ROLE DEEP DIVE · PREPARED 12 OCTOBER 2026

# KKR Global Client Solutions

Everything a first-choice KCS applicant needs: private markets from zero, KKR from the inside, the role decoded line by line, the team mapped, the competition, the rules, the news, the interview, the scenarios and the answer to "why KCS, why KKR".

**Target:** KKR London 2027 Summer Internship (6 Jun to 29 Jul 2027), Client Solutions ("KCS"), via SEO London Alternative Investments
**Applications close:** 18 October 2026 · rank six teams 1 to 6
**Method:** seven research workstreams, about 380 public sources, every figure tagged with a source ID and a confidence level (Confirmed, Reported, Inferred)
**Companion:** the Complete Interview Pack covers all six London teams and the firm in full

Built only from public information. Not produced by, endorsed by or affiliated with KKR or SEO London. Check any figure against its source before quoting it.

# Contents

Part 0 · How to use this pack 6
Your situation in one box 6
The ten-minute emergency version 6
How the pack is organised 7
A reading plan for the week before 18 October 7
How to read the markers 7
Part 1 · Before anything: private markets from zero 9
1. Investing, and what an "alternative" asset manager is 9
2. The GP / LP structure: who gives what, who gets what 10
3. The life of a closed-end (drawdown) fund 13
4. Fees and the waterfall 14
5. Performance metrics: IRR, MOIC, TVPI, DPI, RVPI, PME 16
6. The asset classes KKR's internship teams invest in 17
7. Who the LPs are, and what each one needs 18
8. Evergreen (semi-liquid) funds versus drawdown funds 19
9. Secondaries, continuation vehicles, co-investment, SMAs and the denominator effect 21
10. How big the industry is, and the fundraising market today 23
11. The structural forces reshaping the industry now 25
12. What this means for a fundraising role 27
Part 2 · KKR from the inside 28
A. The founding insight: three people, a borrowed-money idea, and a firm built around it 28
Mission and culture in KKR's own words 30
B. How KKR makes money now 31
C. The contracts: who gives what, and who gets what 36
D. The operating model: four layers and what flows between them 38
Governance and risk: who says yes, who keeps watch 39
E. How the business mix has changed 40
F. A public company: why that is a gift for your research 41
G. Leadership and the future 42
H. Recent moves, October 2024 to October 2026 45

I. The skeletons, told straight 46
J. KKR in London and EMEA 48
Part 3 · What KCS is: KKR's client engine 50
KCS in one paragraph 50
History: from the Client and Partner Group to KCS 51
The mission in KKR's own words 52
How big is KCS? 53
Who leads it 54
The three client channels 55
KKR's investor mix: who the money comes from 56
What KCS sells: the product shelf 57
How KCS is organised 60
Why a central client team exists 61
How KCS is wired into the rest of KKR 62
KCS in London and EMEA: the team map 64
Ten facts to carry into the room 66
Part 4 · The role decoded, line by line 67
How to read this part 67
The eight lines of the KCS description 67
The four intern duty lines 70
The London analyst posting, decoded 71
A worked day: KCS summer intern in London 72
The life of a fundraise 72
The life of an RFP or DDQ 73
The life of a co-investment syndication with KCM 74
Two channels compared: institutional vs private wealth 75
The taxonomy of KCS activities and formats 76
What the team is judged on 77
The compliance dimension: bright lines 78
Career path from the seat 79
Part 5 · How KCS stands out: the competitive research on the role 81
The field: KKR against ten rivals 81

The rival client teams, one by one 83
Wealth: where KKR is a fast follower 85
Size against staffing 86
Seven design choices, and where each rival sits 87
What you would do differently as a KCS intern 88
What only KKR's client model can claim 90
Where KKR does not lead 92
Part 6 · The fundraising industry and its regulation 94
Why the client function has its own industry 94
A short history of raising money 94
The players: who stands between savings and a fund 95
How an institutional LP picks a manager 96
ILPA: the rule book written by the clients 98
What LPs value in 2026 98
Regulation in one picture: who may be marketed what 99
The European Union 99
The United Kingdom 101
The United States 102
The regulation timeline, 2011 to 2028 104
The walls around a client function 105
What to say about all this 106
Part 7 · What is happening right now 107
The six months in one paragraph 107
KKR's scoreboard in four charts 107
Timeline: April to October 2026 108
The KKR stories 110
The industry and regulation stories 113
KKR's house view in plain English 114
Reading list: how to stay current 115
Part 8 · Forming your own view 117
How to hold an opinion in a KKR interview 117
1. Is private wealth "democratisation" good for retail investors? 118

2. Is private credit a bubble? 118
3. Will the fundraising drought end? 119
4. Does scale win? 120
5. Should UK pensions be pushed into private assets? 121
6. Are insurer-owned asset managers a good model? 121
7. Evergreen funds: is the liquidity mismatch a flaw? 122
8. Will AI change fundraising and investor relations? 123
9. The founders' control sunset: good for KKR? 123
10. The DPI drought: are continuation vehicles the answer? 124
Delivering an opinion under pressure 124
Part 9 · The application and the interview: KCS edition 125
The process, stage by stage 125
KKR's culture is the marking scheme 126
The SEO application and the cover letter 128
How to rank the six teams 130
KCS question bank: 59 questions with scaffolds 132
Ten questions only a researcher could ask 141
Seven-day plan to 18 October, then the run-up 142
Part 10 · The scenario playbook: KCS edition 143
The four-step protocol: steady, sort, act, close 143
The priority order when good things collide 145
Eight ways interviewers break a frame, and the counter to each 146
Staying calm physically 147
The scenario ladder: three rungs for every duty line 147
The composure set: five hard scenarios with decision trees 161
The CV grill: holding your frame three levels deep 166
Part 11 · Why KCS, why KKR: built from mechanism 169
The principle: mechanism, not adjectives 169
The four mechanisms, explained 171
"Why KKR, why KCS" in three lengths 172
What most candidates say versus what you can say 173
The honest counter-case (know it before they raise it) 173

Part 12 · Cheat sheet 175
KKR KCS cheat sheet: one page, read it in the lift 176
Part 13 · Glossary 177
How to use the glossary 177
Part 14 · Source table 183
How to read this table 183
WS2 · The firm (S1-S69) 183
WS1 · KCS function (S70-S139) 186
WS1B · Team map (S140-S199) 191
WS3 · Competitors (S200-S259) 195
WS4 · Industry and regulation (S260-S329) 198
WS5 · Live news (S330-S369) 202
WS6 · Interview intelligence (S370-S419) 205
Part 15 · Gaps, open questions and the self-check 208
Why this section exists 208
About KCS and the team 208
About the application and interview 209
About the firm 209
About the industry and rules 209
Turn gaps into questions 210
Final self-check 210

PART 0

# How to use this pack

Start here. The ten-minute version first, then a reading plan for the week before the deadline.

## Your situation in one box

**18 Oct**
Applications close (2026), via SEO London. Rank six teams 1 to 6.

**KCS**
Your first choice: KKR Global Client Solutions, London.

**6 Jun to 29 Jul**
The 2027 internship, eight weeks in the London office.

No interview is scheduled yet, and the interviewers are not known. So this pack does two jobs: it helps you write an application nobody else could write this week, and it prepares you for interviews that could follow within weeks. When names and dates arrive, use the checklist in the interview part.

## The ten-minute emergency version

If you read nothing else, read these ten points. Each is expanded, with sources, later in the pack.

1. **What KKR is.** A listed alternative asset manager: it invests clients' money in private equity, private credit, infrastructure and real estate, and owns an insurer, Global Atlantic. $796.5bn of assets under management at 30 June 2026 [S1] CONFIRMED.
2. **Who pays KKR.** Its clients (limited partners): pensions, sovereign wealth funds, insurers, endowments, family offices and, increasingly, wealthy individuals. They pay management fees and a share of profits (carried interest).
3. **What KCS is.** The team that raises and looks after that money: formed in 2009, 300+ people, split into relationship management and product/strategy management [S103, S141] CONFIRMED. KKR's words: it exists to "connect the dots" across all of KKR's businesses [S141].
4. **The three client channels.** Institutions, Family Capital and Global Wealth. Private wealth is now 18% of KKR's AUM, ahead of pensions at 14% [S71] CONFIRMED. The wealth products are the evergreen K-Series, which grew from $6bn (2023) to $42bn (June 2026) [S72, S73].
5. **Why KCS works with Capital Markets.** KKR can underwrite a deal and syndicate co-investment to clients through KCM; KCS brings the clients [S70]. In Europe one Partner, Mark Danzey, heads both KCM and Institutional Client Solutions [S156] CONFIRMED.
6. **Why KKR is built this way.** One firm, one P&L, one compensation pool [S5]; employees own about 30% of the stock [S3]. So the client team can sell what fits the client, not what one team needs to fill INFERRED.
7. **The year so far.** Record fundraising pace: $305bn raised since the start of 2024 against a $300bn target [S76]; Global Infrastructure Investors V closed at $19.2bn in August 2026, KKR's largest infrastructure fund [S176].
8. **The awkward facts.** A proposed $250m DOJ settlement over merger filings (Aug 2026) [S205]; K-FIT paid about 80% of redemption requests in Q1 2026, then 100% in Q2 [S338]; founders' control ends by 31 Dec 2026 [S2]. Know them; state them neutrally.
9. **Where KKR does not lead.** Blackstone and Apollo are larger, Blackstone leads private wealth by a wide margin, and in-house capital markets is not unique [S213, S215, S220]. Never overclaim.

10. **Your answer.** "KCS is the team that has to understand all of KKR. KKR is built for that seat. I want to learn the whole firm by explaining it honestly to the people who fund it." Then one personal example of explaining something or keeping a commitment.

## How the pack is organised

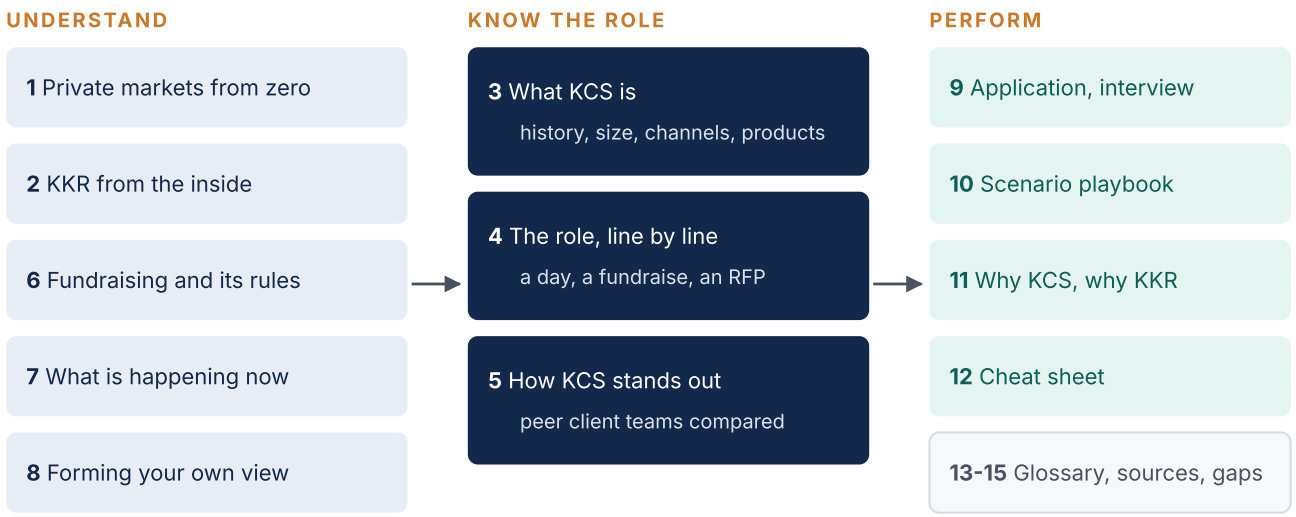

**Figure 1. The pack at a glance.** Read left to right the first time; on the day, work right to left.

## A reading plan for the week before 18 October

| Day | Read | Do |
|---|---|---|
| 1 | Part 0, Part 1 (basics), the glossary's first three tables | Explain GP/LP, a capital call and DPI out loud to a friend in under a minute each. |
| 2 | Part 2 (KKR from the inside) | Draw the money-flow diagram from memory. |
| 3 | Parts 3 and 4 (KCS and the role decoded) | Write your own one-paragraph "what KCS does" without looking. |
| 4 | Part 5 (competition) and Part 11 (why KCS) | Draft the application motivation answer using the scaffold in Part 9. |
| 5 | Part 9 (application and interview) | Finalise the ranking of the six teams; submit early, not on the 18th. |
| 6-7 | Parts 6-8, then Part 10 (scenarios) | Practise three scenarios aloud with the four-step protocol; time yourself. |

## How to read the markers

[S12] points to row S12 in the source table (Part 14). Every non-obvious fact has one.

CONFIRMED primary source or two credible outlets.
REPORTED one credible source.
INFERRED the author's reasoning from sourced facts.

**KEY TERM**
Definitions in plain English.

**SAY THIS**
Lines you can use.

**DON'T SAY THIS**

Traps and overclaims.

**YOUR OPINION GOES HERE**

Where to form a view.

**SOURCE UNCERTAIN**

Thin or conflicting evidence.

**THE RULE THAT MATTERS MOST**

Only say a number in an interview if you can name where it came from. "According to KKR's second-quarter release..." is more impressive than a precise figure without a source, and it protects you if the interviewer has a newer number.

PART 1

# Before anything: private markets from zero

Every assumption the job description takes for granted, explained from the ground up.

This part assumes you know nothing. By the end you should be able to draw, on a blank sheet, how money moves from a pension fund into a KKR fund, into companies and back again, who takes what along the way, and why the people who raise that money (KKR Global Client Solutions, "KCS") are having a busy 2026.

**$796bn**
KKR assets under management, 30 Jun 2026 [S330] CONFIRMED

**$16.7tn**
Private capital AUM worldwide, Dec 2025 (PitchBook) [S260] REPORTED

**$133bn**
New capital KKR raised in the 12 months to 30 Jun 2026 [S330] CONFIRMED

## 1. Investing, and what an "alternative" asset manager is

**Investing** means handing over money today to get more back later. The person or institution with the money (a pension fund, an insurer, a wealthy family) usually does not pick the investments itself. It hires an **asset manager** and pays it a fee. The asset manager's product is a **fund**: a pot of money from many investors, run under one set of rules.

KEY TERM

**Traditional investments** are listed shares (stocks), government and company bonds, and cash. You can buy and sell them every trading day at a public price INFERRED. **Alternative investments** are everything else that big investors buy: private equity, private credit, infrastructure, real estate, hedge funds and natural resources [S269] REPORTED. Their defining feature is that they are **illiquid**: you cannot sell them quickly at a known price. In return investors hope for an **illiquidity premium**, a higher return than public markets INFERRED.

Five kinds of firm get confused all the time. Here is the difference in one line each [Inferred, standard definitions]:

- **Traditional asset manager** (BlackRock, Vanguard): mostly index funds and listed share and bond funds. Very low fees, huge scale, daily liquidity.
- **Hedge fund**: trades mostly liquid securities, often with monthly or quarterly liquidity, and aims for returns that do not move with the market.
- **Investment bank**: advises on deals (mergers, listings) and underwrites securities. Paid per transaction, not a long-term management fee. Banks are counterparties and lenders to the firms above.
- **Private equity firm**: buys whole companies that are not on the stock market, improves them and sells them, using funds that last about ten years.
- **Alternative asset manager** (KKR, Blackstone, Apollo, Carlyle, Ares, Brookfield, EQT): a private equity firm that grew into many strategies. Runs long-lived private funds, earns management fees plus a share of profits, and increasingly owns insurance companies and runs products for individuals.

KKR is the clearest example of that growth. At 31 December 2010 traditional private equity was over 70% of KKR's assets under management. At 30 June 2026 it was "less than 25%" [S332] CONFIRMED. Today KKR's $796bn splits into Credit and Liquid Strategies $331bn, Real Assets $211bn and Private Equity $255bn [S332] CONFIRMED.

### Where KKR sits on the map of finance

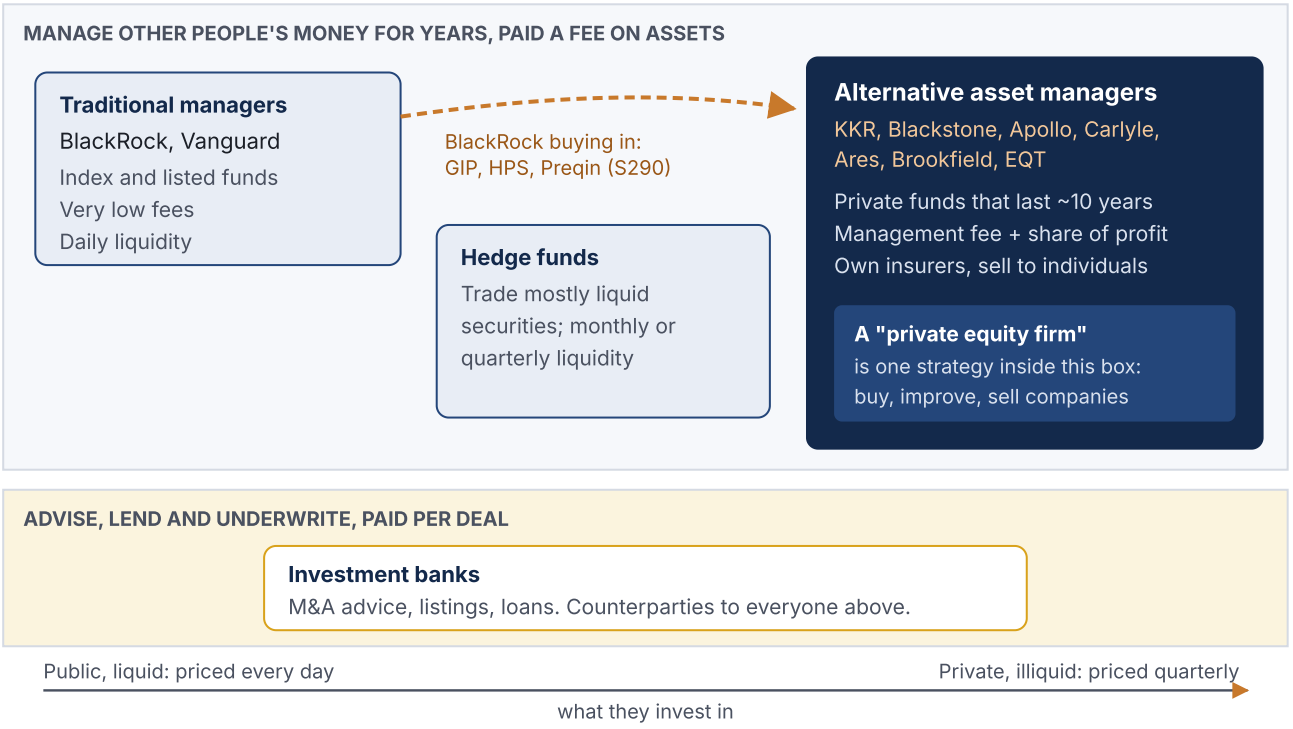

**Figure 2. The map.** Left to right is how easy the investments are to sell. Top band earns ongoing fees on money managed; bottom band earns fees per deal. Positions are qualitative INFERRED. BlackRock acquisitions: GIP (about $12.5bn, closed Oct 2024), HPS (about $12bn, announced Dec 2024), Preqin (about £2.55bn) [S290].

**SAY THIS IN THE INTERVIEW**

"KKR started as a buyout firm but is now mostly a credit, infrastructure and insurance business. Private equity is less than a quarter of its assets. So KCS is not selling one product, it is selling a platform."

## 2. The GP / LP structure: who gives what, who gets what

A private fund is usually set up as a **limited partnership**, a legal form with two kinds of partner INFERRED.

**KEY TERM**

**General partner (GP):** the manager. KKR, Blackstone, Apollo and Carlyle act as GPs. The GP picks the investments, runs them and decides when to sell INFERRED. It also puts in some of its own money, the **GP commitment**, so it has "skin in the game" INFERRED.

**KEY TERM**

**Limited partners (LPs):** the investors who supply most of the money. "Limited" because they cannot lose more than they put in and they do not run the fund INFERRED. Pension funds, sovereign wealth funds, insurers, endowments, family offices and wealthy individuals.

The contract between them is the **limited partnership agreement (LPA)**. Individual LPs often negotiate extra terms in a **side letter**, for example a fee discount or extra reporting INFERRED. The LPs' trade body, **ILPA** (Institutional Limited Partners Association), lists three guiding principles: alignment of interest, governance and transparency [S317] CONFIRMED. Keep those three words in your head: they are what every LP is checking when it meets KCS.

| Party | Gives | Gets |
|---|---|---|
| **LP** | A commitment (a legal promise to pay up to a set amount when asked); cash when called; patience for about 10 years | Most of the profits; access to deals it could not do alone; quarterly reports; a say on conflicts (through an advisory committee) |
| **GP** | Deal-finding, management, operating help; its own GP commitment; a track record | A management fee every year; carried interest (a share of profits above a hurdle); the platform to raise the next fund |

The next page draws the whole system on one sheet. Learn to sketch it from memory. It is the single most useful drawing for a fundraising interview.

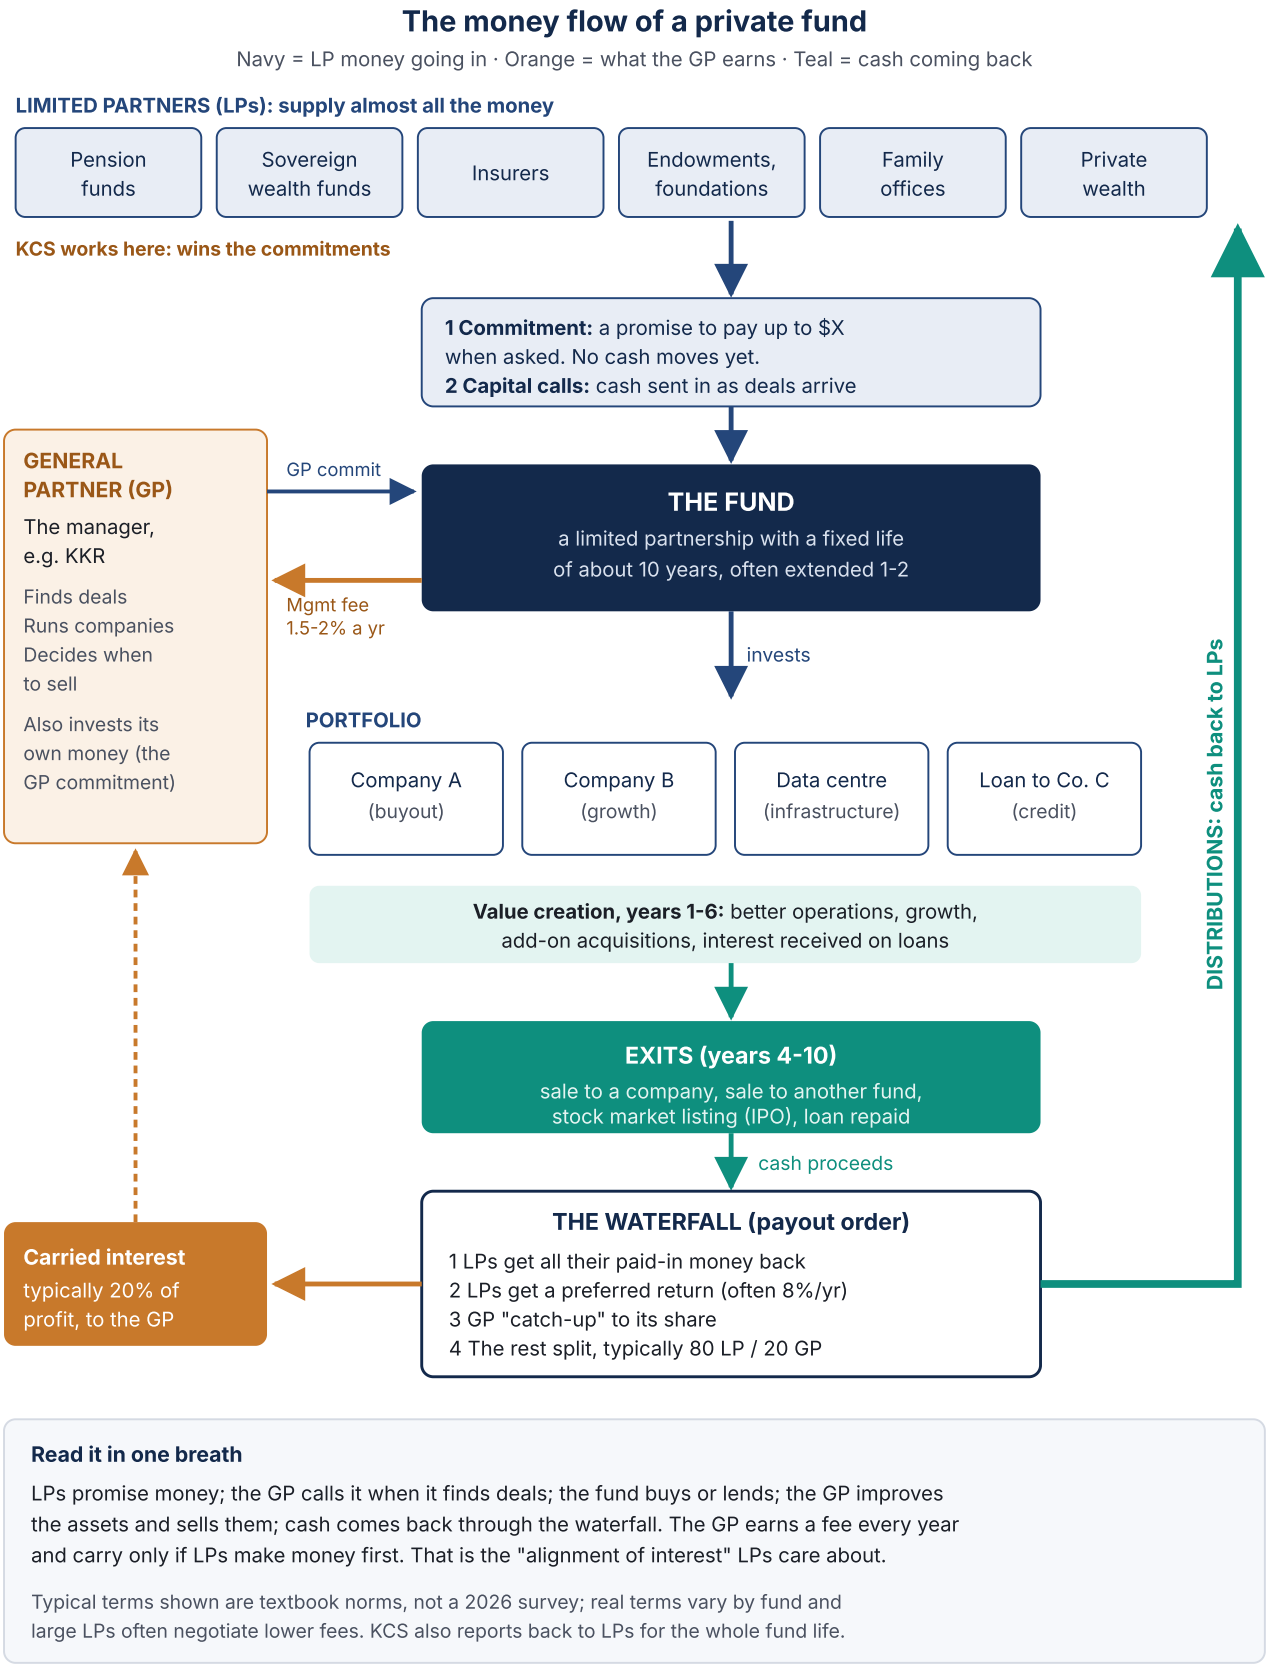

**Figure 3. LP money in, distributions out, fees and carry peel off to the GP.** Fee, hurdle and carry levels are standard textbook figures, not KKR's terms INFERRED. Exit routes are the standard list INFERRED. Illustrative portfolio.

# 3. The life of a closed-end (drawdown) fund

Most KKR flagship funds are **closed-end**: investors join only during fundraising, then the door shuts and the fund runs for a fixed life. They are also called **drawdown** funds, because the GP "draws down" committed money in stages. Think of it as a ten-year journey in four stages [Inferred, standard model]:

1. **Fundraising and commitment.** The GP markets the fund. LPs sign a commitment to give, say, $100m when asked. No cash moves yet. The fund holds a **first close** (the first date it accepts commitments and can start investing) and later a **final close** (the last day it accepts new investors) INFERRED.
2. **Investment period (roughly years 1 to 5).** When the GP finds a deal it sends a **capital call** (also called a drawdown) asking each LP for its share. LPs must pay within days. Money promised but not yet called is **dry powder** or **unfunded commitments** INFERRED.
3. **Value creation and harvest (roughly years 4 to 10).** The GP improves the companies, then sells them in an **exit**: a sale to another company, a sale to another fund, or a stock market listing (IPO) INFERRED.
4. **Distribution.** Cash from exits goes back to LPs. The fund usually has a 10-year life, often with 1 to 2 years of extensions INFERRED.

A real example: in April 2026 KKR held the final close of North America Fund XIV at about $23bn, which KKR calls the largest private equity fund focused only on North America [S335] CONFIRMED. Its LPs included public and private pension plans, sovereign wealth funds, insurers, endowments and foundations, private wealth platforms, family offices and wealthy individuals [S335] REPORTED. That list is the KCS client map.

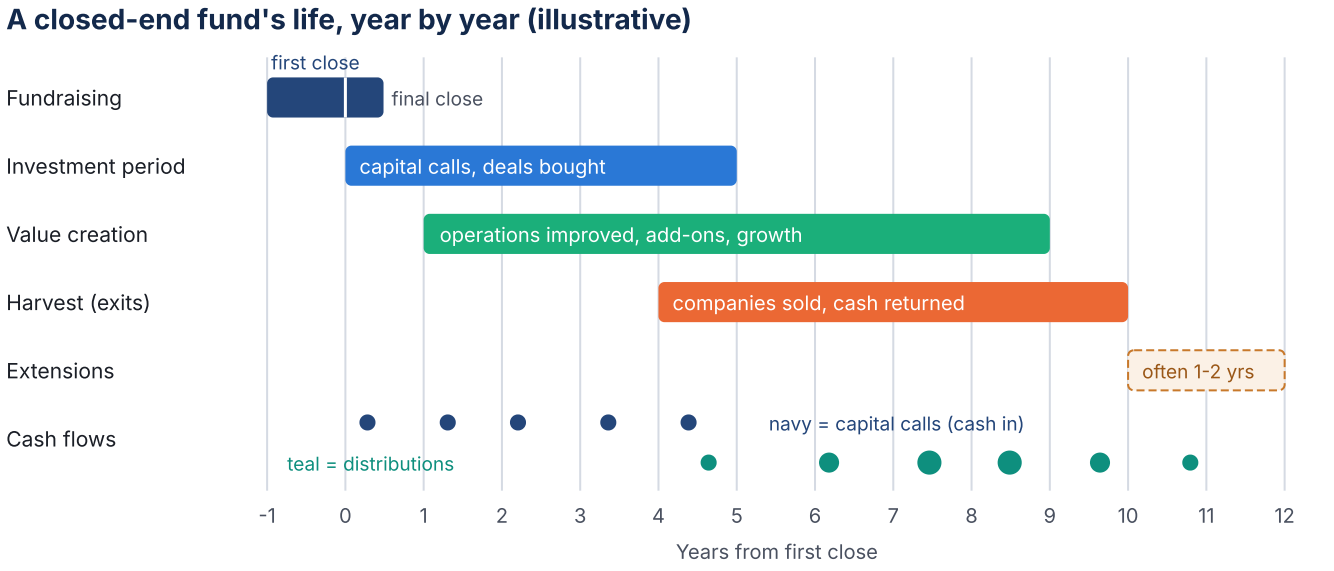

**Figure 4. Four overlapping stages.** Calls cluster early, distributions late. Year ranges are the standard textbook model, not a specific KKR fund INFERRED.

## The J-curve: why the early years look bad

Plot an LP's **cumulative net cash flow** (all cash received minus all cash paid in) over the fund's life. In the early years the LP pays capital calls and fees but gets little back, so the line falls. Once exits start, it climbs. The shape looks like a letter J INFERRED. The bottom of the J is where LPs feel the most strain, and it is why slow exits in 2022 to 2026 hurt so much.

**The J-curve (ILLUSTRATIVE shape, not real data)**

**Figure 5. The J-curve.** Illustrative shape with made-up values, drawn to show the mechanism only. Real depth and timing vary by fund, strategy and exit market INFERRED.

**WHY THIS MATTERS**

Exits have been slow, so the J has been stuck near the bottom for many funds. PitchBook counts almost $5tn sitting in funds that are seven years old or older, 39% of total NAV, as of December 2025 [S260] REPORTED. Bain counts about 32,000 unsold portfolio companies worth about $3.8tn [S262, S326] CONFIRMED. LPs with no cash coming back have less to commit to the next fund. That is the KCS problem in one sentence.

## 4. Fees and the waterfall

The industry shorthand is **"2 and 20"**. The real terms vary by fund, and large LPs often negotiate lower ones [Inferred, standard definitions].

**KEY TERMS**

**Management fee (the "2"):** about 1.5% to 2% a year of committed capital during the investment period, often stepping down later to invested capital. Pays salaries and running costs INFERRED.

**Carried interest or "carry" (the "20"):** the GP's share of profits, typically 20% INFERRED.

**Hurdle rate or preferred return:** the minimum return LPs must earn before the GP gets any carry, commonly 8% a year INFERRED.

**Catch-up:** once the hurdle is cleared, the GP takes a large share of the next profits until it has "caught up" to 20% of total profit INFERRED.

**Waterfall:** the order in which cash is paid out. A **European** (whole-of-fund) waterfall pays carry only after LPs get all their money back plus the hurdle across the whole fund. An **American** (deal-by-deal) waterfall can pay carry deal by deal, which is better for the GP INFERRED. A **clawback** makes the GP repay carry if later losses mean it was overpaid; ILPA's Principles 2.0 (2011) added a clawback appendix [S317] CONFIRMED.

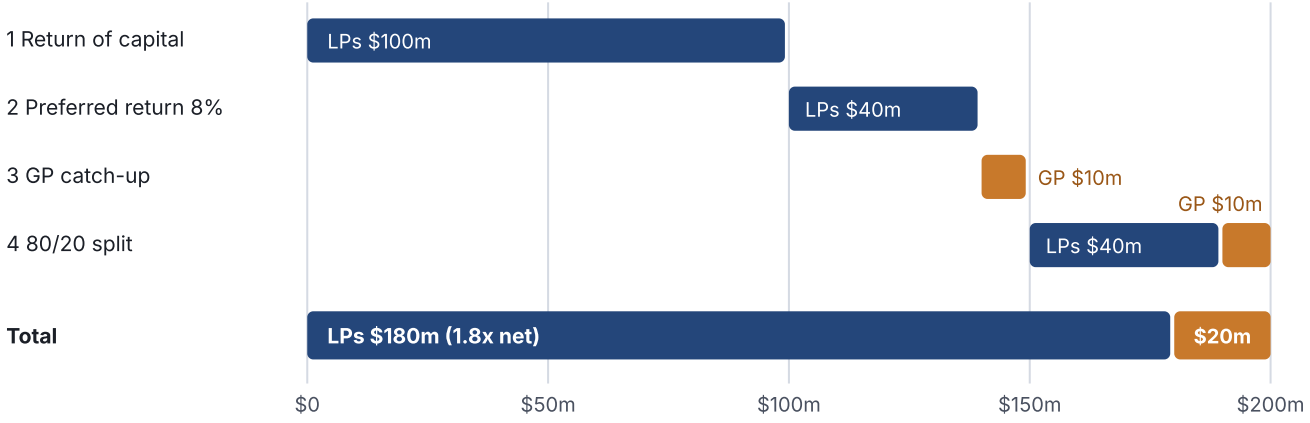

## Worked example you can do on paper

**All numbers are illustrative.** A fund has $100m paid in by LPs. After exactly five years every investment has been sold for $200m in total. The terms: 8% preferred return (simple, not compounded, to keep the maths easy; real funds usually compound), 100% GP catch-up, 20% carry, European waterfall. Ignore fees inside the example.

| Step | Rule | Maths | To LPs | To GP | Left in the pot |
|---|---|---|---|---|---|
| Start | Total exit proceeds | | | | $200m |
| 1 Return of capital | LPs get their $100m back first | 100 | $100m | 0 | $100m |
| 2 Preferred return | 8% a year for 5 years on $100m | 100 × 8% x 5 = 40 | $40m | 0 | $60m |
| 3 Catch-up | GP takes 100% until it has 20% of all profit paid so far | C = 20% x (40 + C), so C = 10 | 0 | $10m | $50m |
| 4 Split | Remainder 80 / 20 | 50 × 80% ; 50 × 20% | $40m | $10m | 0 |
| **Total** | | | **$180m** | **$20m** | |

Check: total profit is $100m and the GP got $20m, exactly 20%. The LPs turned $100m into $180m, so their **net** multiple is 1.8x even though the fund's **gross** multiple was 2.0x. That gap (plus fees, which we ignored) is why LPs always ask whether a figure is gross or net.

### Where the $200m goes: the waterfall, step by step (illustrative)

Navy = LPs, orange = GP. Each bar starts where the previous one ended: the pot is used up from left to right.

**Figure 6. The waterfall.** LPs are paid first; the GP only earns carry because the fund beat the 8% hurdle. Illustrative numbers; textbook terms INFERRED.

**Now add the management fee.** At 2% a year on $100m of commitments for a five-year investment period, the GP would collect $10m of fees before any carry (illustrative). The fee is paid whether or not the fund makes money. Carry is paid only if it does. That is why LPs like a large **GP commitment**: if the GP has its own money in the fund, it suffers losses alongside them.

**DON'T SAY THIS**

"KKR makes its money from carried interest." Carry matters, but the steady engine is fees. KKR's Fee Related Earnings were $1.2bn in Q2 2026 alone [S330] CONFIRMED, and its fee-paying AUM was $638bn [S330] CONFIRMED. Say: "Fees pay for the platform; carry rewards performance."

# 5. Performance metrics: IRR, MOIC, TVPI, DPI, RVPI, PME

LPs judge a GP by its numbers. Six abbreviations do most of the work [Inferred, standard definitions]:

| Metric | Plain English | Formula |
|---|---|---|
| **IRR** internal rate of return | The annualised return, taking timing into account. Returning money fast boosts IRR. | The yearly rate that makes all cash in and out net to zero |
| **MOIC** multiple on invested capital | How many times your money you got back. $1 in, $2.50 out = 2.5x. | Total value / amount invested |
| **TVPI** total value to paid-in | The LP-level version of MOIC: cash already back plus what is still held. | (Distributions + remaining value) / paid-in |
| **DPI** distributions to paid-in | Cash actually returned. "Real money." | Distributions / paid-in |
| **RVPI** residual value to paid-in | Value still sitting in the fund, on paper. | Remaining value (NAV) / paid-in |
| **PME** public market equivalent | Did the fund beat what the same cash flows would have earned in a stock index? | Fund result compared with an index on matched cash flows |

The one equation to remember is **TVPI = DPI + RVPI**. **NAV** (net asset value) is the GP's own estimate of what the unsold holdings are worth, updated quarterly.

### Mini-example (illustrative numbers)

An LP has paid in $50m. By year 6 it has received $30m in cash and the holdings left are valued at $55m. DPI = 30 / 50 = **0.6x**. RVPI = 55 / 50 = **1.1x**. TVPI = 0.6 + 1.1 = **1.7x**. The fund looks good on paper, but only 0.6x is cash in hand.

**Why IRR is not enough.** Fund A doubles money (2.0x) in 3 years: IRR is about 26% a year, since 2 to the power of one-third is about 1.26. Fund B doubles money in 8 years: IRR is about 9%, since 2 to the power of one-eighth is about 1.09. Same multiple, very different experience. Always quote a multiple and an IRR together.

