## One question to ask

"Since the APR and BPR cap came in, how have conversations with farming clients changed?"

## Answer protocol

**Steady** (restate) → **Sort** (client, rules, time) → **Act** (steps + who you'd involve) → **Close** (client safe, nothing at risk). 45 to 75 seconds.

## Priority order

1 Rules and the bank's name → 2 Client's real interest → 3 Process and record → 4 Speed.

*"Quickly, but not in a way that puts the client or the bank at risk."*

## Counters

- Interrupted: answer, then "coming back to..."
- Contradicted: "Which part?" Hold if reasoning holds.
- Silence: stop talking; offer more detail.
- False choice: look for the third option.
- Don't know: "My understanding is X; I'd check with Y."
- Badmouth bait: never criticise rivals.

## Never

- Give advice or tax advice as an intern
- Skip a control to please a senior person
- Talk about clients outside work
- Claim Weatherbys is the oldest or biggest bank
- Fake a love of racing

## Lines ready

- "Weatherbys is built so the person who knows the client makes the decision."
- "It's mostly a lending and deposit business wrapped in a relationship."
- "The growth in advice income is the number I'd watch."
