.
Consumer Duty PS22/9; open products 31 Jul 2023, closed products 31 Jul 2024	A new Consumer Principle "that requires firms to act to deliver good outcomes for retail customers", with four outcomes: products and services, price and value, consumer understanding, consumer support [S161] .	Manufacturers such as Schroders share responsibility for retail outcomes with distributors. Every retail product needs a fair-value case. Explaining clearly is a rule, not a courtesy.
Assessment of Value PS18/8, from 30 Sep 2019	UK fund managers must assess every year whether each fund's charges are justified by the value delivered, with independent directors on the fund manager board [S163, S164] .	If a client asks "why this fee?", the published assessment of value is the firm's official answer.
Sustainability rules (SDR) PS23/16; anti-greenwashing 31 May 2024; labels 31 Jul 2024; naming and marketing 2 Dec 2024	Sustainability claims must be fair, clear, not misleading and consistent with the product. "Sustainable", "sustainability" and "impact" may appear in a UK fund's name only if it uses a label [S165, S166] .	Any green language in an email, slide or event invitation is in scope. Check before you write "sustainable".
Product governance MiFID II / PROD 3, from Jan 2018	Every product has a defined target market. Manufacturers share it with distributors, and distributors report back [S176] .	Sell a fund only to the kind of client it was designed for. Feed distribution data back to Value Proposition.
Market abuse UK MAR (EU MAR 3 Jul 2016; UK law from 31 Dec 2020)	Bans insider dealing, unlawful disclosure of inside information and market manipulation. Inside information is "information of a precise nature which has not been made public" that would be "likely to have a significant impact on the prices" of financial instruments [S402] .	If you overhear something price-sensitive, do not repeat it, trade on it or forward it. Tell Compliance. A former Schroders trader was jailed for insider dealing [S103] .
Data protection UK GDPR	Personal data must be "accurate and, where necessary, kept up to date" and processed with "appropriate security" [S403] .	Client contact details in the CRM are personal data. Keep them accurate and inside approved systems.
Individual accountability SM&CR; review PS26/6, April 2026	Named senior managers are personally accountable; many client-facing staff are certified as fit and proper each year [S174] .	Conduct rules apply to everyone, including interns: act with integrity, due skill, care and diligence.

6.5 What is changing right now

Figure 29. Regulation timeline for UK fund distribution. Dates checked against FCA and government sources where marked **Confirmed**; the MiFID II date is general knowledge **Reported**. Orange = still to come. CCI goes mandatory one week before the internship starts.

- **Consumer Composite Investments (CCI), PS25/20.** Replaces the PRIIPs key information document and the UCITS KIID with a flexible "product summary" showing costs, risk and past performance. Optional from 6 April 2026, mandatory from 8 June 2027 ^[S168]. That is one week before the internship starts. Every retail fund document changes.
- **Targeted support, PS25/22.** Live from 6 April 2026. Authorised firms can suggest products to groups of consumers with similar circumstances, without full advice ^[S170]. The FCA says around 23 million people are underserved by advice or guidance ^[S170]. Early take-up is slow ^[S253].
- **Value for Money for DC pensions.** FCA CP26/1 (8 January 2026) and the joint FCA/DWP consultation of July 2026 propose rating default funds on performance, cost and service, with first assessments in 2028 ^[S172, S173]. Poor-value managers will be switched out.
- **Consumer Duty scope.** CP26/23 (29 June 2026) proposes clarifying the Duty and making it lighter for wholesale-focused firms ^[S256] **Reported**.
- **Pension Schemes Act 2026.** Royal Assent 29 April 2026: £25bn DC megafunds by 2030, six LGPS pools, a reserve power to mandate private-market allocations capped at 10% (5% UK) ^[S183, S254].

- **Cash ISA cut.** From 6 April 2027 the cash ISA limit is £12,000 for under-65s ^[S187].

SAY THIS IN THE INTERVIEW

"The new CCI product summaries become mandatory on 8 June 2027, a week before the internship starts, and the cash ISA limit falls in April 2027. Both change what retail clients see and where their money goes, so I'd expect the intermediary team to be busy with both."

DON'T SAY THIS

"PRIIPs KIDs" as if they were the future: they are being replaced. "Consumer Duty applies to everyone": it covers retail customers, and its scope for wholesale firms is under review. "Sustainable fund" loosely: the word is regulated in UK fund names.

6.6 What buyers value today

External clients and fund buyers

- Clear value for the fee: Consumer Duty and assessments of value make this a rule ^[S161, S164].
- Consistent outcomes, not star managers.
- Access to private markets, with honest liquidity terms ^[S196].
- Active fixed income: 81% of fund selectors surveyed by Rathbones expect a bigger role for it ^[S194] **Reported**.
- Building blocks that fit model portfolios: low charges, platform availability ^[S193].
- Sustainability claims that survive the anti-greenwashing rule ^[S165].
- Service: data, reporting and education.

Internal clients (fund managers and product teams)

- Accurate intelligence on what buyers need and what rivals are doing.
- A fair description of their strategy, never an oversold one.
- A qualified pipeline, not a long list of maybes.
- Sticky money rather than "hot money" that leaves after one bad quarter.
- Feedback for product development, such as demand for an active ETF version or an LTAF wrapper.
- Communications that pass compliance first time.

PART 7

What is happening right now

The twelve stories from April to September 2026 that a Client Group interviewer expects you to know, each with why it matters and a question you could raise. Refresh the market numbers in the week of your interview.

7.1 Your 60-second market view (as at 29 September 2026)

SAY THIS, IN YOUR OWN WORDS

"The big driver this year has been an energy shock. Since the Iran conflict started in late February, disruption around the Strait of Hormuz has kept oil around \$100, and inflation is rising again. UK CPI was 3.1% in August, and the Bank of England expects it just above 4% early next year. So the debate has flipped from rate cuts to possible rises. The Bank held at 3.75% in September, but three members voted to raise, so the 5 November meeting is live. That has hit long bonds hardest: 30-year gilt yields reached their highest since the late 1990s.

Equities have held up, but the US market is very concentrated: the seven biggest tech names are roughly a third of the S&P 500. Schroders' own economists describe a stagflationary tilt without a recession, with global growth around 2.5%, and name a spike in long-term yields as the main risk.

For clients, I'd focus on three things: diversifying away from index concentration, the higher yields now available in good-quality credit, and active management where dispersion is high. UK savers are defensive right now, holding cash and bonds. That money is there to win when rates turn."

Sources: [S232] Bank of England; [S242] Schroders Q3 viewpoint; [S241] concentration; [S237] gilt yields **Reported**, approximate; [S240] conflict background **Reported**; [S248, S250] UK flows.

DON'T SAY THIS

"Rates are coming down." Both the Bank of England and the Fed had a tightening bias in September 2026 [S232, S234]. "Rachel Reeves' Budget." The Chancellor is John Healey, and the Autumn Budget is on 28 October 2026 [S247, S246]. "Keith Wade, Schroders' chief economist." The Q3 2026 viewpoint is by David Rees, Head of Global Economics, and colleagues [S242].

7.2 The story cards

1. Nuveen's £9.9bn takeover of Schroders completes on 1 October 2026

MUST KNOW

SOURCE	Court sanction RNS, 29 Sep 2026 ^[S75] ; Disruption Banking, 25 Sep 2026 ^[S223] ; Global Banking & Finance, 22 Sep 2026 ^[S228] . Bloomberg's report is PAYWALLED-NOT-READ ^[S226] .
WHAT	A court-approved takeover ("scheme of arrangement") at up to 612p a share. The combined group runs about \$2.5trn. Schroders keeps its brand and London HQ, runs standalone for at least a year and is led by Richard Oldfield, who reports to Nuveen CEO William Huffman. Matthew Westerman becomes chair.
FOR SCHRODERS	Scale, US distribution and a much bigger private markets platform. The H1 statement says institutional fundraising in "longer-dated capabilities" was temporarily lower while the deal was pending ^[S70] .
FOR THE ROLE	Clients will ask what changes for them. Sales needs one calm, consistent message: brand retained, standalone for at least a year, London HQ, broader shelf.
ASK	"After the first standalone year, how do you expect Client Group to bring Nuveen's capabilities, such as private credit or real assets, to UK and European clients?"

2. H1 2026: record assets, profit up 46%, net outflows £8.3bn

MUST KNOW

SOURCE	Schroders half-year results, 30 Jul 2026 ^[S70] ; Professional Pensions ^[S221] .
WHAT	AUM £867.8bn; adjusted operating profit £459.8m; cost:income 68%; gross inflows £69.3bn; net outflows £8.3bn ex JVs, including one £6.6bn low-margin institutional redemption; intermediary gross inflows up more than 40%.
FOR SCHRODERS	The cost plan worked. Organic growth is still the weak point, especially institutional equities.
FOR THE ROLE	The gap between gross and net flows is a sales story: winning new money is not enough if existing money leaves.
ASK	"Equities saw £8.7bn of net outflows in H1. Is that performance, a shift to passive, or particular client types?"

3. Benchmark sold to Söderberg & Partners: wealth refocused on Cazenove

SHOULD KNOW

SOURCE	Money Marketing, 6 Jul 2026 ^[S231] ; H1 results ^[S70] .
WHAT	Schroders sold its UK advice business to a Swedish group for about £215m and becomes a long-term asset management partner to it. Wealth now centres on Cazenove Capital in the UK and Schroders Wealth Management internationally. Oliver Gregson: "It further sharpens our focus".
FOR SCHRODERS	A move up-market to high-net-worth families, charities and family offices.
FOR THE ROLE	An example of partnership distribution: one relationship bringing sticky flows.
ASK	"With Benchmark sold, how will Schroders reach UK mass-affluent savers: partners, platforms or active ETFs?"

4. Active ETFs: two fixed income launches as European active ETF inflows break a record**SHOULD KNOW**

SOURCE	Schroders release via EuropaWire, 29 Sep 2026 ^[S230] ; QuotedData, 18 Sep 2026 ^[S251] .
WHAT	Schroders listed a CoCo financial credit active ETF and a USD investment grade corporate bond active ETF in London. Its UCITS active ETF range was \$4.3bn at 21 September. European active ETFs took \$33.9bn in the eight months to August, beating 2025's full-year record.
FOR SCHRODERS	A cheaper, tradeable wrapper for its active skills that competes for money that would otherwise go to passive.
FOR THE ROLE	Salespeople must explain when a client should use the ETF rather than the fund version of the same strategy.
ASK	"Do active ETFs bring in new clients, or mostly move existing investors into a lower-fee wrapper?"

5. Bank of England holds at 3.75%, three votes to raise**MUST KNOW**

SOURCE	Bank of England, 17 Sep 2026 ^[S232] .
WHAT	A 6-3 vote to hold. CPI 3.1% in August, expected slightly above 4% in Q1 2027. Brent about \$106 at the meeting. GDP +0.4% in Q2; unemployment 4.9%. Next decision 5 November.
FOR SCHRODERS	Higher-for-longer rates favour cash and bond products and hurt long-duration assets.
FOR THE ROLE	Clients ask whether to lock in yields now. You explain the house view; you don't give advice.
ASK	"If the Bank raises in November, how do conversations differ between a DB pension client and a wealth client?"

6. The Fed raises rates to 3.75 to 4.00%**GOOD TO KNOW**

SOURCE	Federal Reserve statement, 16 Sep 2026 ^[S234] ; CNBC ^[S235] . Both search summaries only Reported .
WHAT	A 25bp rise, reported as the first in more than three years, driven by oil-led inflation. Schroders' economists had forecast the Fed would start raising ^[S242] .
FOR THE ROLE	Higher US rates weigh on expensive growth stocks and support the dollar.
ASK	"With the Fed raising and the Bank of England holding, is there a case for sterling bonds for global clients?"

7. Global bond sell-off: 30-year gilt yields at their highest since 1998**SHOULD KNOW**

SOURCE	Bloomberg, 1 Sep 2026, PAYWALLED-NOT-READ ^[S236] ; Trading Economics summary ^[S237] Reported , levels approximate.
WHAT	Long-dated government bonds sold off on budget and debt worries; UK 30-year yields reached about 5.7 to 5.9%. A new Chancellor, John Healey, delivers the Autumn Budget on 28 October ^[S247, S246] .
FOR SCHRODERS	Gilt yields drive DB pension funding levels and LDI collateral. Schroders runs large UK solutions and LDI books.
FOR THE ROLE	Better-funded DB schemes move towards buyout, which changes what institutional clients need.
ASK	"With long gilt yields near 6%, do more DB schemes lock in and buy out, and what does that mean for Schroders Solutions?"

8. UK savers go defensive: cash and bonds in, equities out**SHOULD KNOW**

SOURCE	Investment Association, 6 Aug 2026 [S248] ; Calastone, 8 Sep 2026 [S249, S250] .
WHAT	UK retail funds took £12.3bn in H1 2026: fixed income +£4.5bn, money market +£3.8bn, mixed asset +£7.4bn, equities -£7.0bn. Trackers took £9.7bn and active funds £2.6bn. Calastone reports equity outflows in 14 of the last 15 months.
FOR SCHRODERS	Its own H1 flows match: multi-asset +£2.6bn, fixed income +£1.9bn, equities -£8.7bn [S70] .
FOR THE ROLE	This is the demand picture intermediary sales works within.
ASK	"Money market funds keep gathering cash. Can Schroders win it into short-dated credit or multi-asset income as rates peak?"

9. The oil shock and AI concentration: the two big market risks**SHOULD KNOW**

SOURCE	Yahoo Finance, 24 Sep 2026 [S238] ; Motley Fool, 27 Sep 2026 [S241] ; conflict background from reference sources [S240] Reported .
WHAT	A US-Israel conflict with Iran from late February 2026 disrupted the Strait of Hormuz; Brent traded around \$99 to \$104 in late September. The seven largest US tech stocks are about 31% of S&P 500 value but about 26% of expected earnings. Sources differ on the exact share, so say "roughly a third".
FOR THE ROLE	Schroders' 2026 institutional survey reports concentration risk as a leading reason investors add active management [S244] Reported .
ASK	"Is concentration risk the strongest argument for active management in a decade?"

10. Schroders' house view: inflation is the bigger worry**MUST KNOW**

SOURCE	Schroders Economic and Strategy Viewpoint Q3 2026, 16 Sep 2026 [S242] .
WHAT	Authors David Rees, George Brown, Tina Fong and Luke James. Global GDP about 2.5% (2026) and 2.6% (2027); inflation 3.3% and 2.7%. "The biggest threat to risk assets is that question marks over central bank credibility cause long term yields to surge higher."
FOR THE ROLE	Quoting the house view accurately, with its date, is the easiest way to sound like you already work there.
ASK	"How does the economics team's view reach salespeople before client meetings?"

11. Pension Schemes Act 2026: megafunds, value for money, six LGPS pools**SHOULD KNOW**

SOURCE	LCP, May 2026 [S183] ; The Actuary, 7 May 2026 [S254] Reported .
WHAT	Royal Assent on 29 April 2026. DC default "megafunds" of at least £25bn by 2030; a value for money framework; small pots consolidation; all LGPS money invested through six pools; a reserve power to mandate private market allocations, capped at 10% (5% UK).
FOR THE ROLE	Fewer, bigger, more expert buyers. Mandates get larger and fees get tighter.
ASK	"Does Schroders sell to megafunds as a specialist manager or as a partner building the whole portfolio?"

12. Retail rules: targeted support live, CCI coming, cash ISA cut in 2027**SHOULD KNOW**

SOURCE	FCA PS25/22 ^[S170] and PS25/20 ^[S168] ; Professional Adviser ^[S253] ; GOV.UK ^[S187] .
WHAT	Targeted support went live on 6 April 2026 with a "slow start". CCI product summaries became optional on 6 April 2026 and are mandatory from 8 June 2027. The cash ISA limit falls to £12,000 for under-65s from 6 April 2027.
FOR THE ROLE	New routes for savers into funds, new partners for asset managers, and a rewrite of every retail fund document.
ASK	"Should an asset manager help platform partners with ready-made solutions for targeted support, or stay out of it?"

PART 8

Forming your own view: both sides of every argument

The JD asks you to "form well-reasoned opinions on commercial or financial matters" ^[S263]. Here are ten live debates. Each has the case for, the case against, a model view and the follow-up question that tests it. Rewrite each model view in your own words, then defend it out loud for 60 seconds.

8.1 How to hold a view under pressure

A good opinion has four parts. **A claim** ("I think X"). **One mechanism** ("because Y causes Z"). **One number** with its source. **The best counter-argument, named by you** before they name it. If the interviewer pushes, concede facts, not the whole view: "That's fair on the numbers; I still think the conclusion holds because..."