**One LP's position in the same fund over time (illustrative)**

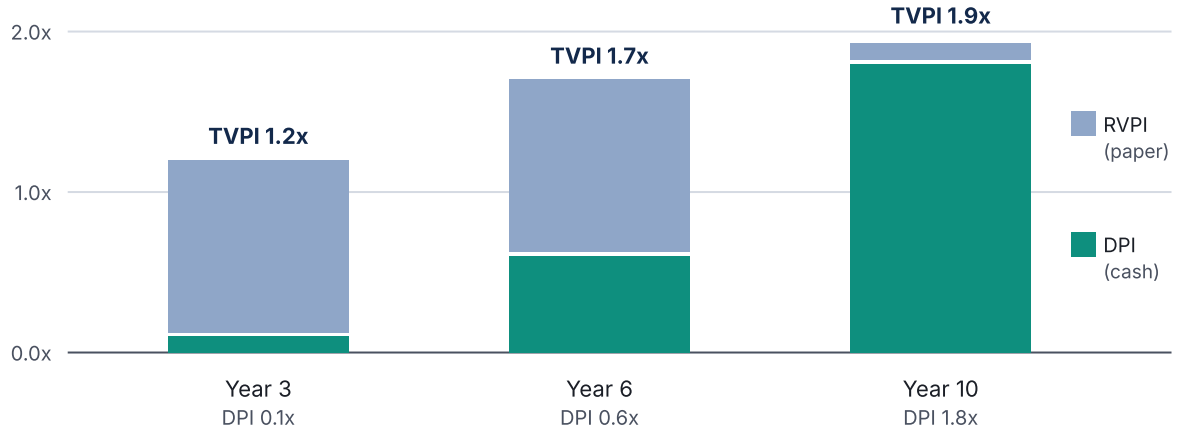

**Figure 7. TVPI = DPI + RVPI.** Over time "paper" value (RVPI) should turn into cash (DPI). Year 6 matches the mini-example above. Made-up numbers for teaching INFERRED.

### Why DPI is the word of 2025-26

If exits are slow, a fund can show a fine TVPI while sending back little cash. LPs need cash to pay pensions and to fund new commitments, so they now ask about DPI first INFERRED. The evidence:

- Bain: distributions as a share of NAV were about 14% in 2025, and below 15% for four years running [S262] CONFIRMED.
- McKinsey's 2026 report (via a Dakota summary): distributions fell to 6% of AUM against a 2015 to 2019 average of 16% [S261] REPORTED.
- Bain cites an ILPA survey in which 53% of LPs said undrawn commitments limit new private equity commitments, up 15 percentage points [S262] CONFIRMED.

**SOURCE UNCERTAIN**

Bain's 2025 report described 2024 distributions as the lowest rate in over a decade (one reprint says 11%), which does not square neatly with "essentially flat at 14%" in the 2026 report [S271] REPORTED. Quote the provider with the number, and say "about".

KKR leans into this. Its co-CEOs called Q2 2026 KKR's "strongest monetization quarter ever" (monetisation means selling or part-selling investments and returning cash) [S330] CONFIRMED. In August 2026 Aon agreed to buy USI Insurance Services from KKR and co-investors for about $17bn including debt, reported at about 6x KKR's original equity [S354] REPORTED. Exits like that are the best fundraising argument there is.

**SAY THIS IN THE INTERVIEW**

"TVPI tells you what a fund might be worth. DPI tells you what an LP can actually spend. After four years of distributions under 15% of NAV, DPI is what gets a pension fund to re-up."

## 6. The asset classes KKR's internship teams invest in

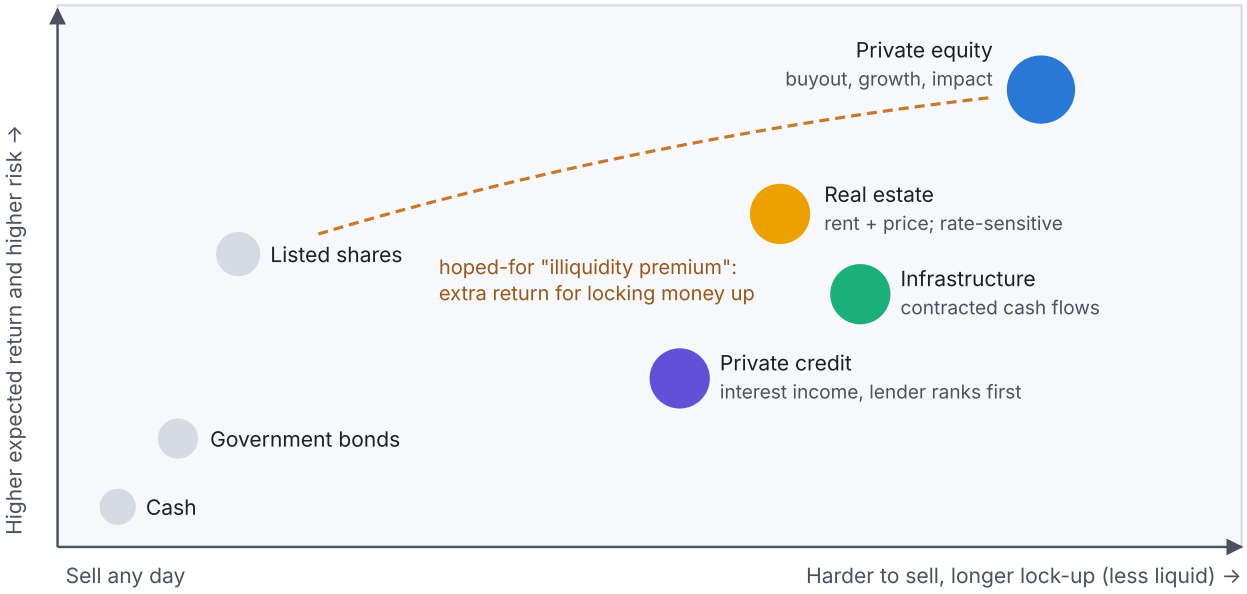

Candidates for the London internship rank six teams: Private Equity (including Global Impact), Real Estate, Infrastructure, Capital Markets, Client Solutions and Capstone. KCS has to explain all of the investing strategies to clients. KCS itself says it "connect[s] the dots" across Private Equity, Infrastructure, Real Estate, Credit, Capital Markets and Insurance-Funded Strategies [S390] CONFIRMED.

| Asset class | What it buys | Where return comes from | Typical risk | Market marker |
|---|---|---|---|---|
| **Private equity: buyout** | Controlling stakes in mature companies | Growth, operational improvement, debt, selling at a higher price multiple | High | 2025 buyout deal value up 44% to $904bn; exits up 47% to $717bn (Bain) [S262] CONFIRMED |
| **PE: growth** | Minority or majority stakes in fast-growing firms | Revenue growth more than debt | High | Grouped with buyout in most data INFERRED |
| **PE: impact** | Companies with a measurable social or environmental goal | Same as PE, plus the impact goal | High | No market size gathered INFERRED |
| **Private credit** | Loans to companies (direct lending, asset-based finance) | Interest income | Lower than equity; leverage and opacity concerns | $2.1tn in 2024, forecast $4.5tn by 2030 (Preqin) [S270] REPORTED |
| **Infrastructure** | Essential physical assets: power, data centres, roads, fibre | Long-term contracted or regulated cash flows | Lower to medium | Around $3tn AUM by end-2030 (Preqin) [S269] REPORTED |

| Asset class | What it buys | Where return comes from | Typical risk | Market marker |
|---|---|---|---|---|
| **Real estate** | Buildings and land | Rent plus price growth | Medium; sensitive to interest rates | Closed-end RE fundraising only $41.3bn in H1 2026, on track for weakest year since 2012 (PitchBook) [S260] REPORTED |

Risk levels and the growth and impact rows are standard descriptions, not sourced data INFERRED. KKR-specific markers: Global Infrastructure Investors V closed at $19.2bn in August 2026, KKR's largest infrastructure fund [S334] CONFIRMED; KKR's alternative credit includes $91bn of asset-based finance and $48bn of corporate private credit, of which $39bn is direct lending [S332] CONFIRMED.

**Risk, return and liquidity: QUALITATIVE map, not data**

Positions are rough intuition from standard risk labels. Real outcomes overlap widely; a bad PE fund can lose money.

**Figure 8. Qualitative map.** No numbers: positions show relative ordering only, drawn from standard descriptions INFERRED. Use it to explain why a client might hold several strategies at once.

## 7. Who the LPs are, and what each one needs

KCS's clients are LPs. Each type has different **liabilities** (what it owes in future), a different **horizon** (how long it can wait), different **liquidity** needs (how fast it may need cash back) and a different **ticket size** (how much it commits per fund). The descriptions below are the standard picture INFERRED; the research found no 2026 breakdown of how much each type holds.

KEY TERM

**Defined benefit (DB) pension:** the employer promises a set income in retirement (say, a share of final salary), so the fund has fixed long-term liabilities and the employer carries the investment risk. **Defined contribution (DC) pension:** the employer and worker pay into a personal pot; the retirement income depends on how the pot performs, so the saver carries the risk. DC funds need daily pricing and switching, which makes illiquid funds harder to hold INFERRED. UK change: 17 workplace pension providers, covering about 90% of active DC savers, pledged in the **Mansion House Accord** (13 May 2025) to put at least 10% of DC default funds in private markets by 2030, with at least 5% in the UK [S315] CONFIRMED.

### Six LP types and what they need (qualitative)

| LP TYPE | WHAT DRIVES IT | HORIZON | CASH NEED | TICKET |
|---|---|---|---|---|
| **Pension (DB)** and DC schemes | Pays pensions for decades; DC needs daily pricing | long | ●● | large |
| **Sovereign wealth** Gulf, Asian state funds | National savings; few near-term liabilities | long | ● | very large |
| **Insurer** life and annuities | Must match long-dated promises; wants credit | long | ●● | large |
| **Endowment,** foundation | Funds a university or charity forever | long | ● | medium |
| **Family office** one rich family's money | Preserve wealth across generations; flexible | medium | ●● | medium |
| **Private wealth** via banks and advisers | Individuals saving or retiring; want liquidity | short | ●●● | tiny, many |

Bars: longer = can wait longer. Red dots: more = needs cash back sooner. Circles: larger = bigger cheque per fund.

**Figure 9. The KCS client map.** All positions are qualitative judgements from standard industry descriptions INFERRED; no 2026 data on LP mix was found in the research. Private wealth tickets are small per person but huge in aggregate.

- **Pensions** are historically the largest LP group INFERRED. Many are now over-allocated: S&P Global found 174 of 298 pension funds analysed were over their private equity target in Q1 2025 [S324] REPORTED. In the UK, the Local Government Pension Scheme holds over £400bn across 86 funds and is consolidating into six pools [S347] REPORTED: fewer, bigger clients.
- **Insurers** are growing fast as LPs because they want long-dated credit INFERRED. KKR owns one: Global Atlantic had $220bn of AUM at 30 June 2026 [S330] CONFIRMED.
- **Private wealth** is the big gap. Bain estimates individuals hold about 50% of global AUM ($275tn to $295tn) but only 16% of AUM held by alternative funds [S293] REPORTED. PitchBook: "Growing inflows from retail investors are becoming the main source of new capital" [S260] CONFIRMED.

**SOURCE UNCERTAIN**

No 2026 figure was found for the share of global private capital held by each LP type, and no sourced ticket sizes. Do not quote percentages for "pensions are X% of LPs".

## 8. Evergreen (semi-liquid) funds versus drawdown funds

A wealthy individual cannot easily handle ten years of unpredictable capital calls. So managers built a second kind of vehicle.

**KEY TERM**

**Evergreen or semi-liquid fund:** a fund with no fixed end date. Investors **subscribe** (buy in) monthly at the latest **NAV per share**, and can ask to **redeem** (cash out), usually quarterly, up to a cap, often 5% of the fund per quarter [S278] REPORTED. When requests exceed the cap, a **gate** applies and requests are paid **pro rata** (everyone gets the same fraction). Examples: non-traded BDCs (US private credit vehicles), non-traded REITs, ELTIFs in Europe, LTAFs in the UK INFERRED.

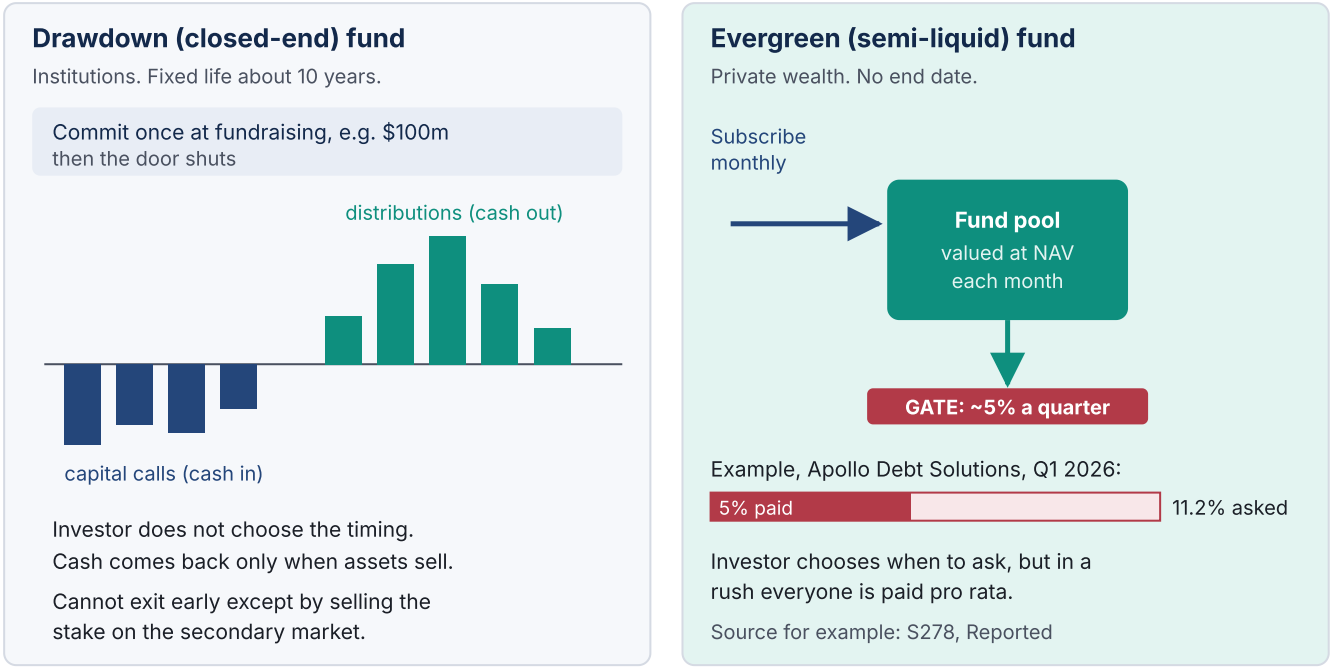

**Figure 10. Two vehicles, two liquidity promises.** Drawdown cash-flow bars are illustrative. Evergreen gate data: Apollo Debt Solutions received requests of 11.2% and honoured 5% in Q1 2026 [S278] REPORTED.

## Why this is the private wealth channel's vehicle

- Size: semi-liquid evergreen vehicles hold about $500bn of industry AUM (Evercore) [S267] REPORTED. US evergreen PE AUM nearly doubled from $51.3bn (end-2024) to $99.3bn (Q1 2026), which "funnels more capital into the hands of the largest GPs with established wealth products" (PitchBook) [S260] REPORTED.
- KKR's version is **K-Series**, its family of funds for wealthy individuals sold through banks and advisers. K-Series AUM was $42bn at 30 June 2026, up from $25bn a year earlier [S330, S332] CONFIRMED.
- The stress test: in Q1 2026 wealthy investors asked to withdraw $20.8bn from private credit funds run by Apollo, Ares, Blackstone, Blue Owl, KKR and others; managers paid "just over half" of requests [S337] REPORTED. Blue Owl enforced a 5% quarterly cap on 2 April 2026 [S278] REPORTED. Blackstone's BCRED paid 100% of record requests of 7.9% of NAV [S278] REPORTED. KKR's K-FIT received requests for 6.3% of shares in Q1 and paid about 80% of them; in Q2 requests fell to 1.65% and were paid in full [S338] REPORTED.
- Europe and the UK have their own wrappers: 189 new ELTIFs since start-2024 and about €34bn of ELTIF assets at end-2025 [S302] REPORTED; the UK LTAF was opened to retail investors from 3 July 2023 [S305] CONFIRMED.

**YOUR OPINION GOES HERE**

Was Q1 2026 a failure of semi-liquid funds, or proof that gates work as designed? One defensible line: "The gates did their job. The lesson for a client team is to set liquidity expectations when the fund is sold, not when the queue forms." Decide whether you agree and why.

## 9. Secondaries, continuation vehicles, co-investment, SMAs and the denominator effect

These five ideas all answer one LP question: "How do I get the exposure I want, on terms I like, without being stuck?"

**KEY TERM**

**LP-led secondary:** an LP sells its stake in a fund to a specialist buyer, usually at a price near NAV, to get cash early INFERRED .

**KEY TERM**

**GP-led secondary / continuation vehicle (CV):** the GP moves one or more prized assets from an old fund into a new vehicle. Old LPs can cash out or roll over; new investors come in INFERRED .

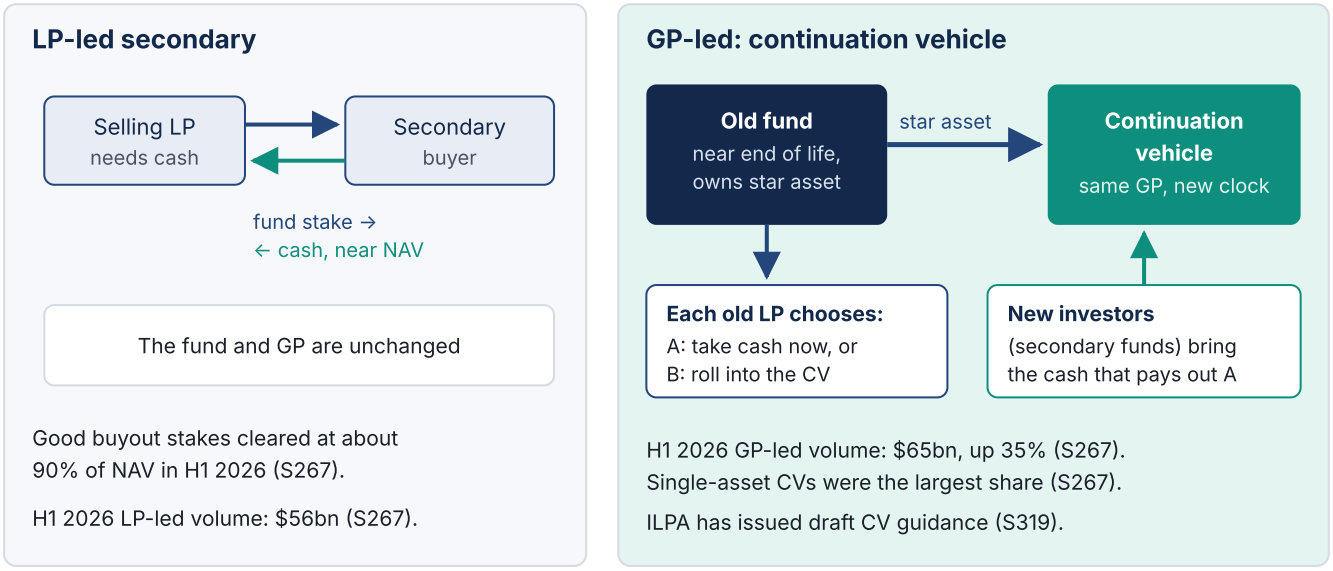

**Figure 11. Two ways to sell early.** Mechanics are standard descriptions INFERRED ; volumes and pricing from Evercore's H1 2026 Secondary Market Review, July 2026 [S267] CONFIRMED . ILPA guidance still a draft [S319] REPORTED .

Bain found CV transaction value grew 62% in 2025, but CVs were still less than 10% of exit value [S262] CONFIRMED . Evercore calls secondaries' shift "from an episodic liquidity solution into a structural portfolio management channel" [S267] CONFIRMED . KKR bought Arctos Partners (closed 4 May 2026); its team now forms "KKR Solutions", which KKR says will house "a scaled multi-asset class secondaries business" [S330, S332] CONFIRMED [S355] REPORTED .

**KEY TERM**

**Co-investment:** an LP invests directly in one deal alongside the fund, usually with no or low fees [S260] CONFIRMED. It lowers the LP's average fee and lets the GP do a bigger deal. PitchBook tracks $37.5bn of co-investment fundraising in the 12 months to June 2026 [S260] CONFIRMED.

**KEY TERM**

**Separately managed account (SMA):** instead of joining a pooled fund, one large LP gets its own account run by the GP, with terms, strategy mix and reporting built for it INFERRED. This is what "customized products" in the KCS job description points at INFERRED.

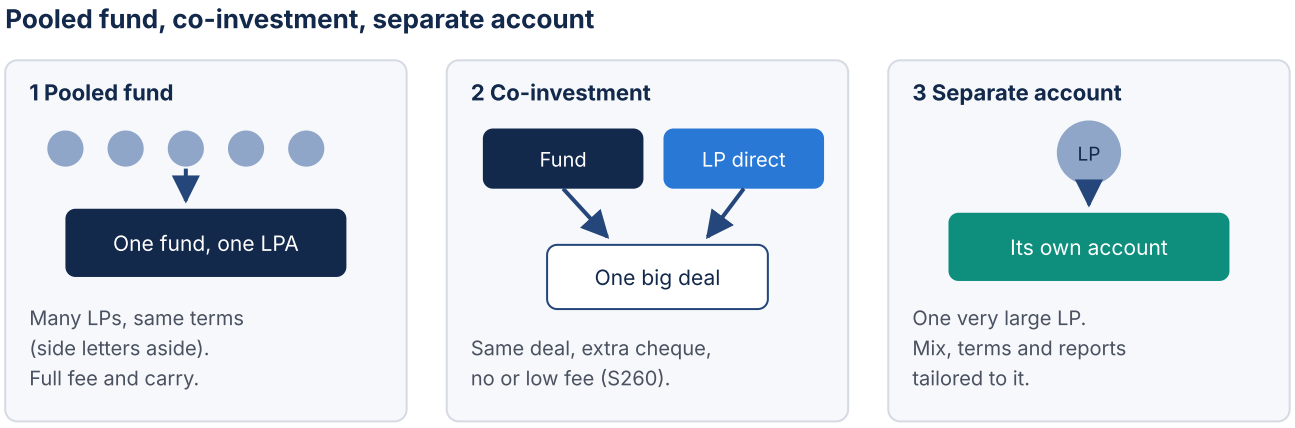

**Figure 12. Three ways an LP can buy from a GP.** Schematic. Co-investment fee point [S260]; SMA description INFERRED.

## The denominator effect

Pension funds set a **target allocation**, for example "15% in private equity". When listed markets fall fast (as in 2022), the value of the listed shares drops at once, but private holdings are revalued only quarterly and more slowly. Private assets become a bigger share of the total even though nothing was bought. The fund may then be "over-allocated" and stop making new commitments [S323] REPORTED.

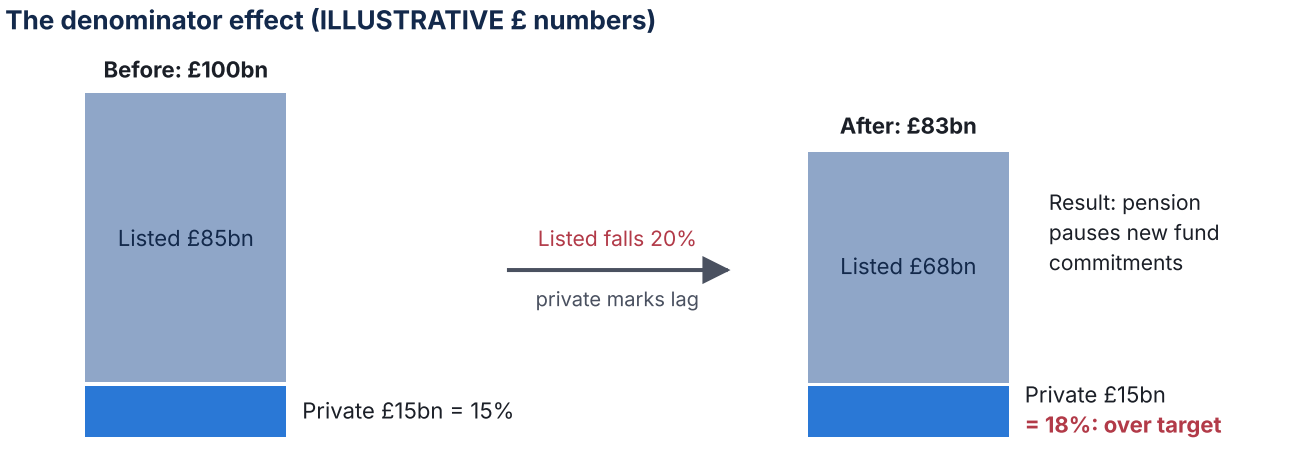

**Figure 13. Nothing was bought, yet private equity went from 15% to 18% of the pension.** Made-up numbers to show the mechanism INFERRED; mechanism from Eaton Vance [S323] REPORTED.

This was not just a 2022 story. S&P Global found 174 of 298 pension funds analysed over-allocated to private equity in Q1 2025 [S324] REPORTED, and PitchBook says institutional allocations are "bumping up against risk limits" [S260] REPORTED. Secondaries are one way out: an over-allocated LP can sell stakes to get back under target.

# 10. How big the industry is, and the fundraising market today

**SOURCE UNCERTAIN: READ THIS BEFORE QUOTING ANY NUMBER**

Every data provider (PitchBook, Preqin, Bain, McKinsey) defines "private markets" and "fundraising" differently. Some count venture capital, some do not; some count only closed-end funds. The totals do not add up to each other. Always quote the provider and the scope together. McKinsey's own reports could not be read in full; only summaries were used [S264] REPORTED .

**$6.1tn → $16.7tn**
Private capital AUM, 2016 to Dec 2025 (PitchBook) [S260] REPORTED

**~$32tn**
Alternatives AUM forecast for 2030 (Preqin, Oct 2025; wider scope incl. hedge funds) [S269] CONFIRMED

**$2.35tn**
PE dry powder, 25% of AUM, Q4 2025 (Preqin) [S266] REPORTED

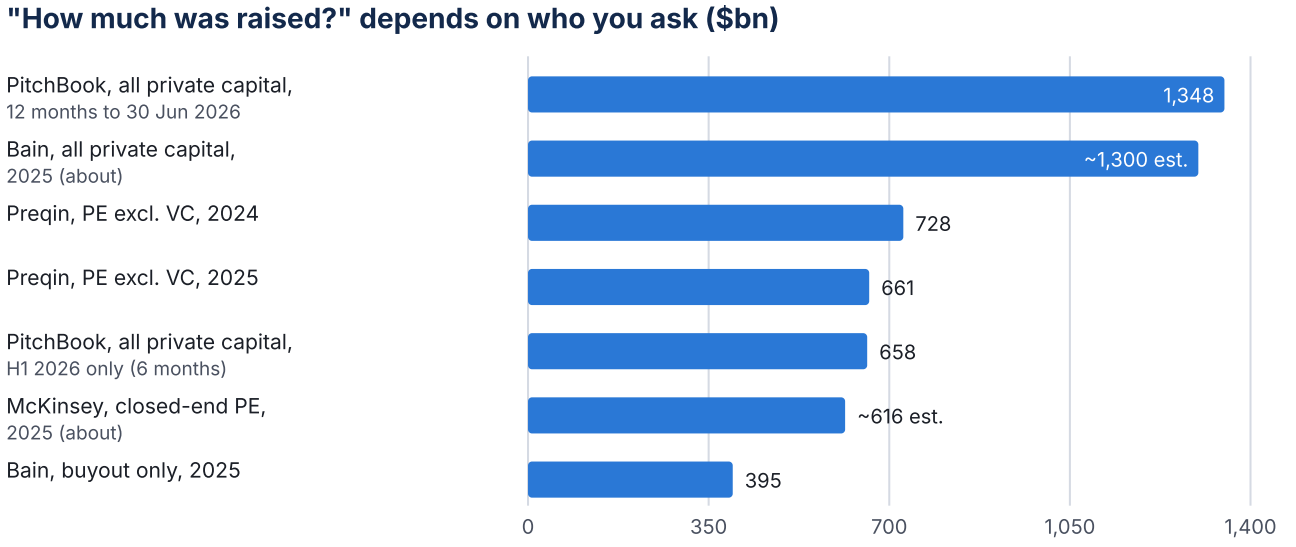

**Figure 14. Same market, different scopes.** PitchBook Q2 2026 Global Private Market Fundraising Report, 3 Sep 2026 [S260]; Bain Global PE Report 2026, Feb 2026 [S262]; Preqin data via Paul Weiss, FY2025 [S265]; McKinsey 2026 via Dakota summary, Feb 2026 [S261]. Values rounded to $bn. "est." marks figures given only as "about".

## The fundraising story, year by year

- **2024:** fundraising fell around 23% to 24% across private market asset classes; Bain blamed the "persistent liquidity situation" for LPs [S271] REPORTED . McKinsey called it the lowest level since 2016 [S264] REPORTED .
- **2025:** Bain counts about $1.3tn raised in total, about flat, with buyout down 16% to $395bn, a fourth straight annual decline; growth came from infrastructure and secondaries [S262] CONFIRMED . Preqin: PE excluding VC $660.7bn, down 9%, with funds closed down 26% to 1,205 [S265] CONFIRMED . Cambridge Associates: fundraising "troughed in 2025 at roughly one-third of 2021 levels" [S261] REPORTED .
- **2026 to 30 June:** PitchBook counts $658.1bn across 1,499 funds in H1, with the 12-month total down 12.7% and fund count down 37%; if the pace holds, 2026 is the fifth straight annual decline [S260] CONFIRMED . But for the biggest firms it is a rebound: average time to close fell to 15.7 months and 82% of PE funds closed at or above target, the highest in at least six years [S266] CONFIRMED . And 7,739 PE funds are on the road, the most in five years [S266] CONFIRMED . KKR raised $34bn in Q2 2026 and expects "a record fundraising year for the firm" [S330] CONFIRMED [S362] REPORTED .

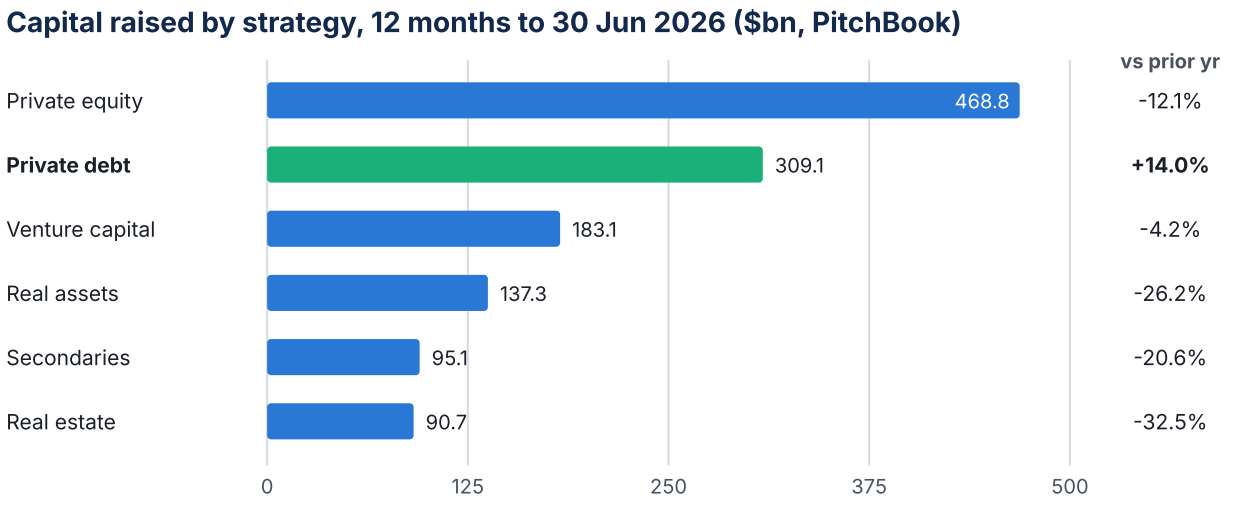

**Figure 15. Private debt is the only strategy growing.** Trailing 12 months to 30 Jun 2026; H1 2026 private debt fundraising was up 27.3%. Source: PitchBook Q2 2026 Global Private Market Fundraising Report, 3 Sep 2026 [S260] CONFIRMED.

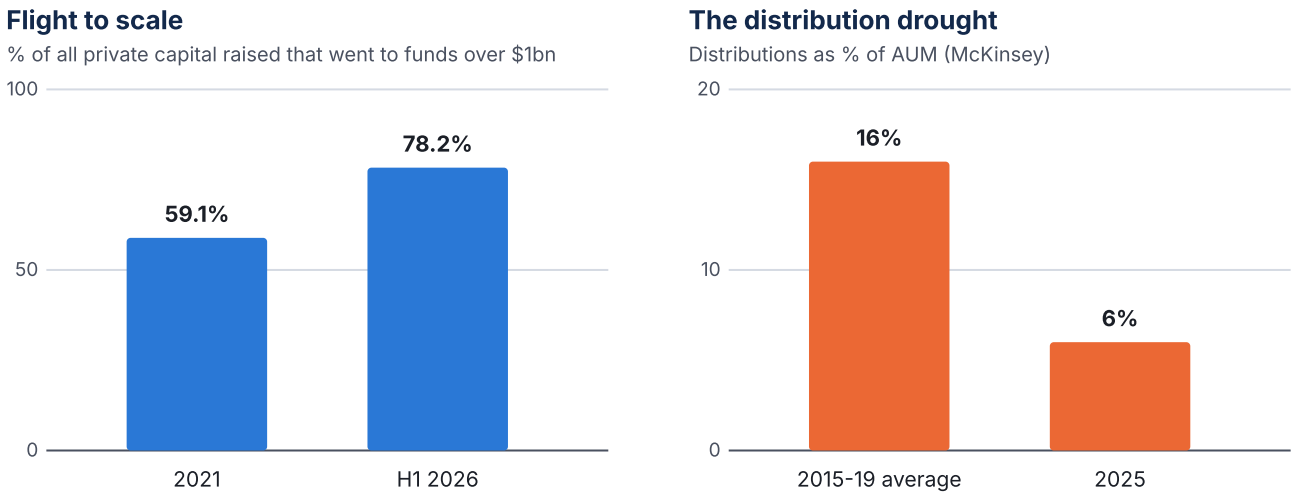

**Figure 16. Money is concentrating in big funds while cash returns have dried up.** Left: PitchBook Q2 2026 report, 3 Sep 2026 [S260] CONFIRMED. Right: McKinsey Global Private Markets Report 2026 as summarised by Dakota, 24 Feb 2026 [S261] REPORTED; Bain's measure (distributions / NAV) was about 14% in 2025 [S262].

More signs of the flight to scale: in PE, 77% of capital since 2024 went to funds over $1bn; only 36 first-time PE funds closed in H1 2026, raising $7.7bn [S260] CONFIRMED. The ten largest funds closed in Q2 2026 took 49% of the quarter's capital [S266] CONFIRMED. PitchBook reads this as allocators "gravitating toward GPs with established track records and broad market validation rather than expending the resources required to underwrite smaller, less-proven vehicles" [S260] CONFIRMED. Bain: "Investors more than ever are focused on funds that have a clear, repeatable, and easily explained strategy" [S262] CONFIRMED.

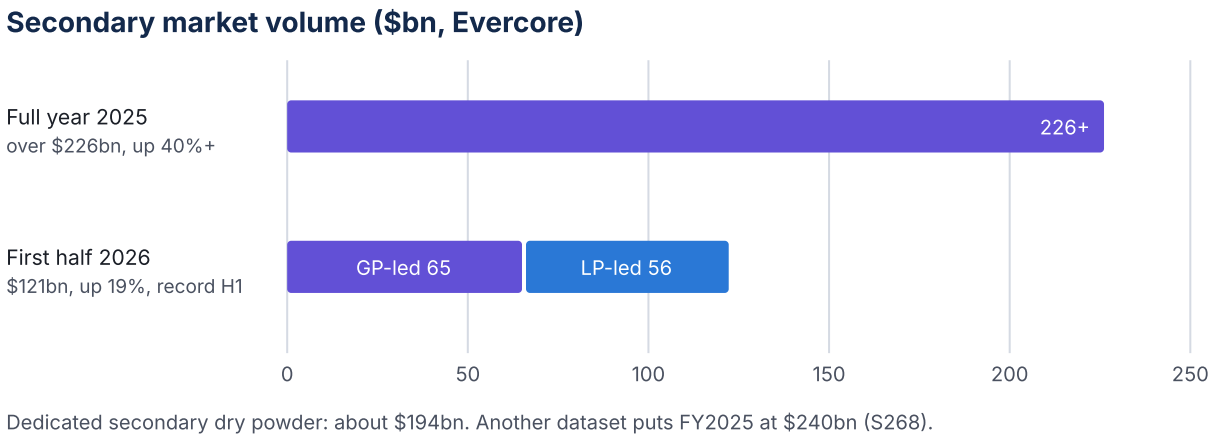

**Figure 17. Secondaries are the liquidity valve.** Evercore H1 2026 Secondary Market Review, July 2026 [S267] CONFIRMED. FY2025 bar is a floor ("topped $226bn"). Ropes & Gray's summary of a different dataset gives $240bn [S268] REPORTED.

## 11. The structural forces reshaping the industry now

Six forces matter most for someone joining a fundraising team in 2027. The map below puts each one next to its best data point and what it means for KCS.

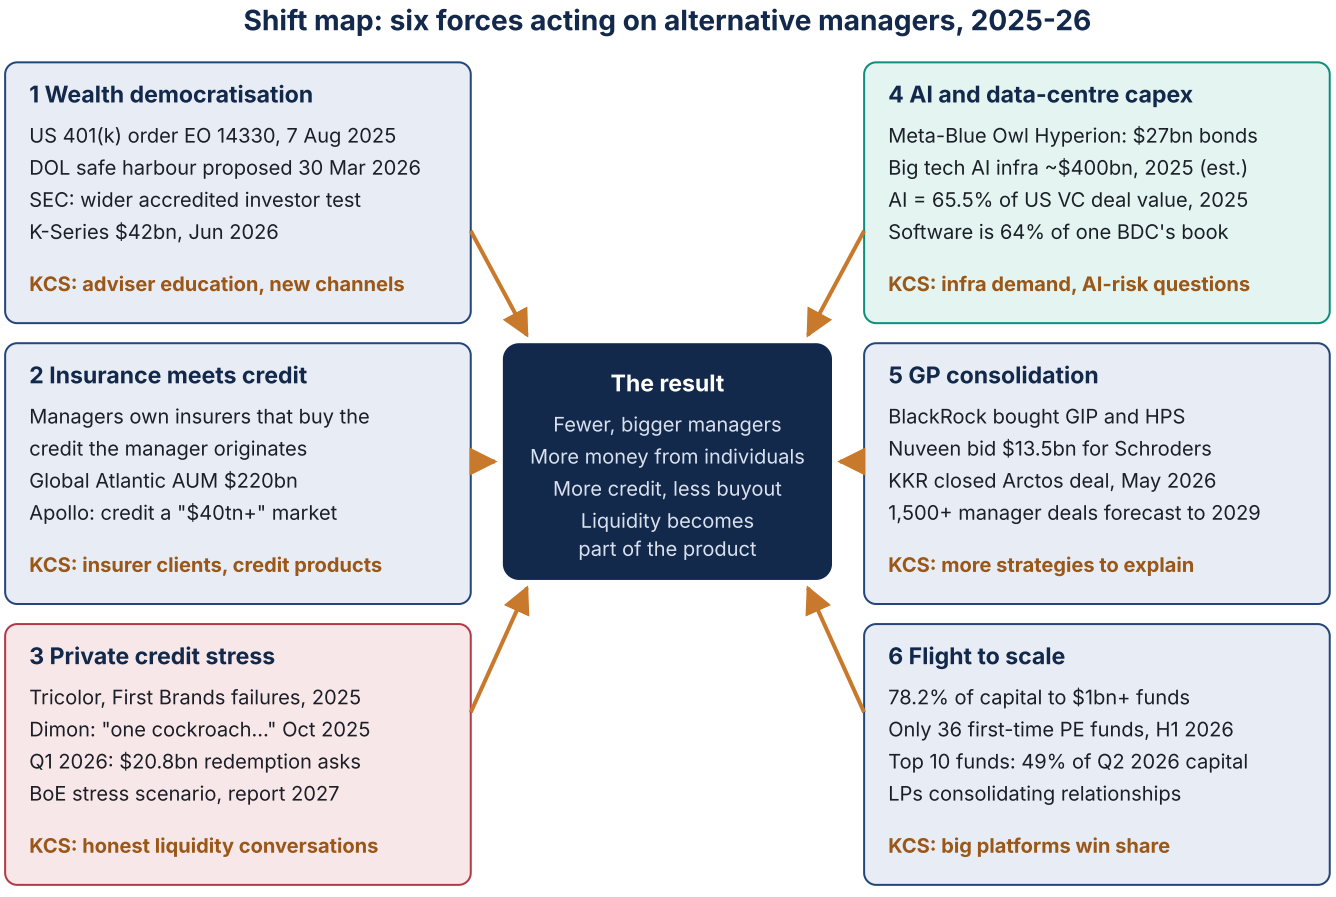

**Figure 18. The shift map.** Sources by box: (1) [S273, S272, S275, S330]; (2) [S330, S285], Apollo is an interested party; (3) [S282, S283, S280, S337, S288]; (4) [S289, S260, S279], the $400bn is a Morgan Stanley estimate; (5) [S290, S291, S330]; (6) [S260, S266]. Facts as of Oct 2026. "KCS" lines are INFERRED.