8.2 Ten debates

Debate	For	Against	Model view (make it yours)
1. Was selling to Nuveen right?	Scale matters as margins fall: the UK industry's operating margin is 18%, down from 31% ^[S150] . The deal brings US distribution and \$414bn of private markets ^[S125] . More than 99% of votes backed it ^[S77] .	A shareholder said the price was "10 to 15% below fair value" ^[S223] . Independence and the long-term family owner are gone. Integration risk starts after the first year.	"Right for clients if the bigger shelf reaches them without disrupting service. The test is 2027 to 2028, after the standalone year."
2. Is active management worth its fees?	71% of Schroders' assets beat their comparator over three years ^[S70] . Concentration is high; active can avoid it ^[S241] .	Only 14.2% of European active equity funds survived and beat passive over ten years ^[S319] . Trackers took £12.8bn of UK retail money in 2025 while active funds lost £15.1bn ^[S152] .	"Worth it where the index is a poor answer: credit, smaller companies, private markets, solutions. Hard to justify in large-cap US equity."
3. Should DC pensions hold private markets?	The Mansion House Accord aims for 10% by 2030 for higher potential net returns ^[S181] . Members are invested for decades and can bear illiquidity.	The Bank of England reports "Redemption requests have been elevated in several retail funds, with some limiting redemptions" ^[S196] . Fees and valuations are harder to judge.	"Yes, in modest amounts, inside a default fund with a long horizon, with honest liquidity terms and fees tested under the value for money rules."
4. One central Client Group or sales inside each business?	One owner per client; fewer propositions sold harder; shared CRM and data; lower cost ^[S72, S301] .	Generalists struggle with complex products; Schroders built a separate 40-person private markets sales team ^[S71] .	"Central for coverage and data, specialist overlays for complex products. Schroders has in effect chosen that hybrid."
5. Should an asset manager own a wealth manager?	Stable, high-margin revenue (Cazenove about 48bp) and a route to market for private assets ^[S71] .	Conflict risk if the wealth arm favours in-house funds; Consumer Duty's price and value outcome sharpens this ^[S161] . Wealth growth missed target in 2025 ^[S71] .	"It works if the wealth business picks funds on merit and can show it. The conflicts process matters more than the org chart."

Debate	For	Against	Model view (make it yours)
6. Do active ETFs grow the business or cannibalise it?	European active ETF inflows beat their full-year record by August 2026 [S251] . New buyers such as model portfolios prefer ETFs.	Lower fees than the fund version of the same strategy. Some flows are existing clients switching wrappers.	"Net positive if they reach buyers who would never buy the fund, which is a question to measure, not assume."
7. Should UK savers invest more in the UK?	The Accord's 5% UK aim and the "Invest for the Future" campaign, which Schroders co-founded [S181, S189] .	UK equity funds lost £11.1bn of retail money in 2025 [S152] . Savers should diversify globally; mandation distorts choice.	"Voluntary encouragement, yes; compulsion, no. The IA itself says commitments must stay voluntary to protect clients [S150] ."
8. Will AI replace salespeople?	BCG says AI could cut costs by 25 to 35% and let one relationship manager cover three to five times as many clients [S154] .	Trust, judgement and accountability sit with people, and regulators hold named individuals responsible [S43] .	"AI takes the preparation, not the relationship. The intern tasks change first: DDQ drafting, CRM updates, meeting briefs."
9. Is consolidation good for clients?	Scale lowers costs and funds technology; "Distribution now defines who wins" [S144] .	Fewer, bigger managers mean less choice. Integrations disrupt teams, and clients paused long-dated commitments during the Schroders deal [S70] .	"Good for clients when savings are passed on in fees. Bad when integration takes attention from performance."
10. Fewer core propositions: focus or lost strengths?	Nine capabilities make more than 85% of public markets revenue [S301] . Focus lifts speed to market [S72] .	Niche funds can be tomorrow's winners. Closing more than 16% of the range upsets some clients [S71] .	"Focus is right when the tail is sub-scale. Keep a route for new ideas through Value Proposition's work with investment teams."

YOUR OPINION GOES HERE

Choose two debates you would enjoy arguing. Write your own model view for each in 40 words, with one number. Those two are your answers to "What's something in the industry you have an opinion on?"

PART 9

The interview: process, Cappfinity stages, question bank, questions to ask

What each stage is, what Cappfinity is measuring, the video prompts and workplace scenarios most likely to appear, the assessment centre, 44 questions with scaffolds and ten questions to ask.

9.1 The process, stage by stage

Feedback report within about 24 hours of each online stage. No single pass mark; humans make all decisions [S260, S262].

Figure 30. The Schroders 2027 recruitment funnel and the candidate's likely position. Stages from the advert and Schroders' Cappfinity Candidate Zone [S263, S262, S260] **Confirmed**; "you are here" is inferred from the date.

Stage	What it is	Length and rules	Confidence
Application form	Eligibility and motivation. The brief says it closed 16 Sep 2026; req 1943 still showed live on 29 Sep [S2].	n/a	Confirmed
Stage 1: Cognitive	"Numerical, critical and diagrammatic reasoning" [S14]. Practice tiles for each type in the Candidate Zone [S262].	About 20 min; untimed, but response time is probably recorded [S260, S279].	Confirmed ; timing capture Reported
Stage 2: Behavioural and motivational	A questionnaire on "what drives you, how you work with others, and how your strengths align to the role and our values" [S262].	About 20 min; untimed; answers can change until you submit [S262].	Confirmed

Stage	What it is	Length and rules	Confidence
Stage 3: Work simulation and video interview	"Online questions ranking responses and submit a short recorded video answer" [S262] .	About 30 min; video timed, no pause, no retake, auto-advances; up to 25% extra time with adjustments [S262] .	Confirmed
Assessment centre	"Group exercises, an individual presentation and a competency-based interview" [S262] .	4 to 5 hours, usually in person; details 1 to 2 weeks ahead; outcome within about a week [S262, S260] .	Confirmed

Feedback and scoring. You get "an individual and bespoke feedback report after each of the three online assessment stages, usually within 24 hours" [\[S14\]](#). "We do not use one single 'pass mark'. Your results are reviewed holistically" [\[S262\]](#). "All shortlisting and final decisions are made by humans" [\[S262\]](#).

Timing. Graduate assessment centres run "between October - December" [\[S261\]](#). The intern window is not published. Prep sites and older reports say November to February [\[S288, S49\]](#) **Reported**. Best estimate: Stage 3 in late September to October 2026, an assessment centre between late October 2026 and January 2027 **Inferred**.

DON'T DO THIS

Schroders states: "Any use of AI to create, edit, or enhance your application and responses is strictly prohibited" [\[S262\]](#). Use this pack to learn and rehearse. Every answer you give must be your own words and your own examples.

9B. Cappfinity: how the stages work and what could come up

What Cappfinity is

Schroders' "Emerging Talent Candidate Zone" at schroders.preparationplus.com is "Powered by Cappfinity" [\[S262\]](#). Cappfinity grew out of CAPP, the Centre of Applied Positive Psychology, founded in 2005 by Alex Linley and Nicky Garcea [\[S279\]](#) **Reported**. The same platform is used by HSBC and EY, among others [\[S282, S296\]](#). Older prep-site material on Schroders mentions HireVue or Aon; that describes earlier cycles [\[S289\]](#).

KEY TERM: A STRENGTH, IN CAPPFINITY'S SENSE

Something you do well, find energising and use often. Cappfinity's Strengths Profile scores 60 strengths on "three dimensions of energy, performance and use" [\[S283\]](#). Being good at something is not enough. They look for evidence that it energises you.

Strengths versus competency questions. A competency question asks what you did ("Tell me about a time..."). A strengths question asks what you enjoy, what comes naturally and what drains you ("What does a great day look like?" [\[S285\]](#)). Prospects: "If you're genuinely describing something you enjoy, you'll be animated and your enthusiasm and motivation will shine through" [\[S285\]](#). Questions may feel repetitive "to allow the interviewer to calibrate the consistency of your answers" [\[S286\]](#). Schroders mixes both: Stage 3 asks about "what you enjoy" [\[S262\]](#), and the assessment centre interview is "competency-based" with STAR suggested [\[S262\]](#).

The 60 strengths, and the ones this role probably targets

Family	Strengths ^[S283]
Being	Authenticity, Centred, Courage, Curiosity, Gratitude, Humility, Legacy, Mission, Moral Compass, Personal Responsibility, Pride, Self-awareness, Service, Unconditionality
Communicating	Counterpoint, Explainer , Feedback, Humour, Listener , Narrator , Scribe, Spotlight
Motivating	Action, Adventure, Bounceback, Catalyst , Change Agent, Competitive, Drive , Efficacy, Growth, Improver, Persistence, Resilience , Work Ethic
Relating	Compassion, Connector, Emotional Awareness, Empathic Connection, Enabler, Equality, Esteem Builder, Personalisation, Persuasion , Rapport Builder , Relationship Deepener
Thinking	Adherence, Creativity, Detail, Incubator, Innovation, Judgement, Optimism, Order , Planful , Prevention, Reconfiguration, Resolver , Strategic Awareness, Time Optimiser

Bold = strengths the author maps to the advert's skills ^[Inferred]. Which strengths Schroders actually scores is not published. Cappfinity also appears to run a newer 80-skill library, including "Adaptable & Learning Agility" and "Commercial Insight" ^[S262] ^[Reported].

Advert line ^[S263]	Likely strength
"develops strong, trust-based relationships"	Rapport Builder, Relationship Deepener
"adapt style to different audiences"	Explainer, Narrator
"listens actively"	Listener
"genuine interest ... current market trends"	Curiosity, Commercial Insight
"self-starter ... takes initiative"	Drive, Catalyst
"composure ... under pressure"	Centred, Resilience
"event or project coordination ... diary management"	Planful, Time Optimiser, Order
"identifies practical, effective solutions"	Resolver

Stage 1 and Stage 2 in one paragraph each

Stage 1. Numerical (tables and charts: percentages, ratios, growth rates), critical reasoning (does the conclusion follow?) and diagrammatic (patterns and rules). Untimed, but treat speed as scored ^[S279] ^[Reported]. Do the three practice tiles in the Candidate Zone first ^[S262]. Have a calculator and scrap paper ready.

Stage 2. You rank or rate options, sometimes for how effective they are and sometimes for how much you would enjoy them ^[S280] ^[Reported]. Answer honestly and consistently. The same strengths framework reads your Stage 3 video, so an energetic video about client work will not fit a Stage 2 profile that says you dislike talking to people.

Stage 3: the work simulation and video

Known: ~30 min; timed video; auto-advance; 25% max extra time; own words only (AI use prohibited) ^[S262].

Not published: number of video questions, prep seconds, answer length. Plan for 30 to 60 s prep, 1 to 3 min answers ^[Inferred] ^[S289, S290].

Figure 31. Anatomy of Stage 3, the Cappfinity Work Simulation and Video Interview. Order of parts is indicative; Schroders publishes the elements, not the running order ^[S262, S276, S277].

In Schroders' words: "A Work Simulation is an assessment that aims to give you a real insight into the role, tasks and team you will be working within ... One unique characteristic of the Work Simulation is that there will be a video interview as part of the assessment" [S262]. And: "It is not possible to pause the video interview or to retake them after completion. They are timed, and once the timer counts down it will automatically move you to the next question" [S262]. Schroders' advice: "Prepare 2 to 3 examples about yourself ... We'll be looking to understand how your experiences to date have shaped who you are, what you enjoy and what skills you have developed" [S262]. And: "It is not about being polished" [S260].

SET-UP CHECKLIST (DO THIS THE DAY BEFORE)

- Laptop on a stable surface, camera at eye level, light in front of you, plain background.
- Dress "as you would for an interview" [S260]. "We focus on what you say, not where you are or how you look" [S262].
- Close notifications; phone on silent; charger in.
- Do the Candidate Zone practice for this stage first. The practice video question is not assessed [S277] **Reported**.
- Notes allowed on paper beside you: your 3 stories (one line each), your market view (3 numbers), your "why Schroders" (3 words).
- If the timer is short: take one breath, say the first line of your answer structure, then speak.

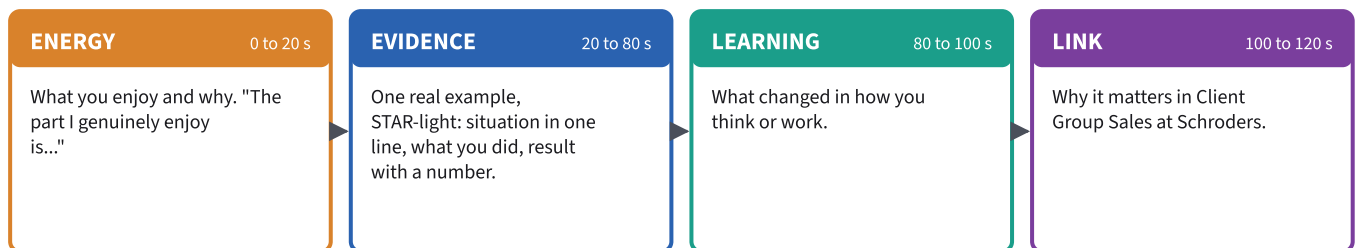

Figure 32. The shape of a strengths-based video answer: energy first, then evidence, learning and link. Built from Cappfinity's strengths method (energy, performance, use) and Schroders' own guidance to explain "what you enjoy" [S262, S283, S285] **Inferred**.

A WORKED MODEL, TO REBUILD IN YOUR OWN WORDS AND WITH YOUR OWN STORY

Prompt: "Tell us about a time you explained something complex to someone with no background in it."

Energy (15s): "Explaining things is one of the parts of any role I enjoy most. I like the moment someone gets it."

Evidence (60s): "[Your real example: who, what was complex, the analogy you used, how you checked they understood, what happened next, with one number.]"

Learning (15s): "I learned to ask them to explain it back rather than asking 'does that make sense?'"

Link (15s): "That's a big part of Client Group: taking an investment team's view and making it useful to a trustee or an adviser, within what we're allowed to say."

Timing rule. Prep time is not published for Schroders. Older cycles reported 30 seconds of preparation and 2-minute answers [S289, S290] **Reported**. Practise a 60-second and a 2-minute version of each core answer. If the clock runs out mid-sentence you move on automatically, so put the link line early if time is short.

Likely Cappfinity video prompts (none confirmed as Schroders questions)

#	Prompt	Type	Tests	Scaffold (energy, evidence, learning, link)
1	Why are you interested in a career in asset management?	Motivation	Genuine, specific interest	Moment it clicked; what asset managers do for savers; why the client side; one current fact.
2	Why Schroders, and why Client Group rather than an investment team?	Motivation	Research and fit	Structure, economics, moment (Part 12); energy for client work.
3	What do you think a Sales intern in Client Group does day to day, and which part appeals most?	Motivation	Realistic job preview	Three real tasks ^[S7] ; the one you would enjoy and why; a time you did something similar.
4	Tell us about a recent market or economic event and how it might affect what our clients ask us.	Commercial	Event-to-client chain	Event, number, mechanism, which client, what they would ask, what you would do.
5	What have you done to learn about this industry, and what surprised you?	Motivation	Curiosity, initiative	Two concrete actions; one surprise with a number; how it changed your view.
6	Where do you see yourself in five years, and how would this internship help?	Motivation	Fit with the programme	Graduate programme, qualification, client seat; what you would learn here first.
7	What does a great day look like for you?	Strengths	Energisers	A real day; what made it great; the strength behind it; where Client Group offers that.
8	What energises you, and what drains you?	Strengths	Self-awareness, fit	Honest energiser linked to the role; honest drainer and how you manage it.
9	Tell us about something you learned recently purely because you were curious.	Strengths	Curiosity	What, why, how you went about it, what you did with it.
10	Do you prefer starting things or finishing them?	Strengths	Consistency and reasons	Pick one honestly; why; how you cover the other side.
11	Do you prefer the big picture or the detail?	Strengths	Consistency and reasons	Pick one; example; how you guard against the weakness.
12	What do you find easy that other people seem to find hard?	Strengths	Natural strengths	One thing; evidence others noticed; how it would help in sales.
13	What tasks tend to stay at the bottom of your to-do list?	Strengths	Honesty about drains	A real task; why; what system stops it slipping.
14	When have you felt most in your element?	Strengths	Energy	Scene, what you were doing, why it felt natural.
15	How would friends or teammates describe you, and would you agree?	Strengths	Self-awareness	Three words others use; one you agree with and one you'd nuance.
16	What achievement are you most proud of, and why that one?	Strengths	Values	The achievement; why it mattered to you, not just the result.
17	Tell us about a time you built a relationship with someone very different from you.	Relationships	Rapport Builder	Energy line; how you found common ground; what it led to.
18	Describe a time you explained something complex to someone with no background in it.	Relationships	Explainer	Concept; your analogy; how you checked understanding.
19	Tell us about a time you changed someone's mind.	Relationships	Persuasion with integrity	Their view; your evidence; listening; the outcome; respecting their choice.