## What sits behind each force

- **Wealth.** Executive Order 14330 (7 August 2025) told the US Department of Labor to re-examine 401(k) guidance [S273] CONFIRMED; the DOL proposed a process-based safe harbour on 30 March 2026, with no final rule found as of 11 October 2026 [S272, S274] CONFIRMED. Around 30 September 2026 the SEC proposed widening the "accredited investor" test beyond income and wealth, adding an exam and professional routes such as the CFA charter [S275] REPORTED. Bain projects private wealth allocations to alternatives could grow from about $4tn (2022) to over $13tn by 2032 [S293] REPORTED. KKR and Capital Group announced plans in December 2025 that include a target-date fund for 401(k) plans [S363] REPORTED.
- **Insurance and credit.** Large managers own or partner with life insurers (Apollo with Athene, KKR with Global Atlantic). The insurer collects premiums and invests them in long-dated private credit the manager originates [S285] REPORTED. Apollo argues private credit is a market "of over $40 trillion", mostly investment grade [S285] REPORTED; critics say "private credit" as most people mean it is about $1.7tn to $3tn [S286] REPORTED.
- **Credit stress.** Tricolor filed for Chapter 7 on 10 September 2025 [S282] REPORTED; First Brands filed for Chapter 11 around 28 September 2025 with liabilities over $10bn [S283] REPORTED. Jamie Dimon: "when you see one cockroach, there are probably more" [S280] CONFIRMED. BlueBay's Mark Dowding called Tricolor "corporate fraud rather than an underlying symptom of credit market conditions" [S281] REPORTED. Contrast: closed-end private debt funds had a record 2025 net cash flow of $39.5bn, behaving "differently from evergreen vehicles" [S260] REPORTED.
- **AI.** Meta and Blue Owl's Hyperion data-centre joint venture issued $27bn of bonds, described as the largest private credit deal ever [S289] REPORTED. Redemption requests at Blue Owl's BDCs were partly driven by AI disruption risk to software borrowers [S279] REPORTED.
- **Consolidation.** BlackRock's GIP and HPS deals were "the two largest-ever acquisitions of alternative asset managers in less than a year" [S290] REPORTED. Morgan Stanley and Oliver Wyman forecast more than 1,500 asset manager M&A deals through 2029 [S291] REPORTED.

## Where the industry goes in 3 to 5 years: four competing views

| View | Who argues it | Core evidence | If right, for KCS |
|---|---|---|---|
| **1 Structural growth via wealth and insurance** (bull) | Preqin [S269]; Apollo [S285]; Bain [S293] | $32tn alternatives AUM by 2030; credit a $40tn+ market; wealth allocations to $13tn by 2032; US and UK rules opening retirement money | Huge new client base; KCS becomes part sales force, part educator INFERRED |
| **2 Maturity and tougher terrain** (slowdown) | McKinsey 2026 [S263]; PitchBook [S260]; Bain [S262] | McKinsey: changes "previously considered to be episodic are more likely structural features of a maturing industry"; PitchBook: PE must "go back to their guiding principles"; Bain: "12 is the new 5" (deals need about 12% yearly EBITDA growth, not about 5%) | Big multi-strategy platforms win; small and first-time managers struggle INFERRED |
| **3 Hidden risk and correction** (sceptic) | IMF [S287]; Jamie Dimon [S280]; critics of the $40tn claim [S286]; BoE [S288] | IMF warns private credit vulnerabilities "could become systemic"; 2026 BDC gating [S278]; BoE scenario assumes a shock worse than the 2008 crisis | Retail money arrives just as liquidity mismatches are exposed; reputations made or lost on redemptions INFERRED |
| **4 Liquidity reinvented** (middle) | Evercore [S267] | Secondaries now "a structural portfolio management channel"; CVs and evergreen funds become permanent plumbing | Liquidity solutions become a product KCS sells to existing LPs INFERRED |

The views are as summarised in the research notes REPORTED; the "for KCS" column is reasoning INFERRED.

**YOUR OPINION GOES HERE**

Pick one view and one piece of evidence that would change your mind. Example structure: "I lean to view 2 for the industry but view 1 for the largest firms, because 78.2% of capital already goes to $1bn+ funds [S260]. I would change my mind if evergreen redemptions stayed above the 5% gates for several more quarters." Write your own version and practise it aloud in 45 seconds.

## 12. What this means for a fundraising role

- **The market shrinks, the leaders grow.** Buyout fundraising fell for a fourth straight year in 2025 and PitchBook sees 2026 as a fifth straight annual decline for private capital overall [S262, S260], yet KKR raised $133bn in 12 months [S330]. KCS is where share is won INFERRED.
- **DPI is the opening question.** LPs short of distributions ask about cash returned before anything else. Exits like USI are the evidence KCS uses [S354] REPORTED.
- **Two client worlds.** Institutions buy drawdown funds, SMAs and co-investments; individuals buy evergreen funds through banks and advisers. KCS covers both, with different languages for each [S388, S390] CONFIRMED.
- **Liquidity is now part of the pitch.** Gates, pro-rating, secondaries and CVs are basic vocabulary after Q1 2026 [S337, S338] REPORTED.
- **Fewer, bigger buyers.** UK LGPS pools and £25bn+ DC megafunds want customised, fee-efficient access [S346, S347], which is the "customized products" line in the KCS description INFERRED.
- **Platform, not product.** KCS "connect[s] the dots" from PE to infrastructure, real estate, credit, capital markets and insurance [S390] CONFIRMED. Knowing all six asset classes in this part is the entry ticket.
- **Trust is the currency.** KKR's own line: "People do business with people they like and trust" [S384] CONFIRMED. Every number you give a client must be one you can source.

**SAY THIS IN THE INTERVIEW**

"Industry fundraising has fallen for several years, but capital is concentrating in large platforms: funds over $1bn took 78% of the money in the first half of 2026. LPs are short of distributions, so the conversation now starts with DPI and liquidity. That makes Client Solutions more important, not less: the team has to explain everything from a drawdown buyout fund to a semi-liquid credit fund, to a pension and to a wealth adviser, in their own language."

**DON'T SAY THIS**

"Private equity is booming and everyone wants in." It is wrong on the data (buyout fundraising fell for a fourth straight year in 2025 [S262]), it ignores the 2026 redemption queues, and it tells the interviewer you have read headlines, not numbers. Also avoid quoting one total for "the industry" without naming the provider and scope.

PART 2

# KKR from the inside

How the firm makes money, how it is governed, what it promises its clients and what has gone wrong. The product you would be selling.

## A. The founding insight: three people, a borrowed-money idea, and a firm built around it

KKR began as an idea that a big Wall Street bank refused to back. Almost everything about how KKR is built today (who owns it, how people are paid, how long client money is locked in) traces back to that idea and to the partnership of the three men who had it.

### Bear Stearns and the "bootstrap" deals

Jerome Kohlberg Jr. ran corporate finance at the investment bank Bear, Stearns & Co. His two protégés were first cousins: Henry Kravis and George Roberts [S27, S28] CONFIRMED. From the mid 1960s the three did what they called "bootstrap" acquisitions. They bought mostly family-owned companies using a small slice of their own money (equity) and a lot of borrowed money (debt) [S27, S28] CONFIRMED. A reference history credits Kohlberg with first using the technique in 1965 [S27] REPORTED.

KEY TERM

**Leveraged buyout (LBO):** buying a company mainly with borrowed money, where the debt is repaid from the company's own cash flows. The buyer improves the business, pays down the debt, then sells. Because the buyer put in only a small amount of equity, a modest rise in the company's value can multiply that equity many times. The "bootstrap" deals were the first version of this [S27, S28] CONFIRMED. (Fees, carry and fund mechanics are in the basics section; this part only uses them.)

The early results were mixed, which is worth knowing. Roberts and Kravis completed 14 buyouts between 1969 and 1975 with what one history calls "generally mediocre results" [S27] REPORTED. Some were spectacular: investors in Vapor Corp. (1972, about $37m) got 12 times their stake back when it was sold in 1978, and a Rockwell division bought in 1975 returned 22 times in five years. Others failed: Cobblers Industries (1971) went bankrupt [S27, S28] REPORTED. When Bear Stearns leadership refused to set up an in-house buyout fund, the three left to do it themselves [S28] REPORTED.

### 1 May 1976: "3 guys and a broom"

In KKR's own words: "On May 1, 1976, Henry Kravis and George Roberts co-founded KKR alongside their mentor Jerome Kohlberg with $120,000, launching what we now know as the alternatives industry" [S13] CONFIRMED. KKR describes the early firm as "3 guys and a broom" [S14] CONFIRMED. Its first buyout as KKR was A.J. Industries in 1976 [S28] REPORTED.

The first fund still appears in KKR's 2025 annual report. The "1976 Fund" took $31m of commitments and returned $537m: a 35.5% net IRR (the yearly return to investors after fees) and 17.1 times the money invested [S2] CONFIRMED. That track record is the reason pension funds later trusted three people with billions.

**$120,000**
Starting capital, 1 May 1976 [S13]

**17.1x**
Money multiple on the 1976 Fund ($31m in, $537m out) [S2]

**50 years**
Anniversary celebrated 1 May 2026 [S5, S13]

## Scale, fame and the first break-up

The firm grew fast. Houdaille Industries (1979, about $355m) was then the largest LBO ever and KKR's first buyout of a major public company. Beatrice (1986, about $6.2bn) was financed partly with $2.5bn of "junk bonds" (high-interest, lower-rated bonds) arranged by Drexel [S27] REPORTED. In 1987 Kohlberg resigned, uneasy that KKR's deal hunting "disturbingly echoed the tactics of corporate raiders". He later sued over his reduced ownership; the case settled on undisclosed terms [S27, S28] REPORTED. Kravis and Roberts then ran the firm together as co-CEOs from 1987 until October 2021 [S10, S28] CONFIRMED. RJR Nabisco (1988 to 1989) made KKR famous and is covered straight in section I.

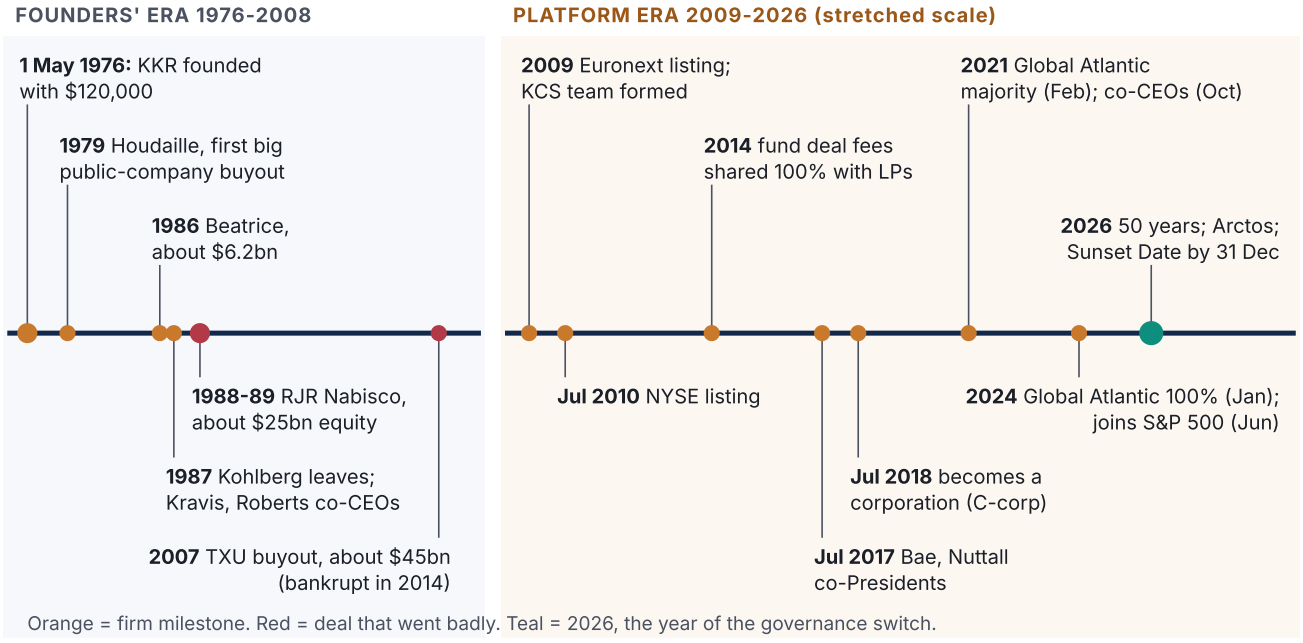

**Figure 19. KKR in 50 years.** Notice the two speeds: 33 years as a buyout partnership, then 17 years of listing, new businesses and an insurer. Sources: founding [S13]; early deals [S27, S28]; KCS formed 2009 [S390]; listings [S5, S28]; fee sharing [S2]; governance dates [S5, S10]; Global Atlantic [S2, S5]; S&P 500 [S31]; Arctos [S1]; Sunset Date [S2]. Dates for the founding of Capstone, KKR Capital Markets and the first credit and infrastructure funds are not in our research files, so they are left off.

**SOURCE UNCERTAIN**

You may read elsewhere that Capstone (KKR's operations team) dates from 2000 and KKR Capital Markets from 2007. Those dates were not confirmed in the research behind this pack. If you want to use them, check KKR's own history page first (kkr.com/about/history) [S13]. Safer line: "KKR added credit, capital markets, infrastructure and insurance over the 2000s and 2010s, and by 2025 traditional private equity was under a quarter of its money" [S2] CONFIRMED.

## How the founding idea shaped KKR's design

You can draw a straight line from the 1976 idea to today's structure. This is the kind of link interviewers remember, because it shows you understand *why* the firm looks the way it does, not just what it does.

**Figure 20. From founding idea to firm design.** Left-hand facts: [S2, S10, S27, S384]; "patient capital" echoes KKR's "patient and disciplined" wording [S1]. Right-hand facts: employee ownership [S2, S3]; portfolio equity [S387]; $30bn alongside clients [S12]; Asian Fund II clawback [S2, S4]; one pool [S2, S5]; 93% long-dated [S1]. The arrows are the author's reading INFERRED.

## Mission and culture in KKR's own words

Interviewers test "fit" against a small set of phrases that KKR repeats everywhere. Learn the exact wording and the date. Then you can quote it accurately and say where you read it.

| Exact words | Who / where | Date and source |
|---|---|---|
| "our mission is to fortify companies and communities and help secure the futures of the institutions and individuals counting on us." | kkr.com About page; tagline "The Power of Together" | Live page, read 11 Oct 2026 [S12] CONFIRMED |
| KKR "aims to generate attractive investment returns by following a patient and disciplined investment approach, employing world-class people, and supporting growth in its portfolio companies and communities." | Boilerplate in every earnings release and the 10-K | 30 Jul 2026 release [S1]; 10-K [S2] CONFIRMED |
| Values: Pursue Excellence; Earn Like & Trust Every Day; Stay Curious, Be Creative; Work Together; Remember, People are Counting on Us. | kkr.com About page | [S12] CONFIRMED |
| "One Firm"; "One P&L and compensation pool"; "Collaboration"; "Business building & innovation" | 2026 proxy presentation, culture slide | Mar 2026 [S5] CONFIRMED |
| "People do business with people they like and trust." Kravis calls it "probably the most apt phrase that speaks both to our culture and our values". Also: "Our business really runs on trust." | Henry Kravis, "The importance of a strong company culture" | 25 Oct 2024 [S384] CONFIRMED |
| "From like and trust, one of our other cultural tenets was born: 'Our word is our bond.'" Also: "There is something that eats away at like and trust. It is arrogance." | Henry Kravis, same piece | 25 Oct 2024 [S384] CONFIRMED |
| "When we are interviewing candidates wishing to join KKR, we look beyond financial acumen, strategy and leadership skills. We look for like and trust and we look to understand who the person is." "Those who are arrogant fail this test." | Henry Kravis, "Looking for talent beyond skills and track records" | 26 Oct 2024 [S385] CONFIRMED |

| Exact words | Who / where | Date and source |
|---|---|---|
| "We could not be more excited about this moment in time. There is such a huge need for private capital to support businesses, and KKR still has so much potential even 45 years later." | Kravis and Roberts, joint statement on handing over as CEOs | 11 Oct 2021 [S10] CONFIRMED |
| "People here like to be helpful, share experiences and use their networks to solve problems. It's a team sport." | Scott Nuttall and Joe Bae, kkr.com About page | [S12] CONFIRMED |
| "We run KKR as 1 firm with 1 compensation approach. Relationships travel, ideas travel, lessons learned travel." | Rob Lewin, CFO, Q2 2026 earnings call | 30 Jul 2026 [S3] CONFIRMED |

Two stories carry the culture better than any slogan. First, Kravis says his "best deal" was a company that went bankrupt: Walter Industries, bought in 1987. KKR spent almost 17 years and settled for over $300m (against $117m of KKR equity) to get fund investors their money back plus a small profit [S384] CONFIRMED. Second, he describes reprimanding an employee who "retraded" a loan deal with a bank in KKR's favour, and apologising to the bank's chief executive [S384] CONFIRMED. Both are about keeping promises to the people who trust you with money, which is the whole job of a client team.

**SAY THIS IN THE INTERVIEW**

"What struck me in Henry Kravis's 2024 pieces on culture was the Walter Industries story: 17 years spent getting investors their money back from a bankruptcy. For a client team that is the culture in one example. The product is trust, and KKR treats a promise to an LP as something you keep even when the deal goes wrong." [S384]

**SOURCE UNCERTAIN: "INDUSTRIALIST VISION"**

The phrase "industrialist vision" appears in the SEO London listing for this internship. Our research did not find it in any KKR document we read: the 10-K, the earnings releases, or kkr.com's About and History pages [S2, S12, S13]. Do not quote it as KKR's own wording. If you want to use the idea, attribute it: "the SEO listing describes KKR's industrialist vision", and then anchor it to something KKR does say, such as "supporting growth in its portfolio companies" [S1] or its ownership-culture programme [S387].

**DON'T SAY THIS**

"KKR is a private equity firm." KKR describes itself as a global investment firm with asset management, insurance and strategic holdings [S1, S12]. Traditional private equity was under 25% of its money at the end of 2025 [S2] CONFIRMED. Also avoid generic praise ("prestigious", "market leader"). Use a number or a quote instead.

## B. How KKR makes money now

KKR reports three businesses, which it calls its "Three Engines of Growth" [S12] CONFIRMED. Each earns money in a different way. If you can explain the three engines and the "earnings ladder" in two minutes, you will be ahead of most candidates.

**$796.5bn**
Assets under management (AUM), 30 Jun 2026, up 16% in a year [S1]

**$638.4bn**
Fee-paying AUM, 30 Jun 2026 [S1]

**$129bn**
New capital raised in 2025, a record [S4, S5]

**$3.71bn**
Fee Related Earnings, FY2025 ($4.13 per share) [S2, S4]

**70%**
FRE margin, Q2 2026: 10th quarter in a row above 65% [S1, S3]

**$4.38bn**
Adjusted Net Income, FY2025 ($4.87 per share) [S2, S4]

## The three segments

| Segment | What it is | How it earns |
|---|---|---|
| **1. Asset Management** | Five business lines: Private Equity, Real Assets (infrastructure and real estate), Credit and Liquid Strategies, Capital Markets (KCM), and Principal Activities (KKR's own balance sheet invested alongside clients) [S1, S2] CONFIRMED. | Management fees, transaction and monitoring fees, fee-related performance revenues, carried interest and investment income [S2] CONFIRMED. |
| **2. Insurance** | Global Atlantic, a retirement and life insurer selling annuities and reinsurance. AUM $220bn at 30 Jun 2026; book value $11.8bn [S1] CONFIRMED. | The "spread": what it earns investing policyholders' premiums minus what the policies cost. It also pays KKR's asset manager fees to manage its money [S1] CONFIRMED. |
| **3. Strategic Holdings** | Long-term stakes in operating companies owned by KKR itself, mainly through its Core Private Equity strategy. 19 companies at 31 Dec 2025 [S2] CONFIRMED. | Dividends now, gains on sale later. Target: $350m+ of operating earnings in 2026 and $1.1bn+ by 2030 [S3] CONFIRMED (targets). |

## The earnings ladder, one rung at a time

KKR's earnings release builds profit up in steps. Each step has a name that analysts and KKR's own managers use on calls. You do not need the accounting, only the logic.

- **Fee Related Earnings (FRE)**: management fees, plus transaction and monitoring fees, plus fee-related performance revenues, minus the pay and costs tied to them. The steady, recurring profit of the asset manager [S1, S5] CONFIRMED.
- **Total Operating Earnings (TOE)**: FRE plus Insurance Operating Earnings plus Strategic Holdings Operating Earnings. KKR calls this "the more durable and recurring portion" of earnings. Introduced in November 2023 [S1, S11] CONFIRMED.
- **Total Investing Earnings**: net realised performance income (carry after the staff share) plus net realised investment income (gains on KKR's own money) [S1] CONFIRMED.
- **Adjusted Net Income (ANI)**: TOE plus Total Investing Earnings, minus interest and taxes. KKR's headline "bottom line" [S1] CONFIRMED.

## Follow one dollar through KKR

FY2025 figures unless marked. Read top to bottom: money in, money invested, money earned, money shared.

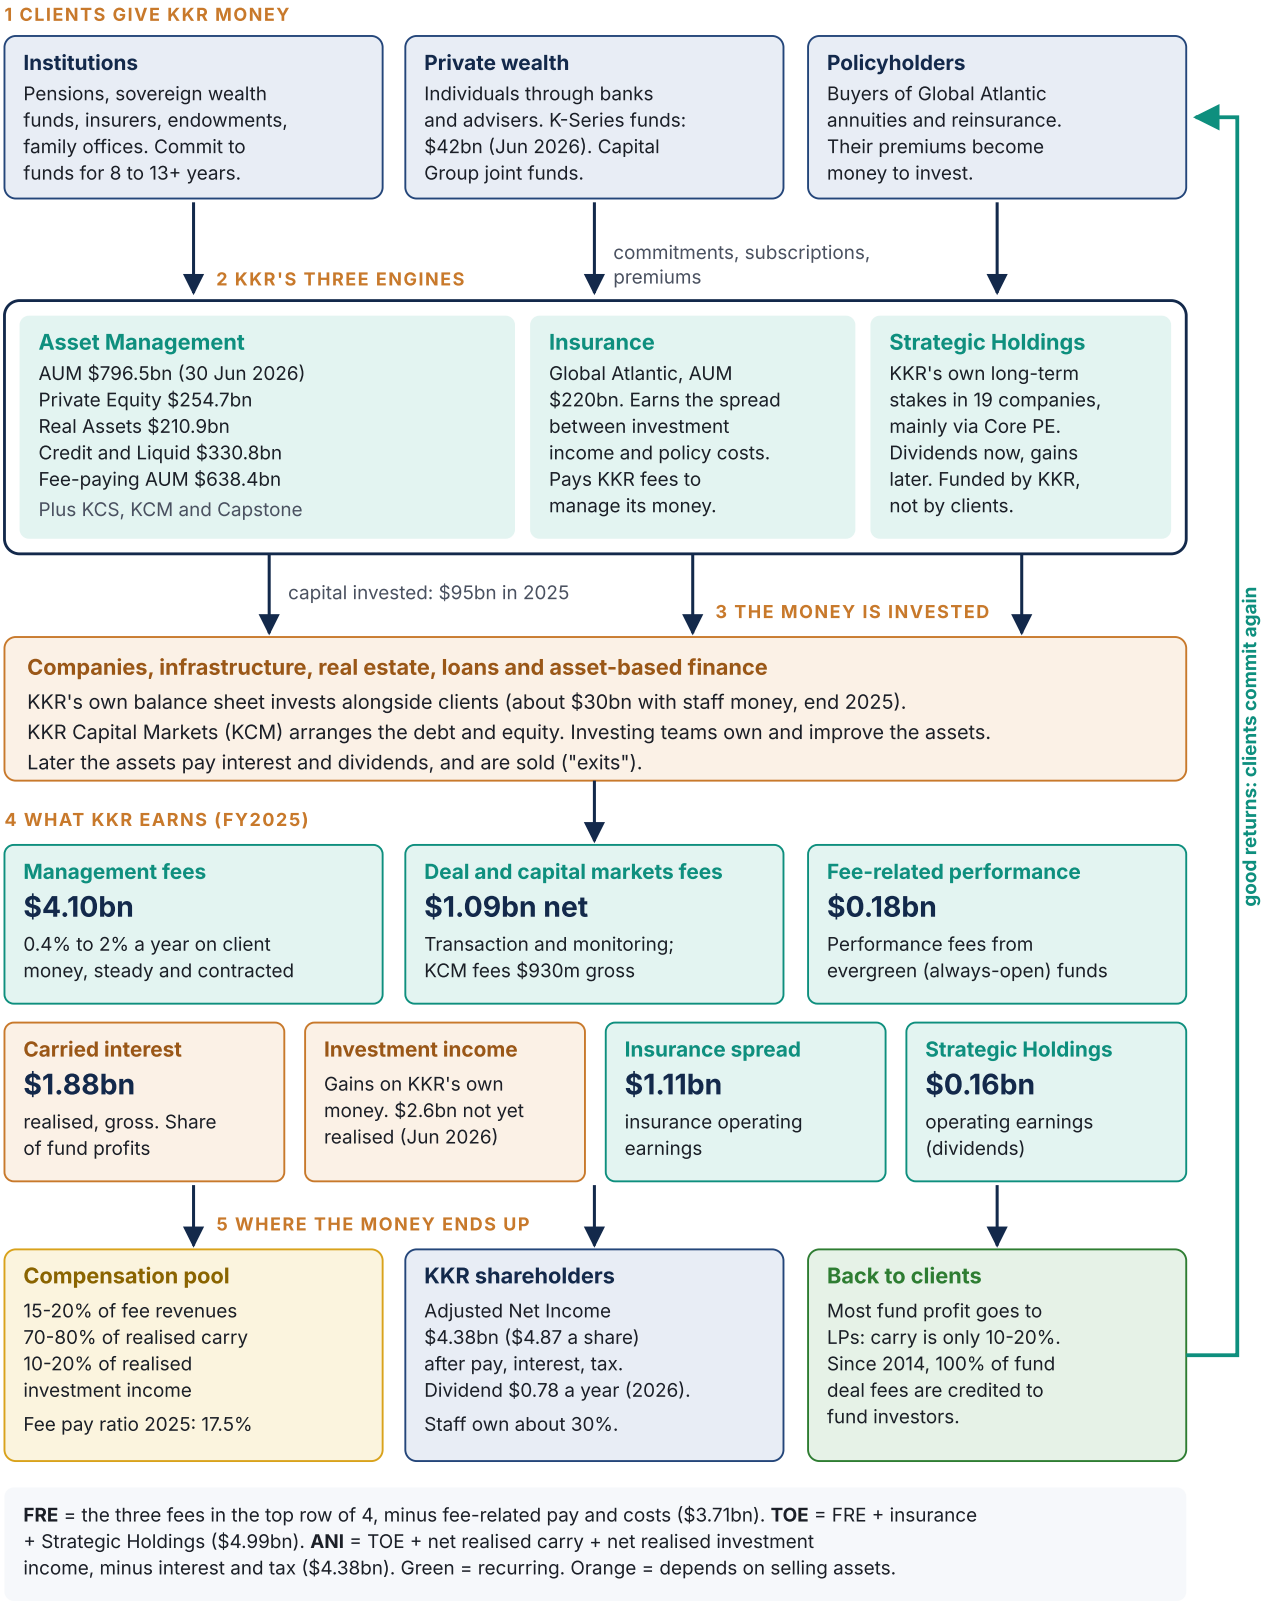

**Figure 21. The money flow.** Read the green boxes as the "annuity" (steady, contracted) and the orange boxes as the "harvest" (lumpy, depends on markets). Sources: FY2025 revenue lines and earnings [S2, S4]; AUM and K-Series [S1]; KCM fees [S5]; fee and carry ranges, fee sharing since 2014 [S2]; compensation ratios [S5]; $30bn alongside clients [S12]; dividend [S1, S4]; employee ownership [S2, S3]. All CONFIRMED; layout is the author's.

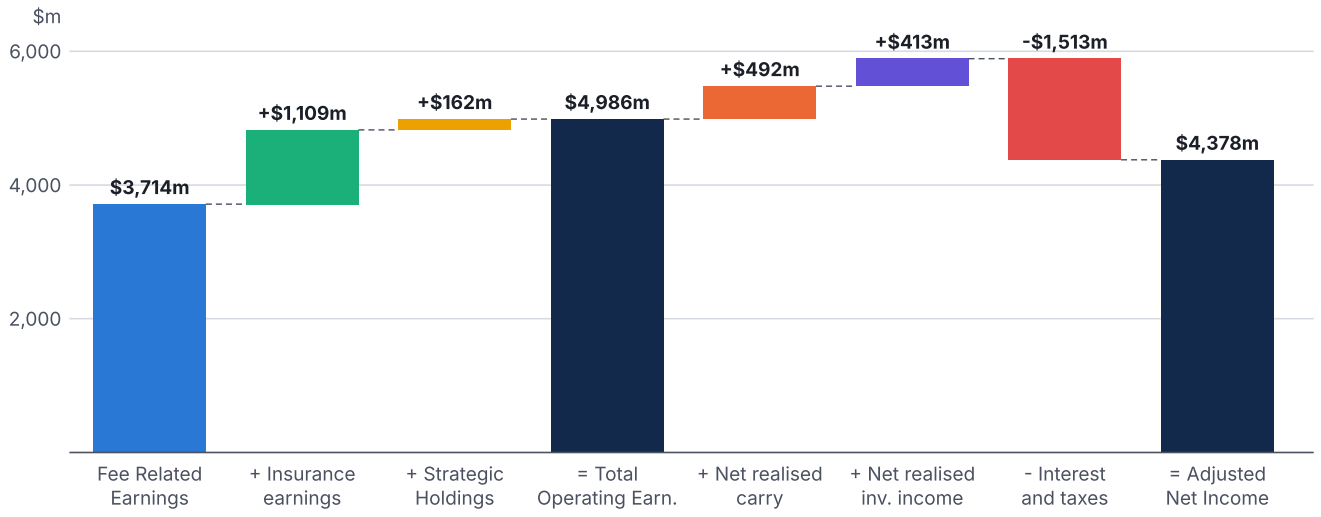

**Figure 22. FY2025 earnings ladder ($m).** Most of the profit (TOE, $4,986m) arrives before a single asset is sold. Source: FY2025 10-K and Q4 2025 release [S2, S4] CONFIRMED; 84% recurring share [S1, S3]. Interest and taxes are derived by subtraction INFERRED.

**WHY THIS MATTERS**

Investors pay more for steady earnings than for lumpy ones. That is why KKR keeps moving revenue into the "recurring" boxes. Example: from Q2 2026, performance fees from its K-Series private equity fund for wealthy individuals moved from carried interest (where 70% to 80% goes to staff) into fee-related performance revenues (where 15% to 20% does). CFO Rob Lewin said this "structurally increases" earnings per share [S1, S3] CONFIRMED. For a client team, this is the link: **every dollar KCS raises into a fee-paying fund lands in the most valuable box**. At 30 Jun 2026, $72bn of committed money was not yet paying fees, at an average of about 90 basis points (0.90%) [S1, S3] CONFIRMED. Simple maths: that is roughly $650m of yearly fees waiting to switch on once the money is invested (estimate, as of Jun 2026) INFERRED.

## Fee rates in one paragraph

Management fees vary by product. Private equity drawdown funds charge 1.0% to 2.0% of commitments while investing, then 0.75% to 1.50% of invested capital; infrastructure and real estate 0.75% to 1.50%; CLOs 0.4% to 0.5%; open-ended vehicles 0.50% to 1.25% [S2] CONFIRMED. Carry is typically 10% to 20% of fund profits after a 6% to 8% preferred return [S2] CONFIRMED. Management fees were $4.1bn in 2025 and $4.6bn over the 12 months to Q2 2026, up 26% year on year in Q2 [S1] CONFIRMED. Realised carry was $1.88bn in 2025; $10.2bn of carry was earned on paper but not yet realised at 30 June 2026 [S1, S2] CONFIRMED.

## The numbers over time

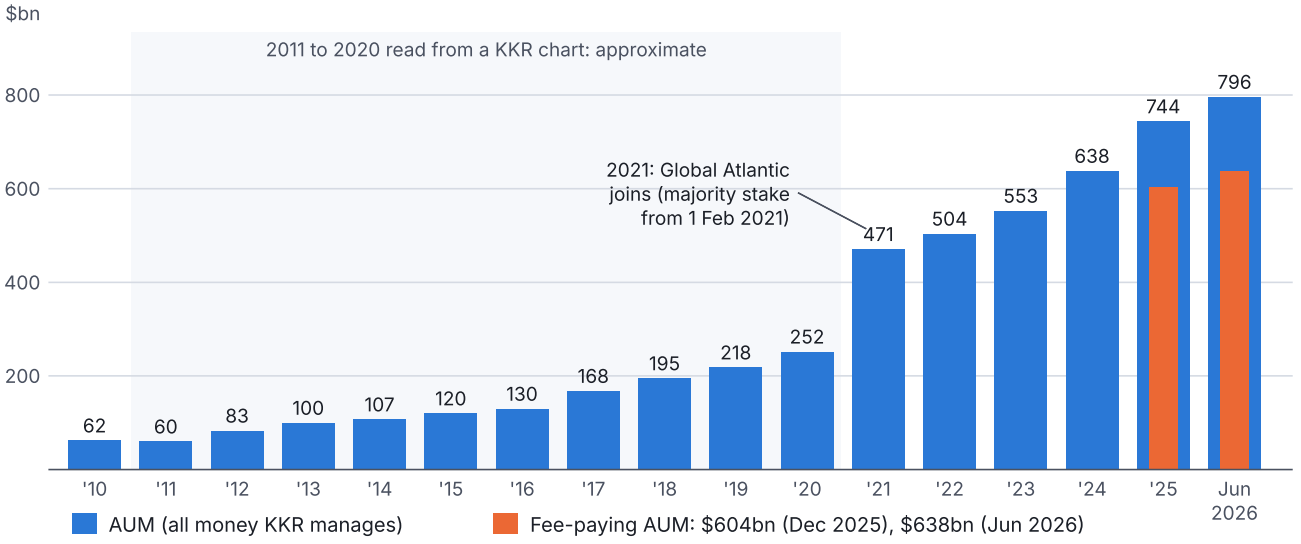

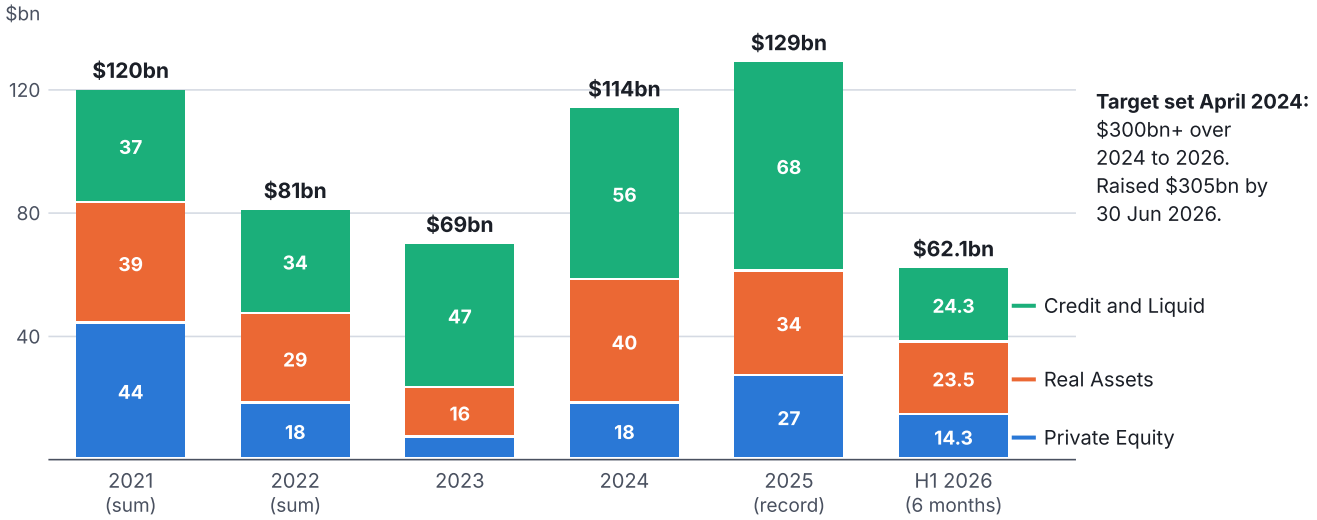

**Figure 23. AUM since the 2010 listing ($bn, year end).** About $62bn in 2010 to $796.5bn in June 2026, an 18% ten-year compound growth rate on KKR's own figures. The step in 2021 is Global Atlantic. Sources: 2010 to 2025 from KKR's proxy deck chart [S5] (middle years are read from chart labels and are approximate INFERRED); 2024 and 2025 [S2, S4]; Jun 2026 and fee-paying AUM [S1, S4] CONFIRMED.

2021 and 2022 totals are sums of the business-line figures. 2023 lines sum to $70bn; KKR reports $69bn (rounding).

**Figure 24. New capital raised per year, by business line ($bn).** 2023 was the low point for private equity fundraising ($7bn), but credit carried the year. 2025 set a record, and the 12 months to June 2026 set another ($133bn). Sources: line figures [S2]; totals 2023 to 2025 [S5]; H1 2026 [S1]; $305bn since 2024 [S1, S3] CONFIRMED. 2021 and 2022 totals are sums INFERRED.

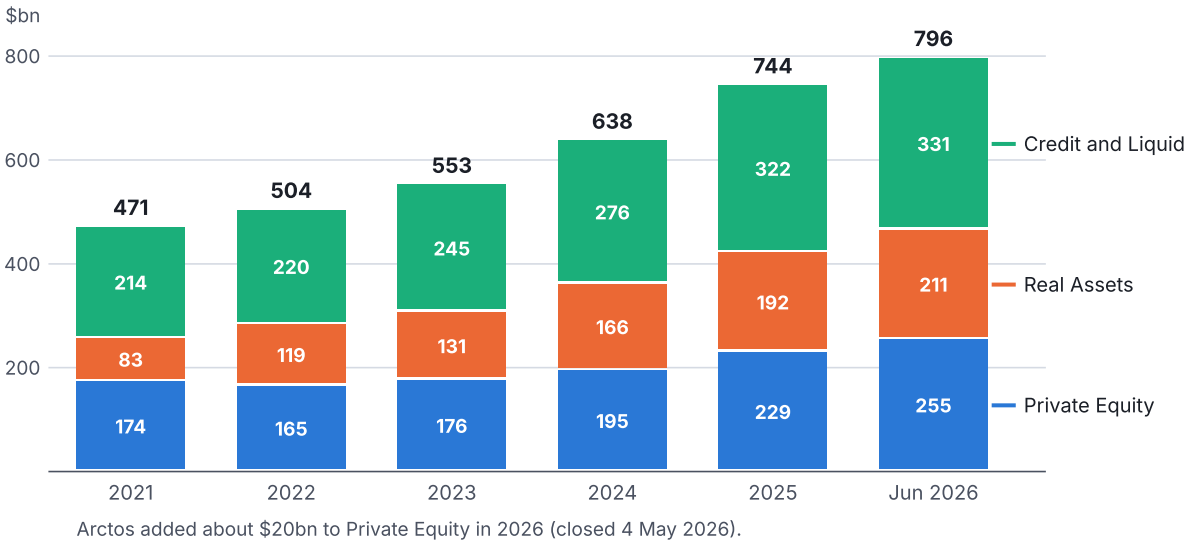

**Figure 25. AUM by business line ($bn, year end).** Credit is now the biggest line; Real Assets grew fastest (83 to 211). Sources: 10-K business line tables [S2]; Jun 2026 [S1] CONFIRMED. Global Atlantic's $220bn ($164bn of it credit) appears to be counted inside these totals, judging by the jump in 2021 [S1, S5] INFERRED. Within Credit at Jun 2026: $143bn leveraged credit, $91bn asset-based finance, $48bn corporate private credit, $38bn liquid strategies [S1].

**SAY THIS IN THE INTERVIEW**

"KKR is really three businesses: an asset manager that earns steady fees, an insurer that earns a spread, and its own long-term holdings. About 84% of segment earnings over the last twelve months were the recurring kind. For a client solutions team that matters, because the money you raise turns into management fees, which feed Fee Related Earnings, which is the part of KKR the market values most." [S1, S3]

## C. The contracts: who gives what, and who gets what

A firm like KKR is a bundle of agreements with four groups: the clients who lend it their money (LPs), the people who work there, the shareholders who own the listed company, and KKR's own balance sheet. The trick is that the same people often sit in several groups at once. Employees own about 30% of the shares [S2, S3] CONFIRMED. Clients are sometimes shareholders too.