#	Prompt	Type	Tests	Scaffold (energy, evidence, learning, link)
20	Tell us about a time you dealt with an unhappy customer or member of the public.	Relationships	Composure, client focus	Listen, acknowledge, act, follow up; what you learned.
21	How do you keep in touch with and maintain a network?	Relationships	Relationship Deepener	Your actual habit; an example where it paid off for both sides.
22	Tell us about a time you had several competing deadlines.	Organisation	Planful, Time Optimiser	The list; how you ranked; who you told; result.
23	Describe an event, project or society activity you coordinated. What would you do differently?	Organisation	Coordination	Scale in numbers; plan; problem; fix; the change next time.
24	Tell us about a setback and what you did next.	Resilience	Bounceback	What went wrong; first action; what you changed; later result.
25	When have you had to stay calm when things were going wrong?	Resilience	Centred	What was at stake; your method; the outcome.
26	Tell us about a time you took the initiative without being asked.	Drive	Self-starter	The gap; your first step; who you involved; result.
27	Tell us about feedback that changed how you work.	Growth	Coachability	Feedback; reaction; change; evidence.
28	Describe a time you contributed to a team's success. What was your role?	Teamwork	Collaboration	Team goal; your specific part; how you helped others.
29	Tell us about a time you used a creative approach to overcome a challenge.	Resourcefulness	Reported at Schroders [S290]	Constraint; idea; test; result.
30	How has your thinking changed over the past year about something that matters to you?	Growth	Official phrasing hint [S262]	Old view; what changed it; new view; what you do differently.

How to rank the workplace scenarios

You will usually see a short workplace situation and four or so responses to rank from most to least effective [\[S262, S280\]](#). Four rules decide almost every ranking in a client-facing asset management seat **Inferred** :

1. **Rules first.** Anything that sends unapproved, out-of-date or inside information goes to the bottom.
2. **The client gets an honest, timely answer.** Acknowledge, give a time, keep promises.
3. **The owner decides.** Escalate to the relationship manager or diary owner with options, rather than deciding alone or dumping the problem.
4. **Initiative inside the lines.** Doing something useful now beats waiting, as long as rules 1 to 3 hold.

Likely work simulation scenarios, with a suggested ranking

S1. Client complaint email

RANK

SETUP	An IFA emails you: the Q3 factsheet for a fund they use is late and their client review is tomorrow. They are annoyed.
OPTIONS	A. Reply immediately with last quarter's factsheet so they have something. B. Acknowledge, apologise for the delay, check with the reporting team when the Q3 factsheet will be ready, and tell the IFA a time. Copy the relationship manager. C. Forward the email to the relationship manager and do nothing else. D. Reply saying factsheets are produced by another team and are not your responsibility.
BEST ORDER	B, C, A, D
WHY	B owns the client experience inside the rules. C is safe but slow. A sends out-of-date information that could mislead. D abandons the client.

S2. Three requests by 2pm

RANK

SETUP	It is 11am. RM1 wants a pitch book updated by 2pm for a final-round presentation. RM2 wants CRM notes from yesterday's meeting logged today. Your manager wants an event guest list by 5pm.
OPTIONS	A. Do them in the order they arrived. B. Start the pitch book, tell RM2 the notes will be done by 4pm, confirm the guest list for 5pm, and flag if the pitch book runs over. C. Ask your manager to choose the order for you before starting anything. D. Do the quick CRM notes first to clear your list, then the pitch book.
BEST ORDER	B, D, C, A
WHY	B ranks by deadline and stakes and manages expectations early. D is reasonable if the notes truly take minutes, but risks the fixed deadline. C is over-escalation for a clear call. A ignores stakes.

S3. The wrong number in the pack

RANK

SETUP	Twenty minutes before a client meeting you spot that a performance figure in the pack you built is for the wrong share class.
OPTIONS	A. Say nothing; the difference is small. B. Correct the slide yourself and reprint without telling anyone. C. Tell the RM immediately, give the correct approved figure and its source, and let them decide how to handle it in the meeting. D. Tell the RM after the meeting.
BEST ORDER	C, B, D, A
WHY	C is honest, fast and keeps the decision with the owner. B fixes the error but bypasses the record and approval. D lets the client see wrong data. A is misleading.

S4. Speaker drops out**RANK**

SETUP	The day before an adviser seminar with 40 guests, the fund manager speaker cancels.
OPTIONS	A. Cancel the event and email guests. B. Tell your manager now with two options: a named replacement from the same team, or a recorded update plus live Q&A. Draft the guest message for approval. C. Find a replacement yourself and tell your manager once it is sorted. D. Run the event with no change and hope guests don't mind.
BEST ORDER	B, C, A, D
WHY	B solves and escalates with options. C shows initiative but skips the owner. A is a last resort. D ignores the client experience.

S5. A client wants a view**RANK**

SETUP	On a volatile day, a family office client emails: "Should we sell our equity funds now?"
OPTIONS	A. Reply with your own view on whether to sell. B. Acknowledge, share the firm's latest published market commentary, and arrange a call with the RM and investment specialist. C. Tell them you can't discuss markets. D. Forward to the RM with no reply to the client.
BEST ORDER	B, D, C, A
WHY	B is helpful within the rules: published views, the right people, no personal advice. D is safe but leaves the client waiting. C is unhelpful. A risks unsuitable advice.

S6. Double-booked senior**RANK**

SETUP	Two senior RMs both booked the same fund manager for the same Thursday hour.
OPTIONS	A. Keep the first booking and tell the second RM. B. Lay out both requests with client, stage and deadline, and ask the person who owns the fund manager's diary to decide today. Offer alternative slots. C. Pick the one with the bigger client. D. Leave them to sort it out.
BEST ORDER	B, A, C, D
WHY	B makes the process fair and fast. A is a defensible rule but ignores stakes. C is you judging. D abdicates.

S7. Teammate not contributing**RANK**

SETUP	On an intern group project due Friday, one member has missed two check-ins.
OPTIONS	A. Do their part yourself. B. Message them privately, ask if something is wrong, agree a smaller piece they can deliver, and tell the group the plan. C. Report them to the programme manager straight away. D. Mention it in the final presentation.
BEST ORDER	B, A, C, D
WHY	B is fair, direct and keeps the team on track. A delivers but hides the problem. C escalates too early. D is public blame.

S8. CRM duplicates before a mail-out**RANK**

SETUP	Before a campaign email, you notice duplicate and out-of-date contacts in the list.
OPTIONS	A. Send anyway; duplicates are harmless. B. Flag it to the campaign owner, suggest a quick clean using agreed rules, and send once fixed. C. Delete records you think are wrong. D. Export the list to your laptop to fix it in Excel.
BEST ORDER	B, C, A, D
WHY	B protects data quality and the client experience. C is well meant but unilateral. A irritates clients. D takes personal data out of approved systems.

S9. Compliance-sensitive request**RANK**

SETUP	A client asks by email for this month's unpublished performance number and "any hot ideas".
OPTIONS	A. Send what you have; it's only a few days early. B. Explain politely that you can share published figures now and the month-end figure once released, and offer a call with the RM on market views. C. Ignore the email. D. Ask a colleague in the investment team for their ideas and pass them on.
BEST ORDER	B, C, D, A
WHY	B is courteous and inside the rules. C is poor service but no breach. D and A share unapproved information.

S10. A day-in-the-life video**RANK**

SETUP	You watch a short clip of a Schroders salesperson describing a day, then rate how much you would enjoy each task.
OPTIONS	Rate: client meetings; RFP writing; CRM updates; event logistics; market reading.
BEST ORDER	No right order
WHY	This tests consistency with Stage 2 and authenticity. Answer honestly. Say what energises you and show you know the dull parts exist.

9.2 The assessment centre

Exercise	What Schroders says	How to do well
Group exercise	"How you listen, contribute, collaborate and adapt in group settings, not who speaks the most or takes charge" [S262] . Candidates report a pack of information and a choice between options [S290, S292] Reported .	Propose a process and timing early. Summarise and build on others' points. Bring in quieter people with a specific question. Tie the choice to the client's need. Keep one eye on the clock.
Individual presentation	"A group activity, short presentation and interview" [S260] . Reported as: read information, pick an option, present findings [S290] Reported .	Recommendation first. Two or three reasons, each with a number. Risks and how to handle them. Next steps. Finish early rather than late.
Interview	"Assessors are looking to understand your underlying motivations and interests for the role alongside previous experiences" [S262] . Reported as HR plus a manager from the business area [S288, S49] Reported .	STAR with the energy line in front. Eight stories mapped to the advert's skills. One market view. Two questions to ask.

Scoring is "against clear criteria and an assessment skills framework ... not against other candidates" ^[S262]. You are not competing with the person next to you in the group exercise. Help them.

9.3 The question bank

Forty-four questions in six groups. Each shows what is really being tested, a structure (a scaffold, not a script), the facts to weave in and the trap. Rehearse out loud.

A. Motivation: why this, why here, why now

Q1 Why asset management?

TESTS Genuine interest versus a generic finance choice. **STRUCTURE** One moment you got interested; what the industry does for real people; why the client side.

WEAVE IN UK industry manages £10trn, half for overseas clients ^[S150]; retail now the largest client group ^[S150].

TRAP "I like markets" with no link to clients.

Q2 Why Schroders?

TESTS Mechanism, not adjectives; up to date on the deal. **STRUCTURE** Structure (central Client Group), economics (margin mix), moment (Nuveen). See Part 12.

WEAVE IN Client Group model ^[S72]; margins 6 to 57bp ^[S71]; Nuveen effective 1 Oct 2026 ^[S75].

TRAP "Prestigious family firm since 1804." Out of date this week.

Q3 Why Client Group rather than an investment team?

TESTS Whether you understand the client side is a career, not a consolation. **STRUCTURE** What energises you (explaining, relationships); what the three pillars do; one example of you doing it.

WEAVE IN Three pillars ^[S263]; Oomen's remit ^[S306].

TRAP Implying sales is a back-up for failing to get into investment.

Q4 Why sales specifically, rather than product or marketing?

TESTS Self-knowledge. **STRUCTURE** Name the activity you enjoy most (conversations, winning trust); acknowledge the others; show you know they are colleagues.

WEAVE IN Product, Marketing and Sales under one head ^[S306].

TRAP Dismissing the other teams.

Q5 What do you think a Sales intern here does day to day?

TESTS Realism. **STRUCTURE** Meeting packs, RFP and DDQ support, CRM, events, client requests, a project.

WEAVE IN Zurich Sales Activation posting ^[S7].

TRAP "Pitching to clients."

Q6 Where do you see yourself in five years?

TESTS Ambition that fits the programme. **STRUCTURE** Graduate programme, CFA Level 1, a client-facing seat, a specialism.

WEAVE IN Graduate programme and CFA support ^[S15].

TRAP A plan that leaves Schroders in year two.

Q7 Why now: what has changed at Schroders that makes this a good time?

TESTS Current awareness. **STRUCTURE** Client Group rebuilt 2025; Nuveen shelf; retail rule changes in 2027.

WEAVE IN ^[S72, S75, S168, S187].

TRAP Speculating about job cuts.

B. The firm

Q8 What do you know about Schroders' recent results?

TESTS Whether you read primary sources. **STRUCTURE** One headline, one strength, one weakness, one so-what.

WEAVE IN H1 2026: AUM £867.8bn, profit +46%, net outflows £8.3bn incl. one £6.6bn mandate ^[S70].

TRAP Quoting outflows without the context.

Q9 What does the Nuveen deal mean for clients?

TESTS Calm, accurate messaging. **STRUCTURE** What stays (brand, London, CEO, standalone year); what grows (shelf); what to watch.

WEAVE IN ^[S76, S309].

TRAP Promising nothing will change, or guessing at integration.

Q10 How does Schroders make money?

TESTS Commercial basics. **STRUCTURE** Fee rate times assets, by business; costs; profit.

WEAVE IN NOR £2,504.3m; margins by business ^[S71].

TRAP Saying "commission" or "trading profits".

Q11 What are Schroders' three businesses?

TESTS Map of the firm. **STRUCTURE** Public Markets, Schroders Capital, Wealth Management; Client Group sells across them.

WEAVE IN ^[S71].

TRAP Forgetting wealth.

Q12 Who is Schroders' biggest competitor?

TESTS Judgement about competition. **STRUCTURE** Depends on channel: BlackRock/L&G in passive and DC; M&G, aberdeen, Jupiter in UK wholesale; private markets firms in alternatives.

WEAVE IN Part 4 table [S130 to S140].

TRAP One name with no reasoning.

Q13 What is one weakness at Schroders?

TESTS Honesty without disloyalty. **STRUCTURE** Flows; context; what Client Group can do.

WEAVE IN ^[S70, S71].

TRAP Badmouthing or refusing to answer.

Q14 What are Schroders' values?

TESTS Whether you read the annual report. **STRUCTURE** Excellence, innovation, teamwork, passion, integrity; one example of each you can show.

WEAVE IN ^[S72].

TRAP Leaving out teamwork.

C. Markets and the industry

Q15 Tell us about a market story you are following.

TESTS Genuine interest and the event-to-client chain. **STRUCTURE** Event, number, mechanism, client, what you would watch.

WEAVE IN BoE 3.75%, 3 votes to raise ^[S232]; Schroders house view ^[S242].

TRAP A headline you can't explain two levels down.

Q16 What happens to bond prices when rates rise, and why?

TESTS Basic finance. **STRUCTURE** Fixed coupon; new bonds pay more; old bond price falls until yields match.

WEAVE IN 30-year gilts highest since 1998 ^[S237] **Reported**.

TRAP Getting the direction wrong under pressure.

Q17 Active or passive: which would you choose for your own pension?

TESTS A reasoned view. **STRUCTURE** Depends on asset class; low-cost core plus active where it adds value.

WEAVE IN ^[S152, S319].

TRAP Dogma either way.

Q18 What is the biggest risk to markets right now?

TESTS Macro awareness. **STRUCTURE** Name one risk, its channel, what would show it's happening.

WEAVE IN Long-term yields spike ^[S242]; concentration ^[S241].

TRAP Listing five risks with no depth.

Q19 How would you explain inflation to a new client?

TESTS Communication. **STRUCTURE** Plain words; one picture; what it does to their savings.

WEAVE IN CPI 3.1% Aug 2026 ^[S232].

TRAP Jargon.

Q20 What is a private market asset and why would a pension want one?

TESTS Industry vocabulary. **STRUCTURE** Unlisted companies, loans, property; illiquidity premium; long horizon.

WEAVE IN Mansion House 10% aim ^[S181].

TRAP Ignoring liquidity risk ^[S196].

Q21 What is an ETF, and what is an active ETF?

TESTS Product literacy. **STRUCTURE** Exchange-traded fund; active version has a manager; cheaper wrapper.

WEAVE IN Schroders active ETFs \$4.3bn ^[S230].

TRAP Saying ETFs are always passive.

Q22 What will the industry look like in five years?

TESTS Structured thinking. **STRUCTURE** Pick one of four views; evidence; counter-view.

WEAVE IN Part 5.7 ^[S154, S181, S196].

TRAP Vague "technology will change everything".

D. The role and commercial sense**Q23 A client says our fees are too high. What do you say?**

TESTS Value, not defensiveness. **STRUCTURE** Acknowledge; ask what they compare with; explain value; offer the published assessment of value; escalate pricing to the RM.

WEAVE IN Assessment of Value rules ^[S163, S164].

TRAP Offering a discount you can't authorise.

Q24 Why does a £6.6bn redemption hurt less than it sounds?

TESTS Margin thinking. **STRUCTURE** It was core solutions at about 6bp; revenue lost is about £4m a year.

WEAVE IN ^[S70, S71] **Inferred**.

TRAP Treating all assets as equal.

Q25 How would you prepare for a first meeting with a pension scheme?

TESTS Preparation and client empathy. **STRUCTURE** Public papers, size, liabilities, consultant, current managers, our relevant capabilities, one question to ask.

WEAVE IN 600+ UK pension clients ^[S27].

TRAP Leading with our products.

Q26 How would you measure whether a client event worked?