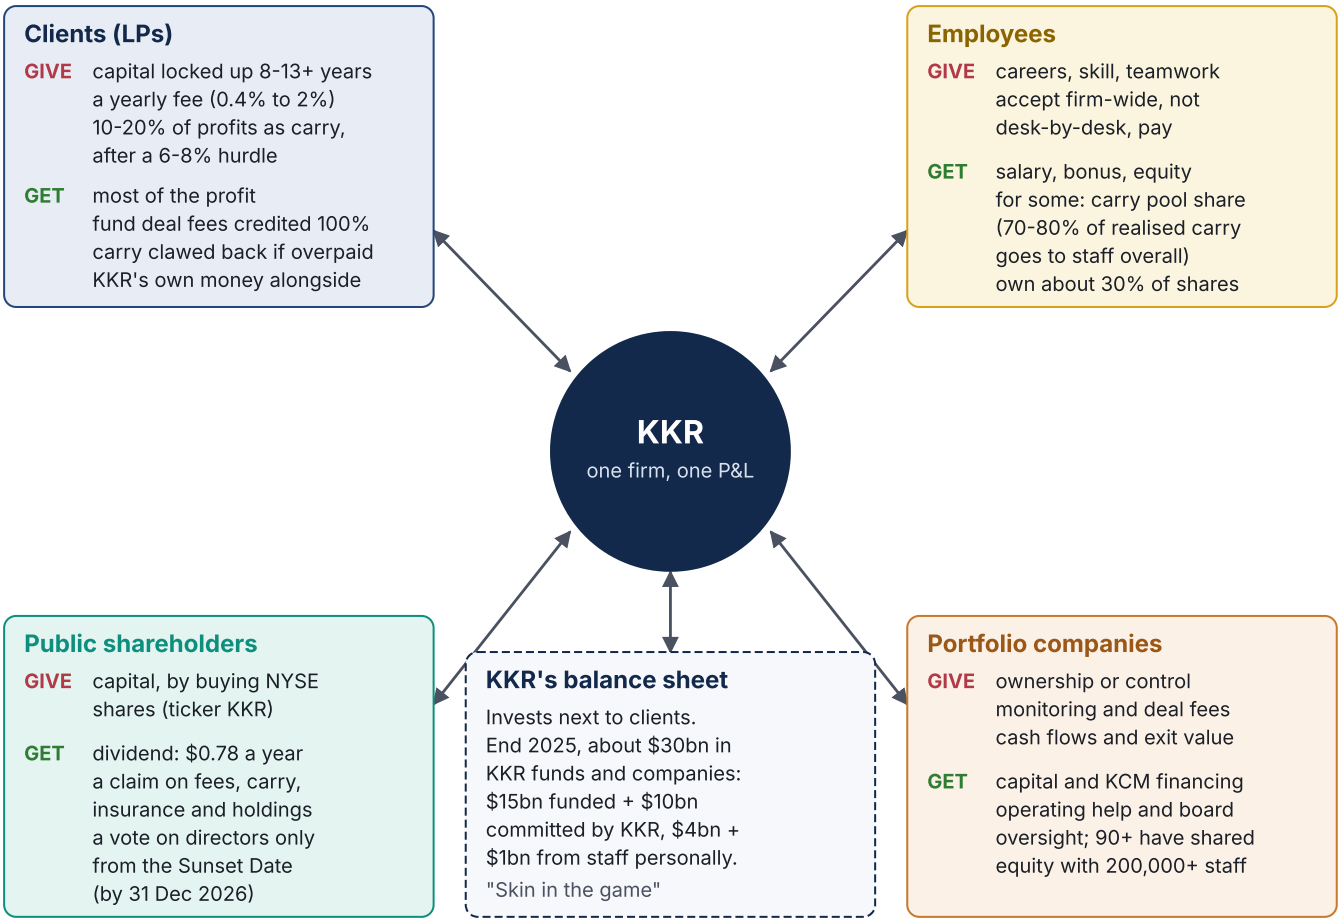

**Figure 26. The stakeholder contract map.** Every arrow runs both ways: each group gives something and gets something. Sources: fund terms, fee and carry ranges, clawback, fee sharing [S2]; compensation ratios [S5]; carry pool and employee ownership [S2, S3]; dividend [S1]; Sunset Date [S2]; portfolio equity programme [S387]; $30bn co-investment [S12]. All CONFIRMED.

## What LPs give and get

The fund mechanics are in the basics section. Here is what is specific to KKR. Fund lives vary by strategy: infrastructure and real estate drawdown funds invest for up to six years and last 10 to 13 years; credit drawdown funds last 8 to 10 years (up to 12); core private equity vehicles can last up to 25 years; open-ended vehicles have no end date [S2] CONFIRMED. Real examples from the June 2026 fund table: North America Fund XIV ($21.9bn committed at that date, investing April 2025 to April 2031), Global Infrastructure Investors V ($18.6bn, July 2024 to July 2030), European Fund VI ($7.5bn, June 2022 to June 2028) [S1] CONFIRMED. Both flagships later closed larger: about $23bn for North America XIV in April 2026 and $19.2bn for Infrastructure V in August 2026 [S334, S335] CONFIRMED.

KEY TERM

**Clawback:** if a manager takes carry early in a fund's life and the fund later does worse, the manager must hand that carry back. KKR did exactly this in Q4 2025 on Asian Fund II: $344m repaid, $207m net after amounts recovered from current and former employees [S2, S4] CONFIRMED. It is the contract working as designed, and a good example to show you understand alignment.

## What employees give and get

KKR pays from **one compensation pool** across the firm. The 10-K says pay "is based on the performance of KKR as a whole, in addition to an individual's contributions", and that KKR generally does not pay people "based solely on an individual's accomplishments in relation to the profits and losses" of one

business [S2] CONFIRMED. Kravis says KKR has always worked this way, "creating a system in which we all succeed and fail together", and that everyone got "phantom equity" from the start [S385] CONFIRMED.

Carried interest from all funds is allocated to one vehicle, KKR Associates Holdings L.P., "the carry pool" [S2] CONFIRMED. The pay mix is base salary, a possible cash bonus, discretionary equity and, for select employees, a carry pool allocation [S2] CONFIRMED. On 29 November 2023 KKR made pay "more success based": more from carry, less from fees [S11] CONFIRMED. Bloomberg reported the shift: the staff share of carry went from 60%-70% to 70%-80%, and the fee-related share from 20%-25% to 15%-20% [S30] REPORTED; the new ranges match KKR's own deck [S5] CONFIRMED.

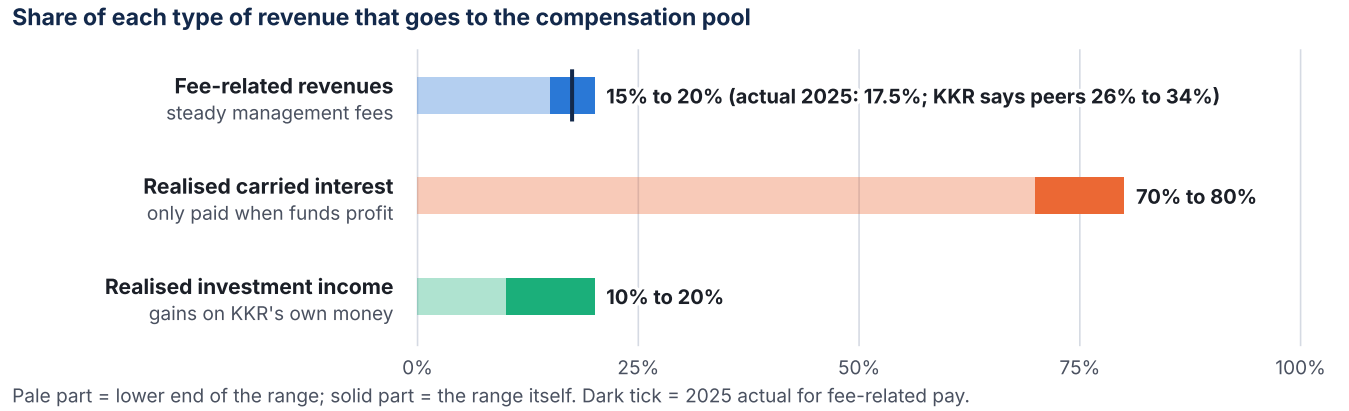

**Figure 27. "Success-based" pay.** Staff get a small slice of steady fees and a large slice of carry, so most pay depends on clients making money. Source: 2026 proxy presentation [S5] CONFIRMED (KKR's own claim, including the peer comparison). 17.5% "right at the midpoint" of guidance [S3].

**SAY THIS IN THE INTERVIEW**

"Because KKR pays from one pool and most pay comes from carry, a person in client solutions and a person on a deal team want the same thing: funds that make money for clients. That is what an LP wants to hear when they ask about alignment, and I think it is a real selling point for the KCS team." [S2, S5] INFERRED

### KKR's balance sheet and its shareholders

KKR's own money is invested next to clients'. At 31 December 2025, KKR and its employees had about $30bn invested in or committed to KKR funds and companies [S12] CONFIRMED. KKR says these "GP commitments" are usually required by contract, and also show "conviction"; it adds that their size has fallen relative to fund sizes as funds grew [S2] CONFIRMED. Employees and others put $612m of their own cash into KKR vehicles in 2025, mostly without paying fees or carry [S2] CONFIRMED.

Shareholders own KKR & Co. Inc. They get a dividend that KKR says it has raised every year since becoming a corporation in 2018: $0.78 a year from Q1 2026 [S1, S4] CONFIRMED. Until the Sunset Date (see section G) they cannot elect directors [S2] CONFIRMED. 891.6m shares were outstanding on 24 Feb 2026 [S2] CONFIRMED.

## D. The operating model: four layers and what flows between them

The simplest way to picture KKR is as four stacked layers. Clients sit on top. The investments sit at the bottom. In between are the teams that bring money in and the teams that put it to work. The KCS team, the one you are applying to, sits in the second layer and touches every other layer.

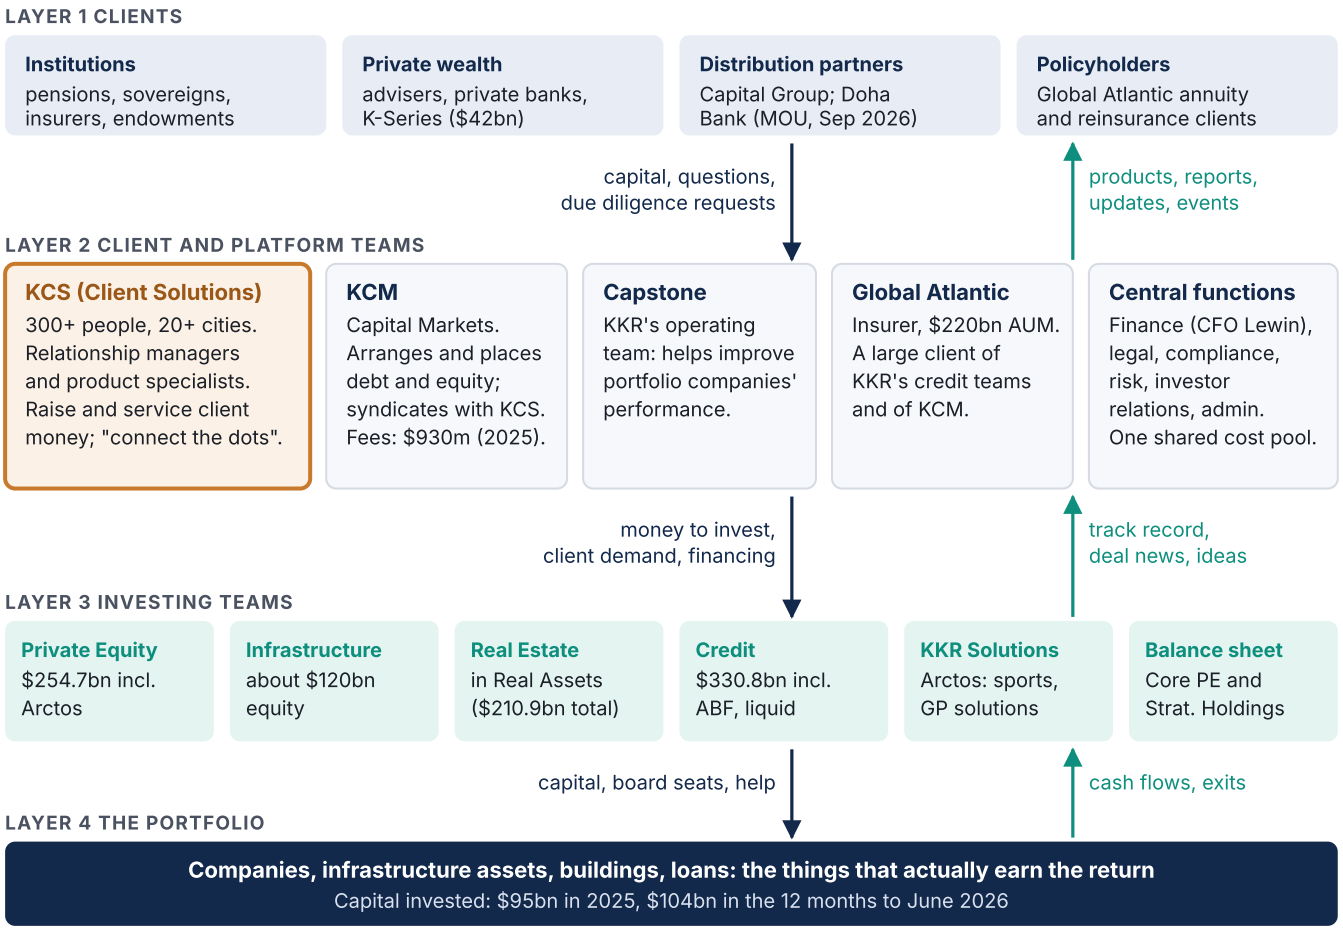

**Figure 28. KKR as four layers.** Navy arrows carry money and requests down; teal arrows carry results and information up. KCS is highlighted. Sources: KCS size and "connect the dots" [S390]; KCS works "in partnership with Capital Markets" (official team description, candidate brief); KCM fees [S5]; Global Atlantic [S1]; central officers and single cost pool [S2]; business line AUM [S1]; infrastructure [S3, S334]; Arctos and KKR Solutions [S1, S38, S355]; partners [S22, S367]; capital invested [S1, S4, S5]. The Capstone description comes only from third-party guides [S394] REPORTED. Layout INFERRED.

Three flows matter most for a KCS candidate. **First**, KCS is a two-way channel. It takes products to clients and brings client demand back to the investment teams. The Frankfurt KCS intern advert says the team "seeks to 'connect the dots' across all businesses at KKR, from our Private Equity investing teams to Infrastructure, Real Estate, Credit, Capital Markets and Insurance-Funded Strategies" [S390] CONFIRMED. **Second**, KCS and KCM work together on co-investment and syndication, which is where much of KKR's remaining deal-fee income now comes from, because fund-related deal fees are credited to LPs [S2] CONFIRMED; the link is the author's INFERRED. **Third**, Global Atlantic is both an engine and a client: its assets are managed by KKR's credit teams, and KKR reports "Total Insurance Economics" of $2.0bn over the 12 months to Q2 2026, which adds those fees to the insurance earnings [S1] CONFIRMED.

## Governance and risk: who says yes, who keeps watch

KKR runs risk through committees, not single decision-makers. The 10-K says: "Our investment committees, or similar committees, review and evaluate investment opportunities using frameworks that are designed to include qualitative and quantitative assessments of the key investment risks" [S2] CONFIRMED. Committees exist per strategy and region. In London, for example, Tara Davies sits on the Infrastructure Investment Committee and the Infrastructure Portfolio Management Committee, and Mattia Caprioli on the European Private Equity Investment Committee and European Portfolio Management Committee [S16, S17] CONFIRMED.

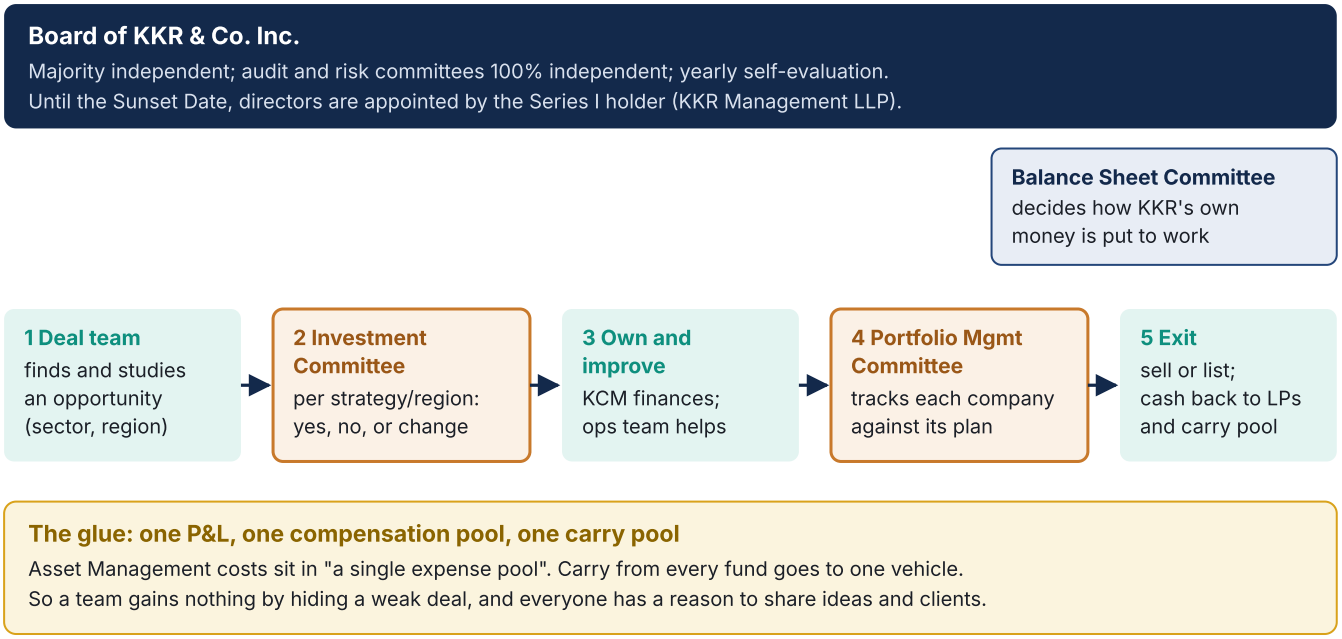

**Figure 29. How a deal is governed.** The two orange boxes are the formal checks; the yellow band is the incentive that makes them work. Sources: committee frameworks, single expense pool, carry pool [S2]; committee examples [S16, S17]; Balance Sheet Committee [S10]; board independence [S2, S5]; one P&L [S5, S9]. The last sentence of the band is the author's reading INFERRED.

**WHY THIS MATTERS**

LPs ask about governance in their due diligence questionnaires. A KCS junior helps answer them. Knowing that decisions go through named committees, and that pay is set on the whole firm's results, lets you explain why one bad deal does not lead a team to take wild risks to catch up. Lewin's line from 30 July 2026 sums it up: "Relationships travel, ideas travel, lessons learned travel" [S3] CONFIRMED.

## E. How the business mix has changed

The single most useful sentence about KKR's evolution is in its own 10-K: "As of December 31, 2010, our traditional Private Equity strategy represented over 70% of our total AUM. As of December 31, 2025, traditional Private Equity was less than 25% of our total AUM" [S2] CONFIRMED. Fees tell the same story. Real Assets management fees almost tripled between 2021 and 2025 and now nearly match private equity [S2] CONFIRMED.

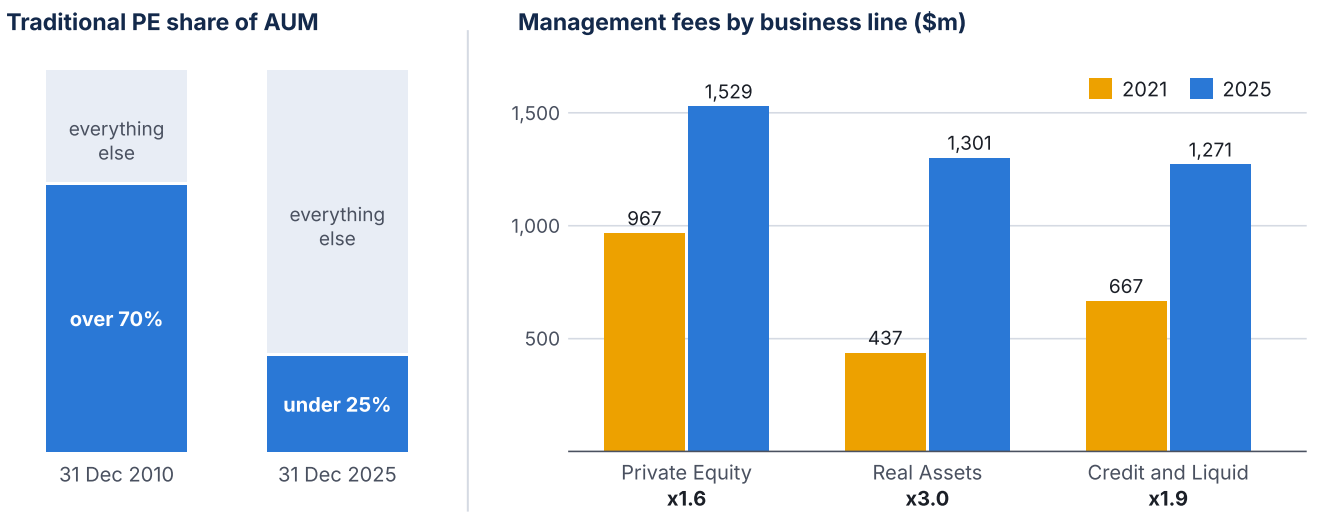

**Figure 30. From buyout shop to platform.** Left: KKR gives only "over 70%" and "less than 25%", so the bars are drawn at those bounds. Right: management fees per business line. Source: FY2025 10-K [S2] CONFIRMED.

On 30 July 2026 CFO Rob Lewin listed growth since the April 2024 Investor Day: private equity up about 45%, infrastructure doubled, credit up about 35%, Asia up over 35%, third-party insurance up over 50%, and wealth up about six times [S3] CONFIRMED. Wealth is the outlier: K-Series grew from $16bn at the end of 2024 to $42bn in June 2026 [S1, S5] CONFIRMED.

**YOUR OPINION GOES HERE**

A defensible view: "KKR is becoming less of a buyout firm and more of a capital solutions platform. Credit is its biggest line, insurance is a whole segment, and wealth grew about six times in two years. That makes the client solutions job more complex, because you are now matching dozens of products to very different clients." Then add your own angle: which of these shifts do you find most interesting, and why? [S2, S3] INFERRED

## F. A public company: why that is a gift for your research

KKR has traded on the New York Stock Exchange since July 2010 (ticker KKR), after first listing in Amsterdam in October 2009 [S5] CONFIRMED [S28] REPORTED. It became a corporation on 1 July 2018 and joined the S&P 500 on 24 June 2024 [S2, S31] CONFIRMED. Being listed means KKR must publish a lot about itself. Most private firms you could apply to publish almost nothing. Use this.

What you can read for free on ir.kkr.com or SEC EDGAR: the **10-K** annual report (FY2025 filed 27 Feb 2026), with fee ranges, fund terms, risks, legal cases and the founding fund track records [S1, S2]; the quarterly **10-Q** [S332]; the quarterly **earnings release**, with a fund-by-fund table of sizes, dates and returns (Q3 2026 due 9 Nov 2026) [S1, S333]; the **earnings call**, the source of most management quotes in this pack [S3]; **8-Ks** for material events such as Arctos, shareholder votes and the DOJ settlement [S6, S7, S8, S349]; and **proxy and Investor Day decks** (last full Investor Day 10 Apr 2024) [S5, S9] CONFIRMED.

### How to read KKR's earnings release in 10 minutes

| Ask: | | | | | |
|---|---|---|---|---|---|
| Up or down on a year ago? Q2 26: FRE $1.32, up 34%. | How much new money came in? Q2 26: $34bn; $133bn in 12m. | Is the steady part growing? Q2 26: FRE margin 70%. | Is the insurer earning more? Q2 26: $288m insurance op. earn. | Did they sell assets? What is still to come? $10.2bn gross carry. | Size, dates and returns of e.g. North Am. Fund XIV. |

Then read the co-CEOs' quote at the top, and write one sentence: "This quarter KKR ... because ...". That sentence is your commercial awareness answer. Where to find it: ir.kkr.com, or SEC EDGAR (search "KKR & Co. Inc.").

**Figure 31. A 10-minute reading path through a KKR earnings release.** Example numbers from the Q2 2026 release (30 Jul 2026) [S1] CONFIRMED; Q2 capital raised [S330]. The order is a suggestion INFERRED.

**SAY THIS IN THE INTERVIEW**

"I read the Q2 2026 release. What stood out was that KKR raised $305bn since the start of 2024, beating its three-year $300bn target in two and a half years, and that management said it was the strongest monetisation quarter in its history. For a client team, both halves matter: new money in, and cash back to LPs, which is what earns the next commitment." [S1, S3, S330]

## G. Leadership and the future

### Who runs KKR

| Role | Person | Background (public, professional) |
|---|---|---|
| Co-Chief Executive Officers | Joseph (Joe) Bae and Scott Nuttall | Both joined KKR in 1996; Co-Presidents and Co-COOs from July 2017; co-CEOs from 11 Oct 2021. Bae built KKR Asia and had led or served on all private markets investment committees. Nuttall built the listing, balance sheet, credit, capital markets, capital raising and insurance businesses [S10] CONFIRMED. |
| Co-Executive Chairmen | Henry Kravis and George Roberts | Co-founders; co-CEOs 1987 to 2021 [S2, S10] CONFIRMED. |
| Chief Financial Officer | Robert (Rob) Lewin | Leads the earnings calls with the co-CEOs [S2, S3] CONFIRMED. |
| Chief Administrative Officer; Chief Legal Officer | Dane Holmes; Kathryn Sudol | Holmes is ex Goldman Sachs [S2] CONFIRMED. |
| Head of Global Client Solutions | Eric Mogelof, Partner, New York | Joined 2020 from PIMCO (17 years there); also oversees Global Marketing [S18] CONFIRMED. (The KCS section covers the team in depth.) |

When the founders handed over, Bae and Nuttall said: "We have spent virtually our entire careers at KKR because Henry and George are visionaries who not only shaped the business world but created a really special firm" [S10] CONFIRMED. Note the pattern: KKR grows its leaders from inside and over decades.

## Investor Day 2024: targets and progress

On 10 April 2024 KKR set public targets for 2026 and beyond [S9] CONFIRMED. By mid 2026 the fundraising and fee targets were met, while the targets that depend on selling assets were behind. On 30 July 2026 Lewin said of the $7 ANI target: "as it relates to $7, we had removed obviously, that formal guidance last quarter. I'd say, in many ways, it has provided a bit of a distraction" [S3] CONFIRMED. Earlier in 2026 management had stressed it needed a "conducive market environment" for exits and had "modestly less visibility" [S39, S40] REPORTED.

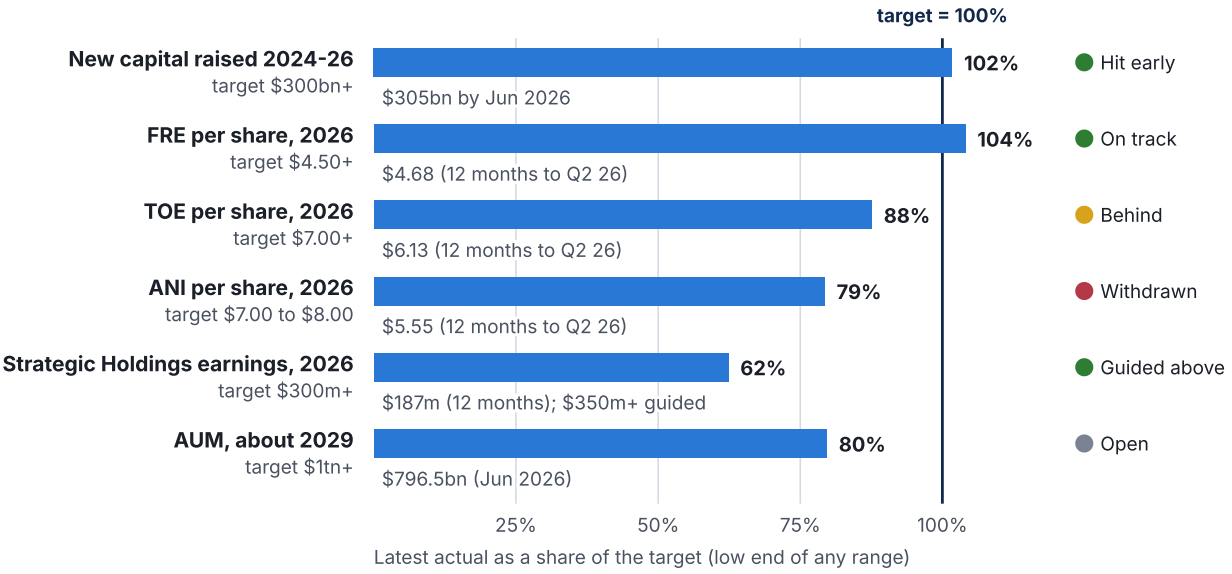

**Figure 32. April 2024 targets against the latest actuals.** The "money in" targets (fundraising, fees) are met; the "money out" targets (carry and gains, which need asset sales) lag. Targets: Investor Day deck [S9]. Actuals: 12 months to 30 Jun 2026 [S1]; $305bn and Strategic Holdings guidance [S3]. All CONFIRMED; status labels and percentages are the author's INFERRED. The long-term goals ($15+ ANI per share within ten years of 2023; doubling Global Atlantic) are not shown.

**YOUR OPINION GOES HERE**

A balanced line: "The $7 miss looks more like a timing story than a business story. The targets KKR controls, raising money and growing fees, were hit early. The miss is in realisations, which depend on markets. I would also note two real headwinds: more competition in insurance, where Lewin said KKR will allocate 'a little bit less capital', and the Asian Fund II clawback." [S1, S3, S4] INFERRED

## The Sunset Date, explained simply

In October 2021, alongside the CEO succession, KKR signed a Reorganization Agreement [S2, S10] CONFIRMED. Its last step is the **Sunset Date**. In the 10-K's words: "On the 'Sunset Date' (which will occur no later than December 31, 2026), KKR will cancel the Series I preferred stock, establish voting rights for all common stock on a one vote per share basis, and acquire control of the carry pool" [S2] CONFIRMED. Today, ordinary shareholders cannot elect or remove directors: the holder of the Series I preferred share, KKR Management LLP (owned by senior employees including Kravis and Roberts), appoints them. KKR uses the NYSE "controlled company" exemptions [S2] CONFIRMED. On 29 May 2026 directors were again elected by KKR Management LLP [S352] CONFIRMED.

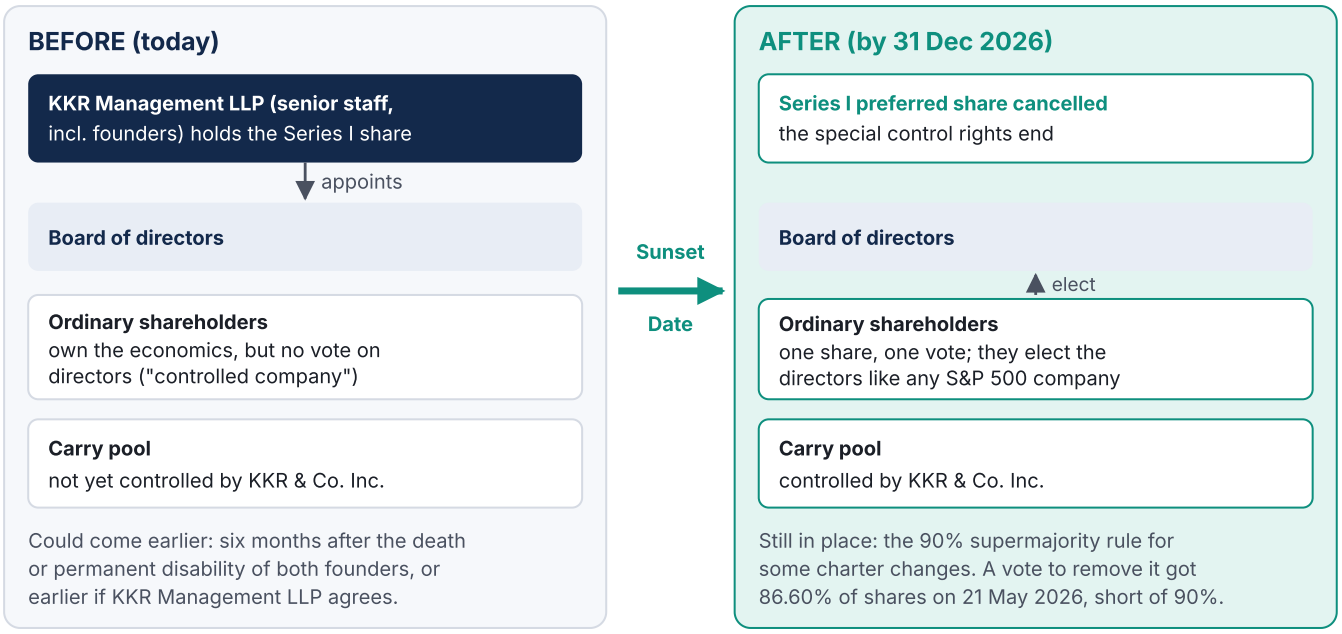

**Figure 33. The Sunset Date, before and after.** The economics do not change; control does. Sources: 10-K and Q2 2026 10-Q [S2, S332]; special meeting results 21 Apr and 21 May 2026 [S6, S7]; directors elected 29 May 2026 [S352]. All CONFIRMED. No earlier Sunset Date had been announced in our sources as of 11 Oct 2026.

In April 2026 shareholders approved three charter changes to prepare: meetings only (no written consent), the board fills vacancies, and the board fixes its own size [S6] CONFIRMED. The fourth, removing the 90% supermajority, failed for lack of quorum at the reconvened meeting on 21 May 2026, even though 97.83% of votes cast were in favour [S7] CONFIRMED.

**SAY THIS IN THE INTERVIEW**

"By the end of 2026 KKR becomes a normal one-share-one-vote company. The founders' special control ends 50 years after they started the firm. I see it as the last step of a handover that began with the co-CEOs in 2021, and something an institutional client who is also a shareholder might well ask about." [S2, S10] INFERRED

## What leadership says about the future

- **Four growth drivers** (Lewin, 30 Jul 2026): a growing industry with megatrends (AI, digital and energy infrastructure, defence); Asia (about 60% of expected global GDP growth); retirement demand from ageing populations; and a model that grows earnings without big headcount growth [S3] CONFIRMED.
- **Market mood** (Nuttall): "In our time here, I don't recall a period of time where the external perception is so disconnected from the operating fundamentals and how it feels inside the firm." And: "Our industry is increasingly K-shaped... We find ourselves on the happy part of the K" [S3] CONFIRMED.
- **Five worries answered** (Nuttall): private credit anxiety (KKR expects a record third-party credit fundraising year); wealth redemptions (K-Series net inflows up 20%+ year to date); PE exits (record monetisation quarter); software and AI (about 6% of AUM); slowing fundraising (KKR expects a record year) [S3] CONFIRMED [S362] REPORTED.
- **Big goals**: "Multiple paths to surpass $1 trillion of AUM in the next 5 years" and "Strong conviction we can double Global Atlantic AUM" [S5, S9] CONFIRMED (targets).

**AUTHOR'S INFERENCE FROM HIRING AND MOVES**

Recent senior hires and launches point to five priorities INFERRED : **(1) distribution and wealth**: Capital Group partnership, Doha Bank MOU signed by David Petraeus, KKR Middle East chairman (21 Sep 2026), new Asia-Pacific client head Bhavit Patel (Jun 2026) and a KCS Principal hire in Hong Kong [S22, S358, S359, S367]; **(2) AI and power infrastructure**: Helix, led by former AWS CEO Adam Selipsky [S3]; **(3) secondaries and "solutions"**: Arctos and KKR Solutions under Ian Charles [S38, S355]; **(4) insurance and Asia know-how**: former Manulife CEO Roy Gori as senior adviser [S3]; **(5) European policy and plumbing**: Philippe De Backer for European public affairs (London) and Andre Serpa as EMEA Head of Treasury [S41, S42]. Each of these creates new products for KCS to explain. Treat the pattern as your reading, not KKR's stated plan.

## H. Recent moves, October 2024 to October 2026

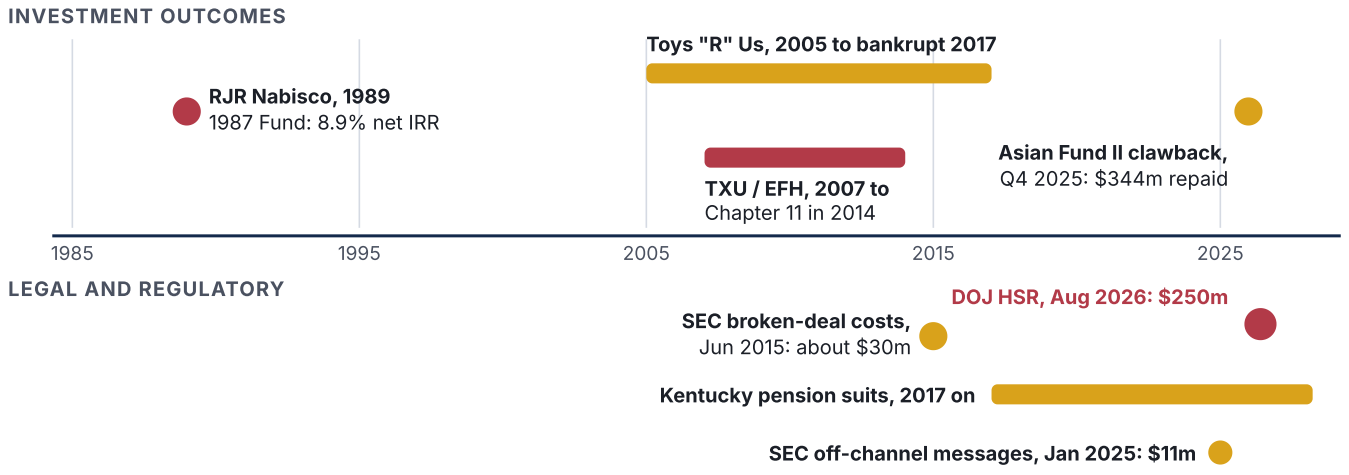

| Date | Event | Source |
|---|---|---|
| 30 Oct 2024 | $50bn partnership with Energy Capital Partners for data centres and power for AI and cloud | [S35] REPORTED |
| Dec 2024 | Philippe De Backer named MD, European Public Affairs, London (from 1 Jan 2025) | [S41] REPORTED |
| 14 Jan 2025 | DOJ files HSR antitrust complaint; KKR countersues the same day | [S2] CONFIRMED |
| Jan 2025 | SEC off-channel communications settlement: KKR pays $11m | [S29] REPORTED |
| 29 Apr 2025 | Capital Group and KKR launch two public-private credit interval funds | [S22] CONFIRMED |
| Jul 2025 | KKR outbids Advent for UK-listed Spectris (about £4.7bn to £4.8bn); later completed | [S34] REPORTED |
| 3 Dec 2025 | Capital Group partnership extended to retirement and model portfolios | [S37, S363] REPORTED |
| Q4 2025 | Asian Fund II clawback repaid ($344m gross, $207m net) | [S2, S4] CONFIRMED |
| 14 Jan 2026 | Agrees to buy 50% of RWE's Norfolk Vanguard offshore wind projects (3.1GW) | [S357] REPORTED |
| 4 Feb 2026 | Agreement to buy Arctos Partners: $1.4bn initial plus up to $550m earn-out (press reported $1.8bn) | [S8] CONFIRMED [S355] REPORTED |
| Q1 2026 | K-FIT, a KKR retail credit fund, pays about 80% of 6.3% redemption requests; Q2 paid in full | [S338] REPORTED |
| 2 Apr 2026 | North America Fund XIV closes at about $23bn | [S335] CONFIRMED |
| 4 May 2026 | Arctos closes; "KKR Solutions" created | [S1] CONFIRMED [S38] REPORTED |
| 5 May 2026 | Q1 results; formal $7 ANI guidance for 2026 removed | [S3, S39] CONFIRMED |
| Jun 2026 | Helix Digital Infrastructure launched ($10bn+); Bhavit Patel named Asia-Pacific client head | [S3] CONFIRMED [S358] REPORTED |
| 27 Jul 2026 | With ECP, board-backed offer for DCC (up to about £5.75bn); approved 18 Sep, completion expected Q1 2027 | [S356] REPORTED |
| 30 Jul 2026 | Q2 results: record FRE, TOE and ANI per share; $305bn raised since 2024 | [S1, S3] CONFIRMED |
| 3 Aug 2026 | Global Infrastructure Investors V closes at $19.2bn, KKR's largest infrastructure fund | [S334] CONFIRMED |
| 26 Aug 2026 | DOJ settlement: proposed $250m civil penalty; court approval pending | [S21, S349] CONFIRMED |
| 31 Aug 2026 | Aon agrees to buy USI Insurance Services from KKR and co-investors (about $17bn incl. debt) | [S353] CONFIRMED [S354] REPORTED |
| 21 Sep 2026 | MOU with Doha Bank on access for Qatari investors | [S367] REPORTED |

| Date | Event | Source |
|---|---|---|
| 5 Oct 2026 | Agrees to buy Gen II Fund Services ($5.1bn enterprise value) via Core PE; close expected 2027 | [S36] REPORTED |
| 9 Nov 2026 | Q3 2026 results due (before NYSE open) | [S333] REPORTED |
| By 31 Dec 2026 | Sunset Date: Series I cancelled, one share one vote | [S2] CONFIRMED (scheduled) |

The news section of this pack explains the stories behind these rows. Check for anything newer on ir.kkr.com in the week before your interview.