TESTS Data-driven Delivery thinking. **STRUCTURE** Attendance, follow-up meetings, pipeline, flows over a year; feedback.

WEAVE IN Salesforce campaign tracking ^[S7].

TRAP Counting attendees only.

Q27 What makes a good salesperson in asset management?

TESTS Values. **STRUCTURE** Listening, knowing the product and its limits, honesty, follow-through, patience over years.

WEAVE IN Client duration 4.6 years ^[S72].

TRAP "Being persuasive" alone.

Q28 How would you prioritise three urgent requests?**TESTS** Organisation. **STRUCTURE** Deadline, consequence, owner; renegotiate out loud; confirm in writing.**WEAVE IN** JD "manages expectations" [S263].**TRAP** Doing them in the order received.**Q29 What rules would you need to know in your first week?****TESTS** Compliance maturity. **STRUCTURE** Fair, clear, not misleading; approvals; professional vs retail; hospitality limits; inside information; data.**WEAVE IN** [S401, S39, S40, S402, S403].**TRAP** "Compliance handles that."**E. Competency and strengths (answer with energy, then evidence)****Q30 Tell us about a time you had to build a relationship with someone very different from you.****TESTS** Rapport and relationship building. **STRUCTURE** Energy line; STAR; what you learned about them; link to clients.**WEAVE IN** JD "trust-based relationships" [S263].**TRAP** A story where you did all the talking.**Q31 Tell us about a time you explained something complex to a non-expert.****TESTS** Explainer strength. **STRUCTURE** The concept; how you tested understanding; the result.**WEAVE IN** JD "adapt style" [S263].**TRAP** No check that they understood.**Q32 Describe a project or event you organised.****TESTS** Planning, coordination. **STRUCTURE** Scale with numbers; your plan; a problem; how you fixed it.**WEAVE IN** JD "event or project coordination" [S263].**TRAP** Group achievement with no "I".**Q33 Tell us about a time you were under pressure.****TESTS** Composure and method. **STRUCTURE** What was at stake; your method; the outcome; what you would repeat.**WEAVE IN** JD "composure" [S263].**TRAP** A story where pressure was self-inflicted and unresolved.**Q34 Tell us about something you started from scratch.****TESTS** Self-starter. **STRUCTURE** The gap you saw; what you did first; who you brought in; result.**WEAVE IN** JD "leading or launching projects" [S263].**TRAP** Something you merely joined.**Q35 Tell us about a mistake you made.****TESTS** Honesty and learning. **STRUCTURE** Real mistake; your part; fix; what changed after.**WEAVE IN** Cappfinity values authentic reflection [S285].**TRAP** A fake weakness.**Q36 Tell us about a time you disagreed with a teammate.****TESTS** Collaboration. **STRUCTURE** Their view fairly stated; how you resolved it; the relationship after.**WEAVE IN** AC group criteria: listen, collaborate [S262].**TRAP** Winning the argument as the point.**Q37 What energises you, and what drains you?****TESTS** Strengths fit. **STRUCTURE** Honest energiser linked to the role; a drainer you manage.**WEAVE IN** Strengths Profile method [S283].**TRAP** Saying nothing drains you.

Q38 Tell us about a time you used a creative approach to overcome a challenge.**TESTS** Resourcefulness. Reported as asked at Schroders ^[S290]. **STRUCTURE** Constraint; your idea; result.**WEAVE IN** ^[S290] **Reported**.**TRAP** Creative but pointless.**Q39 Tell us about feedback that changed how you work.****TESTS** Coachability. **STRUCTURE** Feedback; how you felt; what you changed; evidence it stuck.**WEAVE IN** Buddy and training culture ^[S263].**TRAP** Feedback you disagreed with and ignored.

F. Curveballs

Q40 Sell me this pen.**TESTS** Listening before pitching. **STRUCTURE** Ask what they need it for; match one feature to that need; close.**TRAP** Listing features without questions.**Q41 What would you do if you finished your work early?****TESTS** Initiative inside priorities. **STRUCTURE** Ask the team, read, offer help, tell your manager.**TRAP** "Go home early."**Q42 What is something you believe that most people disagree with?****TESTS** Independent thinking with reasons. **STRUCTURE** Claim, reason, number, counter.**WEAVE IN** Part 8.**TRAP** Something controversial and off-topic.**Q43 If you were CEO of Schroders tomorrow, what would you do first?****TESTS** Strategic sense and humility. **STRUCTURE** Clients through the integration; flows in equities; one idea.**WEAVE IN** ^[S70, S76].**TRAP** A radical plan with no evidence.**Q44 What would you do if a client asked you for a stock tip?****TESTS** Rules and courtesy. **STRUCTURE** Politely decline; explain you can share published views; refer to the RM.**WEAVE IN** COBS 4; MAR ^[S401, S402].**TRAP** Giving one.

9.4 Questions to ask them

Pick two. Each can only be asked by someone who has done the research, and each is sourced.

1. Since Client Group moved to "fewer core propositions", how do regional sales feed what they hear from clients back into Value Proposition? ^[S72]
2. How has the Client Group operating model changed a UK salesperson's week since 2025? ^[S72, S306]
3. Clients paused some long-dated commitments before completion. What are UK institutional clients asking about the Nuveen combination now? ^[S70]
4. After the first standalone year, which Nuveen capabilities do you think UK and European clients will want first? ^[S76]
5. With DC megafunds and six LGPS pools, does UK Institutional now sell whole-portfolio partnerships rather than single strategies? ^[S23, S183]
6. Where do active ETFs sit in an intermediary sales conversation compared with the fund version of the same strategy? ^[S230]
7. How does the Schroders Capital specialist sales team work alongside generalist relationship managers on a pension client? ^[S71]

8. CCI product summaries become mandatory a week before the internship starts. How much of that lands on Client Group? [\[S168\]](#)
9. What does sales effectiveness look like in Salesforce terms here? [\[S72, S7\]](#)
10. What distinguishes interns who convert to the 2028 graduate programme? [\[S263, S260\]](#)

DON'T ASK

"How many jobs will Nuveen cut?" (Nobody in the room can answer, and it sounds like it's about you.) "What does Schroders do?" "What are the hours?" (Ask your buddy later.)

PART 10

Interviewer briefing

Your interviewers have not been named. This part lists the people who shape Client Group and who might appear at a Coffee Hour or on a panel, using public professional information only. It then shows how to tell an early-careers assessor from a practitioner, and how to adapt.

10.1 Who might be in the room

Schroders says only that assessors are trained and use "an assessment skills framework" [\[S262\]](#). Candidate reports describe an early-careers or HR person plus a manager or senior person from the business area [\[S288, S289, S49\]](#) **Reported**. None of the people below is confirmed as an assessor.

Person	Public role	Career path (public)	Why they matter to you	Confidence
Matt Oomen	Global Head of Client Group; executive committee	Joined August 2025. Previously global head of distribution at BNY Investments, responsible for "product strategy, marketing and sales across 30 countries"; long career at BNY Mellon [S91, S306, S129] .	Top of your function. His remit words, "client experience" and "driving forward our sales capabilities" [S306] , are good material for "why Client Group".	Role Confirmed ; appearance unlikely
Phil Middleton	Head of UK (Client Group) since 1 Jan 2025	Joined Schroders in 1992; roles in distribution and marketing; later CEO North America and CEO Americas [S269] .	Leads the UK business your London seat sits in. A plausible Coffee Hour speaker.	Role Confirmed
Rachel Harris	Head of UK Institutional	Joined 2022; previously Head of DC and Retirement Solutions and business partner to the CEO [S270, S22] Reported .	Owns the institutional repositioning towards "long-term strategic partnerships" [S23] .	Reported
Jamie Fowler	Head of UK Wealth (intermediary), from May 2025	Covers "advisers, wealth managers, family offices and discretionary investors" [S25] .	Owns the intermediary channel, where gross inflows grew more than 40% in H1 2026 [S70] .	Confirmed
Ed Mitchell	Head of Client Group Strategy Execution and Delivery (new role, Sep 2025)	Ex-BNY Investments (Global Head of Distribution Business Operations); earlier Henderson Global Investors and Barclays [S20, S271] .	Probably runs what the JD calls "Delivery" Inferred .	Confirmed role
Karine Szenberg	Executive Vice Chair	Joined 2014; previously Global Head of Client Group and Global Head of Product and Marketing; 14 years at J.P. Morgan Asset Management [S267] .	Shaped today's Client Group; the CEO credited her with "re-focusing the team and doubling down on driving sales excellence" [S268] .	Confirmed

Person	Public role	Career path (public)	Why they matter to you	Confidence
Richard Oldfield	Group CEO	Joined October 2023 as CFO from PwC; CEO since 8 Nov 2024 ^[S306] .	Strategy talking points; reports to Nuveen's CEO from 1 Oct 2026 ^[S76] .	Confirmed
Lauren Hillier	Emerging talent programme manager (per a third-party org chart); earlier "Early Careers Recruitment Specialist"	Earlier at Dentsu Aegis Network ^[S274, S297] Reported .	Early-careers team; her current remit may be Wealth Management rather than Client Group.	Reported

IDENTITY UNCERTAINTY

Two further Schroders early-careers recruiters post publicly about the programme, but their job titles could not be confirmed, so they are not named here ^[S272, S273]. Nothing personal was researched about anyone. If you are given names before the day, check each person's current title on the Schroders site before relying on this table.

10.2 Recruiter or practitioner? How to tell, and how to adapt

Signal	Early-careers or HR assessor	Practitioner from Client Group
Introduction	"Emerging Talent" or "Early Careers"; they brief and time the exercises.	A desk or team: "UK Intermediary", "Institutional client service", "Product".
Questions	Framework-led: "What did <i>you</i> do?", "What was the result?", follow-up probes, strict timing.	Off-script: "What fund would you pitch now?", "How would you explain active versus passive to an IFA?"
Note-taking	Continuous, against a grid.	Lighter; more conversation.
How to pitch your answer	Make the structure visible: signpost situation, action, result. Say the result with a number. Keep to time.	Lead with a market view or client insight. Show commercial "so what". Ask a question back where natural.
Question to ask them	Programme structure, buddy system, how the 2028 conversion works ^[S263] .	How the Client Group changes altered their week; wholesale versus institutional dynamics; the Nuveen shelf.

For both: show energy. That is how Cappfinity-style scoring reads authenticity ^[S285].

10.3 Reading the room live

- **If they lean in or write fast**, you are on something they score. Finish the point cleanly; don't add a second example.
- **If they look at the clock or the grid**, compress: result and link, then stop.
- **If they interrupt**, answer the new question first, then offer to finish the old one (Part 11.3).
- **If they challenge a fact**, check it calmly. "You may well be right; my source was the H1 results. Either way, the point is..."
- **If there are two assessors**, answer the person who asked, then include the other with your eyes on the result line.

This is about adapting your communication, which is on the JD, not about managing people. The same honest answer, pitched at the right level.

PART 11

The scenario playbook

A method for answering any "what would you do" question and holding your frame when pushed, then three scenarios for every line of the JD, five hard composure scenarios with decision trees, and a CV grill drill.

11.1 The four-step protocol: steady, sort, act, close

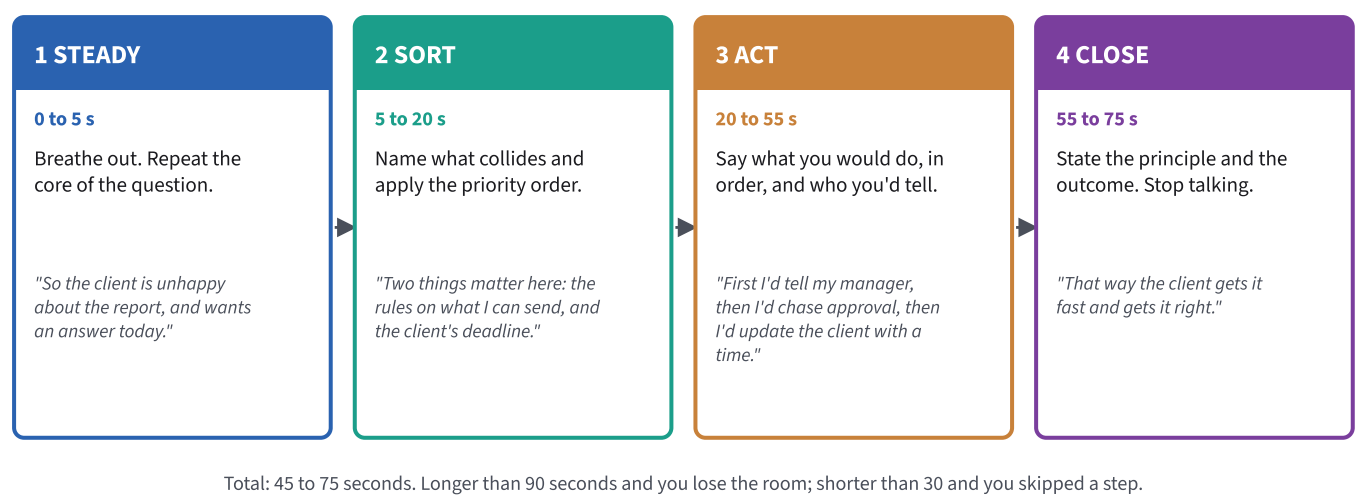

Figure 33. The four-step answer protocol for any scenario. Timings are a coaching heuristic built for this pack **Inferred**, not a Schroders rule.

Step	What you do	Phrases that execute it
Steady	Breathe out. Restate the core of the problem so they know you heard it.	"So the situation is..." / "Let me make sure I've got this: ..." / "The key issue seems to be..."
Sort	Name what collides. Apply the priority order.	"Two things matter here: X and Y." / "The rule comes first, then the client, then speed." / "What I don't know yet is..."
Act	Say what you would do, in order, and who you would tell.	"First I'd..., then I'd..., and I'd tell [owner] by [time]." / "I'd put it in writing so there's a record."
Close	State the principle and the outcome. Stop talking.	"That way the client gets it fast and gets it right." / "The principle is I tell people early."

11.2 The priority order when good things collide

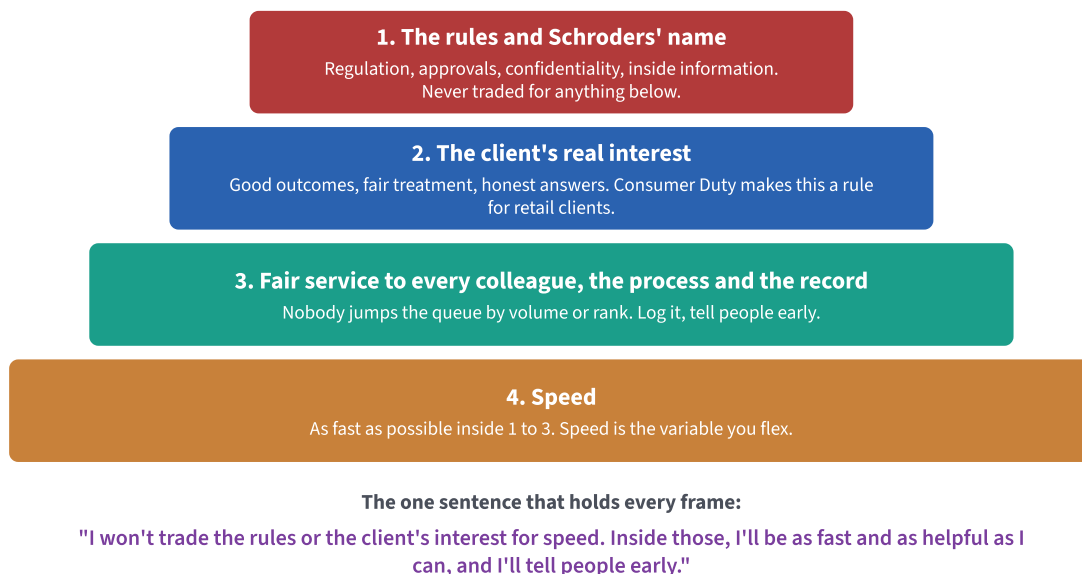

Figure 34. Priority order when good things collide in a Client Group seat. Built by the author from the JD and the FCA rules in Part 6 **Inferred**.

Why this order in a Client Group seat:

- **Rules first.** They carry personal and firm-wide consequences: financial promotions, inside information and data [\[S401, S402, S403\]](#).
- **The client's real interest second.** For retail outcomes that is itself a rule under Consumer Duty [\[S161\]](#), and trust is what an active manager sells.
- **Fairness and the record third.** Client Group is a shared hub, so queue-jumping by rank breaks it.
- **Speed last.** Speed is what you flex **Inferred**.

11.3 Eight ways assessors break a frame, and the counter to each

1. Interruption <i>They cut in mid-answer.</i> Stop. "Sure." Answer the new point in one line, then: "To finish my first point..."	2. Flat contradiction <i>"That's wrong."</i> "Tell me more." If they're right, update. If not: "I see it differently, because..."
3. Silence <i>They say nothing after you finish.</i> Don't fill it with a new answer. Wait three seconds, then: "Would it help if I went deeper on any part?"	4. Escalation <i>"And now the client threatens to leave."</i> Same priority order, bigger stakes. Escalate to your manager sooner, not the rules later.
5. Authority squeeze <i>"The MD says just do it."</i> "I'll do it the moment it's approved, and I'll chase approval now." Rank doesn't change the rule.	6. False choice <i>"Break the rule or lose the client?"</i> Find the third door: "Neither. I'd tell the client when they'll get it, and get it approved fast."
7. Knowledge trap <i>A fact question you can't answer.</i> "I don't know that figure. Here's how I'd find it, and here's what I do know."	8. Invitation to badmouth <i>"Isn't [rival / old boss] a bit useless?"</i> Stay generous and specific: "They do X well. What I'd do differently is..."

Figure 35. Eight ways assessors break a frame, with the counter to each. Author's synthesis of common interview practice Inferred.

Staying calm physically

- **Breathe out first.** A long exhale (four seconds) before you speak slows the heart rate more than a deep breath in.
- **Feet flat, hands still and visible.** On video, rest forearms on the desk.
- **Slow the first sentence on purpose.** The rest follows its pace.
- **Hold a pause.** "Let me think about that for a second" is always acceptable. Three seconds of silence feels long to you and normal to them.
- **Anchor on paper.** Keep a card with the four protocol words and the one-sentence frame.

General composure practice Inferred; not Schroders guidance.

11.4 The scenario ladder: every JD line, three rungs

JD line	EASY	MEDIUM	HARD
1. Markets and opinions	What has caught your eye in markets?	Defend a view on active versus passive	The client blames the market on you
2. Finance knowledge with clients	Explain a bond to a non-expert	A macro question you can't answer	Two clients, opposite fears
3. Self-starter	Week one, nothing to do	You spot a better way	Your society project that failed
4. Composure under pressure	Three deadlines, one afternoon	The live mistake	Assessment centre meltdown
5. Communication	Same fact, three audiences	The cold call	Writing to a senior person
6. Organisation and events	Diary clash	The event with 40 guests and a missing speaker	Tools under pressure
7. Analytical problem solving	What is the client really asking?	The data doesn't match	Competitor analysis
8. Teamwork and trust	The quiet teammate	A colleague takes credit	Client need versus colleague request
9. Value Proposition	Spot a gap	Competitor fee cut	Green claims
10. Sales Activation	Prepare a meeting brief	A complaint on a call	Cross-region request
11. Delivery	Clean the CRM	Use AI to write a client note	Measure engagement

Figure 36. The scenario ladder: every JD line in this role, three rungs from easy to hard. Full cards follow. Scenarios are the author's constructions from the JD **Inferred**.

Each card below gives the setup, the trap, what to say, why it works (with a source), the twist the interviewer will add, and how to hold. Green is easy, amber medium, red hard.

1. Markets and opinions

JD line: "Shows genuine interest in asset management and current market trends, with the ability to discuss the impact of economic events on investments and form well-reasoned opinions on commercial or financial matters."

What has caught your eye in markets?		EASY
SETUP	The assessor opens with: "What is one market story you have followed recently and why does it matter to our clients?"	
TRAP	Picking a headline you cannot explain two levels down, or reciting a number with no "so what".	
SAY	Name one story, one number, one mechanism, one client. "The Bank of England's path on rates matters to a UK DB pension client because it moves gilt yields, which moves the value of their liabilities." Then say what you would watch next.	
WHY	The JD asks you to "discuss the impact of economic events on investments". A chain from event to client is exactly that skill. [S232]	
TWIST	"And what would change your mind?"	
HOLD	Give one data point that would falsify your view. Holding a view and naming its weak point is the frame.	

Defend a view on active versus passive**MEDIUM**

SETUP	"Passive is cheaper and usually wins. Why would anyone pay Schroders' fees?"
TRAP	Getting defensive, or conceding completely. Both lose.
SAY	Concede the fact, then narrow the claim. "On average, after fees, many active funds do lag their index over long periods. [S319, S321] The case for a firm like Schroders sits where indices are weak or absent: private markets, solutions, less efficient markets, and clients who need an outcome, not a benchmark."
WHY	You show you know the evidence and you still find the commercial logic. That is a "well-reasoned opinion". [S71]
TWIST	"So you're saying active is dead in large-cap US equity?"
HOLD	"Harder to justify there, yes. That is why the mix matters more than any single fund." Do not retreat further than the evidence.

The client blames the market on you**HARD**

SETUP	Role-play: a client says, "Your fund fell 8% this quarter. Explain yourself."
TRAP	Guessing at reasons for the fall, promising a rebound, or apologising for the market.
SAY	Acknowledge, clarify, commit. "That is a fair question and you should get a proper answer. Can I check which share class and period you're looking at? I'll come back today with the attribution from the investment team, and I'd like to set up a call with the portfolio manager."
WHY	An intern should never improvise performance explanations or forecasts. Communications with clients must be fair, clear and not misleading. [S401] Promises of recovery are exactly what the rules forbid.
TWIST	"I don't want the fund manager. I want your view, now."
HOLD	"My honest view is that I don't have the full attribution in front of me, and a guess from me wouldn't help you. You'll have it today."

2. Finance knowledge with clients**JD line:** "Demonstrates moderate understanding of finance, able to discuss macro-level topics with clients and articulate insights effectively."**Explain a bond to a non-expert****EASY**

SETUP	"Explain to me, as if I were a new charity trustee, why bond prices fall when rates rise."
TRAP	Jargon. Or a technically perfect answer that takes three minutes.
SAY	Use one picture. "A bond pays a fixed amount each year. If new bonds pay more, nobody will pay full price for the old one, so its price drops until its return matches the new rate." Then check understanding: "Does that land?"
WHY	The JD asks you to "articulate insights effectively" and to "adapt style to different audiences". Checking understanding is the client-service habit Consumer Duty's consumer understanding outcome points to. [S161]
TWIST	"So should our charity sell its bonds now?"
HOLD	"That depends on what the money is for and when you need it, and it's a decision for you and your adviser. What I can do is send you our latest views and set up a proper conversation."

A macro question you can't answer**MEDIUM**

SETUP	In a client lunch the client asks you what the yield curve is saying about recession.
TRAP	Bluffing. The follow-up question will expose it.
SAY	Say what you know and flag what you don't. "An inverted curve has historically been read as a recession signal, though the signal has been less reliable recently. Our economics team publishes on exactly this; I'll send you their latest piece."
WHY	Honest limits build trust faster than a confident guess. Schroders publishes economic views you can point to. [S242]
TWIST	"You're the Schroders person here. What's the house view?"
HOLD	Only quote a house view you have actually read, with its date. Otherwise: "I'd rather send you the house view verbatim than paraphrase it wrongly."

Two clients, opposite fears**HARD**

SETUP	A pension trustee fears inflation. A family office fears recession. Both ask you, the same week, "What should we be worried about?"
TRAP	Giving each what they want to hear, which means contradicting yourself.
SAY	Keep one consistent set of facts and tailor the relevance. The same rate path matters differently to a liability-driven pension and to a growth-seeking family office. Refer both to the house research and the right specialist.
WHY	Consistency across clients is part of treating clients fairly. Tailoring relevance, not facts, is the skill. [S161]
TWIST	"Your colleague told us the opposite last month."
HOLD	"Let me check what was said and what has changed since. If our view moved, you deserve to know why."

3. Self-starter

JD line: "Acts as a self-starter who is driven and passionate, willingly takes initiative, and seeks out opportunities, evidenced by leading or launching projects, societies, or volunteering activities."

Week one, nothing to do**EASY**

SETUP	It is day three. Your manager is travelling and you have no task.
TRAP	Waiting. Or inventing a big project nobody asked for.
SAY	Ask the team what is coming up this week, offer to take the admin off a busy analyst, read the latest fund factsheets and Schroders insights, and send your manager a two-line note: "Here's what I've picked up. Anything you'd rather I prioritised?"
WHY	Initiative inside the team's priorities, made visible to the manager. That is what "seeks out opportunities" means in a 10-week internship. [S263]
TWIST	"Someone on another desk offers you a more interesting task."
HOLD	Say yes in principle, then check with your own manager first. Initiative never skips the line manager.

You spot a better way**MEDIUM**

SETUP	You notice the team rebuilds the same client meeting pack by hand every week.
TRAP	Rebuilding it your way without asking, or criticising the current process.
SAY	Build a small prototype in your own time, show one person, ask what you're missing. "I tried templating the pack; it saves about an hour. Is there a reason it's done by hand I should know about?"
WHY	The Delivery pillar exists to "drive efficient, data-driven processes". Asking why before changing respects controls you may not see (approvals, data rules). [S263]
TWIST	"It's done by hand because Compliance has to approve every version."
HOLD	"Then could the template be pre-approved and only the numbers change?" Keep the control, remove the waste.

Your society project that failed**HARD**

SETUP	"Tell me about something you launched that didn't work."
TRAP	Picking a fake failure, or blaming others.
SAY	Real failure, your part in it, what you changed, what happened next time. Keep the lesson specific: "I learned to test demand with ten people before booking a room for a hundred."
WHY	Cappfinity-style strengths assessment rewards authentic reflection and learning, not polish. [S262, S285]
TWIST	"Wasn't that just bad luck?"
HOLD	"Partly, but the part I controlled was the testing, and I changed that." Own your share, don't take all of it.

4. Composure under pressure

JD line: "Maintains composure and methodical thinking under pressure, balancing commitments and delivering results even in high-pressure environments."

Three deadlines, one afternoon**EASY**

SETUP	At 2pm you have a pitch book edit due at 4pm, an event list due at 5pm and a CRM clean-up due end of week. A salesperson asks for a new chart by 3pm.
TRAP	Saying yes to everything, then missing one silently.
SAY	Sort by deadline and consequence, then renegotiate out loud. "I can do the chart by 3:30 if the event list moves to 10am tomorrow. Which matters more to you?" Confirm in writing.
WHY	The JD asks you to manage "time, tasks, and expectations". Expectations are managed by telling people early. [S263]
TWIST	"Everything is urgent. Just do it all."
HOLD	"Then I need you to pick the order, because I can't do all four well by five." Calm, factual, no drama.

The live mistake**MEDIUM**

SETUP	You notice, 20 minutes before a client meeting, that a number in the pack you prepared is wrong.
TRAP	Hoping nobody notices, or fixing it silently in a version that skipped approval.
SAY	Tell the salesperson now, with the correct number and its source. Let them decide: reprint, correct verbally, or pull the slide. Log it afterwards.
WHY	Client materials usually go through approval. A silent edit breaks the record. Correcting before the client sees it is the fair, clear, not misleading standard. [S401]
TWIST	"Just change it, no one will know."
HOLD	"I'd rather we correct it verbally in the meeting than hand over a version Compliance hasn't seen."

Assessment centre meltdown**HARD**

SETUP	In the group exercise, the brief changes halfway and the group panics.
TRAP	Taking over loudly, or going silent.
SAY	Steady the group: "Let's take one minute to re-read the new brief and agree the three things that changed." Then assign parts and keep time.
WHY	Assessors watch process under pressure, not just the answer. Method is visible. [S262]
TWIST	An assessor interrupts: "You have five minutes left."
HOLD	"Then we present what we have, with one line on what we'd do next." Deliver something, not nothing.

5. Communication

JD line: "Confident, authentic communicator with strong written and verbal skills, able to adapt style to different audiences, present clearly, and build rapport, whether in person, over the phone, or in client-facing situations."

Same fact, three audiences**EASY**

SETUP	"Explain our new fund in one sentence to a pension CIO, an IFA, and your grandmother."
TRAP	Three versions that are the same sentence with different words.
SAY	Change the frame, not the fact. CIO: risk, return, fit in the portfolio. IFA: suitability, cost, what to tell their client. Grandmother: what it buys and why.
WHY	Adapting to audience is written into the JD. Retail audiences also bring stricter promotion rules than professional ones. [S401]
TWIST	"Now do the grandmother version, but she's asking if it's safe."
HOLD	"No investment is guaranteed; the value can go down as well as up." Never trade a risk warning for rapport.

The cold call**MEDIUM**

SETUP	Role-play: phone an IFA who has never heard of you to invite them to a Schroders event.
TRAP	A script read at speed, or pushing a product.
SAY	Name, reason, value, ask, exit. "We're running a session on private markets for advisers on the 14th, with CPD. Would it be useful? If not, no problem." Listen more than you speak.
WHY	Events and relationship building sit in Sales Activation. An intern invitation is marketing, not advice. [S263]
TWIST	"Is this fund right for my client Mrs Jones?"
HOLD	"I can't comment on a specific client. I can send you the fund documents and put you in touch with the sales team."

Writing to a senior person**HARD**

SETUP	You must email the head of a sales team you've never met to ask for 15 minutes.
TRAP	A long email about yourself.
SAY	Three lines: who you are, why them specifically, one easy ask with two time options. Subject line that says the ask.
WHY	Senior people read the first line. Written clarity is on the JD list. [S263]
TWIST	No reply after a week.
HOLD	One short polite follow-up; then ask your buddy or manager whether there's a better route.

6. Organisation and events

JD line: "Manages time, tasks, and expectations effectively, demonstrating event or project coordination skills, diary management, and successful use of organisational tools."

Diary clash

EASY

SETUP	Two senior salespeople both want the same client slot for a meeting with the same fund manager.
TRAP	Choosing yourself based on who shouts louder.
SAY	Lay out both requests with the facts (client, size of opportunity, deadline) and ask the person who owns the fund manager's diary to decide. Offer an alternative slot to the other.
WHY	You are the process, not the judge. The escalation route protects you and gives fair service to both. [S263]
TWIST	"I'm more senior, just book me."
HOLD	"I'll put your request first on the list to [owner] with your reasons. It's their call, and I'll tell you within the hour."

The event with 40 guests and a missing speaker

MEDIUM

SETUP	The day before a client seminar, the fund manager speaker drops out.
TRAP	Telling guests nothing, or cancelling without asking.
SAY	Tell your manager immediately with two options: a named replacement from the same team, or a recorded update plus Q&A later. Draft the guest message for approval.
WHY	Coordination is judged on the plan B, not the plan A. Client communication should be approved before it goes. [S263]
TWIST	"The replacement is a junior analyst. The clients are senior."
HOLD	"Then we frame it as a deep dive with the analyst who runs the numbers, plus a follow-up call with the manager."

Tools under pressure

HARD

SETUP	"How do you keep track of 20 small tasks?"
TRAP	"I'm very organised." An adjective, not a system.
SAY	Name the system: one task list, sorted daily by deadline and owner, a calendar block for deep work, a Friday review. Give one example where it saved a deadline.
WHY	The JD asks for "successful use of organisational tools". Show the tool and the result. [S263]
TWIST	"What happens when your system fails?"
HOLD	"I tell the person early and agree a new time. The failure is silence, not lateness."

7. Analytical problem solving

JD line: "Analytical and resourceful, quickly understands client issues, listens actively, and identifies practical, effective solutions using available tools and networks."

What is the client really asking?

EASY

SETUP	A client email: "Can you send me everything you have on your emerging market debt fund?"
TRAP	Sending 40 attachments.
SAY	Ask one clarifying question: "Happy to. Is this for a manager review, a new allocation, or a board paper? I'll send the most useful three documents first."
WHY	"Quickly understands client issues" and "listens actively" means finding the need behind the request. [S263]
TWIST	"Just send everything."
HOLD	Send the pack with a one-paragraph guide to what is where. Serve the request and the need.

The data doesn't match**MEDIUM**

SETUP	The flows number in the CRM and in the finance report differ by £20m.
TRAP	Picking the one you like.
SAY	Report both, say which system each came from, and ask the owner of the data which is the record. Note the date and timing differences you suspect.
WHY	The Delivery pillar is about data-driven processes. Unresolved data is a finding, not a failure. [S263]
TWIST	"The MD wants one number in 10 minutes."
HOLD	"The finance figure is the official one; the CRM figure is £20m higher and I'm finding out why."