## I. The skeletons, told straight

Every 50-year-old investment firm has deals that went wrong and fines it paid. Interviewers rarely raise them, but a client asks about them in due diligence, and knowing them calmly is a sign of maturity. Here they are, with the facts and KKR's response.

Red = largest money or reputation impact. Amber = smaller or still open. Bars show how long an issue ran.

**Figure 34. Forty years of problems on one line.** Most of the money-heavy items are old; the recent ones are about process (filings, messages). Sources: [S2, S4, S20, S21, S27, S28, S29, S32, S33]. Severity colours are the author's judgement INFERRED.

| Issue | What happened | KKR's response and status |
|---|---|---|
| **RJR Nabisco** (1988 to 1989) | KKR won a bidding war at $109 a share against management's $112, because the board judged KKR's bid more certain. About $25bn of equity value, about $31bn with debt; the subject of "Barbarians at the Gate" [S27, S28] REPORTED. One history says Kravis "clearly overpaid". KKR's own 10-K shows the 1987 Fund behind it made 8.9% net IRR and 2.4x, against 34.4% gross IRR for the 1986 Fund [S2, S27] CONFIRMED. | No new LBOs for about three years after 1989; remaining stake traded for Borden in 1995 [S27] REPORTED. Fame, weak returns. |
| **TXU / Energy Future Holdings** (2007 to 2014) | With TPG and Goldman Sachs' PE arm, bought TXU for about $45bn, the largest LBO ever. A bet that gas prices would rise; they fell. Chapter 11 on 29 Apr 2014 with about $49.7bn of debt; equity largely wiped out [S28, S32] CONFIRMED. | A lesson in leverage plus a commodity bet. Shows why KKR now stresses durable cash flows INFERRED. |
| **Toys "R" Us** (2005 to 2018) | With Bain Capital and Vornado, bought for about $6.6bn. Bankrupt September 2017, liquidated 2018 [S28, S33] REPORTED. | KKR and Bain each put $10m into a $20m fund for laid-off workers (Nov 2018), not legally required; advocates said about $75m was needed [S33] REPORTED. |

| Issue | What happened | KKR's response and status |
|---|---|---|
| **SEC broken-deal expenses** (29 Jun 2015) | The SEC found KKR misallocated more than $17m of costs from deals that never happened to its flagship PE funds instead of sharing them with co-investors, including KKR executives. "The first SEC case to charge a private equity adviser with misallocating broken deal expenses" [S20] CONFIRMED. | Paid nearly $30m (over $14m disgorgement, over $4.5m interest, $10m penalty) without admitting or denying. KKR said it related to "historical ... policies and not to any current practices" [S20] CONFIRMED [S45] REPORTED. |
| **Kentucky pension suits** (2017 to now) | Claims over accounts run by Prisma Capital Partners, a former KKR subsidiary, for Kentucky Retirement Systems; Kravis and Roberts named personally. The 2017 case was dismissed for lack of standing (final Feb 2024). The Attorney General's 2020 action and member suits continue; the Kentucky Supreme Court took up jurisdiction and indemnity issues (briefs Sep 2025) [S2] CONFIRMED. | Contesting. Outcome not known in our sources as of Oct 2026. |
| **SEC off-channel messages** (Jan 2025) | One of 12 firms fined $63.1m in total for staff using unapproved messaging apps for business. KKR paid $11m [S29] REPORTED. | Settled. An industry-wide sweep, not a KKR-only case. |
| **Asian Fund II clawback** (Q4 2025) | The 2013 fund ($5.8bn) had paid carry it later had to give back. $344m repaid; $207m net after recovery from current and former staff. 2025 ANI was $4.87 a share, or $5.05 without it [S1, S2, S4] CONFIRMED. | Paid. The LP contract worked as designed. |
| **DOJ Hart-Scott-Rodino** (2025 to 2026) | The DOJ alleged KKR broke US pre-merger filing rules on at least 16 deals in 2021 and 2022: altered documents for 8, omitted documents for 10, no filing for 2. 26 Aug 2026: proposed $250m civil penalty, the largest ever for HSR [S2, S21] CONFIRMED. | KKR first sued, calling the penalties unconstitutional; then settled. It said it "acted in good faith", that "We strongly disagree with the Antitrust Division's characterization", and that the penalty "will have no financial impact on the firm, our funds, or any of our investors and will be fully reimbursed by outside law firms". Court approval pending [S21, S349] CONFIRMED. |

The pattern in KKR's responses INFERRED: settle without admitting fault (SEC 2015, SEC 2025, DOJ 2026); stress that the issue is historical and practices have changed; fight first where it sees a principle (the DOJ countersuit); and occasionally make voluntary gestures (the Toys "R" Us fund).

**HOW TO TALK ABOUT THIS IF ASKED**

**1. Acknowledge, briefly and with facts.** "Yes, RJR is the deal that made KKR famous, but KKR's own filings show the fund behind it returned 8.9% a year, well below its other early funds."

**2. Separate type from size.** "The recent issues are process ones: a filing case settled for $250m that KKR says outside law firms will reimburse, and an industry-wide messaging fine. They are not about investor losses."

**3. Show what changed.** "Since 2014 KKR's funds credit 100% of fund-related deal fees to LPs, and in 2025 it repaid a clawback on Asian Fund II. That is the contract protecting clients."

**4. Link to the job.** "In client solutions you would point LPs to the approved public statement, never improvise, and make sure due diligence answers match the filings." [S2, S4, S349] INFERRED

**DON'T SAY THIS**

"KKR was fined for fraud" (no: the DOJ case is about pre-merger filings, and KKR disputed it). "RJR was a great deal" (KKR's own numbers say otherwise). "Barbarians" as a joke about the firm. And do not volunteer the skeletons unprompted; answer calmly if asked [S2, S21] INFERRED.

# J. KKR in London and EMEA

KKR's London office is at **18 Hanover Square, London W1S 1JY**. KKR, KKR Capital Markets and KKR Credit all list this address [S15] CONFIRMED. kkr.com lists 12 locations under Europe and the Middle East: Dublin, Frankfurt, London, Luxembourg, Madrid, Milan (satellite), Paris, Stockholm, Zurich, Abu Dhabi, Dubai and Riyadh [S15] CONFIRMED. Trade press in December 2024 put EMEA at over 550 staff across 11 offices managing about $100bn [S41] REPORTED (search snippet only).

## Tara Davies

Co-Head of KKR EMEA and Co-Head of European Infrastructure. Partner, London; joined 2016 from Macquarie. Sits on the Infrastructure Investment and Portfolio Management Committees [S16] CONFIRMED

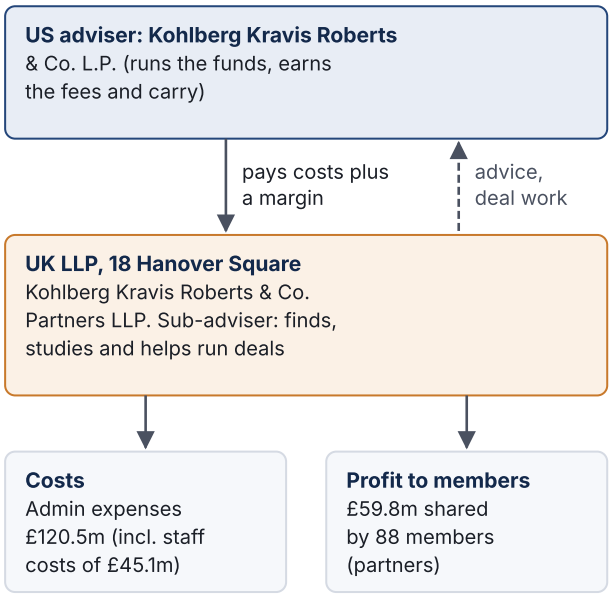

## Mattia Caprioli

Co-Head of KKR EMEA and Co-Head of European Private Equity. Partner, London; joined 2001 from Goldman Sachs. Sits on the European PE Investment and Portfolio Management Committees [S17] CONFIRMED

Johannes Huth, formerly Chairman of KKR EMEA, became a Senior Advisory Partner in 2024 [S19] CONFIRMED. The London client team is visible in KKR's own job adverts: an "EMEA Institutional Client Relations Analyst" role in London covers "EMEA based institutional & family capital clients" [S388] CONFIRMED. The KCS section of this pack goes deeper.

### The UK entities and what the accounts show

KKR's UK businesses are regulated by the Financial Conduct Authority (FCA). The FCA lists Kohlberg Kravis Roberts & Co. Partners LLP (firm reference number 593180) and KKR Credit Advisors (EMEA) LLP (592969) at 18 Hanover Square, and KKR Capital Markets Limited (471885) [S23] CONFIRMED (the FCA page was last updated in Nov 2020, so current permissions were not checked). The main LLP files accounts at Companies House (OC380163), incorporated 13 Nov 2012, audited by Deloitte [S24, S25] CONFIRMED.

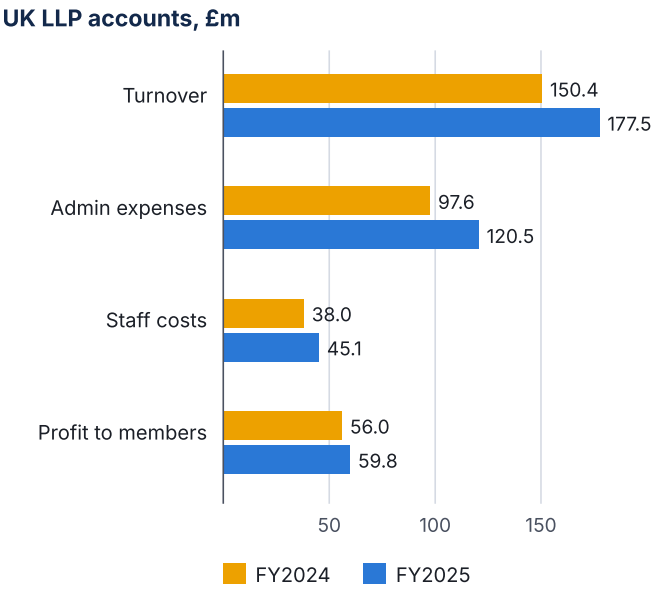

**Figure 35. How the London LLP is paid, and its FY2024 and FY2025 accounts.** The LLP is a service provider to the US adviser, paid on a cost-plus basis. Of £177.5m turnover in 2025, £173.2m was sub-advisory fees and £172.6m came from the USA. Source: LLP annual report for the year to 31 Dec 2025, signed 20 Apr 2026 [S25] CONFIRMED.

| UK LLP figure | FY2025 | FY2024 |
|---|---|---|
| Turnover (of which sub-advisory fees) | £177.5m (£173.2m) | £150.4m (£146.6m) |
| Profit available to members (all paid out as members' remuneration) | £59.8m | £56.0m |

| UK LLP figure | FY2025 | FY2024 |
|---|---|---|
| Largest single member's share: the corporate "Managing Member" | £20.6m | £16.5m |
| Average employees (investment "Executives and Associates" / administration) | 182 (97 / 85) | 169 (81 / 88) |
| Average members (partners), incl. 2 designated members | 88 | 95 |
| Regulatory capital, as a share of the requirement | 367% | 314% |

Source for all rows: [S25] CONFIRMED.

**WHAT THESE NUMBERS DO AND DO NOT MEAN**

**They do mean:** the London LLP is a substantial team (about 182 employees plus 88 members, so roughly 270 people in this one entity INFERRED), its costs are rising, and it is run as a sub-adviser to the US parent "in connection with a number of Private Markets funds" [S25] CONFIRMED.

**They do not mean:** that KKR's London business "earns £177m". Under cost-plus, revenue is set by the LLP's own costs plus a margin, not by the fees and carry that London deals generate, which are booked by the US adviser and the funds [S25] CONFIRMED; the interpretation is the author's INFERRED. Nor is this all of London: KKR Credit Advisors (EMEA) LLP and KKR Capital Markets Limited are separate entities whose accounts we did not read. And the profit per member is not a salary: a large share goes to the corporate Managing Member [S25].

Recent filings show normal partner turnover. Alastair Seaman was appointed a member on 11 Jun 2026, and several members left between May and July 2026 [S24] CONFIRMED (filings list; reasons not stated). Andre Serpa joined from EQT as EMEA Head of Treasury in London in 2026 [S42] REPORTED.

**SAY THIS IN THE INTERVIEW**

"I looked at the London LLP's accounts on Companies House. It is a sub-adviser paid on a cost-plus basis, so the turnover tells you about the size of the London team rather than the money London deals make. What struck me more is the geography: twelve EMEA locations including Abu Dhabi, Dubai and Riyadh, which suggests London KCS covers clients well beyond the UK." [S15, S25] INFERRED

PART 3

# What KCS is: KKR's client engine

The team you want to join: where it came from, how big it is, who runs it, who its clients are, what it sells, how it is organised and how it is wired into the rest of KKR.

## KCS in one paragraph

KKR Global Client Solutions (KCS) is the team that brings money into KKR and looks after the people who gave it. KKR's own job advert calls it "KKR's dedicated investor solutions team" and says it "was first formed in 2009 to invest in and focus on KKR's relationships with current and potential investors" [S103] CONFIRMED. A February 2026 posting puts the team at "~320 employees" [S106] REPORTED; an October 2026 posting says "over 300 executives located in over 20 [offices] across four continents" [S141] CONFIRMED. It is organised around "two specialized focus areas: Sales/Relationship Management and Product/Strategy Management" [S141] CONFIRMED, and its stated job is to "connect the dots" across every KKR business, "from our Private Equity investing teams to Infrastructure, Real Estate, Credit, Capital Markets and Insurance-Funded Strategies" [S141] CONFIRMED.

Put plainly: KKR runs pooled funds. Before any fund can buy a company, a wind farm or a loan, outside investors must promise money to it. Those investors are called **limited partners** or, in KKR's newer language, **clients**. KCS finds them, explains the products, answers their questions, gets them signed up, reports to them for ten years or more, and then asks them to back the next fund [S103, S101] CONFIRMED. That is why the same posting that lists "fundraising activities" also lists "reporting requirements" and "ongoing servicing of existing clients" [S101] CONFIRMED. Selling and servicing are one job.

**Figure 36. KCS in one picture.** Money flows right; reports, data and cash returns flow left. KCS sits on both flows. Sources: KKR postings [S101, S103, S141]; 65 countries from the FY2025 10-K [S70]; ~320 from a Feb 2026 posting [S106].

**KEY TERM**

**Limited partner (LP) / client:** an investor that commits money to a KKR fund, such as a pension fund, a sovereign wealth fund, an insurer, a family office or (now) a wealthy individual through a private bank. "Limited" because their liability is limited to what they put in. **General partner (GP):** the manager that runs the fund, here KKR.

**WHY THIS MATTERS**

Fundraising is the fuel for KKR's fees. New capital raised was $34bn in Q2 2026 and a record $133bn over the twelve months to 30 June 2026 [S74] CONFIRMED. KKR says it raised $305bn from the start of 2024, beating its $300bn three-year target in about two and a half years [S76] REPORTED. That number is, in effect, KCS's scoreboard INFERRED.

## History: from the Client and Partner Group to KCS

KKR was founded in 1976 [S70] CONFIRMED. The modern client team is much younger than the firm. In 2009 KKR hired Suzanne Donohoe "to lead KKR's Client and Partner Group, a global team responsible for supporting and interacting with KKR's Limited Partners" [S94] REPORTED. KKR's own adverts date KCS to the same year [S103] CONFIRMED.

The 2009 to 2020 period built the institutional machine. KKR says the group raised "over $225 billion from a global client base", grew from supporting 4 investment strategies in 2008 to 24 in 2020, and "more than quadrupled the number of clients KKR serves" [S94] REPORTED. In 2010 Jim Burns arrived from Morgan Stanley and "established, and led for eleven years, KKR's Individual Investor Business", covering "family offices and wealth platforms globally" [S122] CONFIRMED. The Family Capital business was set up in 2014 [S178] CONFIRMED, the same year KKR bought Avoca, the origin of its Dublin credit team [S152] CONFIRMED.

The 2020 onward period is the wealth pivot. In August 2020 Donohoe became KKR's first Global Head of Strategic Growth and Eric Mogelof, who spent 17 years at PIMCO including running its US global wealth management business, took over the client group [S94, S79] CONFIRMED. In January 2022 KKR created a Global Head of Private Wealth role inside the group [S97] REPORTED. The evergreen "K-Series" funds for individuals followed in 2022 and 2023 [S111, S112, S113] CONFIRMED, then the Capital Group partnership in 2024 [S86] CONFIRMED. Some time after early 2022 the name changed to Global Client Solutions; the exact date was not found [S138] INFERRED.

**Figure 37. KCS timeline, 1976 to October 2026.** Notice the two eras: an institutional build under Donohoe, then a wealth and partnerships build under Mogelof. Sources: [S70, S94, S103, S122, S178, S152, S79, S97, S111, S112, S113, S100, S119, S86, S92, S177, S165, S73, S168, S76, S101]. Rename date inferred from a 2022 bio [S138].

**SAY THIS IN THE INTERVIEW**

"KCS is younger than most of KKR. It was set up in 2009, and in its first eleven years it went from supporting 4 strategies to 24. Since 2020, under Eric Mogelof, who ran wealth at PIMCO, the big build has been private wealth and partnerships like Capital Group. So the team I would join is in its second act." [S94, S79, S86]

## The mission in KKR's own words

KKR describes the team's purpose in a handful of recurring phrases. Learn them; they are the vocabulary the interviewers use.

| KKR's words (verbatim) | Where | What it tells you |
|---|---|---|
| "KKR's dedicated investor solutions team ... first formed in 2009 to invest in and focus on KKR's relationships with current and potential investors" | GWS Internal Sales posting, Aug 2026 [S103] | Relationships are the product. "Current and potential" means both service and new business. |
| "seeks to 'connect the dots' across all businesses at KKR" | Frankfurt KCS intern posting, Oct 2026 [S141] | KCS is the joining layer between investing teams and clients. |
| "to diversify KKR's client base to include new investors, across all regions and institution types, and to raise capital for the Firm's expanding product platform" | Frankfurt posting [S141] | Two goals: more kinds of client, more products sold. |

| KKR's words (verbatim) | Where | What it tells you |
|---|---|---|
| "including a growing focus on individual, private wealth investors" | Singapore KCS intern posting, Aug 2026 [S107] | Wealth is the growth frontier. |
| "work with institutional and wealth management investors across the world to understand their investment needs, deliver world-class alternatives solutions, and provide customized client service" | Eric Mogelof bio [S79] | Needs first, then solutions, then service. |
| "We subscribe to the view of Henry Kravis and George Roberts that people do business with those they like and trust." | Jim Burns, kkr.com [S81] | The founders' culture line, applied to clients. |
| "with one P&L where most places have silos … 'One Firm,' collaboration, operating with 'like and trust' are core to how KKR operates." | Singapore posting [S107] | Why KCS can sell any strategy without internal turf wars. |

The "one P&L" line is backed by the 10-K: KKR's asset management operating expenses "are shared across a single expense pool given the collaborative nature of our five business lines" [S70] CONFIRMED. That matters for KCS. A relationship manager covering a Dutch pension fund does not need to negotiate with the infrastructure team about who "owns" the client or who gets credit; the firm is paid as one INFERRED.

**YOUR OPINION GOES HERE**

Pick one phrase and say why it rings true for you. Suggested angle: "connect the dots" describes the job better than "sales", because the London analyst posting lists eight internal teams the analyst must work with to answer one client [S101]. Then add your own experience of being the person who joins things up.

## How big is KCS?

KKR does not publish a KCS headcount in its filings. Three kinds of public evidence exist, and they agree reasonably well.

**~320**
KCS employees, Dublin posting, Feb 2026 [S106] REPORTED. Oct 2026 posting: "over 300 executives" [S141]

**232**
KCS bios at Principal level and above in KKR's public directory, 11 Oct 2026 [S80, S149] CONFIRMED

**20**
of those 232 based in London (19 if a dual-listed San Francisco/London bio is excluded) [S149, S80]

The directory breaks the 232 into 84 Principals, 80 Directors, 51 Managing Directors and 17 Partners and titled heads [S80] CONFIRMED. It does not list Analysts or Associates. An older summer-analyst posting described "roughly 270 professionals", date unclear [S108] REPORTED. For scale, KKR had 5,043 employees at 31 December 2025, of whom 2,705 worked in asset management [S70] CONFIRMED; ~320 is about 12% of that asset management headcount INFERRED.

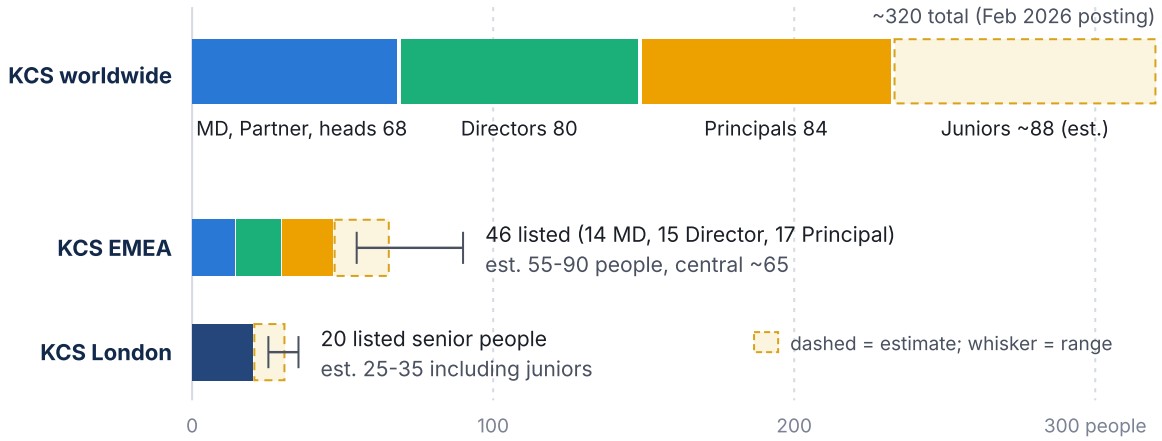

**Figure 38. KCS headcount: what is counted and what is estimated.** Solid bars are counted bios (Principal and above) in KKR's directory on 11 Oct 2026 [S80, S149]. Dashed bars are estimates (est.) for Analysts and Associates. Total from KKR postings [S106, S141]. EMEA and London estimates from WS1B method [S149, S141] INFERRED.

**ESTIMATE: METHOD AND AS-OF DATE (11 OCT 2026)**

**Step 1, count.** KKR's directory lists 232 KCS people at Principal and above worldwide, 46 in EMEA and 20 in London [S149] CONFIRMED.

**Step 2, anchor the total.** Two KKR postings say ~320 (Feb 2026) and "over 300" (Oct 2026) [S106, S141]. So the directory covers roughly 70 to 75% of the team; the gap of about 70 to 90 is mostly Analysts and Associates INFERRED.

**Step 3, scale EMEA.** EMEA is 46 of 232 senior bios, about 20%. 20% of ~320 is about 64. Allowing for a higher junior ratio in Europe (London and Frankfurt are hiring juniors now [S140, S141]) gives an **estimate of 55 to 90 KCS people in EMEA, central ~65**, and **25 to 35 in London** (medium-low confidence) INFERRED.

**Caveats.** Some Dublin client-service (CAPS) staff may or may not be counted inside KCS. Bios can lag moves.

## Who leads it

All of the following is public professional information from KKR's own website. Titles change; check kkr.com before naming anyone in an interview, and name people only when it is relevant.

| Person and title | Base | Public background and what the role tells you |
|---|---|---|
| **Eric Mogelof**, Partner, Head of Global Client Solutions | New York | Joined 2020. 17 years at PIMCO (US global wealth, Asia Pacific, global advisory, co-head Americas institutional). Also oversees Global Marketing [S79] CONFIRMED. A wealth specialist running the whole team signals the strategy INFERRED. |
| **Amy Lesch**, Partner, Head of Global Product Strategy | New York | Joined 2009. "Product origination and management across private equity, infrastructure, real estate, insurance, and credit." Sits on the Global Conflicts and Compliance Committee [S121] CONFIRMED. |
| **Jim Burns**, Partner, Head of Institutional Client Solutions, Americas | New York | Built the individual investor business from 2010; led EMEA clients from London 2018 to 2023; sat on the Executive Committee of KKR Capital Markets LLC [S122] CONFIRMED. |
| **Doug Brody**, Partner, Head of Family Capital, Americas and EMEA | New York | On the GCS Executive Leadership team; previously ran the Credit & Markets Co-investments and Partnerships team [S125] CONFIRMED. |

| Person and title | Base | Public background and what the role tells you |
|---|---|---|
| **Doug Krupa**, Partner, Head of Global Wealth Solutions, Americas | New York | "Led the development of KKR's evergreen solutions"; 8 years at Blackstone in private wealth product strategy [S123] CONFIRMED. Made Partner from 1 Jan 2026 [S165]. |
| **Markus Egloff**, MD, Head of Global Wealth Solutions, International | London | "Leads the Global Wealth Solutions business for EMEA & Asia Pacific"; 25 years at UBS; joined 2021 [S124, S157] CONFIRMED. |
| **Mark Danzey**, Partner, European Head of Institutional Client Solutions | London | Also European Head of KKR Capital Markets and Global Co-Head of Debt Capital Markets; joined 2009; listed under Capital Markets in the directory [S156, S149] CONFIRMED. |
| **Darryl Herrick**, MD, Head of Global Insurance Client Solutions | New York | Also President of Global Atlantic Re; joined KKR 2025 [S127] CONFIRMED. |
| **Kate Bizga**, MD, Global Head of Consultant Relations | New York | Covers the investment consultants who advise pension funds [S135] CONFIRMED. |

**SOURCE UNCERTAIN**

No one on kkr.com is titled "Head of KCS EMEA" (October 2026). Mark Danzey's "European Head of Institutional Client Solutions" is the closest [S156]; Markus Egloff leads wealth internationally [S157]; Doug Brody leads EMEA family capital from New York [S125]. Reporting lines are not published, so any org chart, including the one in this part, is a reconstruction INFERRED. Names that circulate informally, such as "Alisa Amarosa Wood" as a KCS leader, are not in the current KCS directory [S80]; she appears in 2025 as a co-leader of evergreen private equity strategies [S177]. Do not guess titles in the interview.

## The three client channels

KKR presents its clients in three segments on kkr.com: Institutional Investors, Family Capital and Global Wealth [S195] CONFIRMED. Insurance has become a fourth client relationship with its own team and its own products [S104, S127] CONFIRMED. For a beginner it is easiest to think in three channels, with family capital sitting between institutions and wealth.

### Channel A: Institutional

Corporate and public pensions, sovereign wealth funds, insurers, endowments, foundations, health care organisations, and the **investment consultants** who advise them [S81] CONFIRMED. They mostly buy closed-end "drawdown" funds plus separately managed accounts and co-investments [S70] CONFIRMED. The 10-K warns that sovereign funds and public pensions increasingly prefer "alternatives to traditional fund structures, such as separately managed accounts ... and, in some cases, consolidating their capital with fewer alternative asset managers" [S70] CONFIRMED. That consolidation favours large multi-strategy firms like KKR INFERRED. CalPERS, for example, has backed KKR's North America, Europe and Asia flagships over 16 years, including $600m to North America Fund XIII [S117] CONFIRMED.

### Channel B: Private wealth and family capital

KKR's 10-K: "Over the last five years, we have focused on private wealth as a key addressable market ... Our private wealth capital comes from multiple sources, including wirehouses, independent broker-dealers, registered investment advisers, global private banks, and family offices" [S70] CONFIRMED. A **wirehouse** is a big US broker with thousands of advisers; an **RIA** is an independent adviser firm; a **private bank** serves wealthy clients, and is the key route in Europe and Asia INFERRED. Family Capital is a separate

team for single-family offices and founders, offering "Co-Investment Opportunities", "Bespoke Separately Managed Accounts", "Two-Way Sourcing Dialogues" and "Comprehensive Debt Solutions" [S84] CONFIRMED.

### Channel C: Insurance and strategic partners

Global Atlantic, KKR's insurer, is fully owned since January 2024 [S70] CONFIRMED. It "sponsors co-invest vehicles that raise third-party capital to participate alongside Global Atlantic through reinsurance" (often called sidecars) [S70] CONFIRMED; management cited $62bn of AUM in these vehicles in mid-2026 [S77] REPORTED. A dedicated KCS team raises that money [S128] CONFIRMED, while the Global Insurance Client Solutions team builds "multi-dimensional, senior-level relationships with insurance companies globally" [S104] CONFIRMED. Strategic partners include sovereign investors who co-found platforms (Kuwait Investment Authority in Helix Digital Infrastructure) [S78] REPORTED and manager partners such as Capital Group [S86] CONFIRMED.

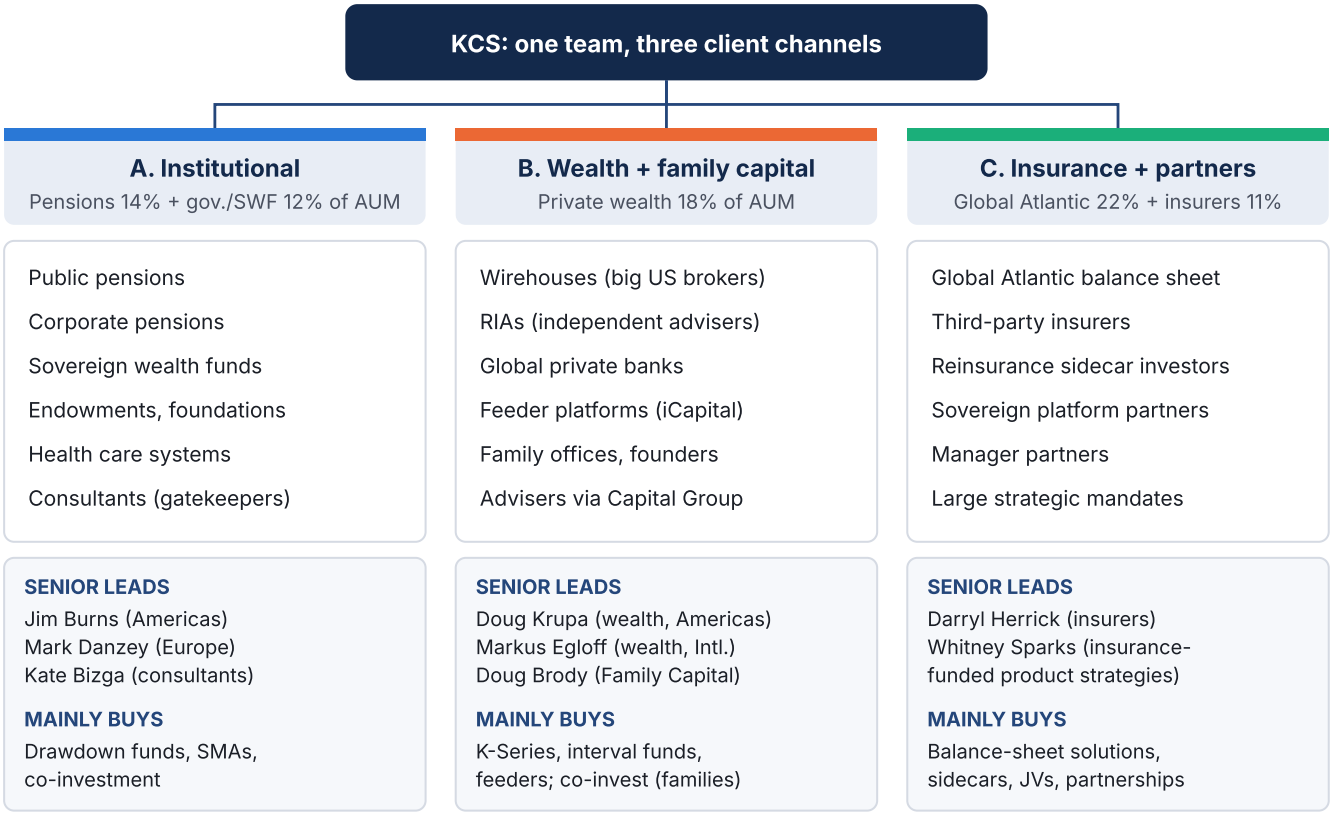

**Figure 39. The KCS client map.** Each channel has its own leaders, its own buyers and its own products, but one KCS team sits over all three. AUM shares by investor type are from the 10-K chart at 31 Dec 2025 [S71]. Segments and leaders: [S70, S81, S84, S104, S122, S123, S124, S125, S127, S128, S135, S156].

## KKR's investor mix: who the money comes from

KKR's FY2025 10-K includes a pie chart of AUM by investor type [S71] CONFIRMED. It is the single best picture of who KCS serves. Two facts stand out. First, private wealth (18%) is now bigger than pensions and other institutions (14%). Second, insurance in total (Global Atlantic's own balance sheet at 22% plus third-party insurers at 11%) is about a third of AUM [S71] INFERRED.

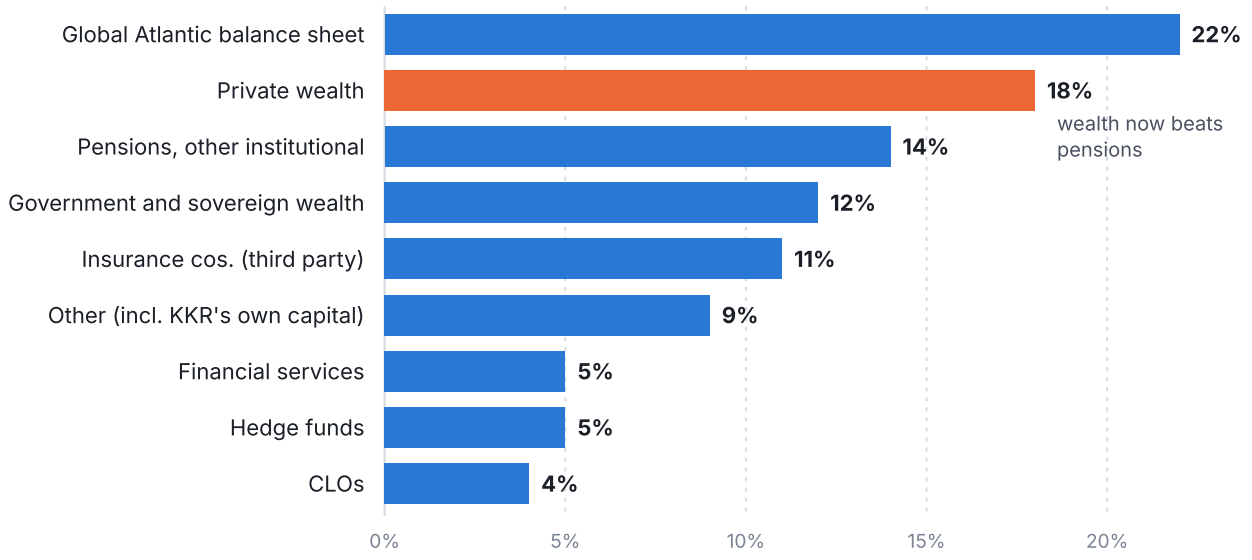

**Figure 40. Composition of KKR AUM by investor type, 31 Dec 2025.** Private wealth highlighted. Read from the pie chart in KKR's FY2025 Form 10-K (filed 27 Feb 2026) [S71] CONFIRMED. Total AUM at that date $744bn [S70]. "Other" is mostly KKR's own GP positions and listed vehicles.

Geography: KKR's investors span 65 countries [S70] CONFIRMED. On the Q2 2026 call Scott Nuttall said "roughly 40%" of recent activity comes from outside the US [S77] REPORTED. KKR does not publish a count of clients, a re-up rate or how many clients invest in more than one strategy [S70, S74] (gap). If an interviewer asks, say you looked and it is not disclosed.

**DON'T SAY THIS**

"Most of KKR's money comes from pension funds." It did once. Today pensions and other institutions are 14% of AUM, behind Global Atlantic (22%) and private wealth (18%) [S71]. Also avoid "KKR is the biggest in private wealth": Blackstone's private wealth business is far larger (about $324bn against KKR's $42bn K-Series) [S216, S73] REPORTED.

## What KCS sells: the product shelf

A KCS professional does not sell one fund. KKR supported 24 strategies by 2020 [S94] and Nuttall said in 2024 that of $214bn raised from 2022 to mid-2024, "only $14 billion ... was in flagships" [S119] REPORTED. The shelf has four layers.

### Shelf 1: flagship and strategy drawdown funds

A **drawdown fund** takes promises (commitments) from investors, then "calls" the cash over the investment period, which for infrastructure and real estate can run up to six years, with fund terms of 10 to 13 years [S2] CONFIRMED. Recent examples: North America Fund XIV closed at about $23bn in April 2026 [S335] CONFIRMED; Global Infrastructure Investors V closed at $19.2bn on 3 August 2026, KKR's largest infrastructure fund, with investors including "pension plans, sovereign wealth funds, insurance companies, asset managers, private wealth platforms, and family offices" [S176] CONFIRMED. That investor list is literally the KCS client map INFERRED.

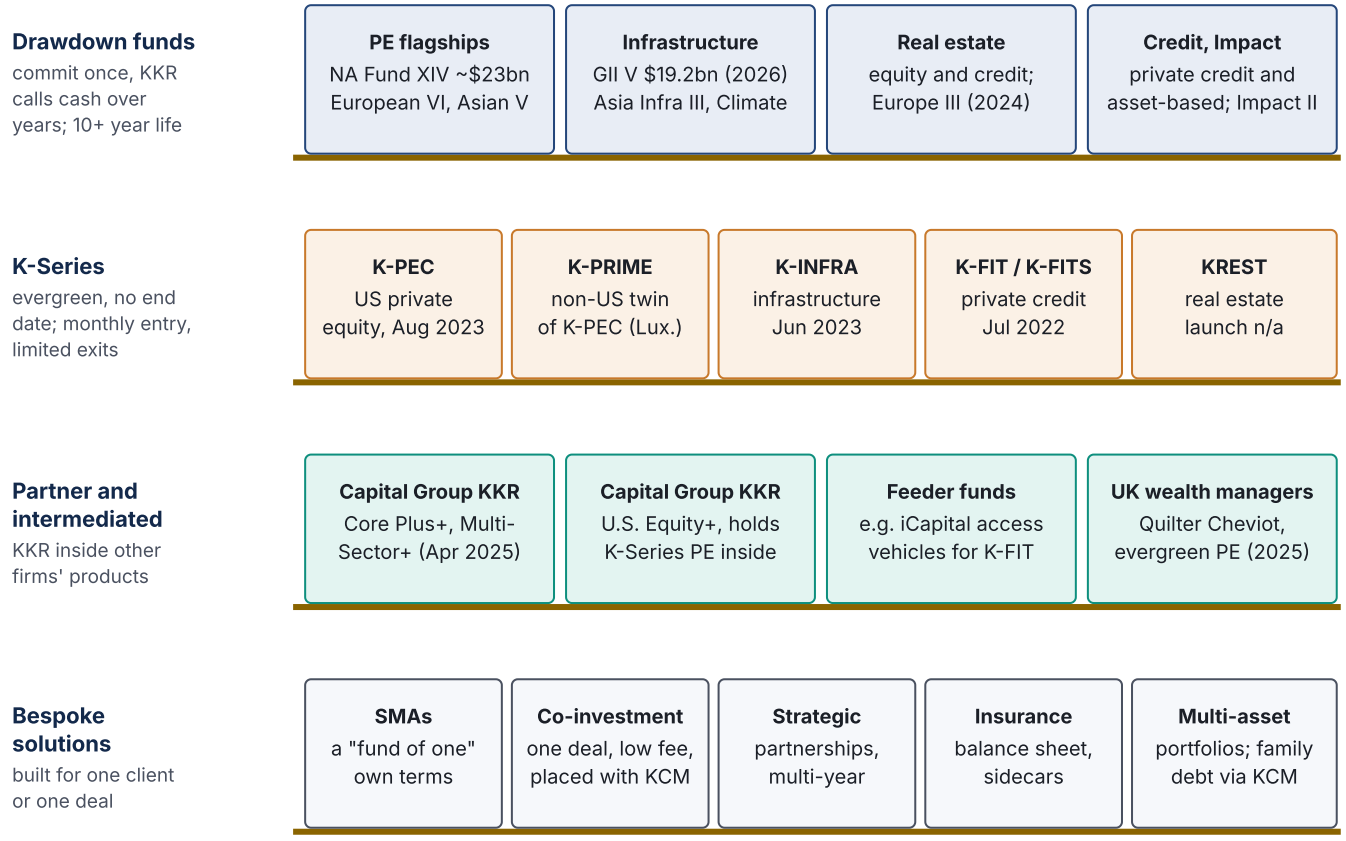

**Figure 41. The KCS product shelf, October 2026.** Four shelves, from classic funds at the top to one-client solutions at the bottom. Sources: fund names and sizes **[S74, S175, S176, S335]**; K-Series dates **[S111, S112, S113, S114]**; Capital Group **[S92, S93, S70]**; feeder **[S114]**; Quilter Cheviot **[S177]**; bespoke **[S84, S85, S70, S104]**. KREST and K-PRIME launch dates not found.