Competitor analysis**HARD**

SETUP	"Our rival just launched a cheaper version of our flagship fund. What do we do?"
TRAP	"Cut fees." A reflex, not an analysis.
SAY	Structure it: which clients are at risk, what they value besides price, whether the rival product is truly comparable, what it costs us to respond. Then a recommendation with one number you'd need.
WHY	Value Proposition "reviews competitor activity". A structured answer beats a quick one. [S263]
TWIST	"You have 30 seconds."
HOLD	"Check which clients care most about price, protect those with share-class terms if the numbers work, and lead on performance and service with the rest."

8. Teamwork and trust

JD line: "Works well in teams, prioritises client needs, and develops strong, trust-based relationships with clients and colleagues, maintaining a professional network."

The quiet teammate**EASY**

SETUP	In the group exercise one person has not spoken.
TRAP	Ignoring them, or putting them on the spot harshly.
SAY	Invite with a specific question: "You mentioned the data earlier; what did you see in the flows table?"
WHY	Assessors score contribution to the group's result, not airtime. [S262]
TWIST	They say, "I don't know."
HOLD	"No problem, could you keep time for us?" Give them a real role.

A colleague takes credit**MEDIUM**

SETUP	At the end of the internship another intern presents your analysis as their own.
TRAP	Public confrontation, or saying nothing and resenting it.
SAY	Private, factual, forward-looking conversation first. Then make sure your manager has seen your work directly, through your own regular updates.
WHY	Trust-based relationships include the difficult ones. A record of your own updates protects you without drama. [S263]
TWIST	"Would you tell your manager?"
HOLD	"If it happened again, yes, factually. The first time I'd talk to them."

Client need versus colleague request**HARD**

SETUP	A salesperson asks you to send a client a product note before it has been approved, "because they asked for it".
TRAP	Sending it to be helpful.
SAY	"I want to get it to them fast. I'll chase the approval now and send it the minute it clears. Shall I tell the client it's coming today?"
WHY	Financial promotions must be approved before they are communicated. Putting the client first includes not sending them unapproved material. [S401]
TWIST	"It's a professional client, rules are lighter."
HOLD	"Some rules are lighter, but our internal approval still applies. I'll get it cleared fast."

9. Value Proposition

JD line: "Value Proposition: Develops tailored investment offerings by analysing market trends, reviewing competitor activity, and working alongside investment teams to create innovative solutions that our clients value."

Spot a gap**EASY**

SETUP	"If you could launch one product at Schroders for UK savers, what would it be?"
TRAP	A product that already exists, or one that ignores regulation.
SAY	Anchor on a client need, a trend and a Schroders strength. For example, private-market access for DC pensions through a long-term fund structure, tied to the pension reforms. Mention the risks: liquidity, fees, value for money.
WHY	Private markets for DC is a live policy theme and a Schroders capability. [S181] [S71]
TWIST	"What would stop it working?"
HOLD	"Liquidity mismatch, platform plumbing and fee caps. I'd test demand with three large DC schemes first."

Competitor fee cut**MEDIUM**

SETUP	A rival cuts fees on a comparable fund by 20 basis points.
TRAP	Matching blindly.
SAY	Ask what clients actually pay for, what the fee cut costs us across the book, and whether a new share class for large clients is a better lever.
WHY	Fees are regulated for value: UK fund managers must publish assessments of value. [S163, S164]
TWIST	"The Board wants an answer tomorrow."
HOLD	"Then I'd give them the three numbers that decide it and a recommendation, with the uncertainty stated."

Green claims**HARD**

SETUP	An investment team wants to market a fund as "sustainable" to retail clients.
TRAP	Agreeing because the fund holds renewables.
SAY	Check the label and naming rules. Sustainability terms in names and marketing for UK retail funds now carry rules, and all claims must be fair, clear, not misleading and capable of being substantiated.
WHY	The FCA's anti-greenwashing rule and the SDR naming and marketing rules apply. [S165, S166]
TWIST	"Everyone else does it."
HOLD	"Then everyone else carries the risk. We'd rather the claim survives an FCA review."

10. Sales Activation

JD line: "Sales Activation: Delivers local sales strategies and deepens client relationships, focusing on growth opportunities and ensuring high standards of client service across regions."

Prepare a meeting brief

EASY

SETUP	A salesperson meets a local authority pension fund tomorrow. "Give me one page."
TRAP	Ten pages. Or one page with no client context.
SAY	Client: size, current holdings with us, pooling arrangements, recent news. Us: relevant funds and performance (approved figures). Ask: what they want. Risks: anything open with the client.
WHY	UK local government pension pools reshape who the buyer is. Knowing that makes the brief useful. [S185]
TWIST	"They're not a client yet. How do you know their holdings?"
HOLD	"Public committee papers and annual reports. I'd say which facts are public and which are our estimates."

A complaint on a call

MEDIUM

SETUP	An adviser calls, angry about a late fund report.
TRAP	Defending the process.
SAY	Listen fully. Apologise for the experience. State what you will do and by when. Log it so it can be tracked as a complaint if it meets the definition.
WHY	Complaints must be handled and recorded properly. Consumer Duty expects firms to act on poor outcomes. [S161]
TWIST	"I want compensation."
HOLD	"I'll pass that request to the team that handles complaints today, and they'll respond formally."

Cross-region request

HARD

SETUP	An Asia-based colleague asks you to send UK marketing material to their Singapore client.
TRAP	Forwarding it.
SAY	Check which jurisdiction's approval the material has. UK-approved material is not automatically fine abroad. Ask Compliance or the local team.
WHY	Marketing rules are local. "Across regions" in the JD means knowing that approval is jurisdiction-specific. [S401]
TWIST	"It's the same fund."
HOLD	"Same fund, different rulebook. I'll check fast."

11. Delivery

JD line: "Delivery: Partners with technology and operations to drive efficient, data-driven processes, leveraging insights and tools to continuously enhance client engagement."

Clean the CRM

EASY

SETUP	You're asked to clean 2,000 contact records in the CRM.
TRAP	Deleting duplicates without checking.
SAY	Agree the rules first (which record wins), test on 50, show your manager, then run. Keep a log of changes.
WHY	Client data is personal data. Accuracy and a change log matter under data protection rules. [S403]
TWIST	"Can't you just export it to your laptop and fix it in Excel?"
HOLD	"I'd keep it inside our approved systems. Personal data shouldn't leave them."

Use AI to write a client note**MEDIUM**

SETUP	A colleague suggests using a public AI chatbot to draft a client update from internal performance data.
TRAP	Pasting internal data into a public tool.
SAY	Use only approved internal tools. Any client-facing text still goes through normal review.
WHY	Confidential and client data must stay in approved systems. Firms are adopting AI inside controlled environments. [S154]
TWIST	"It's only a draft."
HOLD	"The data leaves the building the moment I paste it. I'd use our approved tool."

Measure engagement**HARD**

SETUP	"How would you measure whether our client newsletter works?"
TRAP	Open rates only.
SAY	Chain the metrics: opens, clicks, meetings booked, then flows attributed with care. Pair numbers with five client conversations.
WHY	"Data-driven processes" and "client engagement" together mean linking activity to outcomes. [S263]
TWIST	"Attribution is impossible."
HOLD	"Exact attribution is. Direction isn't: compare clients who engage with those who don't, over a year."

11.5 The composure set: five hard scenarios with decision trees

These five come up in some form at almost every client-facing assessment centre. Learn the trees well enough to draw them on a napkin.

1. Two senior people want the same scarce resource

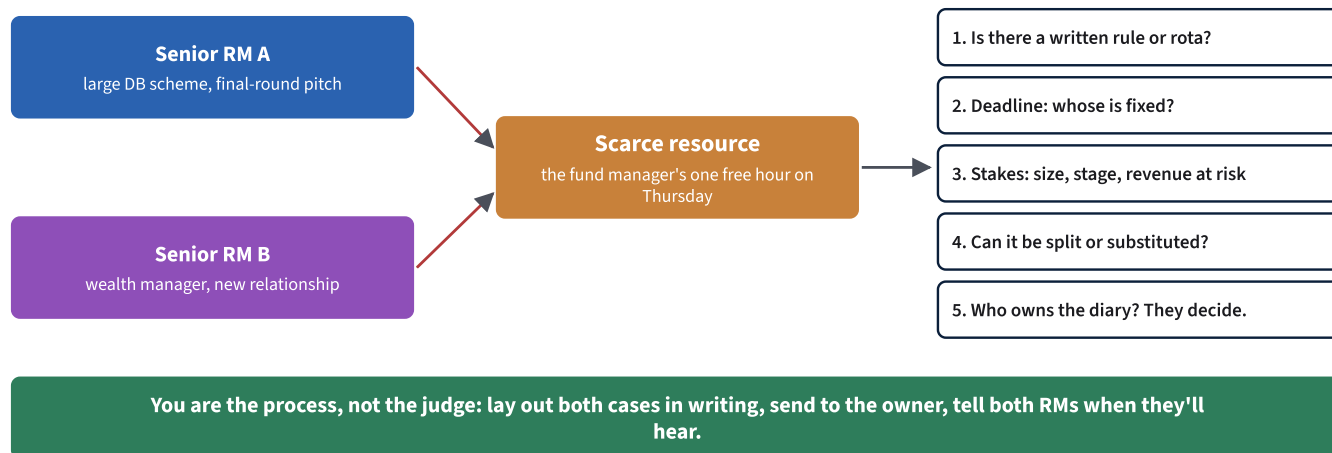

Figure 37. The scarce-resource collision and how it is allocated. The scenario and allocation test are the author's construction [\[Inferred\]](#), matching the JD's "diary management" and "manages expectations" lines [\[S263\]](#).

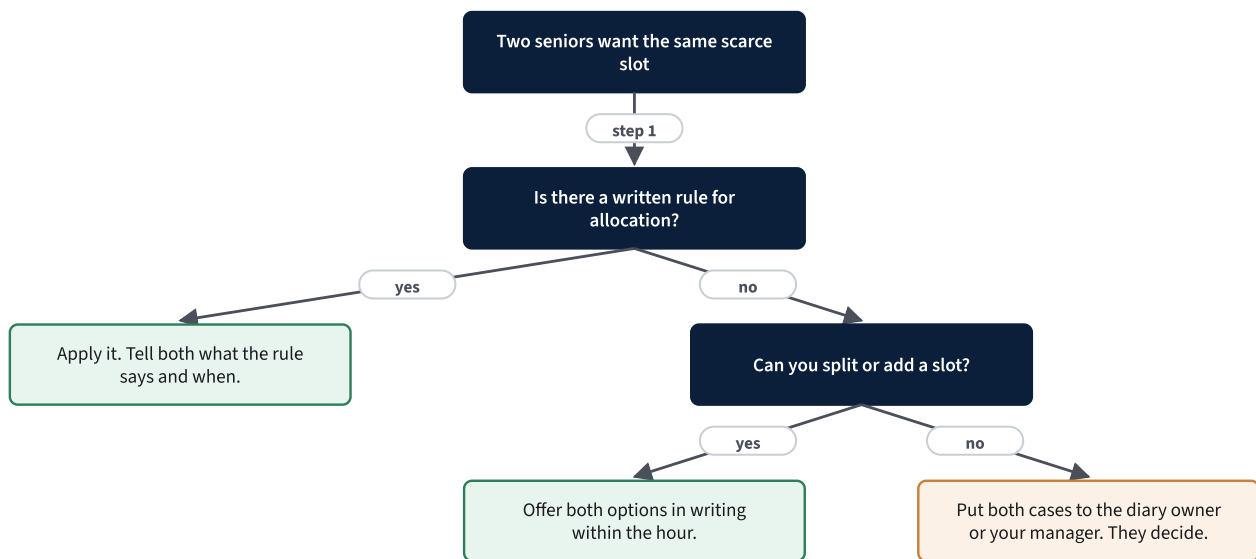

Figure 38. Decision tree: Two senior salespeople both demand the one fund-manager slot. Draw it from memory: the question at each node is what matters. Author's construction from FCA principles cited in the text **Inferred**.

SAY THIS

"I wouldn't pick between them myself. I'd put both requests in writing, with the client, the stage and the deadline, to whoever owns the fund manager's diary, and tell both of them they'll hear within the hour. If there's a way to split the slot or offer a specialist instead, I'd put that in too."

2. A senior person asks you to skip a control

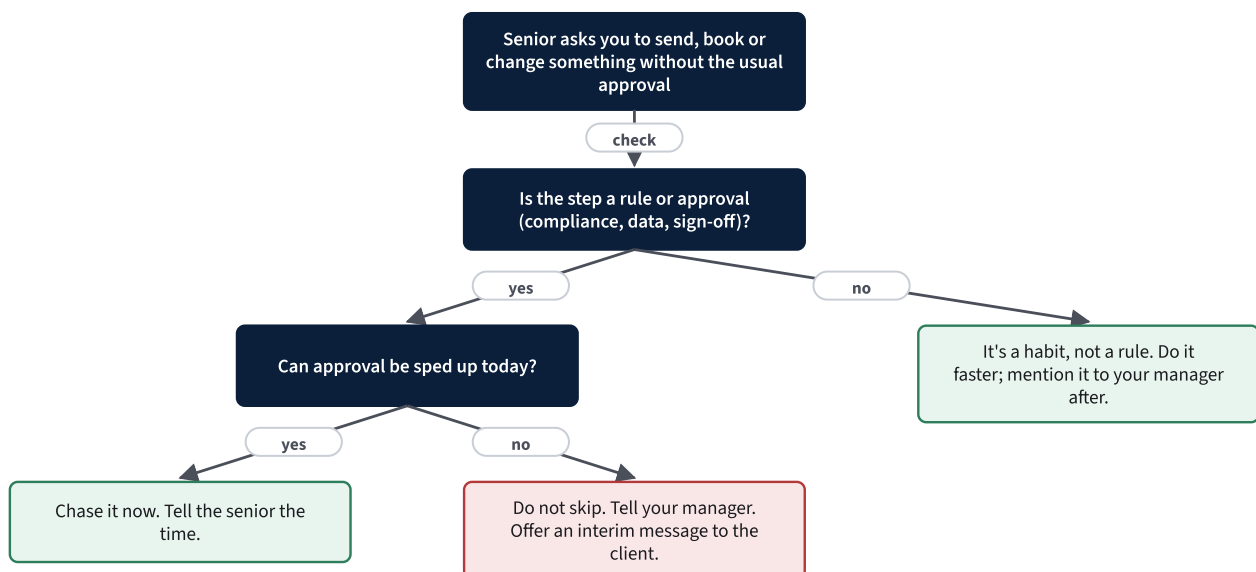

Figure 39. Decision tree: A senior person asks you to skip a control. Draw it from memory: the question at each node is what matters. Author's construction from FCA principles cited in the text **Inferred**.

SAY THIS

"I'd want to help, so I'd chase the approval straight away and tell them when it'll clear. I wouldn't send it before then, because anything a client sees has to be fair, clear, not misleading and approved. If it can't be done in time, I'd tell my manager and suggest a holding message to the client."

3. You hear something that might be confidential or inside information

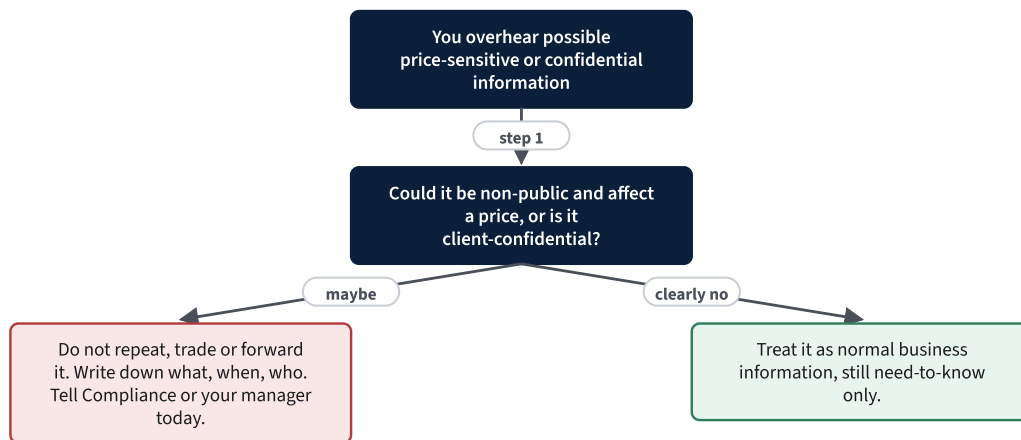

Figure 40. Decision tree: You hear something that might be confidential or inside information. Draw it from memory: the question at each node is what matters. Author's construction from FCA principles cited in the text **Inferred**.