## Shelf 2: the K-Series evergreen funds

K-Series funds have no end date. Investors subscribe regularly and can ask to redeem a limited amount periodically [S70] CONFIRMED. Nuttall: "K Series is built to be able to go to the accredited investor in the U.S., which is $1 million and up in net worth" [S76] REPORTED. The main US classes of K-PEC and K-INFRA charge a 1.25% annual management fee [S111, S112] CONFIRMED. About 85% of K-Series assets are in private equity and infrastructure [S76] REPORTED. London is home to the EMEA product lead for K-PRIME and K-PEC, Matt Yates [S133] CONFIRMED.

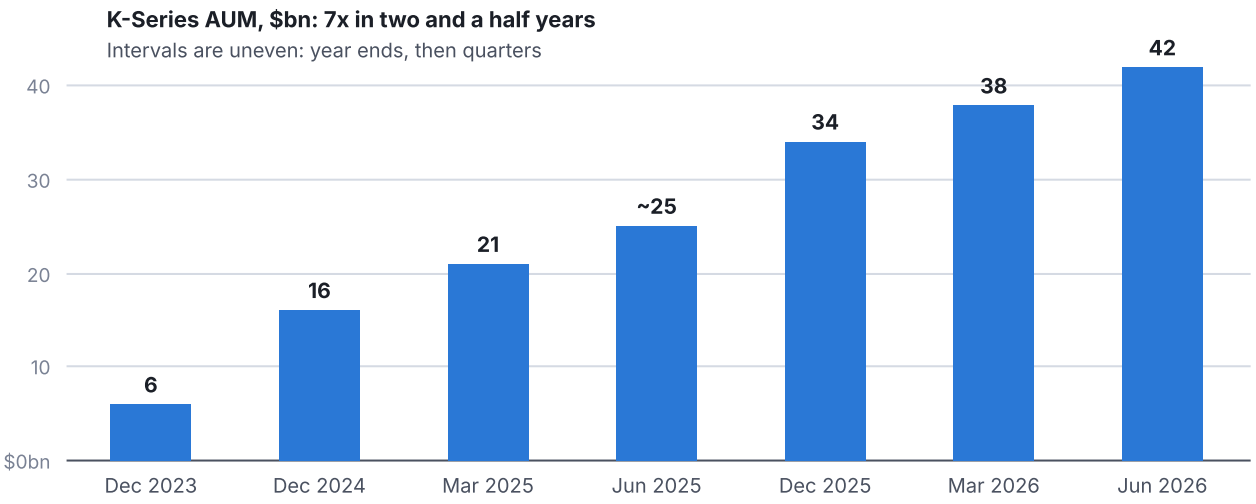

**Figure 42. K-Series assets under management.** Dec 2023 to Dec 2025 from the FY2025 10-K chart [S72]; Mar 2025 and Mar 2026 from the Q1 2026 release [S331]; Jun 2025 "approximately 25" from the Q2 2026 call [S76] REPORTED; Jun 2026 from the Q2 2026 10-Q [S73]. All CONFIRMED except Jun 2025.

The growth has not been frictionless. In Q1 2026, K-FIT investors asked to redeem 6.3% of shares and the fund paid about 80% of requests pro rata; in Q2 requests fell to 1.65% and were paid in full [S338] REPORTED. Nuttall's answer on the call: "What you don't read about in the articles is the inflows. But we're up 20% net year-to-date" [S77] REPORTED. Explaining liquidity terms honestly, before and after the sale, is now core KCS work INFERRED.

### Shelf 3: partner products

The Capital Group partnership, announced in May 2024 as "an exclusive strategic partnership designed to help broaden access to private market investment opportunities" [S86] CONFIRMED, launched two public-private credit interval funds on 29 April 2025: about 60% public fixed income and 40% private credit, with quarterly repurchase offers of up to 10% of shares [S92] CONFIRMED. Capital Group "maintains relationships with more than 200,000 financial advisors across the United States" [S92] CONFIRMED. Capital Group KKR U.S. Equity+ followed, and its private side "invests in a K-Series private equity vehicle" [S70] CONFIRMED. In the UK, Quilter Cheviot began offering KKR's evergreen private equity strategy, a launch Markus Egloff called "an important milestone in our efforts to deliver greater access to KKR's strategies" [S177] CONFIRMED.

### Shelf 4: customised solutions

This is what the team description means by "able to deliver customized products". It includes **separately managed accounts** (a fund with one investor and its own terms), **co-investments** (a stake in one specific deal alongside a KKR fund, usually at low or no fee), **strategic partnerships** (multi-year, multi-asset mandates), **multi-asset portfolios**, and insurance "fully integrated balance sheet solutions" [S84, S85, S104] CONFIRMED. KKR's macro team frames the client conversation with the **Total Portfolio Approach**, "a governance and investment framework that seeks to improve capital allocation by allowing investors to evaluate opportunities across the total portfolio rather than through static asset class silos" [S90] CONFIRMED.

**KEY TERMS**

**Interval fund:** a US registered fund that offers to buy back a set slice of shares at regular intervals. **BDC:** business development company, a US vehicle for lending to private companies; K-FIT elected BDC status in 2023 [S113]. **Feeder fund:** a vehicle that pools many small investors into one ticket into a KKR fund [S114]. **Accredited investor:** in the US, broadly an individual with $1m+ net worth [S76].

## How KCS is organised

KKR's Frankfurt posting gives the official skeleton: two focus areas, "Sales/Relationship Management and Product/Strategy Management" [S141] CONFIRMED. The brief's team description adds the third layer: "Junior resources serving in a generalist capacity". Around them sit enabling teams that the job adverts name: the CAPS team for tenders and due diligence questionnaires [S106] CONFIRMED, client operations [S138], marketing [S79, S138] and wealth communications [S147] CONFIRMED.

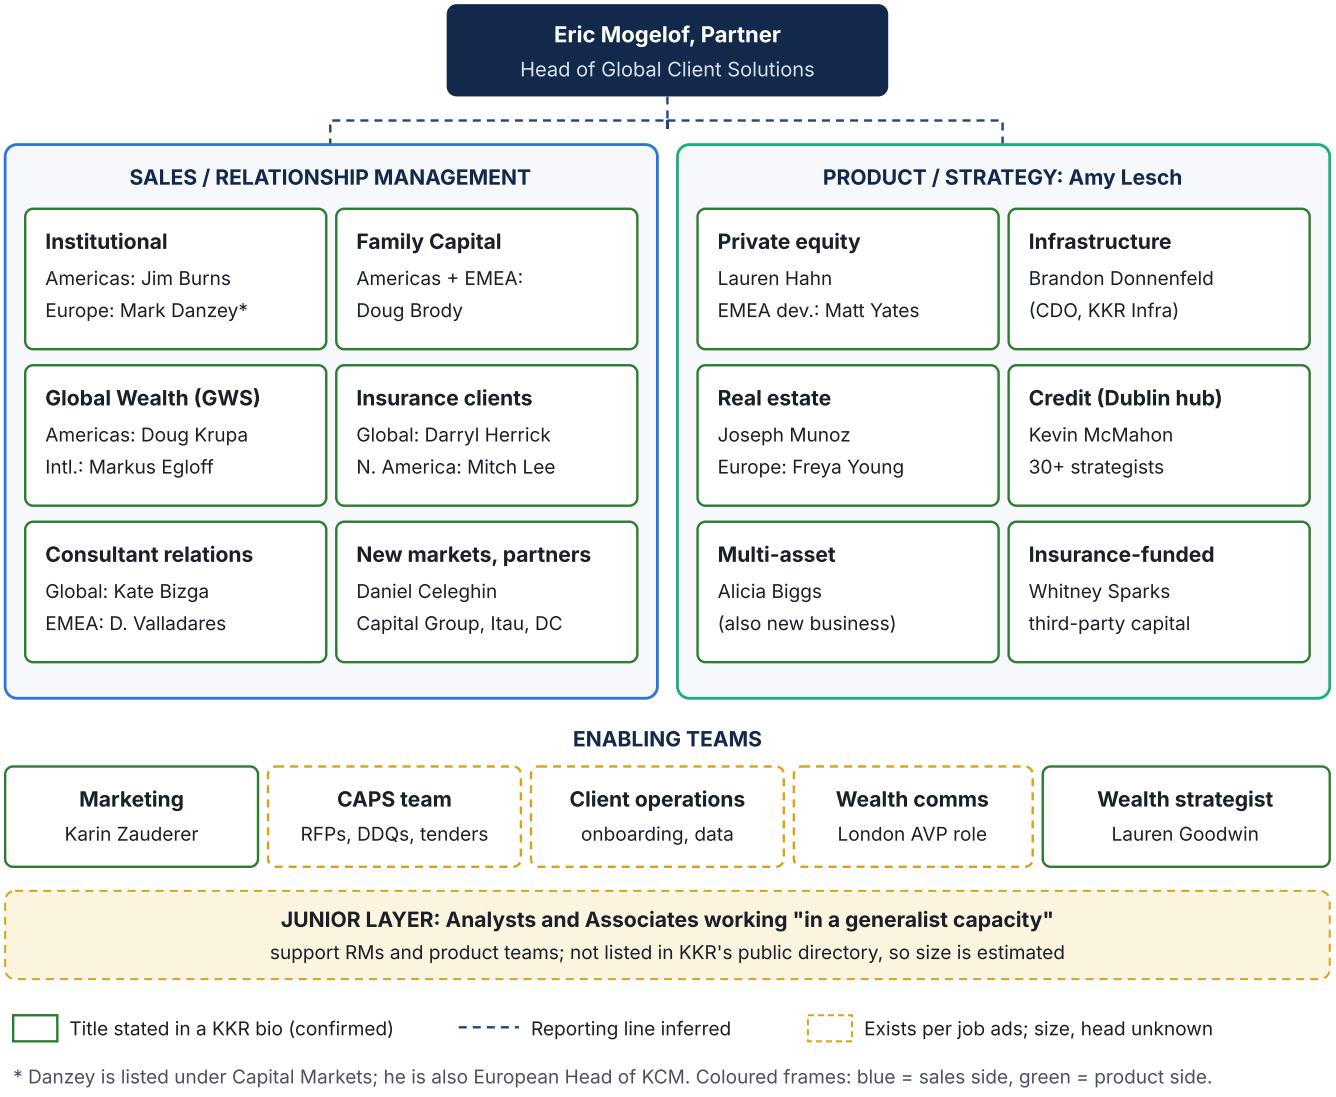

**Figure 43. KCS reconstructed org chart, October 2026.** Built from KKR bios, not a published chart. Titles [S79, S121, S122, S123, S124, S125, S126, S127, S128, S129, S132, S133, S135, S136, S138, S156, S150]; two-area structure [S141]; CAPS [S106, S146]; wealth comms [S147]; credit team size [S106]. Reporting lines INFERRED.

How the three layers divide the work:

- **Relationship managers (RMs)** own a territory or client list. They set meetings, run roadshows, pitch, and close commitments. Josh Metz, for example, "leads a team of Relationship Managers across the U.S." in wealth [S126] CONFIRMED. In Europe, RMs are split by country: UK, DACH, France/Benelux/Southern Europe, Nordics, Middle East [S150, S153, S154, S155, S151] CONFIRMED.
- **Product specialists** are the experts on one asset class. A Dublin posting says the credit team "leads fundraising activities and will also be responsible for owning marketing materials, developing thought leadership and leading investor diligence processes", and is "a group of over 30 product strategists" [S106] CONFIRMED.
- **Junior generalists** support several RMs and products at once. In London that means reporting, fundraising support, KYC onboarding, answering client requests and events [S101] CONFIRMED. Part 4 decodes this line by line.
- **CAPS** (Client and Product Services) answers tenders and due diligence questionnaires from Dublin and New York [S106, S146] CONFIRMED.

> **WHY THIS MATTERS**
>
> The split explains who you would sit next to. As an intern in London you would most likely support RMs covering EMEA institutions and family offices, or a product team such as infrastructure, which is the biggest product cluster in London [S150] CONFIRMED. You will learn both the client and the product, which is the point of a generalist seat INFERRED.

## Why a central client team exists

Imagine KKR without KCS. Each investing team (private equity, infrastructure, real estate, credit, insurance, capital markets) would run its own investor relations. A large pension fund would get six sets of calls, six sets of due diligence questionnaires, six versions of KKR's story, and nobody who sees the whole relationship. With 24 strategies supported by 2020 [S94] and investors in 65 countries [S70], the number of separate links would explode INFERRED.

A central team, the "wheel" in the figure below, does four things the "tangle" cannot INFERRED:

1. **One view of each client.** The RM knows everything the client owns with KKR and what it needs next. That is what makes cross-selling possible, and KKR's own adverts call it a "Relationship-focused, solutions-oriented approach".
2. **Reuse.** One library of due diligence answers (the CAPS team) instead of six [S106].
3. **Consistency and compliance.** One approved story, one set of numbers. That matters because marketing to investors in the UK and EU is regulated [S70] CONFIRMED.
4. **Leverage for big clients.** Large investors are "consolidating their capital with fewer alternative asset managers" [S70] CONFIRMED. A single team that can offer every strategy is how KKR wins that consolidation.

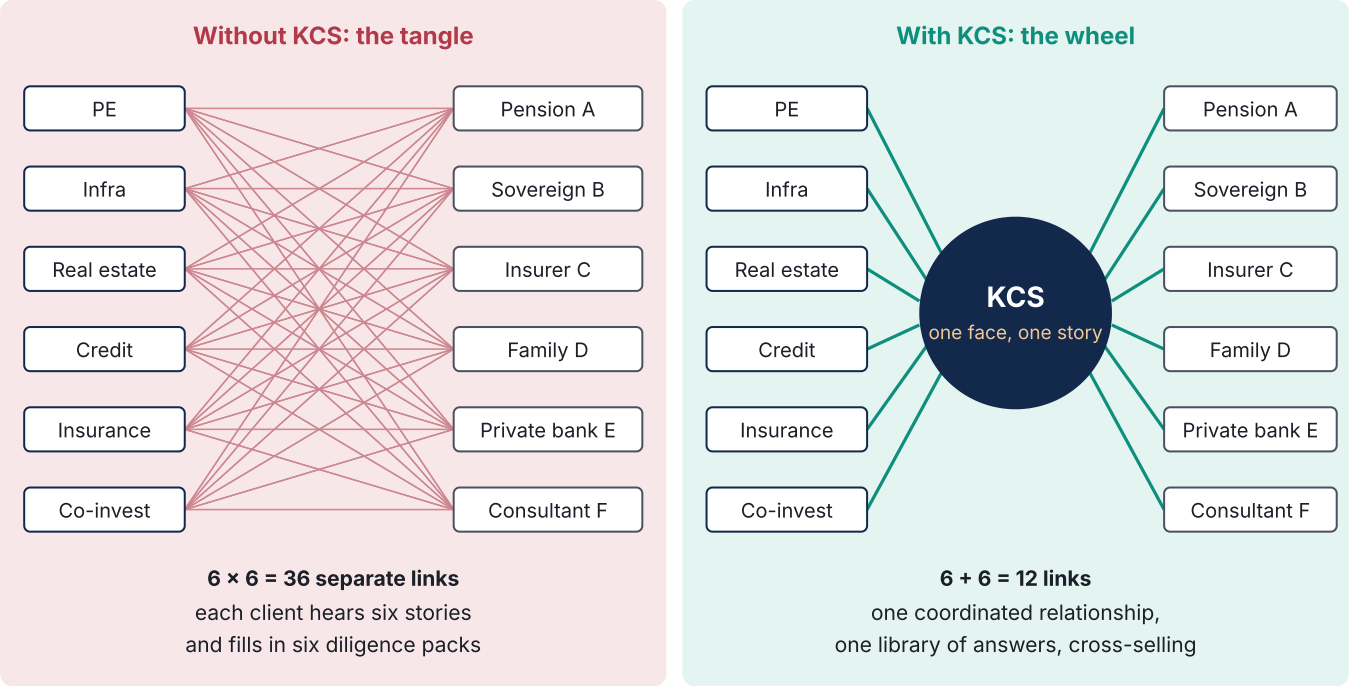

**Figure 44. The hub logic (illustrative).** Six strategies and six clients stand in for KKR's real numbers: 24 strategies supported by 2020 [S94] and investors in 65 countries [S70]. With n strategies and m clients, the tangle has n x m links; the wheel has n + m INFERRED.

**SAY THIS IN THE INTERVIEW**

"Without KCS, a big pension fund would deal with every KKR strategy separately. With it, the client has one relationship, one set of answers and one person who knows its whole portfolio. That is why the team description talks about an 'integrated approach' and why the one-P&L culture matters: nobody fights over who owns the client." [S70, S107]

## How KCS is wired into the rest of KKR

KCS has three kinds of connection inside the firm. **Embedded** links sit inside the investing businesses. **Connective** links join KCS to KKR's other client-facing engines: Capital Markets, Global Atlantic and Capstone. **Utility** links are the control and service functions every client answer depends on.

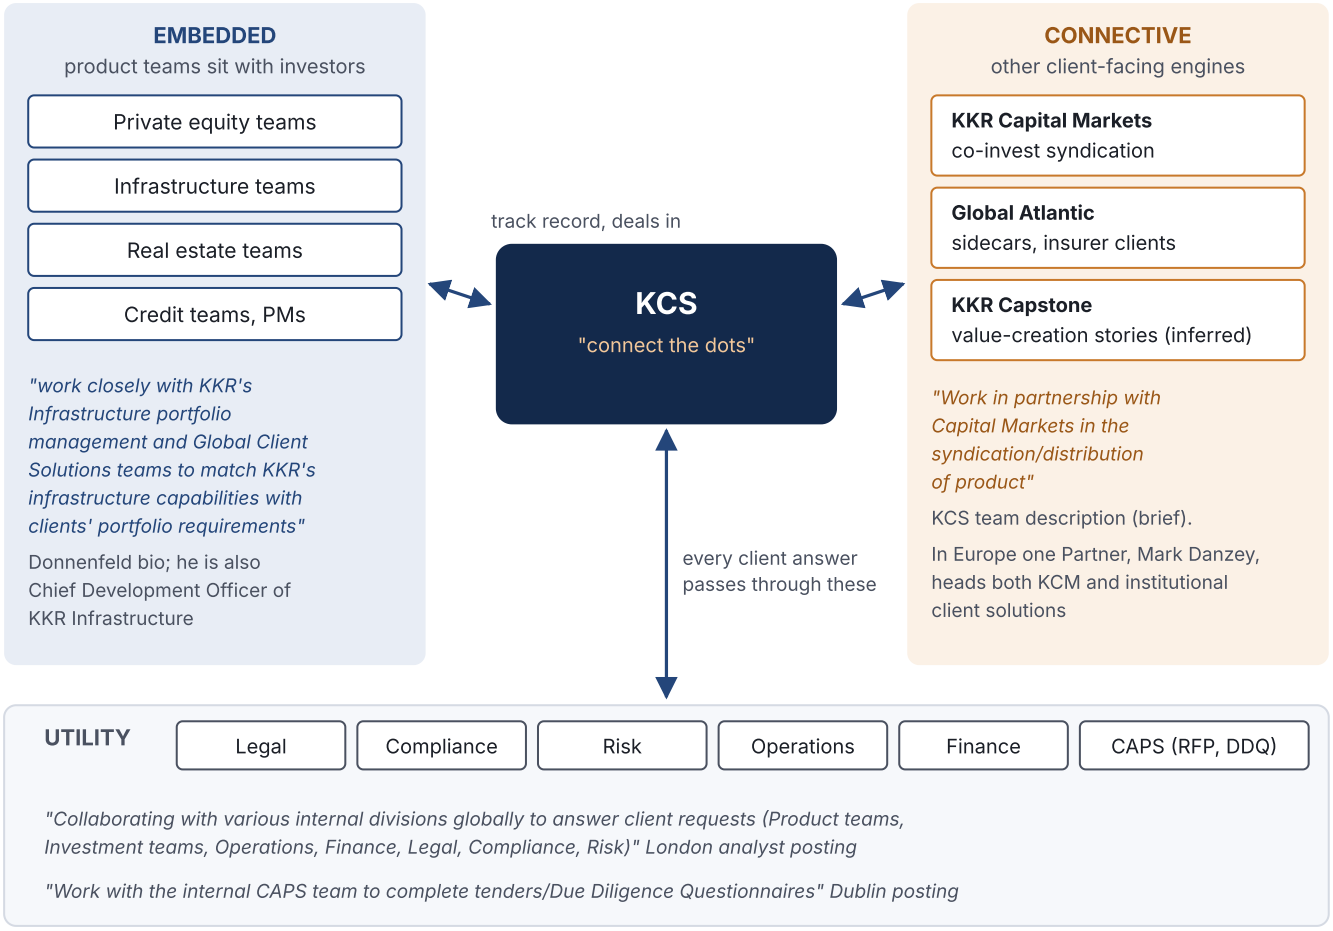

**Figure 45. How KCS is wired into KKR.** Embedded links bring the product to KCS; connective links let KCS sell things other engines create; utility links make every answer accurate and compliant. Quotes from KKR postings and bios [S101, S106, S138, S141, S156]. The Capstone link is INFERRED: no public fundraising deck showing Capstone case studies was found.

## Embedded: the investing teams

Product specialists are the bridge. Credit strategists "work closely with ... Portfolio managers and deal teams to understand the current portfolio, deal pipeline and overall market dynamics" [S106] CONFIRMED. The head of infrastructure product strategy is also the Chief Development Officer of KKR Infrastructure, and was the KKR voice in the GII V close: "We are grateful to receive strong support from both longstanding clients who have partnered with us across multiple fund vintages and new investors from around the world" [S138, S334] CONFIRMED. The traffic runs both ways. Investing teams give KCS track record, deal stories and senior people for client meetings; KCS brings back what clients want, which shapes new products [S141] CONFIRMED (the framing is INFERRED).

## Connective: KCM, Global Atlantic, Capstone

**KKR Capital Markets** "provides syndication services for co-investments in transactions participated in by KKR, our investment vehicles, Global Atlantic, and third-party clients" [S70] CONFIRMED. KCM earned $930m of transaction fees in 2025 [S70] CONFIRMED. KCS knows which clients want which deals; KCM structures and places them INFERRED. The people links are dense: Jim Burns sat on KCM's Executive Committee while leading EMEA clients [S122]; Lauren Hahn moved from KCM equity capital markets to head PE product strategy [S129]; Doug Brody ran the KCM co-investments team before heading Family Capital [S125]; and in Europe Mark Danzey heads both KCM and institutional client solutions [S156] CONFIRMED.

**Global Atlantic** is both a source of capital and a client channel. The Global Insurance Client Solutions principal works with "reinsurance pricing/deal teams" and the "Insurance-Funded Product Strategies team to structure and execute third-party capital vehicles" [S104] CONFIRMED. **KKR Capstone**, the in-house operating team, does not raise a fund; its value-creation work is part of the story KCS tells investors about how returns are made [S174] INFERRED.

### Utility: legal, compliance, risk, operations, finance

The London analyst posting is explicit: the junior answers client requests by working with "Product teams, Investment teams, Operations, Finance, Legal, Compliance, Risk" [S101] CONFIRMED. KYC onboarding is a named task [S101]. The person who leads KKR's product strategy sits on the Global Conflicts and Compliance Committee [S121] CONFIRMED, a sign that product design and compliance are joined at the top INFERRED.

> **YOUR OPINION GOES HERE**
>
> Which link is most underrated? A defensible view: the KCM link. Co-investment is what large clients increasingly want, KKR can underwrite more of a deal than its fund needs, and KCS is the team that knows who will take the rest [S70]. Danzey's dual role in Europe suggests KKR thinks the same [S156]. Add one sentence on why that interests you personally.

## KCS in London and EMEA: the team map

KKR's directory lists 46 KCS people at Principal level and above in EMEA: London 20, Dubai and Riyadh 6, Dublin 5, Zurich 5, Paris 4, Stockholm 4, Frankfurt 2 [S149] CONFIRMED. Their titles split into about 14 Managing Directors, 15 Directors and 17 Principals [S149] CONFIRMED. KKR's London office as a whole is estimated at about 300 to 400 people, based on Companies House accounts (182 average employees plus 88 members in the main LLP in 2025) and 155 London senior bios [S171, S149] INFERRED.

### How the London work splits

From the bios and postings, EMEA KCS divides four ways [S140, S141, S150-S157] CONFIRMED (the framing is INFERRED):

1. **By region.** Each senior RM owns a geography: UK, DACH, France/Benelux/Southern Europe, Nordics, Middle East, Central and Eastern Europe. Iberia is covered from Paris; no Madrid KCS bio exists [S149].
2. **By channel.** Institutional (pensions, sovereigns, insurers, consultants), Family Capital (single-family offices), and Global Wealth Solutions (private banks and wealth platforms).
3. **By product.** Private equity (including the evergreen K-PRIME and K-PEC), infrastructure, real estate, and credit (mostly Dublin).
4. **Support.** CAPS for RFPs and DDQs; the new London analyst role for "investor reporting, fundraising support, KYC and investment onboarding" [S140].

Two signals point to growth in Europe. Four of the seven new KCS Managing Directors for 2026 are EMEA-based: Alice Bush and Daniel Valladares in London, Patricia Bandeira Vieira and Michael de Freitas in the Middle East [S165] CONFIRMED. And KKR is "increasingly localizing" in Europe, said the co-heads of KKR EMEA, Mattia Caprioli and Tara Davies, when announcing Milan [S168] CONFIRMED. The closest European intern analogue, a 2027 KCS off-cycle intern in Frankfurt, supports "the DACH Institutional and Family Capital teams" and coordinates "responses to client due diligence requests/RFPs, including underlying portfolio statistics, marketing materials and presentation decks" [S141] CONFIRMED.

## KCS in EMEA: 46 listed senior people, est. 55-90 in total (central ~65)

Schematic, not to scale. Numbers = KCS bios at Principal+ per city, 11 Oct 2026.

### DUBLIN 5

Credit product strategy hub: Kevin McMahon, MD (Head of the Credit Strategy Team), Rory O'Farrell, MD. Legacy of Avoca (2014).
CAPS (RFPs, DDQs) and investor diligence roles also in Dublin.

### LONDON 20 listed (est. 25-35 incl. juniors)

18 Hanover Square. Where the summer intern sits.

**Institutional and Family Capital (RMs)**

Mark Danzey, Partner: European Head of Institutional Client Solutions (also European Head of KCM)*

Alice Bush, MD: Family Capital across EMEA and UK institutions

Hattie Pettit, Principal: European single-family offices

Samantha Trent, Principal (institutional client investments); Ronan O'Neill, Principal

Junior layer: EMEA Institutional Client Relations Analyst (hiring)

**Consultant relations**

Daniel Valladares, MD: Head of EMEA Consultant Relations

**Global Wealth Solutions, International**

Markus Egloff, MD: head of GWS for EMEA and Asia Pacific

Mark Tucker, MD: leads the GWS product team

Odumade Odutola, Director: Northern Europe and Middle East

Louise Nash, Lucy Anstice, Principals: Europe wealth raising

Leonardo Mercati, Director: credit for private wealth

Plus EMEA Wealth Communications AVP (hiring)

**Product strategy (product specialists)**

Matt Yates, Director: Head of EMEA Product Development; product manager for evergreen PE (K-PRIME, K-PEC)

PE: Peter Gawrychowski, Emily Pollock (evergreen PE), Directors

Infrastructure (largest cluster): Rory Smith, James Hewitt, Larisa Svintsitski, Pablo Arribas (infra for individuals)

Real estate: Freya Young, Director (European RE Strategies)

Origination: Antoine Maduzzi (EMEA, Global Product Origination)

Insurance clients for Europe sit in Paris (Alexandre Gerber)

Credit product sits mainly in Dublin (above)

**London senior bios by KKR team: KCS 20, Credit 20,**
PE 15, Infra 15, Capstone 15, KCM 10, RE 8 (of 155)

* Danzey is listed under Capital Markets, so London KCS = 20 without him.

### STOCKHOLM 4

Nordics: Carl Lithander, MD
Victor Kihlgren (Copenhagen), Adam Bjorndal, Fanny Jorwall

### FRANKFURT 2

DACH family capital: Harald Duerr, MD
DACH RE, credit, CEE: M. Mondovits

### ZURICH 5

German-speaking region: Hagen Raab, MD
+ 4 GWS for Swiss private banks

### PARIS 4

France, Benelux, Italy, Iberia: Yacine Boumahrat, MD
Family Capital France: Mikael Markman, MD (2025)

### DUBAI / RIYADH 6

Michael de Freitas and Patricia Bandeira Vieira (both MD from Jan 2026); real assets, PE, wealth roles

### NEW OFFICES

Abu Dhabi opened Nov 2025; Milan announced May 2026, with "members of KKR's client solutions team" involved

### EMEA SENIOR MIX

~14 Managing Directors
~15 Directors
~17 Principals

4 of 7 new KCS MDs for 2026 are EMEA-based

**Figure 46. KCS EMEA and London team map, October 2026.** Built from KKR's public directory and bios [S149, S150, S151, S152, S153, S154, S155, S156, S157], promotions [S165], Family Capital release [S178], offices [S184, S169], postings [S140, S147]. Grouping into panels and the estimate are INFERRED. Directory lists Principal and above only.

**SOURCE UNCERTAIN**

KKR does not publish reporting lines, so who reports to whom in London is inferred. The directory excludes Analysts and Associates, so the London junior count is an estimate. Bios can lag moves (for example, an infrastructure Partner still listed in London is moving to lead Milan [S149]). Peer London IR team sizes were not found, so no benchmark is given [S149] (gap).

**SAY THIS IN THE INTERVIEW**

"From the outside, London KCS looks like four groups: institutional and family capital relationship managers, consultant relations, Global Wealth Solutions under Markus Egloff, and a product team where infrastructure is the biggest cluster. I would expect an intern to support the relationship managers and one product team, and I would love to know which this summer." [S149, S150, S157]

**DON'T SAY THIS**

"I want to work for [named MD] on her team." You do not know the reporting lines and neither does any public source. Say what work interests you (for example, family capital, or evergreen products for UK wealth managers) and let them map it to people.

## Ten facts to carry into the room

| # | Fact | Source |
|---|---|---|
| 1 | KCS was formed in 2009 and calls itself "KKR's dedicated investor solutions team". | [S103, S141] |
| 2 | About 320 people; 232 listed at Principal and above; 20 senior people in London. | [S106, S149] |
| 3 | Two focus areas: Sales/Relationship Management and Product/Strategy Management, plus junior generalists. | [S141] |
| 4 | Private wealth is 18% of KKR AUM, bigger than pensions at 14%. | [S71] |
| 5 | K-Series AUM grew from $6bn (Dec 2023) to $42bn (Jun 2026). | [S72, S73] |
| 6 | KKR raised $305bn from Jan 2024 to mid-2026, beating its $300bn target. | [S76] |
| 7 | Capital Group partnership: two credit interval funds in April 2025, an equity fund holding K-Series PE. | [S92, S70] |
| 8 | In Europe, Mark Danzey heads both KCM and institutional client solutions. | [S156] |
| 9 | 4 of 7 new KCS MDs for 2026 are in EMEA, two of them in London. | [S165] |
| 10 | GII V closed at $19.2bn in Aug 2026 with private wealth platforms alongside sovereigns and pensions. | [S176] |

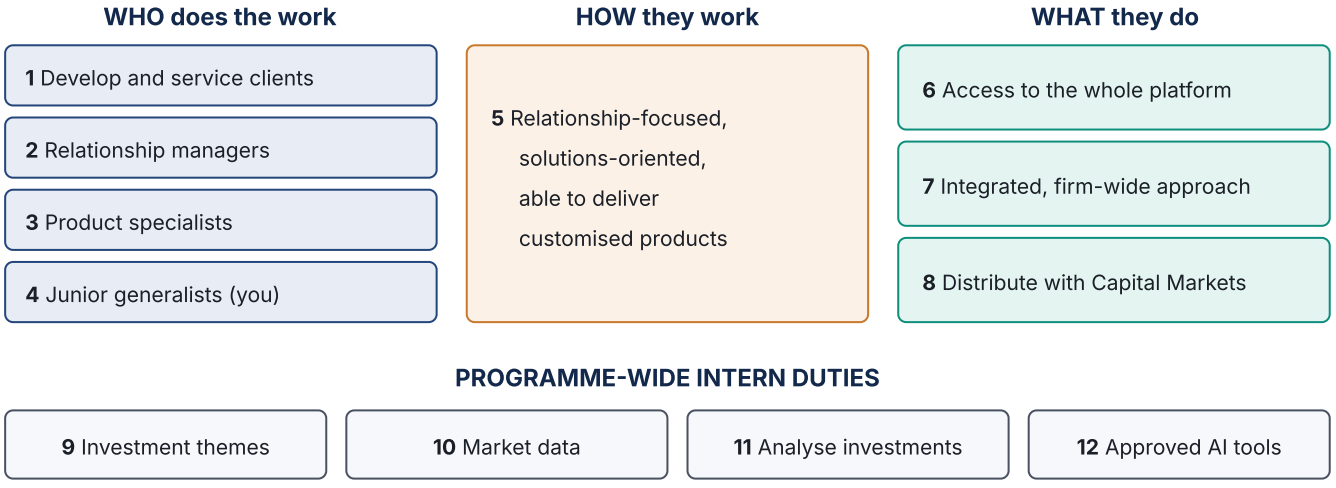

PART 4

# The role decoded, line by line

Every sentence KKR has written about KCS and its interns, translated into what you would actually do, who you would deal with, what good looks like and what it reveals about the firm.

## How to read this part

KKR's KCS team description has eight lines. The internship programme adds four duty lines that apply to every team. Below, each of the twelve gets the same decoding block: what it means day to day, who the counterparties are, the tools, what good looks like, and the structural fact about KKR it reveals. Where the block is reasoning rather than a quoted fact, it is tagged INFERRED. The figure below is the map.

Lines 1-8: KKR's KCS team description. Lines 9-12: the internship programme text. Numbers match the blocks below.

**Figure 47. Anatomy of the role.** Lines 1 to 4 say who, line 5 says how, lines 6 to 8 say what. Source: KKR KCS team description and internship text, as supplied in the candidate brief; grouping INFERRED.

## The eight lines of the KCS description

| Line 1. "consists of experienced professionals with diverse backgrounds dedicated to developing and servicing KKR's global network of investors and clients" | |
|---|---|
| **Day to day** | "Developing" means new clients and new money; "servicing" means reporting, meetings and answers for existing clients. The London analyst posting lists both: "Supporting Relationship Managers in fundraising activities" and "Ongoing servicing of existing clients" [S101] CONFIRMED. |
| **Counterparties** | Pension CIOs, sovereign fund teams, family office principals, private bank product heads, advisers [S70, S84] CONFIRMED. |
| **Tools** | CRM: a KKR wealth posting asks for "Proficiency in CRM systems (Salesforce)" and "meeting/call notes in CRM" [S103] CONFIRMED. |
| **Good looks like** | Clients come back for the next fund and add strategies INFERRED. |
| **Reveals about KKR** | "Diverse backgrounds" is literal: senior KCS people came from PIMCO, Goldman Sachs, UBS, Blackstone, Morgan Stanley, Citi, HSBC and from KKR's own investing and capital markets teams [S79, S120, S122, S123, S124, S129, S137] CONFIRMED. KKR hires laterally into KCS for specialist knowledge (wealth, insurance, a region) INFERRED. |

| Line 2. "Relationship managers in direct outreach to clients" | |
|---|---|
| **Day to day** | RMs own a territory or a client list. They set meetings, run roadshows, pitch, negotiate and close. In EMEA the territories are UK, DACH, France/Benelux/Southern Europe, Nordics and Middle East [S150, S153, S154, S155, S151] CONFIRMED. |
| **Counterparties** | Clients directly, plus the consultants who advise them (a separate consultant relations team covers those) [S132, S135] CONFIRMED. |
| **Tools** | CRM, pitch books, roadshow schedules, pipeline trackers. The Frankfurt intern will "Maintain information on the DACH budgets and pipeline" [S141] CONFIRMED. |
| **Good looks like** | Capital raised, meetings held, pipeline converted, and trust: KKR's 10-K lists "duration of relationships" and "quality of services" among the bases of fundraising competition [S70] CONFIRMED. |
| **Reveals about KKR** | "Direct" means KKR mostly covers clients with its own people rather than relying on placement agents INFERRED. The localisation push (Abu Dhabi 2025, Milan 2026) puts more RMs on the ground [S184, S168] CONFIRMED. |

| Line 3. "Product specialists providing specific support and expertise" | |
|---|---|
| **Day to day** | Each specialist knows one asset class deeply. A Dublin credit posting says the team is "responsible for owning marketing materials, developing thought leadership and leading investor diligence processes" and will "Create and update content for client updates presentations, marketing decks and new business proposals" [S106] CONFIRMED. |
| **Counterparties** | RMs (internal clients), investment teams and portfolio managers, and clients' due diligence teams [S106] CONFIRMED. |
| **Tools** | Pitch decks, DDQ library, data rooms, performance data. |
| **Good looks like** | Fast, accurate diligence answers and a clear story about the strategy INFERRED. |
| **Reveals about KKR** | With 24 strategies by 2020 [S94], no RM can know them all; specialists make breadth sellable. Credit alone has "over 30 product strategists" [S106] CONFIRMED. |

| Line 4. "Junior resources serving in a generalist capacity" | |
|---|---|
| **Day to day** | This is your line. Interns and analysts support several RMs and several products. Singapore intern tasks: "preparing client briefing materials, supporting meeting and roadshow logistics, maintaining CRM data, conducting market and client research, and assisting with sales territory management" [S107] CONFIRMED. Frankfurt: "Learn the platform, products and investment strategies across asset classes" [S141] CONFIRMED. |
| **Counterparties** | Mostly internal: RMs, product teams, CAPS, operations, legal, compliance [S101, S141] CONFIRMED. Some client contact in meetings. |
| **Tools** | PowerPoint, Excel ("Technical and aesthetic mastery" [S101]), CRM, approved AI tools. |
| **Good looks like** | Nothing goes out wrong. Fast turnaround. The RM never has to check your numbers INFERRED. Frankfurt asks for a "Strong support mindset" [S141] CONFIRMED. |
| **Reveals about KKR** | Generalist juniors see the whole shelf, which is the best way to learn a multi-strategy firm in a summer INFERRED. |

**SAY THIS IN THE INTERVIEW**

"I read 'junior resources in a generalist capacity' as the most useful seat for learning, because the intern touches every product and every internal team. The London analyst posting lists seven internal teams you work with just to answer client requests." [S101]

| Line 5. "Relationship-focused, solutions-oriented approach, able to deliver customized products" | |
|---|---|
| **Day to day** | Start from the client's problem, not the fund that is raising. For a big pension that might be a separately managed account; for a family office a co-investment; for an insurer a "fully integrated balance sheet solution" [S84, S104] CONFIRMED. |

| Line 5. "Relationship-focused, solutions-oriented approach, able to deliver customized products" | |
|---|---|
| **Counterparties** | Large institutions, insurers, family offices; internally product strategy and legal. |
| **Tools** | Bespoke proposals; KKR's Total Portfolio Approach framing, "zero-based budgeting for portfolio construction" [S90] CONFIRMED. |
| **Good looks like** | Bigger, stickier, multi-strategy relationships INFERRED. |
| **Reveals about KKR** | The 10-K says sovereigns and public pensions increasingly prefer SMAs and fewer managers [S70] CONFIRMED. Customisation is KKR's answer. "Relationship-focused" echoes the founders: "people do business with people they like and trust" [S384] CONFIRMED. |

| Line 6. "Facilitate client access to products and services across KKR's platform" | |
|---|---|
| **Day to day** | Match each client to the right product: a drawdown fund, a K-Series fund, co-investment, KCM financing for a family's company, an insurance solution [S70, S84] CONFIRMED. |
| **Counterparties** | Clients and product teams. |
| **Tools** | The product shelf; the client's profile and holdings in CRM. |
| **Good looks like** | Clients in more than one strategy. KKR does not publish this number [S74] (gap), but it is the classic test of a platform INFERRED. |
| **Reveals about KKR** | "Services" is a real word: family offices are offered "Comprehensive Debt Solutions ... including buyouts and acquisition financings" [S84] CONFIRMED, which is a capital markets product sold through a KCS relationship. |

| Line 7. "Apply integrated approach by leveraging all KKR executives and capabilities globally" | |
|---|---|
| **Day to day** | Bring the right KKR person into the client conversation: an infrastructure investor for a sovereign, the macro team for a CIO, a senior partner for an annual meeting INFERRED. KCS "seeks to 'connect the dots' across all businesses at KKR" [S141] CONFIRMED. |
| **Counterparties** | Investment teams, the Global Macro team, senior leadership, other regions. |
| **Tools** | Internal networks; KKR Insights research. |
| **Good looks like** | The client feels it sees all of KKR, not one sales person INFERRED. |
| **Reveals about KKR** | It works because of the single expense pool and one compensation approach. CFO Robert Lewin: "We run KKR as 1 firm with 1 compensation approach. Relationships travel, ideas travel, lessons learned travel." [S207] CONFIRMED. |

| Line 8. "Work in partnership with Capital Markets in the syndication/distribution of product" | |
|---|---|
| **Day to day** | When KKR has more of a deal than its funds want, KCM offers the extra as co-investment and KCS brings the clients who want it [S70] CONFIRMED; the KCS role in it is INFERRED. See the co-investment section below. |
| **Counterparties** | KCM desks, co-investing clients (sovereigns, pensions, family offices). |
| **Tools** | Deal teasers, NDAs, wall-crossing records, allocation sheets INFERRED. |
| **Good looks like** | Deals placed quickly and fairly, information barriers respected INFERRED. |
| **Reveals about KKR** | KKR owns its own capital markets business, which earned $930m of transaction fees in 2025 [S70] CONFIRMED. In Europe one Partner, Mark Danzey, heads both KCM and institutional client solutions [S156] CONFIRMED. |

# The four intern duty lines

**WHERE THESE LINES COME FROM**

Every duty and qualification line here is quoted from KKR's own 2027 London internship description, as published on the SEO London listing and the attached team descriptions [Advert]. The core sentence reads: "summer interns will be involved in helping identify attractive investment themes and opportunities, synthesizing industry and market data and analysing potential investments. Interns are encouraged to leverage KKR's approved AI tools to accelerate their work, deepen their learning, and contribute fresh perspectives on how emerging technology can enhance the way we operate." The SEO application form itself sits behind a login and was not read [S392].

| Line 9. Identify investment themes | |
|---|---|
| **In KCS terms** | Not finding deals, but finding the stories clients want to hear and checking KKR has a product for each. Example themes in KKR's own 2026 output: infrastructure for AI and power demand, the Total Portfolio Approach, asset-based finance [S334, S90, S332] CONFIRMED. |
| **Counterparties** | RMs, product specialists, KKR Insights and macro research. |
| **Good looks like** | A theme with evidence, a client type it suits and a KKR product it maps to INFERRED. |
| **Reveals** | KCS sells views as well as funds. A KKR recruiter said the firm wants candidates who "understand how the macro environment is affecting investors and what that might mean for KKR's businesses" [S393] REPORTED. |

| Line 10. Synthesise industry and market data | |
|---|---|
| **In KCS terms** | Turn fundraising data, peer moves and client news into a one-page brief. Singapore interns do "market and client research" and "Support the production and maintenance of Institutional and Family Capital business metrics and reporting" [S107] CONFIRMED. |
| **Good looks like** | Short, sourced, so-what first. For example: "Q1 2026 private credit redemption requests topped $20bn industry-wide; here is what our wealth clients are asking" [S337] REPORTED. |
| **Reveals** | The analyst posting asks for the "ability to read information/situations from varying perspectives and tailor messages to suit different audiences" [S388] CONFIRMED. |

| Line 11. Analyse potential investments | |
|---|---|
| **In KCS terms** | Look at investments from the client's side: what a fund or co-investment adds to a client portfolio, its fees, liquidity, risk and track record. For a K-Series fund that means the 1.25% management fee and limited redemption terms [S111, S70] CONFIRMED. For a co-investment it means a fast read of the deal for a client INFERRED. |
| **Good looks like** | You can say who the product is for and who it is not for INFERRED. |
| **Reveals** | KCS people must understand the investing as well as the investors; several moved between investing, KCM and KCS [S129, S130, S137] CONFIRMED. |

| Line 12. "encouraged to leverage KKR's approved AI tools" | |
|---|---|
| **In KCS terms** | Draft first versions of DDQ answers, summarise long reports, tidy meeting notes, build first-pass slides. The London analyst posting asks for "Strong working knowledge of AI-enabled productivity tools, with the ability to use generative AI effectively and responsibly" [S101] CONFIRMED. |
| **Good looks like** | Faster drafts, every number and claim checked against the source, nothing confidential pasted into an unapproved tool INFERRED. |
| **Reveals** | "Approved" is the key word: client data and fund numbers are confidential and regulated, so only sanctioned tools are allowed INFERRED. |

**SAY THIS IN THE INTERVIEW**

"I would use the approved AI tools for first drafts and summaries, then check every figure against the official source myself, because in client work a DDQ answer or a performance number is a representation to the client." [S101, S70]

## The London analyst posting, decoded

On 7 October 2026 KKR advertised an **EMEA Institutional Client Relations Analyst** in London, for "up to 2 years" of experience [S101, S140] CONFIRMED. It is the closest public description of what the London team's juniors do. Every duty, verbatim [S101], with a decode:

| Verbatim duty | What it means in practice (inferred unless tagged) |
|---|---|
| "a member of the fundraising support and investor relations team for KKR's EMEA based institutional & family capital clients" | Two channels (institutions and families), one region. Not the wealth channel, which sits with GWS under Markus Egloff [S157] CONFIRMED. |
| "develop both client relationships and product expertise in a variety of different asset classes, including private equity, infrastructure, real estate, private and liquid credit strategies" | Generalist across the whole shelf. "Liquid credit" means tradable loans and bonds, as opposed to private loans. |
| "work closely with Relationship Managers across EMEA, providing support for client investments with KKR" | You are the RMs' engine room: packs, numbers, follow-ups. |
| "Managing a variety of reporting requirements for investors" | Clients ask for data in their own formats (fees, holdings, ESG data, look-throughs). You compile, check and send. |
| "Supporting Relationship Managers in fundraising activities" | Pitch books, meeting briefings, roadshow logistics, pipeline tracking. |
| "Partnering with clients to help with KYC & investment onboarding" | Know-your-client checks (identity, ownership, source of funds, sanctions) and subscription paperwork before money can come in. Anti-money laundering rules apply [S70] CONFIRMED. |
| "Collaborating with various internal divisions globally to answer client requests (Product teams, Investment teams, Operations, Finance, Legal, Compliance, Risk)" | Finding the person who knows the answer, getting it right and on time. This is where you learn the firm. |
| "Ongoing servicing of existing clients including delivering investment updates in meetings" | Juniors present too, not just take notes. Prepare to speak about a portfolio clearly. |
| "Regular involvement in event coordination, team budgeting and business planning" | Client events, AGMs, the team's own budget and targets. |
| Competencies: "Technical and aesthetic mastery of PowerPoint and Excel"; "Maturity, presence, sound judgment, and ability to form and express opinions"; "Additional language fluencies, particularly German or French, a plus" | Slides must look KKR-quality. Opinions are wanted, so have some. German and French match the DACH and France/Benelux coverage [S153, S154] CONFIRMED. |

**WHY THIS MATTERS**

The posting shows the job is half service, half sales. If you only talk about "pitching funds" you will sound like you have not read it. Mention reporting, KYC and answering client requests, and you will sound like you already work there.

# A worked day: KCS summer intern in London

This is an illustrative day built only from the duties in KKR's KCS postings [S101, S107, S141]. It is not a reported account. The 2027 London programme runs from 6 June to 29 July 2027 (from the brief). Expect variety: no two days look alike INFERRED.

**Figure 48. An illustrative day in London KCS.** Each block maps to a duty in a KKR posting: briefing materials and CRM [S107], DDQs and RFPs [S141, S106], reporting and client requests [S101], events and pipeline [S101, S141]. Times and examples are INFERRED.

# The life of a fundraise

A flagship fund is a multi-year project for KCS. The diagram shows the stages from design to the next fund, with what KCS does at each. The sequence is the standard private markets pattern INFERRED; the examples are KKR's.

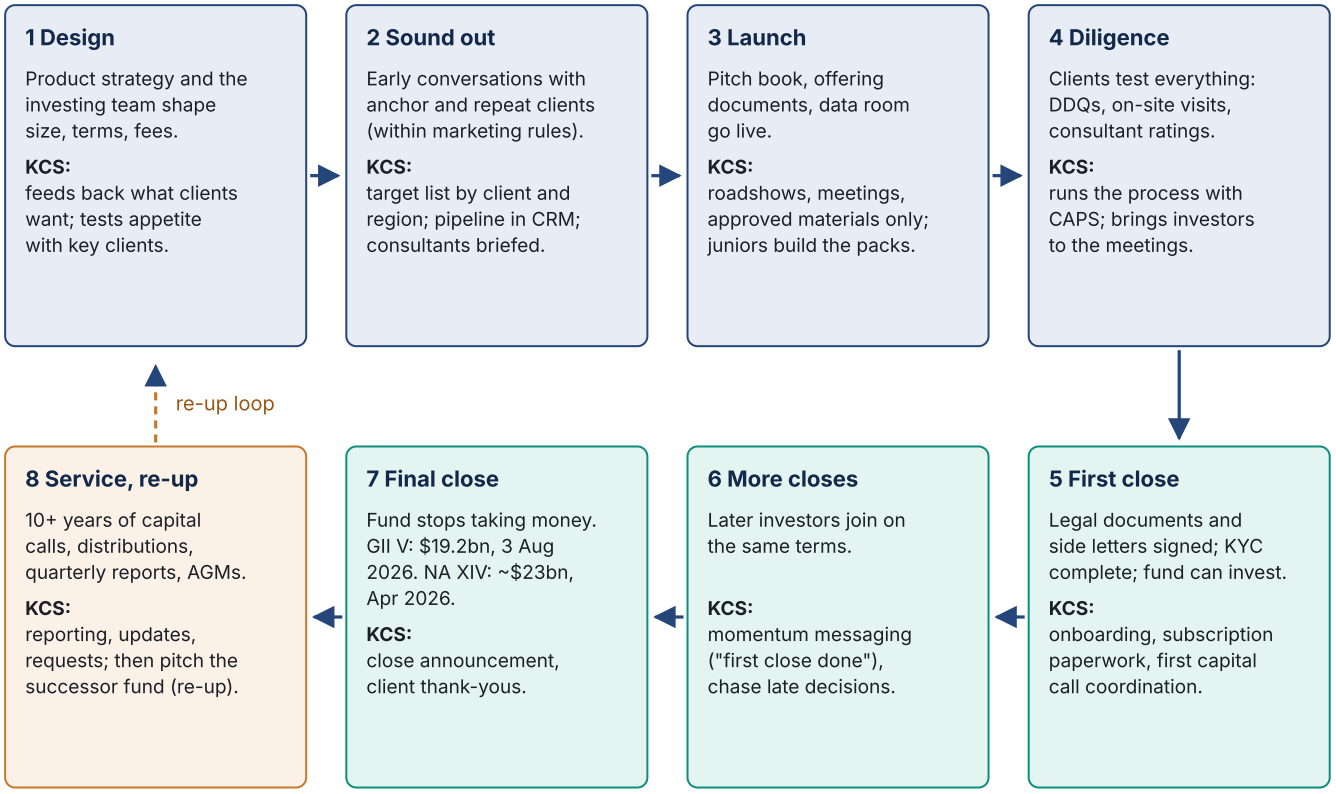

**Figure 49. The life of a fundraise.** Stage sequence INFERRED. Fund closes [S176, S335]; fund terms from KKR's 10-K as summarised in WS2 [S2]; KCS activities from KKR postings [S101, S106, S141]. A CalPERS example of the re-up loop: commitments to KKR flagships from 2006 to 2022 [S117].

**KEY TERMS**

**Close:** a date on which investors sign up and become bound. **Side letter:** a private agreement giving one investor extra terms (reporting, fee or legal points). **Capital call:** KKR asking investors to send part of their commitment. **Distribution:** cash paid back to investors. **Re-up:** an existing investor committing to the successor fund. Donnenfeld on GII V: "strong support from both longstanding clients who have partnered with us across multiple fund vintages and new investors" [S334] CONFIRMED.

## The life of an RFP or DDQ

A **request for proposal** (RFP, called a "tender" in the UK and EU) asks managers to bid for a mandate. A **due diligence questionnaire** (DDQ) is a long list of questions an investor asks before committing: strategy, team, track record, risk, legal, operations, ESG, fees. KKR's Dublin posting: "Work with the internal CAPS team to complete tenders/Due Diligence Questionnaires for potential new clients across credit while leading investor diligence processes" [S106] CONFIRMED. Frankfurt interns "Coordinate responses to client due diligence requests/RFPs, including underlying portfolio statistics, marketing materials and presentation decks" [S141] CONFIRMED.

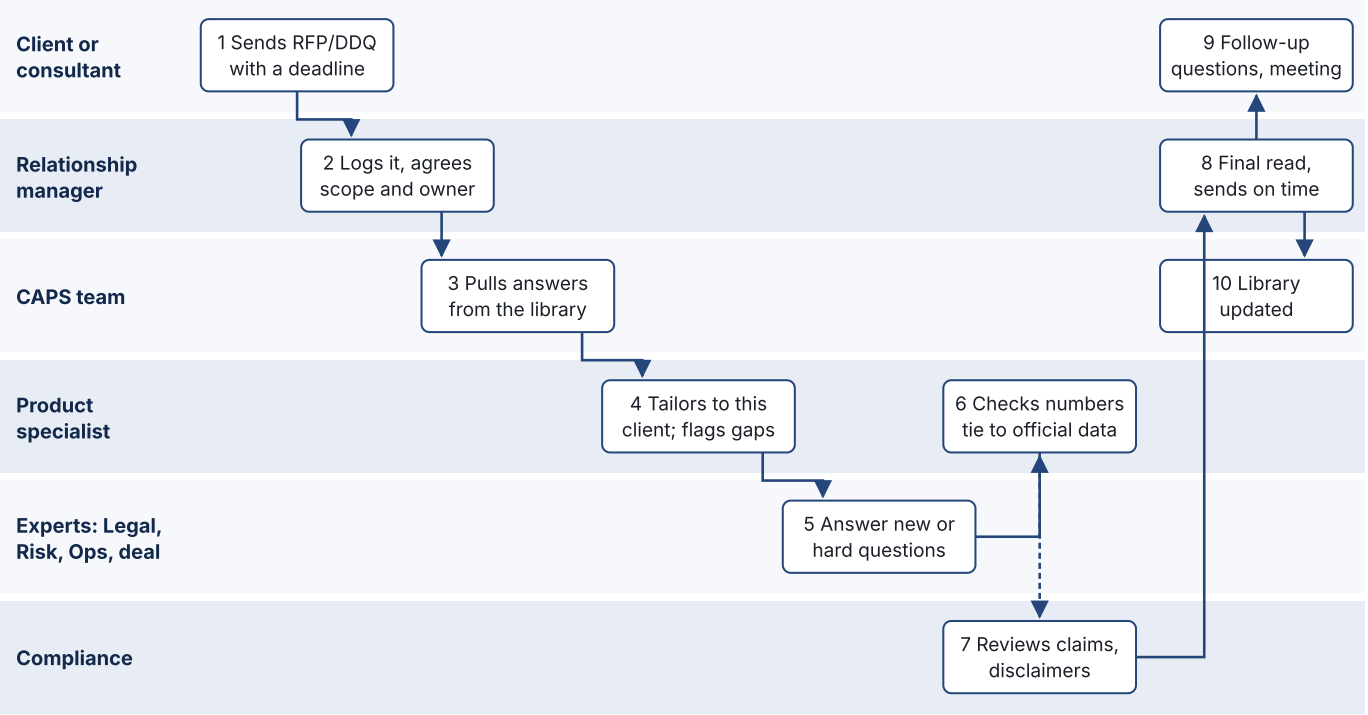

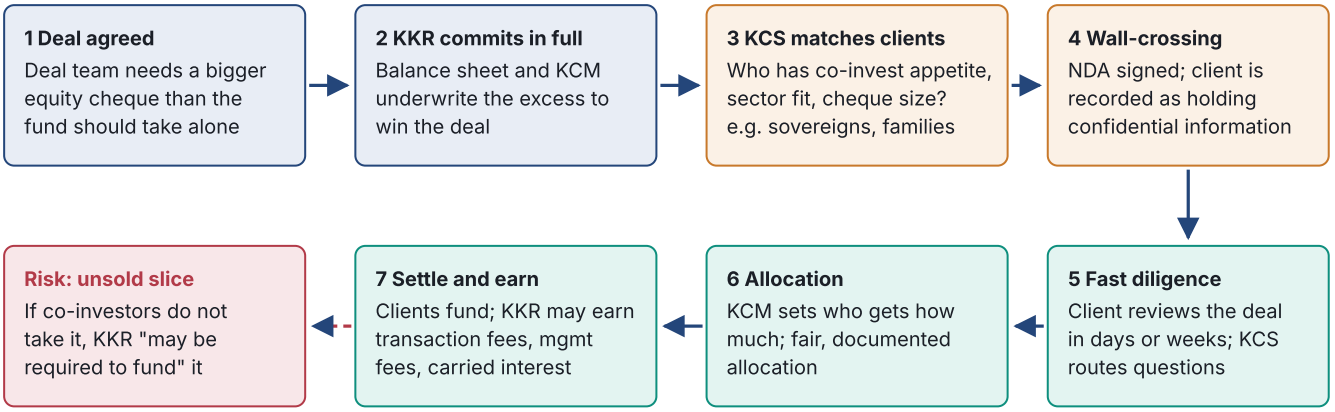

**Figure 50. The life of an RFP or DDQ (swimlane).** Roles from KKR postings: CAPS and tenders [S106, S146], intern coordination [S141], internal divisions [S101]. Step order and checks are INFERRED. Peers run the same process: Blackstone's London ICS summer analysts work on "due diligence questionnaires (DDQs)" [S218] CONFIRMED.

**YOUR OPINION GOES HERE**

Where would AI help most and where is it riskiest? A defensible view: most help in step 3 (finding and adapting past answers), most risk in step 6 (numbers), where a human must tie every figure to the official source. Add your own example of checking someone else's numbers.

## The life of a co-investment syndication with KCM

KKR's 10-K describes the mechanism. KKR Capital Markets "provides syndication services for co-investments in transactions participated in by KKR, our investment vehicles, Global Atlantic, and third-party clients, which may entitle the firm to receive transaction fees, management fees, and a carried interest" [S70] CONFIRMED. KKR may commit to more of a deal than it keeps and "syndicate a portion of our capital commitment to third parties. However, if we are unable to syndicate all or part of such commitment, or if such co-investors fail to fund their commitments, we may be required to fund the remaining commitment" [S70] CONFIRMED.

**Who does what**

**KCM:** structures, underwrites, places and settles. $930m of KKR transaction fees in 2025.

**KCS:** knows each client's appetite and limits; makes the introduction; keeps the relationship.

**Compliance:** wall-crossing records, insider lists, information barriers between teams.

**Client:** gets low-fee exposure to a specific deal and a closer relationship with KKR.

**Figure 51. The life of a co-investment syndication.** Mechanism, fees and the unsold-commitment risk from KKR's FY2025 10-K [S70] CONFIRMED. KCM fees 2025 [S70]. Steps 3 to 6 (matching, wall-crossing, allocation) are INFERRED from standard practice and the KCS description.

**KEY TERMS**

**Syndication:** selling slices of a deal to other investors. **Underwrite:** commit to the whole amount first, taking the risk of not selling it. **Wall-crossing:** formally giving someone confidential (possibly price-sensitive) information, after which they are restricted from trading on it. **MNPI:** material non-public information.

## Two channels compared: institutional vs private wealth

The London analyst role covers institutions and family capital [S101]; wealth sits in GWS [S157]. But a summer intern may see both, and the work differs in shape. Institutions are reached directly, one large client at a time. Wealth is "business to business to consumer": KCS sells to a platform, the platform's advisers sell to individuals INFERRED.

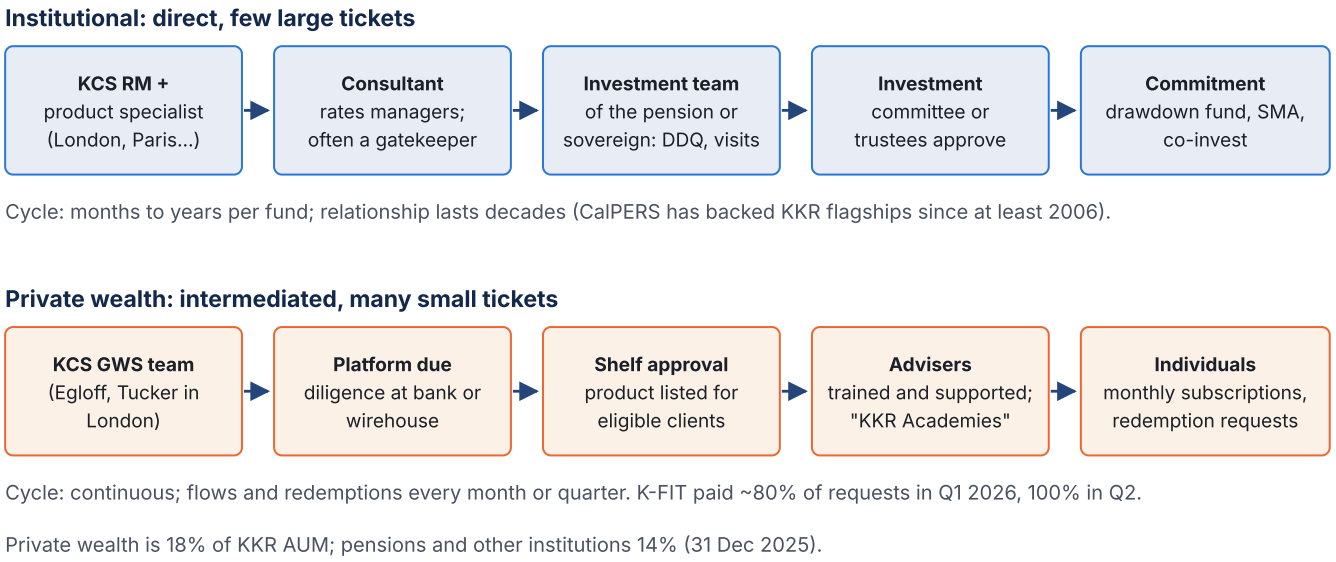

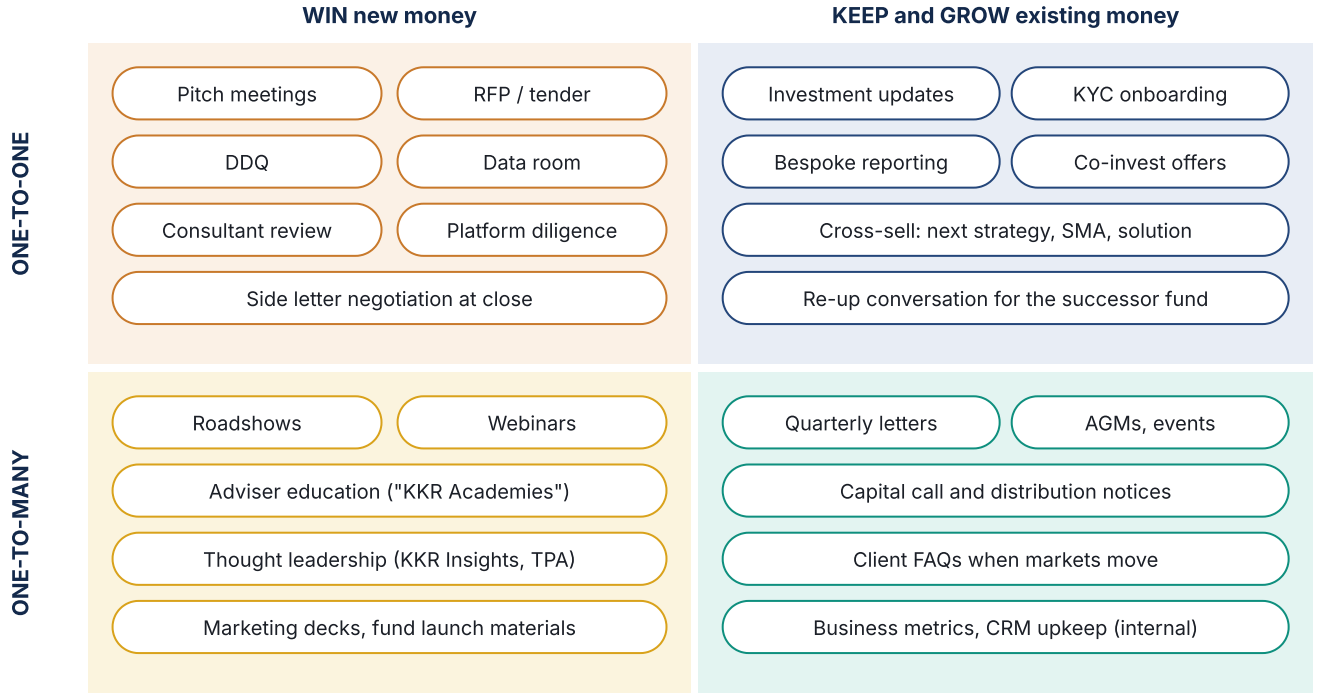

**Figure 52. Institutional vs private wealth: two different sales chains.** Wealth channels [S70]; GWS London [S157, S137]; KKR Academies [S207]; CalPERS [S117]; K-FIT redemptions [S338] REPORTED; AUM mix [S71]. Chain steps INFERRED.

| Dimension | Institutional (and family capital) | Private wealth (GWS) |
|---|---|---|
| Who you persuade | A CIO, an investment team, a consultant, a committee | A platform's due diligence team, then thousands of advisers |
| Main products | Drawdown funds, SMAs, co-investment [S70] | K-Series evergreen funds, interval funds, feeders [S70, S92, S114] |
| Minimums | Large single commitments (e.g. CalPERS $600m to NA XIII [S117]) | US K-Series aimed at accredited investors, $1m+ net worth [S76]; Capital Group KKR funds $1,000 minimum [S210] |
| Liquidity talk | Long lock-up accepted; capital calls and distributions | Limited, periodic redemptions; must be explained before sale [S70, S338] |
| Regulation emphasis | Professional-investor marketing; AIFMD and UK private placement [S70] | Suitability and investor protection: MiFID II, ELTIF Regulation in the EEA [S70]; US licences such as Series 7 [S103] |
| Junior work | Reporting, KYC, DDQs, meeting packs [S101] | Outbound calls, territory and pipeline data, roadshows with platforms [S103]; adviser education material INFERRED |
| Scoreboard | Commitments, re-ups, strategies per client INFERRED | Net flows, platforms signed, redemptions [S76, S77] |

## The taxonomy of KCS activities and formats

Every activity in KCS sits somewhere on two axes: is it one-to-one or one-to-many, and is it about winning new money or keeping and growing existing money? Knowing the formats by name makes you sound like an insider.

Juniors touch every quadrant: they build the packs, run the logistics and keep the data clean.

**Figure 53. Taxonomy of KCS activities.** Formats named in KKR postings: roadshows, AGMs, quarterly presentations, CRM, client reporting [S107]; DDQs and tenders [S106]; RFPs and investor events [S141]; KYC and investment updates [S101]; KKR Academies [S207]; Insights and TPA [S90]. Placement on the axes INFERRED.

| Format | What it is, in one line |
|---|---|
| Roadshow | A run of client meetings in one region over a few days, often around a fund launch. |
| AGM | A fund's annual meeting for its investors: performance, portfolio, outlook, Q&A with senior investors. |
| Quarterly letter / report | The regular update on fund value, cash flows and portfolio companies. |
| Data room | A secure online folder of fund documents for investors doing diligence. |
| Consultant review | An investment consultant's assessment and rating of a strategy, which many pension clients rely on. |
| Side letter | A private agreement with one investor adding to the main fund terms. |
| Webinar | One-to-many online briefing, common in the wealth channel. |
| Platform due diligence | The review a private bank or wirehouse runs before putting a KKR fund on its shelf for advisers. |

## What the team is judged on

KKR publicly reports some KCS outcomes; others are industry practice and not disclosed.

| Measure | Latest public figure or status | Source |
|---|---|---|
| New capital raised | $34bn in Q2 2026; record $133bn over 12 months; record $129bn in 2025 | [S74, S75] CONFIRMED |
| Progress against target | $305bn since start of 2024 vs $300bn+ target for 2024-26 | [S76] REPORTED |
| Fee-paying AUM growth | $638bn, driven "primarily" by "organic new capital raised" | [S74] CONFIRMED |
| Perpetual capital | $334bn, 42% of AUM | [S74] CONFIRMED |
| Wealth growth | K-Series $42bn; "up 20% net year-to-date" | [S73, S77] |
| Breadth of raise | Larson: "capital raise for different geographies, different risk reward and through different distribution channels" | [S76] REPORTED |

| Measure | Latest public figure or status | Source |
|---|---|---|
| Non-flagship share | "only $14 billion of the $214" raised 2022 to mid-2024 was in flagships | [S119] REPORTED |
| Re-up rate, strategies per client, client count, time to close, client satisfaction | Not disclosed by KKR; standard industry measures | INFERRED |

For an intern, the scoreboard is simpler: accuracy, speed, judgement about what matters, and whether RMs start asking for you by name INFERRED. Recall Kravis on hiring: "we look for like and trust and we look to understand who the person is" [S385] CONFIRMED.

**DON'T SAY THIS**

"KCS is basically sales." It is partly sales, but the postings put reporting, KYC, client requests and investor diligence first [S101, S106]. Also avoid "KCS is the back office": the team "leads fundraising activities" [S106] and sits on KKR's main growth line.

## The compliance dimension: bright lines

Client work at an asset manager is regulated work. KKR's 10-K names the frameworks: in the UK and EU it markets under "private placement exemptions and marketing registrations, for example under the AIFMD in Europe, the Financial Services and Markets Act 2000 ... and the Alternative Investment Fund Managers Regulations 2013" [S70] CONFIRMED. Sales to EEA individuals are governed by MiFID II, AIFMD and the ELTIF Regulation, which "contain requirements for, among other things, marketing, investor suitability assessments, and conflicts of interest management" [S70] CONFIRMED. KKR's London LLPs are FCA-authorised [S171, S172] CONFIRMED.

| Bright line | What it means for a junior | What to say unprompted |
|---|---|---|
| **Marketing rules** | Only approved materials go to clients. Content is gated by investor type: KKR's wealth site is "only intended and directed to Institutional, Professional or Accredited Investors" [S83] CONFIRMED. No ad hoc spreadsheets of performance sent from your inbox INFERRED. | "I'd assume nothing goes to a client unless it's been through compliance, and I'd ask before sending anything new." |
| **MNPI walls with KCM** | KCM handles financings and securities; co-investment involves confidential deal information. Wall-crossing and insider lists apply; never share deal details with an un-crossed client or colleague INFERRED. Product strategy head Amy Lesch sits on the Global Conflicts and Compliance Committee [S121] CONFIRMED. | "Working near Capital Markets, I'd expect strict information barriers and would treat any deal information as need-to-know." |
| **Gifts, hospitality, bribery** | Client events and dinners are part of the job, so gifts and entertainment are logged and limited; public pension and sovereign clients raise anti-bribery sensitivity INFERRED. The 10-K warns "Financial crime laws may limit our investment and capital raising activities" [S70] CONFIRMED. | "Client entertainment is a tool, not a perk; I'd follow the logging rules." |
| **Accuracy of numbers** | DDQ answers, returns and fees become representations to clients; errors are legal and regulatory risk INFERRED. Tie every figure to the official source. | "In this job a wrong number is worse than a late number." |

| Bright line | What it means for a junior | What to say unprompted |
|---|---|---|
| **KYC and AML** | Onboarding is a named analyst task [S101]. No money is accepted until checks are complete INFERRED. | "KYC is the first thing that protects the firm, not paperwork." |
| **AI tool use** | Only "KKR's approved AI tools" (brief). Client names, holdings and unpublished performance never go into public tools; outputs are checked like any draft INFERRED. The posting asks for using generative AI "effectively and responsibly" [S101] CONFIRMED. | "I'd use AI for speed on drafts and never for the final check." |

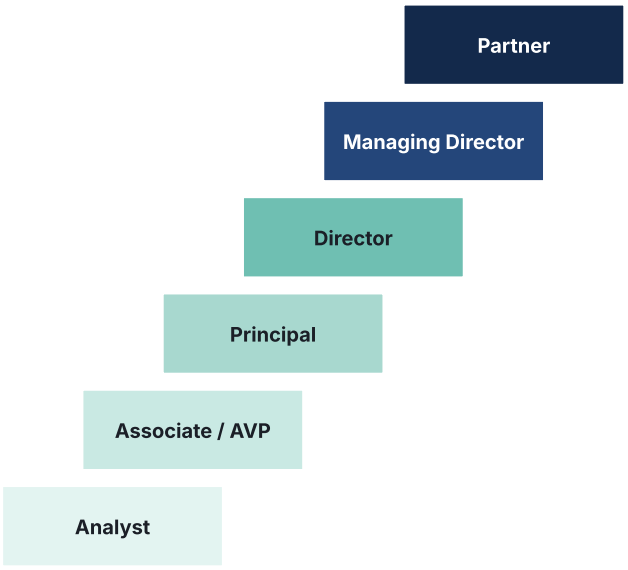

**WHY THIS MATTERS**

KKR's culture line is "our word is our bond", and Kravis tells of apologising to a bank's CEO after an employee retraded a deal in KKR's favour [S384] CONFIRMED. In KCS that culture shows up as accuracy and honesty with clients. Raising compliance yourself, briefly and calmly, signals you understand the seat.

## Career path from the seat

The title ladder in KKR's directory and postings is Analyst, Associate (some postings say AVP), Principal, Director, Managing Director, Partner [S80, S101, S102, S104]. The titles are CONFIRMED; the order is INFERRED. Public bios show that people move across KCS, between KCS and Capital Markets, and from investing into KCS.

**The ladder**

Directory: 84 Principals, 80 Directors, 51 MDs in KCS

**Documented moves (KKR bios)**

**Up within KCS**
Josh Metz: RM to Head of Wirehouse and Platform

**Product to coverage**
D. Valladares: infra product to Head EMEA Consultants

**Capital Markets to KCS**
Lauren Hahn (ECM to PE product); Doug Brody

**Investing to KCS**
Rory Smith (RE investing); Weiyu Tan (PE, KCM, FC)

**KCS to firm leadership**
Suzanne Donohoe: Global Head of Strategic Growth

**KCS to investing**
No public example found (not proof it never happens)

London juniors: several Principals joined after 2-3 years elsewhere (e.g. BNP Paribas sales; Evercore M&A and private capital advisory)

**Figure 54. Career path from a KCS seat.** Titles and counts [S80]; moves from KKR bios [S126, S132, S129, S125, S137, S130, S94, S122]; London lateral examples [S137]. Ladder order is INFERRED; no outbound KCS-to-investing example was found [gap].

## How KCS differs from investing roles in what you learn

| Skill | KCS seat | Investing seat (e.g. private equity) |
|---|---|---|
| Breadth | Every strategy on the shelf, every region's clients | Deep in one sector or strategy |
| Core analysis | Portfolio fit, fees, liquidity, track record from the investor's side | Company valuation, models, due diligence on targets |
| Communication | Explaining complex products simply to different audiences; "tailor messages to suit different audiences" [S388] | Investment memos for committees |
| Network | Clients worldwide plus every internal team [S101] | Management teams, bankers, advisers |
| Rhythm | Continuous: quarters, closes, client cycles | Deal-driven peaks |
| Path | Product, coverage, channel leadership, firm strategy (Donohoe) [S94] | Deal lead, partner on an investment committee |

Pay data points for orientation only: a New York GWS internal sales analyst/associate role was advertised at $130,000 to $165,000 base [S103] and a Global Insurance Client Solutions principal at $190,000 to $230,000 base [S104] CONFIRMED. No London KCS pay data was found.

**YOUR OPINION GOES HERE**

Why KCS over an investing seat, in your words. A strong structure: (1) you want breadth across the whole firm, which KCS gives by design [S141]; (2) you are energised by explaining things to people, which is the job [S388]; (3) the growth is in new channels like wealth and insurance, so the seat is where KKR is changing fastest [S71, S73]. Then one personal example.

**SAY THIS IN THE INTERVIEW**

"What draws me to KCS is that it is the one seat that sees the whole of KKR: every strategy, every client type, and Capital Markets too. The London analyst role lists reporting, KYC, client requests and investment updates, so I know it is a service job as much as a sales job, and I like that. Accuracy and trust are the product." [S101, S141]

**DON'T SAY THIS**

"I see KCS as a way into private equity." Interviewers hear that as a lack of commitment, and no public bio shows a KCS-to-investing move [S80]. If asked about the future, talk about growing within client solutions or across product and coverage, which the bios do show [S126, S132].

PART 5

# How KCS stands out: the competitive research on the role

Ten rival client teams side by side, the seven design choices that separate them, what only KKR's client model can claim, and where it does not lead.

Every big private markets firm has a team like KCS. The job is the same everywhere: find investors, match them to products, look after them, and bring them back for the next fund. What differs is what sits behind the team: how big the firm is, what it owns, and how its people are paid. This part compares KCS with its ten closest peers so you can say, with evidence, what makes KKR's version different and where it is behind.

**KEY TERMS USED IN THIS PART**

**AUM (assets under management):** all the money a firm looks after. **Fee-paying AUM (FPAUM):** the part that actually pays a management fee; analysts value this more. Firms use slightly different names (fee-earning, fee-generating, fee-bearing) for the same idea. **Inflows / capital raised:** new money clients committed in a period. **Evergreen fund:** a fund with no end date that takes new money monthly and lets investors ask for some back each quarter; the main product sold to wealthy individuals. **Insurance affiliate:** an insurance company owned by, or closely tied to, the asset manager, whose savings it invests.

## The field: KKR against ten rivals

Start with the firm-level numbers. The table puts the facts a KCS interviewer might test in one place. Dates matter: AUM and quarterly flows are at 30 June 2026; headcount is from the end-2025 annual reports.

| Firm | AUM | Fee-paying AUM | Raised Q2 2026 | Wealth AUM | Insurance link | Headcount |
|---|---|---|---|---|---|---|
| **KKR** | $796bn [S200] | $638bn [S200] | $34bn; $133bn LTM [S200] | K-Series $42bn [S200] | Owns Global Atlantic, $220bn [S200] | 5,043 [S201] |
| Blackstone | $1,346bn [S213] | $962bn [S213] | $68.3bn [S213] | about $324bn [S215, S216] REPORTED | Partner: manages insurers' money; sold Resolution Life stake [S214] | about 5,285 [S214] |
| Apollo | $1,047bn [S220] | $858bn [S220] | $60bn [S220] | Not disclosed as one figure; AAA $12bn third-party [S220] | Owns Athene; Athene-related $416bn [S220] | about 6,140 [S221] |
| Brookfield (BAM) | "over $1 trillion" [S235] | $672bn fee-bearing [S235] | $77bn [S235] | Not found | Manages sister insurer BWS, not owned by BAM [S236] | 5,800+ [S236] |
| Ares | $671bn [S224] | $410bn [S224] | $36.4bn [S224] | $108.4bn incl. listed funds (end 2025) [S225] | Controls Aspida [S225] | 4,250+ [S225] |

| Firm | AUM | Fee-paying AUM | Raised Q2 2026 | Wealth AUM | Insurance link | Headcount |
|---|---|---|---|---|---|---|
| Carlyle | $485bn [S226] | Not captured | about $17bn [S228] REPORTED | $18bn (end 2025) [S227] | Fortitude Re, controlled via a Carlyle fund [S227] | 2,500+ [S227] |
| TPG | $327bn [S229] | $181bn [S229] | $16.1bn [S229] | Not found | None identified | 1,900+ [S230] |
| Blue Owl | $319bn [S232] | $191bn [S234] REPORTED | $7.8bn [S234] REPORTED | Not found; wealth new money $1.7bn in Q2 [S234] | Bought Kuvare Asset Management [S233] | about 1,365 [S233] |
| EQT | €291bn [S237] | €155bn [S237] | €17.8bn in H1 [S237] | Evergreen NAV €5.6bn [S237] | None identified | 1,895 FTE [S237] |
| CVC | Not captured | €153bn [S238] | €10.8bn in H1 [S238] | €6.7bn [S238] | $3.5bn partnership with AIG [S238] | Not captured |
| Partners Group | $186bn [S239] | Not captured | $16bn in H1 [S239] | Evergreen demand $4.2bn vs $3.8bn redemptions in H1 [S239] | None identified | Not captured |

All figures CONFIRMED unless marked. LTM = last twelve months. European firms report half-years (H1 = January to June 2026). "Not captured" means the research did not find it; do not guess.