SAY THIS

"I wouldn't repeat it, act on it or forward it. I'd note what I heard, when and from whom, and tell Compliance or my manager the same day. Inside information is 'information of a precise nature which has not been made public' that could move a price. I don't have to decide whether it is. I just have to hand it to the people who do."

4. You made a mistake

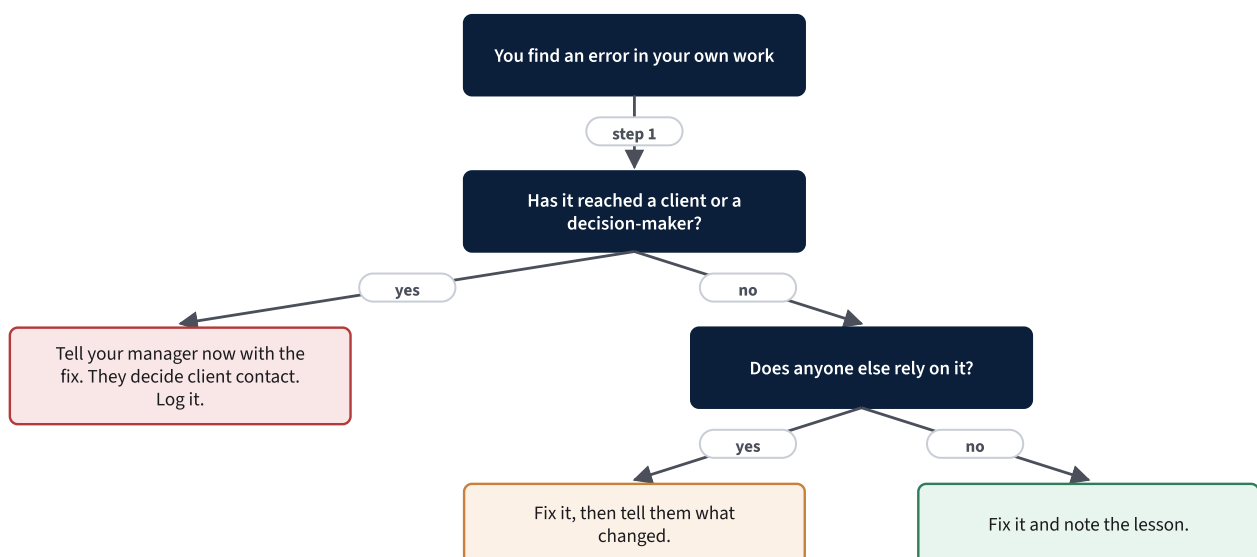

Figure 41. Decision tree: You made a mistake. Draw it from memory: the question at each node is what matters. Author's construction from FCA principles cited in the text **Inferred**.

SAY THIS

"I'd tell the person who owns it straight away, with the corrected figure and its source, and let them decide how to handle the client. Then I'd log it and change my checking so it doesn't happen again. The worst version of a mistake is the one found later."

5. Incomplete information against a deadline

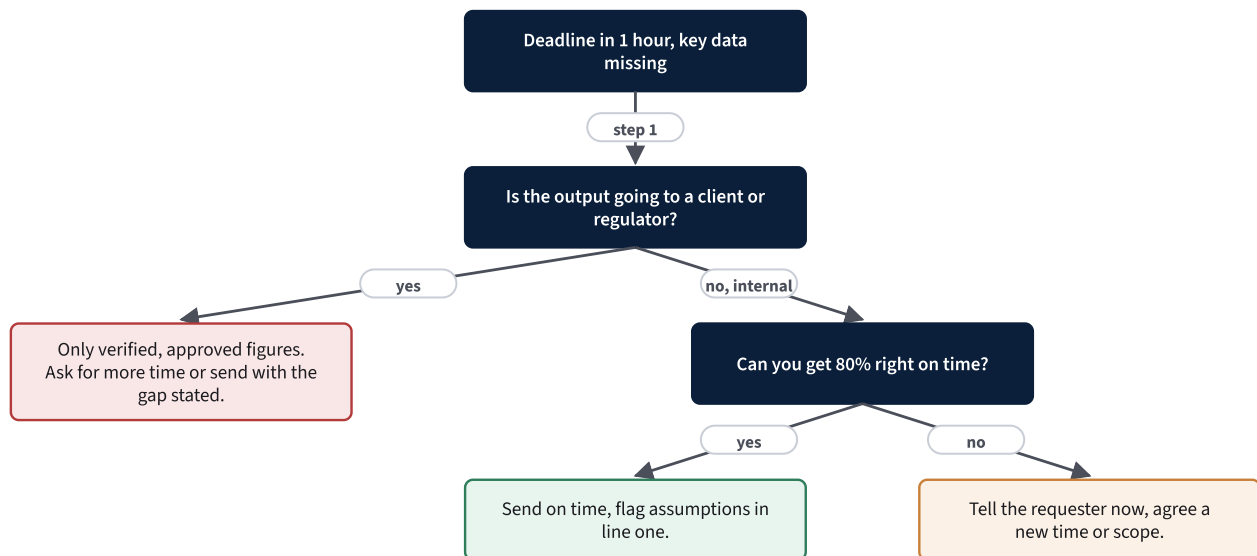

Figure 42. Decision tree: Incomplete information against a deadline. Draw it from memory: the question at each node is what matters. Author's construction from FCA principles cited in the text **Inferred**.

SAY THIS

"It depends who it's for. If it's going to a client, only verified, approved figures go out, so I'd ask for more time or send it with the gap clearly stated. If it's internal, I'd send what I have on time, with my assumptions in the first line."

11.6 The CV grill

How a three-level attack works.

- **Level one** asks what you did. "Tell me about your society role."
- **Level two** asks how, with numbers. "How many members? What did you change? How do you know it worked?"
- **Level three** asks why, or what else. "Why that approach and not another? What would you do differently? What did someone else do that you didn't?"

Most candidates prepare level one. Assessors score levels two and three.

Attack	Frame-holding answer shape
1. "That sounds like a team achievement. What did <i>you</i> do?"	Name your two specific actions and one decision only you made. "The team ran it; my part was X and Y, and I decided Z."
2. "Those numbers sound small."	Agree with the scale, defend the rate. "It was 40 people; attendance went from 15 to 40 in a term, which is the part I'm proud of."
3. "Why did you leave that role / stop that activity?"	Honest reason, forward-looking. No criticism of others.
4. "This bullet has nothing to do with finance."	Bridge the skill, not the subject. "It's where I learned to handle unhappy customers, which is half of client service."
5. "What went wrong?"	A real failure, your share of it, the fix, the evidence you changed.

Attack	Frame-holding answer shape
6. "What would your manager there say about you?"	One strength and one development point, both specific and both true.
7. "You say you're interested in markets. What did the Bank of England do last month?"	Know it. For September 2026: held at 3.75%, six to three, three votes to raise; next decision 5 November [S232] .
8. "Your grades dipped here."	One sentence of context, no excuses, then what you did about it and the result since.

THE FOUR-LINE DRILL FOR EVERY CV BULLET

1. **What:** one sentence, with a number.
2. **How:** the two actions you personally took.
3. **Why:** why that approach, and one alternative you rejected.
4. **So what for Schroders:** the JD skill it proves, quoted.

Write these four lines under each bullet on your CV. If you can't write line 3, that bullet will break at level three.

PART 12

"Why Schroders" in three lengths, and the counter-case

An answer built from how the firm works, not adjectives. It could not be moved to a rival without changing the facts. Rebuild it in your own words.

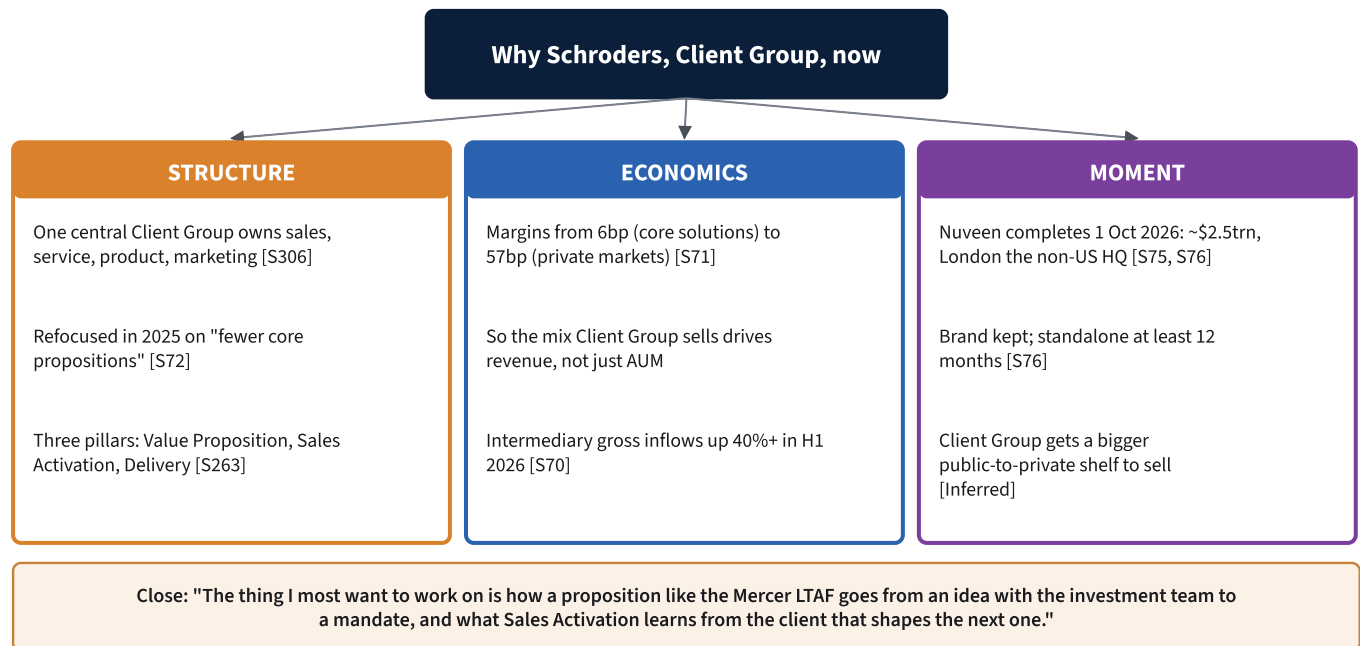

Figure 43. "Why Schroders" on one page: structure, economics, moment, and a specific close. Each fact sourced in the box; the argument is the author's **Inferred**.

12.1 Thirty seconds

SAY THIS, IN YOUR WORDS

"Three reasons. First, the structure: Schroders puts sales, product and marketing into one Client Group, and last year refocused it on fewer core propositions, so one team decides what to sell and takes it to clients fast. That's the part of asset management I want to learn. Second, the economics: margins run from about 6 basis points in core solutions to 57 in private markets, so what Client Group sells matters as much as how much. Third, the moment: with Nuveen completing this week, the same team will be selling a much bigger public-to-private shelf from London."

12.2 Two minutes

- Structure (30 seconds).** Schroders has three businesses, Public Markets, Schroders Capital and Wealth, and one Client Group that owns sales, client service, product and marketing across regions [S71, S306]. In 2025 it "designed a new sales and marketing model where central support is focused on fewer core propositions" [S72].
- Mechanism (30 seconds).** That maps onto the three areas in the JD:

- Value Proposition chooses and shapes propositions with the investment teams.
- Sales Activation takes them to clients locally.
- Delivery keeps the data and CRM running ^[S263].

Centralising means a pension scheme sees one Schroders, not three. Two examples: core solutions took £8.1bn of net inflows from fiduciary and outsourced CIO work, and the Mercer LTAF brought private assets into a DC pension default ^[S71].

- 3. Economics (20 seconds).** Private markets earn about 57bp and core solutions about 6bp ^[S71]. H1 2026 showed why that matters. The headline net outflow was mostly one low-margin mandate, while intermediary gross sales rose more than 40% ^[S70].
- 4. Honesty (20 seconds).** Active management is under pressure. Most European active equity funds lag passive over ten years ^[S319]. That's why the firm is concentrating on credit, private markets, solutions and wealth, where active has an edge.
- 5. Moment (20 seconds).** From 1 October Schroders is part of a roughly \$2.5trn group. London becomes the non-US headquarters, the brand stays, and it runs standalone for at least a year ^[S76]. Client Group's job gets bigger.
- 6. Close (20 seconds).** The specific thing below.

12.3 The close: one specific thing you want to work on

Choose one and read up on it before the day:

- **The Mercer LTAF mandate (December 2025).** A Value Proposition plus Sales Activation case study: a product co-designed with a client that takes private markets into UK DC pensions ^[S71]. "What I'd most like to learn is how a proposition like that goes from an idea with the investment team to a signed mandate, and what the sales team hears that shapes the next one."
- **European active ETFs.** \$4.3bn by September 2026, with two fixed income launches on 29 September ^[S230]. "I'd like to understand how the intermediary team decides whether a client should use the ETF or the fund."
- **UK Institutional's partnership model.** The team is being repositioned "around long-term strategic partnerships" for fewer, larger pension pots ^[S23]. "I'd like to see how selling changes when the buyer is a £25bn megafund."

12.4 What most candidates say versus what you can say

Most candidates say	You can say
"Schroders is a prestigious 200-year-old family firm."	"The family's 44% stake was sold to Nuveen this week. What carries over is the brand, London as the non-US HQ and the Client Group model, which now gets a bigger shelf to sell" ^[S72, S76] .
"I want to work in sales because I like people."	"Client Group sits between investment teams and clients. Value Proposition decides what to sell, Sales Activation sells it locally, Delivery makes the data work. I want to learn how a proposition goes from an idea to a mandate" ^[S263] .
"Schroders has great performance."	"71% of assets beat their comparator over three years at H1 2026, up from 58% at end-2024. It's internally measured and mostly before fees, but consultants screen on three-year numbers" ^[S70, S71] .
"Schroders is committed to sustainability."	"It has proprietary tools such as SustainEx, and they win business: the £3.3bn PGGM mandate was won 'leveraging' them" ^[S72] .
"Schroders is big and global."	"47% of its assets are UK clients and only 12% Americas. That gap is part of why Nuveen fits" ^[S72] .

Most candidates say	You can say
"Asset management is growing."	"More than 80% of the industry's revenue growth in 2025 came from markets, not new money ^[S154] . So distribution is where firms now win."
"I like the culture."	"77% of staff say they're proud to work there, even through a transformation that cut headcount by 10% ^[S72] . That tells me the change was handled with care."

12.5 The honest counter-case, and a reply to each

Counter-argument	Your reply
The shares underperformed. Down about 25% over five years before the bid ^[S125] .	"The market doubted standalone scale. The transformation and the deal are the answer to that."
Flows are negative. -£10.8bn in 2024, +£11.2bn in 2025, -£8.3bn in H1 2026 ^[S71, S70] .	"Mostly institutional and low-margin. Intermediary is growing, and that's where Client Group's redesign is aimed."
Cost cuts and job losses. About 200 roles in January 2025; headcount down 10% in 2025 ^[S88, S72] .	"The cuts were in duplication and outsourcing; client-facing hiring went up. More than 95% of highly rated public markets staff stayed ^[S71] ."
Active is losing. 14.2% ten-year success rate for European active equity ^[S319] .	"Which is why the firm is focused on where active does add value."
Wealth missed its target. 2.7% net new business in 2025 against 5 to 7% ^[S71] .	"H1 2026 was better, with Cazenove at 5% annualised ^[S70] , and selling Benchmark focuses the business."
Integration risk. The standalone period is only "at least 12 months" ^[S76] .	"True, and the internship falls inside it. I'd rather learn in a team that's building something than one that's standing still."
Loss of independence. Strategy ultimately answers to Nuveen and TIAA.	"Yes. The trade-off is scale and US distribution, which a UK active manager struggled to get alone."

DON'T SAY THIS

Anything that could be said about Amundi, M&G or aberdeen without changing a word. If your answer survives a find-and-replace of the firm's name, rewrite it.

PART 13

Cheat sheet: Schroders Client Group Sales Intern 2027

The protocol (45 to 75 s)

- **Steady:** "So the situation is..."
- **Sort:** "Two things matter: the rule and the client."
- **Act:** "First I'd..., then..., and I'd tell [owner] by [time]."
- **Close:** "That way it's fast and right." Stop.

Priority order

1 Rules and Schroders' name. 2 The client's real interest. 3 Fair service, process and the record. 4 Speed.

Frame: "I won't trade the rules or the client's interest for speed. Inside those, I'll be fast and helpful, and I'll tell people early."

Never

- Send unapproved or changed client material (COBS 4.2.1R).
- Guess performance, forecast returns, promise recovery.
- Repeat, forward or trade on possible inside information (UK MAR). Tell Compliance.
- Take client data outside approved systems (UK GDPR).
- Call Schroders "FTSE 100", "listed" or "family-controlled" in the present tense.
- Use AI to write your answers (Schroders prohibits it).

Eight frame-breakers, eight counters

- **Interrupt:** answer the new point, then finish yours.
- **"That's wrong":** "Tell me more." Update or hold with a reason.
- **Silence:** wait 3 s; offer to go deeper.
- **Escalation:** same order, escalate sooner.
- **"The MD says":** rank doesn't change the rule; chase approval.
- **False choice:** find the third door.
- **Knowledge trap:** "I don't know; here's how I'd find out."
- **Badmouth invite:** generous and specific.

Video answer shape (about 2 min, one take)

Energy (what you enjoy) → **Evidence** (one real example, a number) → **Learning** → **Link** (Client Group Sales). If time is short, say the link early.

Why Schroders (30 s)

Structure: one Client Group owns sales, product, marketing; refocused in 2025 on "fewer core propositions". **Economics:** margins from 6bp (core solutions) to 57bp (private markets), so what you sell matters. **Moment:** Nuveen from 1 Oct 2026, ~\$2.5trn, London the non-US HQ, brand kept. **Close:** the Mercer LTAF: how a proposition becomes a mandate.

Numbers, if asked

- AUM £867.8bn (30 Jun 2026); £823.7bn (end-2025).
- H1 2026: profit £459.8m (+46%); cost:income 68%; net flows - £8.3bn incl. one £6.6bn low-margin mandate; intermediary gross +40%.
- 2025: NNB +£11.2bn; revenue £2,504.3m; profit £756.6m.
- AUM mix: institutional 64%, intermediary 19%, wealth 17%; UK 47%, APAC 25%.
- 71% of assets beat comparator over 3 years (internal, mostly gross).
- Deal: 590p + up to 22p, ~£9.9bn; effective 1 Oct; delisted 2 Oct 2026.
- ~5,500 to 6,100 staff; London ~3,100.

Names

Richard Oldfield (CEO) · Matt Oomen (Global Head, Client Group) · Phil Middleton (Head of UK) · Rachel Harris (UK Institutional) · Jamie Fowler (UK Wealth) · Ed Mitchell (CG Strategy Execution & Delivery) · Johanna Kyrklund (Group CIO) · William Huffman (Nuveen CEO)

Market view in three numbers

Bank Rate 3.75%, held 6-3 with three votes to raise (17 Sep); next 5 Nov. UK CPI 3.1% (Aug), seen above 4% early 2027. Schroders house view: global growth ~2.5%, main risk a spike in long yields. Budget 28 Oct (Chancellor John Healey).

Rules with dates

Consumer Duty 31 Jul 2023 / 2024 · Assessment of Value 30 Sep 2019 · SDR anti-greenwashing 31 May 2024; naming 2 Dec 2024 · Targeted support 6 Apr 2026 · Pension Schemes Act 29 Apr 2026 · Cash ISA £12k 6 Apr 2027 · CCI mandatory 8 Jun 2027.

One question to ask

"Since Client Group moved to fewer core propositions, how do regional sales feed what they hear from clients back into Value Proposition?"

Sources: all figures are sourced in Parts 2, 6, 7 and 9 of the full pack [S70, S71, S72, S75, S76, S161, S168, S170, S187, S232, S242, S262, S263, S306, S401, S402, S403]

PART 14

Glossary

85 terms in plain English. Where a term has a date or rule behind it, the source is in the part where it first appears.

Active ETF. An exchange-traded fund run by a manager making active choices.

Active management. Choosing investments by judgement to beat a benchmark or meet an outcome.

Alpha. Return above the benchmark attributable to the manager's skill.

AML. Anti-money laundering: checks that clients and distributors are not moving criminal money.

Assessment of Value (AoV). An annual report in which a UK fund manager judges whether each fund's charges are justified (from 30 Sep 2019).

Asset management. Investing other people's money for a fee.

AUM. Assets under management: the market value of money a manager runs.

AUMA. Assets under management and administration: AUM plus assets held on platforms.

Basis point (bp). One hundredth of one percent. $0.45\% = 45\text{bp}$.

Benchmark. The index or target a fund is measured against.

Beta. Return from market exposure itself.

Buy side. Firms that invest: asset managers, wealth managers, hedge funds, private equity.

Buyout (bulk annuity). A DB pension scheme insuring its pensions with an insurer.

Cazenove Capital. Schroders' UK wealth management and private banking business.

CCI. Consumer Composite Investments: the new UK retail disclosure regime replacing the PRIIPs KID; mandatory from 8 Jun 2027.

Client Group. Schroders' central function for sales, client service, product and marketing.

Compliance. The team that sets and checks the rules; part of the second line of defence.

Consumer Duty. FCA rule requiring firms to deliver good outcomes for retail customers (PS22/9).

Core solutions. Schroders' low-margin, large-scale solutions business, including fiduciary management (about 6bp).

Cost:income ratio. Operating costs as a share of income. Schroders: 68% in H1 2026.

CRM. Customer relationship management system. Schroders uses Salesforce.

Custodian. The bank that holds a fund's assets safely.

DB pension. Defined benefit: a promised pension; the employer bears the risk.

DC pension. Defined contribution: a pot built from contributions; the member bears the risk.

DDQ. Due diligence questionnaire covering team, process, risk, operations and ESG.

Default fund. Where DC members' money goes if they make no choice.

Delisting. Removal of a company's shares from a stock exchange. Schroders: 2 Oct 2026.

DFM. Discretionary fund manager: a wealth manager allowed to make decisions without asking each time.

Distribution. Everything that gets a product to clients: sales, marketing, platforms, intermediaries.

ETF. Exchange-traded fund: a fund whose shares trade on a stock exchange.

Fee compression. The long-run fall in fees as passive and competition grow.

Fiduciary management. A pension scheme handing day-to-day investment decisions to one provider.

Financial promotion. Marketing that invites investment; must be fair, clear and not misleading (COBS 4).

Fund selector. A professional who chooses funds for a wealth manager, platform or model portfolio.

Gross inflows. All new money received before withdrawals.

IFA. Independent financial adviser, paid by client fees since the RDR.

Inducement. A payment or benefit from a third party that could bias service; restricted (COBS 2.3A).

Inside information. Precise, non-public information likely to move a price (UK MAR).

Institutional client. A pension scheme, insurer, sovereign fund or similar organisation.

Intermediary. A firm between the manager and end investors: platforms, wealth managers, advisers.

Investment consultant. Adviser to pension trustees on strategy and manager selection; a gatekeeper.

Investment trust. A UK closed-ended fund listed as a company.

JV. Joint venture: a business owned with a partner, such as Schroders' China JVs with Bank of Communications.

KYD. Know your distributor: due diligence on firms that sell your funds.

LDI. Liability-driven investment: matching a DB scheme's assets to its pension promises.

LGPS pool. One of six vehicles that invest local government pension money.

LTAF. Long-Term Asset Fund: a UK open-ended fund for illiquid assets, aimed at DC and wider retail.

Mandate. The instructions under which a manager runs a client's money.

Mansion House Accord. A May 2025 pledge by 17 DC providers to put 10% of default funds in private markets by 2030.

Megafund. A DC default arrangement of at least £25bn, required by 2030 under the Pension Schemes Act 2026.

MiFID II. EU rules (UK-retained) on investment services, including product governance and inducements.

Model portfolio service (MPS). Ready-made portfolios advisers use on platforms.

NAV. Net asset value: a fund's assets minus liabilities, per share.

Net new business (NNB). New money in minus money out; growth that is not from markets.

Net operating revenue. Fee income after costs paid to distributors; Schroders' main revenue line.

OCF. Ongoing charges figure: the yearly cost of a fund as a percentage.

OCIO. Outsourced chief investment officer: a manager running a client's whole portfolio.

OEIC. Open-ended investment company: a UK fund whose shares are created and cancelled at NAV.

Passive management. Copying an index at low cost.

Per se professional client. A client treated as professional by definition, such as a pension fund or central bank (COBS 3.5.2R).

Pitch book. The presentation used in a client or prospect meeting.

Platform. An online service holding investors' funds, ISAs and pensions.

Pooled fund. A fund shared by many investors.

Private markets. Unlisted assets: private equity, private credit, infrastructure, property.

Product governance. Rules requiring every product to have a defined target market (PROD 3).

RDR. Retail Distribution Review: banned commission to advisers from 31 Dec 2012.

Relationship manager (RM). The salesperson who owns a client relationship.

Retail client. An individual investor; the most protected category.

RFP. Request for proposal: a formal tender from a client.

RNS. Regulatory News Service: how UK-listed firms publish results and announcements.

Scheme of arrangement. A court-approved way to take over a company; used by Nuveen for Schroders.

Schroders Capital. Schroders' private markets business (about 57bp margin).

SDR. Sustainability Disclosure Requirements: FCA regime with four fund labels and naming rules.

Segregated account. A portfolio run for one client only.

Sell side. Banks and brokers that sell services to investors.

SM&CR. Senior Managers and Certification Regime: individual accountability in FCA firms.

Stewardship. Voting and engagement with companies on clients' behalf.

Strength (Cappfinity). Something you do well, find energising and use often.

Targeted support. A new FCA regime (6 Apr 2026) for suggestions to groups of similar consumers.

Three lines of defence. Business, then Risk and Compliance, then Internal Audit.

Tracking error. How much a portfolio's return varies from its benchmark.

UCITS. A regulated fund standard for retail investors in the UK and EU.

UK MAR. UK Market Abuse Regulation: bans insider dealing, unlawful disclosure and manipulation.

Value for Money framework. Planned rating of DC default funds on performance, cost and service; first assessments 2028.

Work simulation. A Cappfinity assessment that puts you in realistic tasks and asks you to rank responses.

PART 15

Source table

Every source marker in the pack, with outlet, title, publication date, URL, access date and how it was read. 289 sources; 173 cited in the text. Grey rows were gathered in research but not cited.

Status: FETCHED = page or PDF read in full; SNIPPET = seen only as a search-result summary (treat as **Reported**); PAYWALLED = headline only, not read. Ranges by workstream: S1 to S57 role and team; S70 to S108 firm; S120 to S149 competitors; S150 to S199 industry and regulation; S220 to S259 news; S260 to S298 interview process and Cappfinity; S300 to S330 why Schroders; S401 to S403 added during writing. Some documents appear under more than one ID because workstreams ran in parallel (for example the H1 2026 results are S28, S70, S120, S220 and S302); all resolve to the same document.

Format: [ID] Outlet. Title. Publication date. URL. Access date. Status. Confidence note.

PART 16

Gaps, open questions and the final self-check

What could not be established from public sources, what may change before your interview, and a check of the pack against its own rules.

16.1 What could not be found

Gap	Detail	What to do
Your interviewers	No names supplied. No assessor can be verified in advance ^[S262] .	If you get names, check titles on schroders.com.
Stage 3 mechanics	Number of video questions, preparation seconds and answer length are not published. The practice tile sits behind a login ^[S262] .	Do the Candidate Zone practice before the live stage.
Intern assessment centre dates	Only the graduate window (October to December) is official ^[S261] . The intern window is reported as November to February ^[S288] Reported .	Watch your email; notice is at least a week ^[S260] .
Client Group headcount	Not disclosed. The 900 to 1,400 range is an estimate Inferred .	Don't quote it as fact.
Heads of the three pillars	No public head of Value Proposition, Sales Activation, Product or Marketing under Oomen; no current Americas head ^[S17] .	A good, genuine question to ask.
Post-Nuveen plans for Client Group	Only the 12-month standalone and 2-year employment intentions are public ^[S76, S309] .	Don't speculate; ask how clients are responding.
2027 London Client Group graduate programme	Not posted on 29 Sep 2026 ^[S12] .	Ask how 2028 conversion works.
Deadline	The brief says 16 Sep 2026; req 1943 showed "posted 18 Sep" and live on 29 Sep ^[S2] .	Check the live posting.
Intern numbers and conversion rate	Not published; the internship is the "key feeder" but not a guarantee ^[S260] .	Ask practitioners, not HR, what distinguishes converters.
First-person London intern accounts	None found; Glassdoor, TheStudentRoom and Bright Network blocked full reading ^[S49, S290, S292] .	Forum claims in this pack are labelled Reported .
Snippet-only facts	Fed decision (16 Sep 2026), gilt yield levels, SPIVA 2025 UK figures, Iran conflict dates, Calastone August figures, Schroders' 2026 survey statistics ^[S234, S237, S321, S240, S250, S244] .	Verify on the primary site before quoting a number.
Peer data	Blended margins for most peers; current headcounts for Fidelity International and L&G Asset Management; peer founding dates ^[S139, S147] .	Use peer figures directionally.
Regulation not verified in this research	SYSC 10 (conflicts), the Training and Competence sourcebook, the exact certification function for client-facing staff, the MiFID II start date (3 Jan 2018) ^[S176] .	Say "conflicts rules" rather than quoting a rule number.
Things that will date quickly	Bank Rate (next decision 5 Nov 2026), the Autumn Budget (28 Oct 2026), the next IA industry survey, and any Nuveen integration announcements.	Refresh Part 7 in the week of the interview.

Gap	Detail	What to do
Your CV and background	Not supplied. The CV grill is a drill, not an attack on your actual bullets.	Apply the four-line drill in Part 11.6.

16.2 Open questions worth asking in the room

- How does Value Proposition decide which propositions make the cut, and how does regional feedback reach it?
- Does the Schroders Capital specialist sales team sit inside Client Group or alongside it?
- How will Client Group bring Nuveen capabilities to UK clients after the standalone year?
- Where is the line between Client Group's intermediary team and Cazenove Capital?

16.3 Final self-check

Check	Result	Evidence
Every figure has a source and date; estimates are labelled on the chart.	Pass, with one caveat	All 43 figures carry source markers in the caption. Data charts state their period (FY25, H1 2026, end-2024). Estimates (AUM per employee, blended margin, family dividend share, Client Group headcount) are marked "est." or Inferred on the chart or in the box. Caveat: conceptual diagrams (protocol, trees, hub) have no data date because they contain no data; they are tagged Inferred .
A total beginner could read Parts 1, 2 and 5 without another source.	Pass	Terms are defined in line on first use, with KEY TERM boxes for AUM, basis points, net flows and three lines of defence, and an 85-term glossary in Part 14. Part 0 points beginners to Part 5 first.
"Why Schroders" is mechanism, not adjectives, and cannot be transplanted to a rival.	Pass	Part 12 rests on Schroders-specific facts: the central Client Group and "fewer core propositions" ^[S72] , published margins by business ^[S71] , the Nuveen completion and London HQ ^[S75, S76] , and the Mercer LTAF ^[S71] . A find-and-replace test fails for every peer.
The regulatory section is current and dated correctly.	Pass, with flagged exceptions	Dates checked against FCA and government pages: Consumer Duty, Assessment of Value, SDR, targeted support, CCI, Pension Schemes Act, cash ISA ^[S161, S163, S165, S166, S168, S170, S183, S187] . MiFID II date, SYSC 10 and T&C rules are flagged as not verified (Part 16).
The team section goes beyond the JD, with method shown and thin evidence admitted.	Pass	Part 1.9: confidence-coded org chart from 20+ sources and live postings (Oracle requisitions 1943, 2049, 2046, 1796, 2067, 1978); headcount estimate with two methods and a range; named gaps for pillar heads and the Americas.
Every JD bullet has three scenarios; the composure set has decision trees.	Pass	11 JD lines (8 skill lines and 3 team areas) × 3 = 33 scenario cards, easy to hard (Part 11.4). Five composure scenarios, each with an SVG decision tree (Part 11.5). Plus 10 ranked work-simulation scenarios (Part 9B).
People sections contain only public professional information, with identity uncertainty flagged.	Pass	Part 10 lists roles, tenure and career paths from company pages and trade press; confidence per person; two recruiters whose titles could not be confirmed are deliberately not named.
The PDF rendered, contents page numbers are correct, and every figure was checked for clipping.	Pass	Two-pass render: contents numbers are read from the rendered PDF and re-applied, with a check that nothing shifted. An automated SVG check (text outside the viewBox or overlapping) reported 0 issues across 43 figures, and every figure page was rasterised and inspected.
What could not be found is listed.	Pass	Part 16.1, with an action for each gap.