### Total assets under management, 30 June 2026

$bn (EQT in €bn; CVC total not captured in the research)

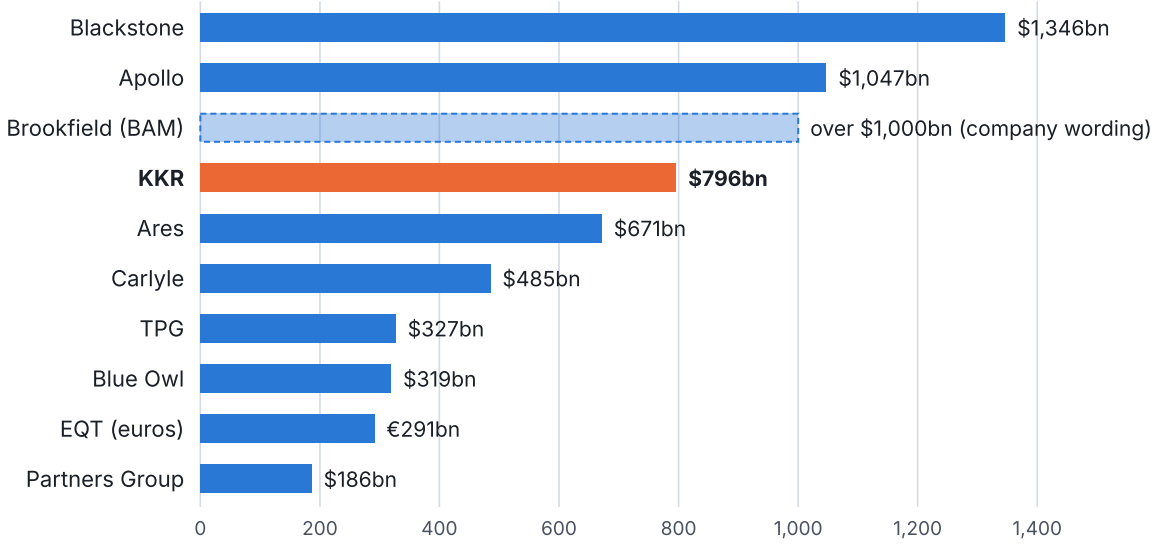

**Figure 55. KKR is fourth by headline size.** Blackstone, Apollo and Brookfield are all past the $1 trillion mark; KKR targets that level "in the next 5 years" from 2024 [S9]. Notice that size alone says little about the client model: Ares and Blue Owl are credit-led, EQT and Partners Group are European. Sources: [S200, S213, S220, S235, S224, S226, S229, S232, S237, S239] CONFIRMED. As of 30 Jun 2026. Brookfield bar is drawn at $1tn because BAM only says "over $1 trillion".

### New capital raised or inflows in Q2 2026 (three months to 30 June)

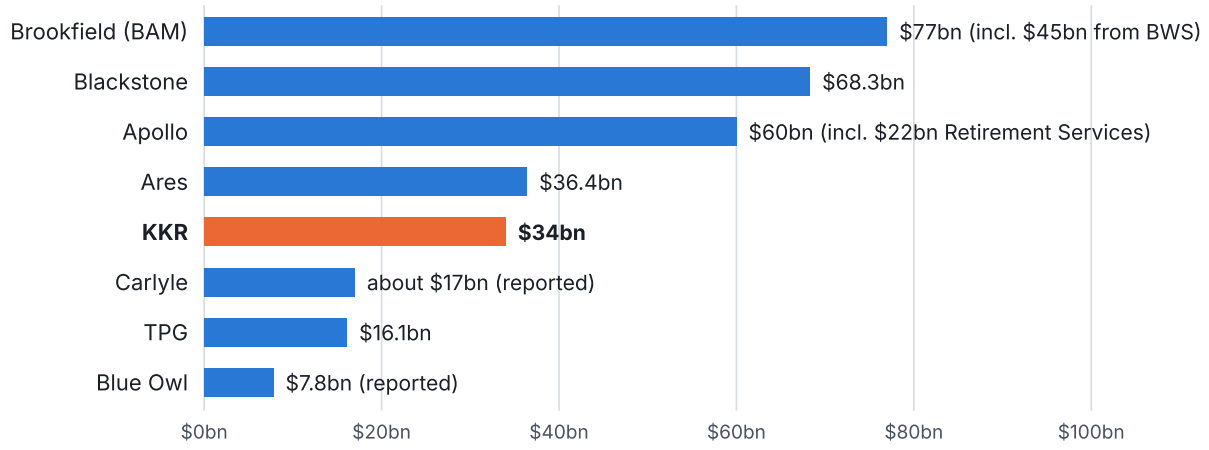

**Figure 56. KKR raised less in Q2 than four rivals.** Read with care: each firm defines "inflows" its own way. Brookfield counts $45bn of mandates from its sister insurer BWS and Apollo counts $22bn from Athene-linked Retirement Services. On a twelve-month view KKR raised $133bn, a record for the firm. Sources: [S200, S213, S220, S224, S229, S235] CONFIRMED; Carlyle [S228] and Blue Owl [S234] REPORTED. EQT, CVC and Partners Group report half-years only and are left out.

**WHY THIS MATTERS**

KKR is a top-five firm but not the biggest, and in Q2 2026 it raised less than Brookfield, Blackstone, Apollo and Ares. The interesting story is not size. It is that KKR's money is spread across more kinds of "engine" than almost anyone else's, which changes what its client team can offer. INFERRED

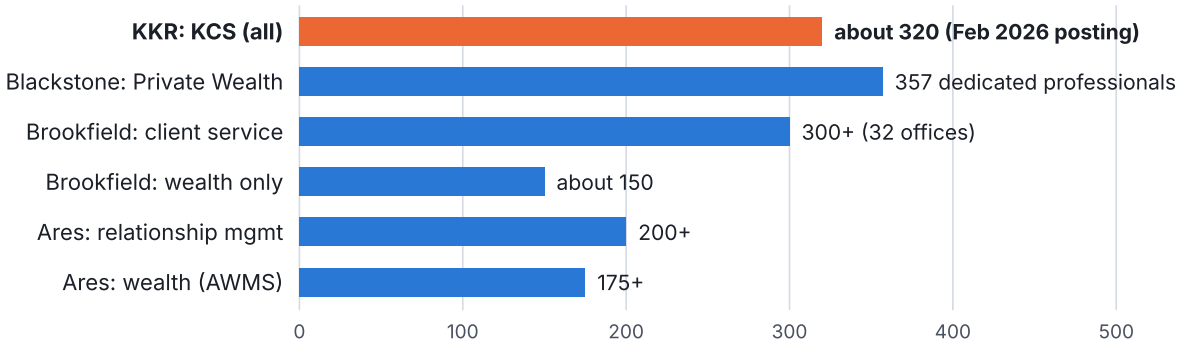

## The rival client teams, one by one

The names differ but the work is the same. Blackstone splits its client team in two (institutions and private wealth). Apollo joins client coverage with product management. Brookfield runs a single "Global Client Group". KKR runs one team, KCS, with relationship managers, product specialists and junior generalists covering institutions, wealth and insurance clients. [S201, S214, S222, S236] CONFIRMED

| Firm and team name | Size disclosed | How it is organised | Channels | Flagship wealth products | London client internship 2027? |
|---|---|---|---|---|---|
| **KKR: Global Client Solutions (KCS)** | about 320 [S106] REPORTED | Relationship managers, product specialists, junior generalists. Formed 2009 [S103]. Head Eric Mogelof (ex PIMCO) [S79]. Two areas: "Sales/Relationship Management and Product/Strategy Management" [S390] | Institutional Investors, Global Wealth, Family Capital [S209]; insurance clients via a Global Insurance Client Solutions team [S104] | K-Series: K-PEC, K-PRIME, K-INFRA, K-FIT, KREST [S111-S114]; Capital Group KKR interval funds [S92] | Yes: KCS is one of six teams in the KKR London 2027 programme |
| Blackstone: Institutional Client Solutions (ICS) + Private Wealth | Private Wealth 357 [S215] REPORTED | Split by client type. ICS head Vikrant Sawhney since 2019; product-specialist ICS teams inside each business (e.g. Real Estate ICS). Private Wealth head Joan Solotar [S214] | Institutions; wealth platforms and advisers | BREIT, BCRED, BXPE, BXINFRA [S213] | Yes, two: Private Wealth Summer Analyst and Real Estate ICS Summer Analyst; 10 weeks; close 30 Oct 2026 [S217, S218] |

| Firm and team name | Size disclosed | How it is organised | Channels | Flagship wealth products | London client internship 2027? |
|---|---|---|---|---|---|
| Apollo: Client & Product Solutions (CPS) | Not disclosed | Institutional Client Group plus product management, plus Global Wealth; Chief Client and Product Development Officer Stephanie Drescher [S222] | Seven "discrete buyer pools", from institutions to 401(k) [S221] | Apollo Aligned Alternatives (AAA) [S220] | None found in London; a New York CPS Product Management summer role exists [S223] |
| Brookfield: Global Client Group | 300+ client service; about 150 in wealth [S236] | One group for institutions and private wealth, led by David Levi [S236] | Institutions, wealth, sister insurer BWS | Not captured | Not checked |
| Carlyle: investor relations / Client Solutions Group + Global Wealth | Not disclosed | Geographic coverage plus product specialists, with a central strategy and operations team [S227] | 3,200+ fund investors in 87 countries; US wealth via RIAs, wirehouses, broker-dealers [S227] | Global Wealth products, $18bn [S227] | None found; full-time London CSG roles exist [S245] REPORTED |
| Ares: relationship management + Ares Wealth Management Solutions | 200+ RMs; 175+ in wealth [S225] | Regional RMs supported by product managers; wealth sold through its own broker-dealer [S225] | Institutions; wealth | Listed funds and perpetual wealth vehicles [S225] | Not checked |
| TPG: Client and Capital Formation Group | Not disclosed | Created 2020 to absorb the old fundraising team [S231] | Institutions; Global Wealth Solutions | Not captured | Not checked |
| Blue Owl | Not disclosed | Not captured | Institutions; wealth (BDCs) | Credit BDCs such as ORCIC (size not verified) | Not checked |
| EQT: Client Relations & Capital Raising | Not disclosed | Regional private wealth heads [S242] REPORTED | Institutions; wealth | EQT Nexus evergreen range [S242] | Not checked |
| CVC: Client and Product Solutions | Not disclosed | Regional distribution heads [S243] REPORTED | Institutions; wealth | "All CVC strategies now have an active evergreen structure" [S238] | Not checked |
| Partners Group: client solutions / Portfolio Solutions | Not disclosed | Strong on bespoke mandates: 52% of H1 2026 new money [S239] | Institutions; wealth | Evergreen funds [S239] | Not checked |

### Disclosed headcount of client and fundraising teams

Apollo, Carlyle, TPG, EQT, CVC, Blue Owl and Partners Group do not disclose a number in the sources read.

**Figure 57. KCS is in the same weight class as the biggest disclosed client teams.** The bars are not like-for-like: KKR's ~320 covers institutional, wealth, insurance and product strategy together, while Blackstone's 357 is its wealth team alone and Blackstone's Institutional Client Solutions is extra. Sources: KKR [S106] REPORTED (a Frankfurt posting says "over 300", [S390]); Blackstone [S215] REPORTED; Brookfield [S236] CONFIRMED; Ares [S225] CONFIRMED. As of FY2025 filings and 2026 postings.

**SOURCE UNCERTAIN**

Several cells are "not disclosed" or "not checked" because the research ran out of search budget. Never fill those gaps in an interview with guesses. If asked about, say, TPG's client team, say what you know (it was set up in 2020 to absorb the old fundraising team [S231]) and stop.

## Wealth: where KKR is a fast follower

Private wealth means selling to individuals (usually rich ones, through banks and advisers) rather than to pension funds. It is the fastest-growing client channel in the industry and the place where the gap between KKR and the leader is widest.

### Private wealth assets, latest disclosed

$bn unless marked €; definitions differ by firm

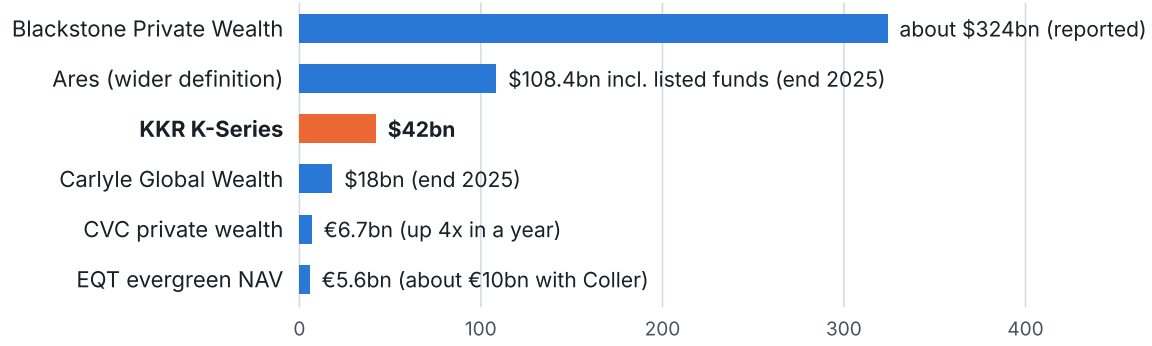

**Figure 58. Blackstone is about eight times KKR's size in wealth.** KKR's K-Series figure counts only its evergreen funds, so KKR's full wealth footprint is larger (private wealth was 18% of KKR AUM by investor type at end 2025, [S71]), but no single KKR wealth AUM number was found. Ares counts its listed funds too. Sources: [S200, S225, S227, S237, S238] CONFIRMED; Blackstone [S215, S216] REPORTED. As of 30 Jun 2026 unless marked.

### KKR'S POSITION

- K-Series rose from $25bn to $42bn in the year to June 2026 [S200] CONFIRMED. Management

### THE INDUSTRY BACKDROP

- Partners Group: $4.2bn of evergreen demand in H1 2026 but $3.8bn of redemptions, so net

said wealth AUM grew "6x" in two and a half years [S207] CONFIRMED.

- About 85% of K-Series is in private equity and infrastructure [S207] REPORTED. Blackstone's biggest wealth funds are in real estate and credit (BREIT, BCRED) [S213].
- KKR has an "Exclusive Strategic Partnership" with Capital Group, a giant traditional fund manager, to sell public-plus-private funds with a $1,000 minimum [S210] CONFIRMED.
- KKR runs "KKR Academies" for about 100 advisers at a time [S207] CONFIRMED.

flows were "only modestly positive" [S239] CONFIRMED.

- Blue Owl's private wealth new money fell to $1.7bn in Q2 from $4.4bn a year earlier [S234] REPORTED.
- CVC grew wealth 4x in a year to €6.7bn, from a small base [S238] CONFIRMED.
- KKR said its wealth flows were still up 20% net year to date [S207] REPORTED.

**YOUR OPINION GOES HERE**

A view you could defend: "KKR is a fast follower in wealth. Its edge is not scale, where Blackstone is about eight times bigger, but product mix (private equity and infrastructure evergreen funds) and a distribution route through Capital Group's adviser network that no rival has." Label it as your view.

[S200, S207, S210, S215] INFERRED

## Size against staffing

A crude test of efficiency is AUM per employee: how much money each person looks after. It is crude because firms that own insurers also employ insurance staff (actuaries, policy administrators), which pulls the ratio down.

**AUM per employee: a crude measure of size against staffing**

AUM divided by headcount, $m per person (axis starts at $100m)

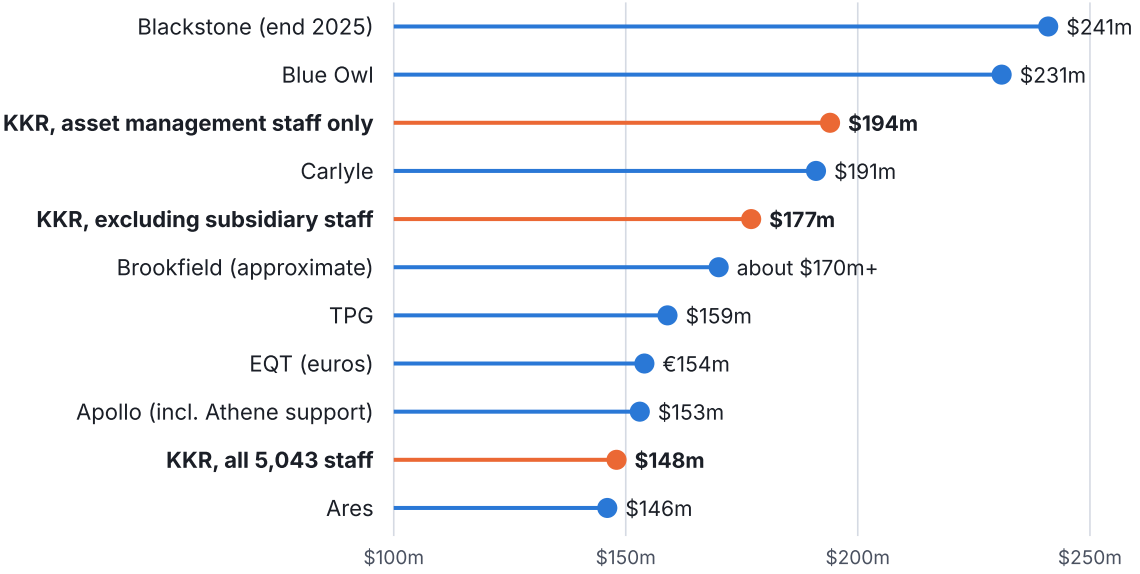

**Figure 59. Where KKR lands depends on who you count.** With Global Atlantic's 1,491 insurance staff included, KKR sits near the bottom with Apollo, the other insurer-owner. Counting only the asset manager, it sits with Carlyle. Estimate: INFERRED arithmetic on [S201, S214, S221, S225, S227, S229, S230, S232, S235, S236, S237]. Dates are mostly end 2025 and mismatched for some firms; "over" headcounts make ratios slightly high.

Two readings matter for KCS. First, KKR's CFO says the firm can grow "without requiring us to significantly increase our headcount or sacrifice our culture" [S207] CONFIRMED. Second, KKR's client team of about 320 looks after a firm of $796bn, while Blackstone has 357 people in wealth alone plus a separate institutional team [S106, S215] REPORTED. So each KCS person covers a wide product shelf. For an intern, that means exposure to many products at once. INFERRED

## Seven design choices, and where each rival sits

Every firm in this group has funds, credit, some wealth product and some insurance link. They differ in how they built those pieces. The table below says what each choice means for a client; the diagram after it puts the seven choices on a line each, from one extreme to the other. Positions are a judgement from the sources, not a measurement.

### What each axis means for a client

| Axis | Where KKR sits, with evidence | What it lets KCS offer a client INFERRED |
|---|---|---|
| 1. One-firm integration | "We run KKR as 1 firm with 1 compensation approach. Relationships travel, ideas travel, lessons learned travel." (CFO Robert Lewin) [S207] CONFIRMED | A client can be introduced to any KKR team without internal bargaining over who gets credit. |
| 2. Balance sheet | About $30bn of KKR and staff money invested in or committed to its own funds and companies [S201]; Strategic Holdings segment with 19 companies [S201] CONFIRMED | "We invest alongside you" is a number, not a slogan. |
| 3. Insurance | Owns Global Atlantic ($220bn, of which $62bn in "Ivy" and other vehicles funded by outside investors) [S200] CONFIRMED | Reinsurance sidecars (Ivy) as a product for institutions; insurance clients served by a specialist team. |
| 4. Capital markets | KCM set up in 2007 "with the objective of increasing the amount of third-party capital that we are able to commit to individual transactions" [S208] CONFIRMED | Co-investment and syndicated deals, which the KCS mandate explicitly includes. |
| 5. Operating consultants | KKR Capstone: about 25 consultants in 2007 [S208]; fees $113.6m in 2025 [S201] CONFIRMED | A concrete answer when a client asks how KKR improves the companies it owns. |
| 6. Wealth | K-Series $42bn [S200]; Capital Group partnership [S210] CONFIRMED | Evergreen private equity and infrastructure for individuals; public-private funds for ordinary savers. |
| 7. Succession | Sunset Date no later than 31 Dec 2026; one vote per share [S201] CONFIRMED | A governance story clients may ask about; KCS needs a calm, factual answer. |

### Seven design axes: where KKR and its rivals sit

Orange = KKR. Blue = rivals with evidence in the research. Rivals without evidence are left off, not placed in the middle.

**1. One-firm integration**

Apollo and Blue Owl say "one team" in job ads; rivals' pay design was not researched.

**2. Own balance sheet**

KKR: about $30bn of own and staff money in its funds; a Strategic Holdings segment of 19 companies.

**3. Insurance: partner or owner**

Global Atlantic $220bn vs Athene-related $416bn. KKR will now allocate "a little bit less capital" here.

**4. In-house capital markets**

KKR (KCM, since 2007), Blackstone (BXCM) and Apollo (Capital Solutions) all have one. Ares uses a broker-dealer.

**5. Operating improvement**

Capstone fees $113.6m in 2025. Rivals' operating groups were not researched, so none is placed.

**6. Wealth: scale reached (positions to scale)**

KKR's distinct move: an exclusive partnership with Capital Group rather than scale alone.

**7. Ownership and succession**

KKR's founders' Series I control ends by 31 Dec 2026; CVC and Partners Group have named new co-CEOs.

Key: BX Blackstone, APO Apollo, BAM Brookfield, CG Carlyle, OWL Blue Owl, PG Partners Group.

**Figure 60. Seven design axes.** KKR sits at the far end of more axes than any rival: one comp pool, a large own balance sheet, an owned insurer, an in-house capital markets arm and an in-house consulting arm. It is near the start on wealth scale. Positions are INFERRED judgements from **[S200, S201, S207, S208, S210, S213, S214, S220, S221, S223, S225, S227, S230, S233, S235, S236, S238, S240, S241]**. Row 6 is drawn to scale from disclosed wealth AUM (mid-2026 or end 2025).

## What you would do differently as a KCS intern

Blackstone has two London client internships, Apollo has a New York one, and Brookfield's internships were not checked. Comparing what each posting says shows how the seat at KKR differs. All comparisons here are INFERRED from the structure of each firm and the posting texts.

## How wide is the seat? Products covered vs client types covered

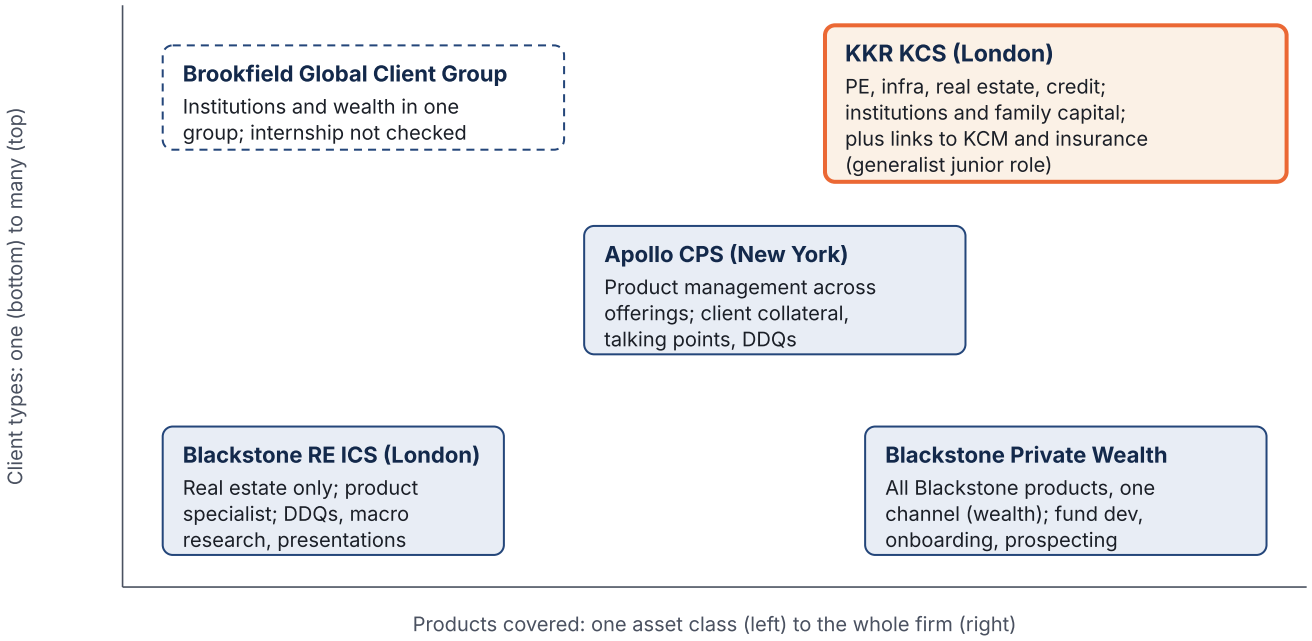

**Figure 61. The KCS seat is wide on both axes.** Blackstone splits its client internships by business (real estate) or by channel (wealth). KKR's London analyst work covers "EMEA based institutional & family capital clients" across "private equity, infrastructure, real estate, private and liquid credit strategies". Sources: [S101, S217, S218, S223, S236] CONFIRMED. Placement on the chart is INFERRED. Postings dated 2025 to Oct 2026.

| Topic | As a KCS intern at KKR | As a client-function intern at Blackstone, Apollo or Brookfield |
|---|---|---|
| Breadth of products | You learn several asset classes at once, because one team sells the whole platform [S101, S390]. The Frankfurt KCS posting asks interns to "Learn the platform, products and investment strategies across asset classes" [S390]. | At Blackstone RE ICS you go deep in one business: the London team "is responsible for supporting the global capital raising efforts for the Real Estate business" [S218]. |
| Wealth | You join a build-out: K-Series grew $25bn to $42bn in a year [S200]. More of the work is likely to be explaining new products to new distributors (KKR Academies, Capital Group) [S207, S210]. | At Blackstone Private Wealth you join a mature machine of about $324bn [S215] with 357 people, giving "targeted prospecting guidance to sales and service teams" [S217]. |
| Capital markets link | The KCS mandate says it works "in partnership with Capital Markets in the syndication/distribution of product". You may see co-investment flowing from KCM to KCS clients [S70, S201]. | Blackstone and Apollo have capital markets arms too [S214, S220], but their published client-internship texts do not name this link. |
| Insurance | KKR owns Global Atlantic and has teams that raise outside money for insurance vehicles (Ivy) [S128, S200]. You may hear "sidecar" and "reinsurance" in client calls. | Apollo also owns an insurer (Athene) [S221]. Blackstone and Brookfield serve insurers under contract [S214, S236]; Brookfield's Q2 flows included a $40bn Just Group mandate via BWS [S235]. |
| How you are judged | One P&L and one comp pool: helping another team's client counts [S107, S201]. | Not researched for rivals. Do not claim they lack firm-wide pay. |
| Typical tasks | Briefing materials, CRM data, DDQ and RFP coordination, roadshows, pipeline tracking [S107, S390]. | Presentations, DDQs, investor queries, macro research [S218]; collateral, talking points, DDQs [S223]. |

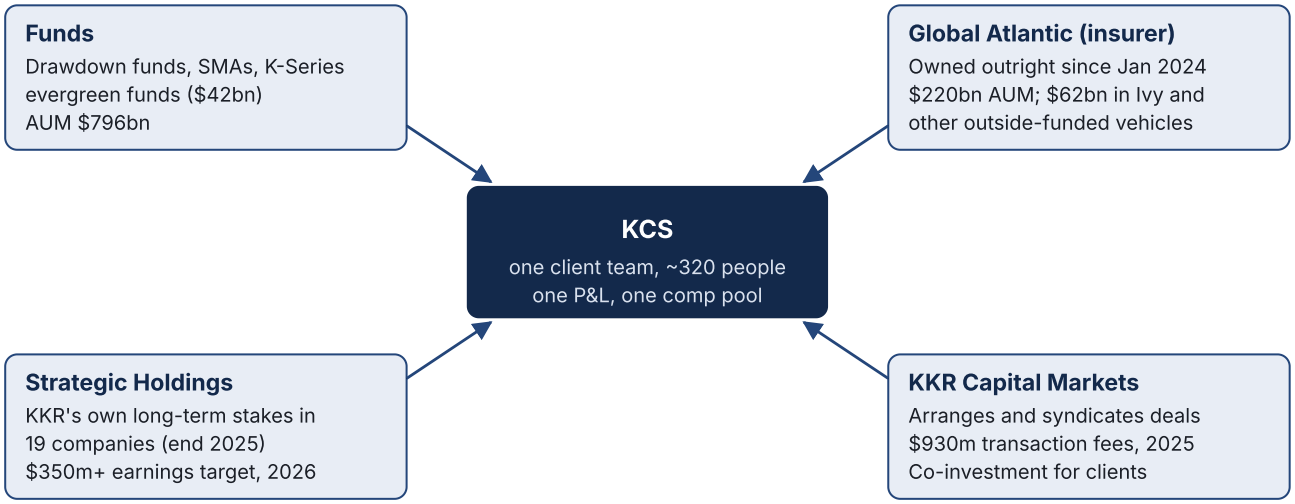

**SAY THIS IN THE INTERVIEW**

"At most firms the client internship sits inside one business or one channel. At KKR it sits across the whole platform: the London team covers institutions and family offices across private equity, infrastructure, real estate and credit, and works with Capital Markets on co-investment. That breadth is what I want to learn this summer."

## What only KKR's client model can claim

These are the points where the research found no rival that can say the same thing. Each is worded so you do not overclaim. "Only" here means "no peer in this research set", not "nobody in the world".

### Claim 1 in a picture: one client team, four engines KKR owns or runs

| Which rivals have each engine? | Funds | Owned insurer | Own-stakes segment | Capital markets arm |
|---|---|---|---|---|
| **KKR** | Yes | Yes | Yes | Yes |
| Apollo | Yes | Yes (Athene) | No equivalent found | Yes |
| Blackstone | Yes | No (partner) | No equivalent found | Yes (BXCM) |
| Brookfield (BAM) | Yes | No (sister co.) | Not researched | Not researched |

**Figure 62. Four engines behind one client team.** Apollo comes closest (funds, an insurer, capital solutions) but reports no Strategic Holdings-type segment. "No equivalent found" is a reading of each firm's published segment list, not proof of absence. Sources: [S200, S201, S213, S214, S220, S236] CONFIRMED; comparison INFERRED. As of 30 Jun 2026 (KCM fees FY2025, [S70]).

**Claim 1. One client team selling four engines that KKR owns or runs** — STRONG

**EVIDENCE** Funds ($796bn AUM), an owned insurer (Global Atlantic, $220bn), a Strategic Holdings segment (19 companies) and KKR Capital Markets [S200, S201] CONFIRMED. Peer segment lists show no Strategic Holdings equivalent at Blackstone, Apollo or Carlyle [S213, S220, S226] INFERRED.

**WHY IT MATTERS** A pension fund can get a fund, a co-investment from KCM and a reinsurance sidecar from one relationship. More products per client makes the relationship stickier. INFERRED

**SAY** "What struck me is that KCS sells four engines KKR itself owns or runs: funds, Global Atlantic, Strategic Holdings and KCM. Apollo has three of those; I could not find anyone with all four."

### Claim 2. An exclusive partnership with Capital Group — STRONG

**EVIDENCE** Announced May 2024; first two public-private credit interval funds launched April 2025 with a $1,000 minimum; a Capital Group equity product invests in a K-Series private equity vehicle [S210, S201] CONFIRMED. Capital Group calls it an "Exclusive Strategic Partnership" [S210].

**WHY IT MATTERS** It reaches ordinary savers through one of the largest traditional managers, which KKR could not reach alone. INFERRED

**SAY** "The pairing with Capital Group is unique to KKR. Other alternative managers have tie-ups with traditional managers, so the idea is not unique, but this partner is."

### Claim 3. A named "Family Capital" client segment — CHECK BEFORE USING

**EVIDENCE** kkr.com shows three client segments: Institutional Investors, Global Wealth and Family Capital [S209] CONFIRMED. Family capital offers include co-investment, bespoke SMAs and "Comprehensive Debt Solutions" [S84] CONFIRMED. No peer in the sources showed family offices as a separate top-level client group INFERRED (limited check).

**WHY IT MATTERS** Family offices want deal-by-deal access and financing for their own companies, which links straight to KCM. [S84, S125] INFERRED

**SAY** "I noticed KKR treats family capital as its own client segment, next to institutions and wealth. How does the London team split that coverage?"

### Claim 4. The client team's mandate names Capital Markets — STRONG

**EVIDENCE** KKR's own KCS description: "Work in partnership with Capital Markets in the syndication/distribution of product" (KKR's official team description) CONFIRMED. KCM "provides syndication services for co-investments in transactions participated in by KKR, our investment vehicles, Global Atlantic, and third-party clients" [S70] CONFIRMED. Several KCS heads came from KCM [S125, S129] CONFIRMED.

**WHY IT MATTERS** KCM can commit to a bigger slice of a deal than the fund needs; KCS supplies the clients to take the excess. [S70, S208] INFERRED

**SAY** "Capital markets in-house is not unique; Blackstone and Apollo have it. What is distinctive is that KKR writes the KCM partnership into the client team's job description."

### Claim 5. A sports and GP-solutions shelf with an insurance angle (Arctos) — WORD CAREFULLY

**EVIDENCE** Arctos ($20bn AUM) closed 4 May 2026 [S200] CONFIRMED. The CFO said the chance to "create flow for Global Atlantic" was critical to the investment case [S207] CONFIRMED.

**WHY IT MATTERS** It is a new product type with no KKR track record yet, which KCS must learn to explain. INFERRED

**SAY** "Arctos gives KCS a sports and GP-solutions product, and KKR has said it should feed Global Atlantic too." Never say "only firm in sports": Blue Owl also owns sports stakes [S233].

### Claim 6. Selling through a founder-control handover in real time — NEUTRAL TONE

**EVIDENCE** On the Sunset Date, no later than 31 Dec 2026, Series I preferred stock is cancelled and every share gets one vote [S201] CONFIRMED. A charter vote to remove a 90% supermajority got 97.83% of votes cast but failed for lack of a 90% quorum on 21 May 2026 [S202, S203] CONFIRMED.

**WHY IT MATTERS** Clients ask about governance and key-person risk. KCS needs a calm, factual answer. INFERRED

**SAY** "KKR is moving to one share, one vote by the end of 2026, fifty years after the founding. I see it as the firm finishing its move from partnership to institution."

**Claim 7. Asia depth (KKR's own claim)** **COMPANY CLAIM**

**EVIDENCE** On the Q2 2026 call KKR said: "We are the largest private equity player. We're the largest infrastructure player" in Asia, with "nearly 1,000 people on the ground", over 200 in Tokyo [S207] REPORTED (company claim, not independently verified).

**SAY** "KKR describes itself as the largest private equity and infrastructure investor in Asia." Always attribute it to KKR.

## Where KKR does not lead

An interviewer will respect you more for knowing KKR's weak spots than for praising it. These are the areas where a rival is clearly ahead.

| Area | Who leads | The numbers | How to handle it |
|---|---|---|---|
| Total size | Blackstone, Apollo, Brookfield | $1,346bn and $1,047bn vs KKR $796bn; BAM "over $1 trillion" [S213, S220, S235, S200] CONFIRMED | Lead with structure, not size. |
| Private wealth | Blackstone | About $324bn and 357 wealth staff vs K-Series $42bn [S215, S216] REPORTED ; [S200] CONFIRMED | "Fast follower, growing faster from a small base." |
| Insurance scale | Apollo | Athene-related $416bn vs Global Atlantic $220bn [S220, S200] CONFIRMED | Note KKR is now pulling back at the margin [S207]. |
| Quarterly fundraising | Brookfield, Blackstone, Apollo, Ares | Q2 2026: $77bn, $68.3bn, $60bn, $36.4bn vs KKR $34bn [S235, S213, S220, S224, S200] CONFIRMED | Definitions differ; KKR's LTM $133bn is a record. |
| Credit specialism and RM team size | Ares | Ares has 200+ relationship managers and 175+ wealth staff [S225] CONFIRMED | KKR's credit AUM ($331bn) is still its largest line [S200]. |
| AUM per employee | Blackstone, Blue Owl | About $241m and $231m per head vs KKR $148m (all staff) INFERRED | Explain the insurance-staff effect. |
| Recent PE returns | Not rankable | KKR traditional PE up 10% LTM [S207] REPORTED ; Blackstone corporate PE up 14.4% LTM [S213] | Not like-for-like. Never rank firms on returns. |

**DON'T SAY THIS**

- **"KKR is the only firm with in-house capital markets."** False: Blackstone has BXCM and Apollo has Apollo Capital Solutions, with a record $277m of fees in Q2 2026 [S214, S220].
- **"KKR is the largest alternative manager."** False: it is fourth by AUM in this group [S213, S220, S235].
- **"KKR leads private wealth."** False: Blackstone is about eight times larger [S215, S200].
- **"KKR has the biggest insurer."** False: Apollo's Athene-related assets are almost twice Global Atlantic [S220, S200].
- **"Only KKR has a one-firm culture."** Rivals use "one team" language too [S223, S233]. Say instead that KKR's version is written into one P&L and one compensation pool.
- **"KKR is the only firm in sports investing."** Blue Owl also holds sports stakes [S233].

**SAY THIS IN THE INTERVIEW: THE THIRTY-SECOND VERSION**

"KKR is not the biggest firm or the biggest in wealth: Blackstone leads both. What makes KCS different is what sits behind it. One client team, paid from one pool, sells funds, an owned insurer, KKR's own balance sheet stakes and an in-house capital markets business. Apollo comes closest, but I could not find a rival with all four. And in wealth KKR has a route nobody else has, through its exclusive partnership with Capital Group."

PART 6

# The fundraising industry and its regulation

How capital is raised, who helps, what investors check, and the rules that bind every conversation with a client.

## Why the client function has its own industry

Private markets firms do two jobs. They invest money, and they raise it. This part is about the second job: the people, steps and rules that sit between an investor's savings and a fund like KKR's. It is the ground a Global Client Solutions (KCS) intern stands on every day.

The basics section explained the fund itself: a general partner (GP, the manager) and limited partners (LPs, the investors) signing a limited partnership agreement (LPA). Here we look at how an LP is found, convinced and kept, and at the walls of regulation that decide what may be said, to whom, and where.

**$1.3tn**
Private capital raised in 2025, about flat on 2024 (Bain) [S262] CONFIRMED

**78.2%**
Share of capital going to funds above $1bn, H1 2026 (59.1% in 2021) [S260] CONFIRMED

**7,739**
Private equity funds on the road chasing LPs, Q2 2026 (Preqin) [S266] CONFIRMED

Read those three numbers together. The pot of money is not growing. More funds than at any time in five years are competing for it. And the biggest managers take a rising share. In a market like that, the quality of a firm's client team decides who wins INFERRED.

## A short history of raising money

**1980s to 1990s: the address book.** GPs raised money mostly through their partners' personal networks. A fund was a handful of relationships with pension funds and wealthy families INFERRED.

**2000s to 2010s: the professional IR team.** As funds grew to tens of billions and LPs multiplied, the large GPs built in-house investor relations (IR) or "client solutions" teams. These have relationship managers per region or client type, product specialists per strategy, and junior generalists INFERRED. KKR's own team, KCS, was "first formed in 2009" and now has "over 300 executives located in over 20 [cities] across four continents" [S390] CONFIRMED. It is organised around "Sales/Relationship Management and Product/Strategy Management" [S390] CONFIRMED.

**2010s: the LP pushes back.** LPs organised. The Institutional Limited Partners Association (ILPA) published its first Principles in September 2009 and its first due diligence questionnaire in 2013 [S317, S320] CONFIRMED. Fund terms, reporting and diligence became more standard.

**2020s: the individual arrives.** Bain estimates individuals hold about 50% of global assets ($275tn to $295tn) but only 16% of the assets held in alternative funds [S293] REPORTED. Closing that gap is the "democratisation" story. Platforms such as iCapital and CAIS, plus wirehouses and private banks, now carry private funds to wealthy individuals. PitchBook says "growing inflows from retail investors are becoming the main source of new capital" for private equity [S260] CONFIRMED.

**WHY THIS MATTERS**

KKR's 10-Q says traditional private equity was over 70% of its assets in 2010 and is "less than 25%" today [S332] CONFIRMED. The client function grew up alongside that shift: more products, more client types, more rules. A KCS junior now explains credit, infrastructure, insurance-backed strategies and wealth funds, not one buyout fund.

## The players: who stands between savings and a fund

The map below shows the cast. Two flows matter. Money moves along the solid lines. Advice, introductions, rules and standards move along the dashed lines. The GP's client team sits in the middle of both.

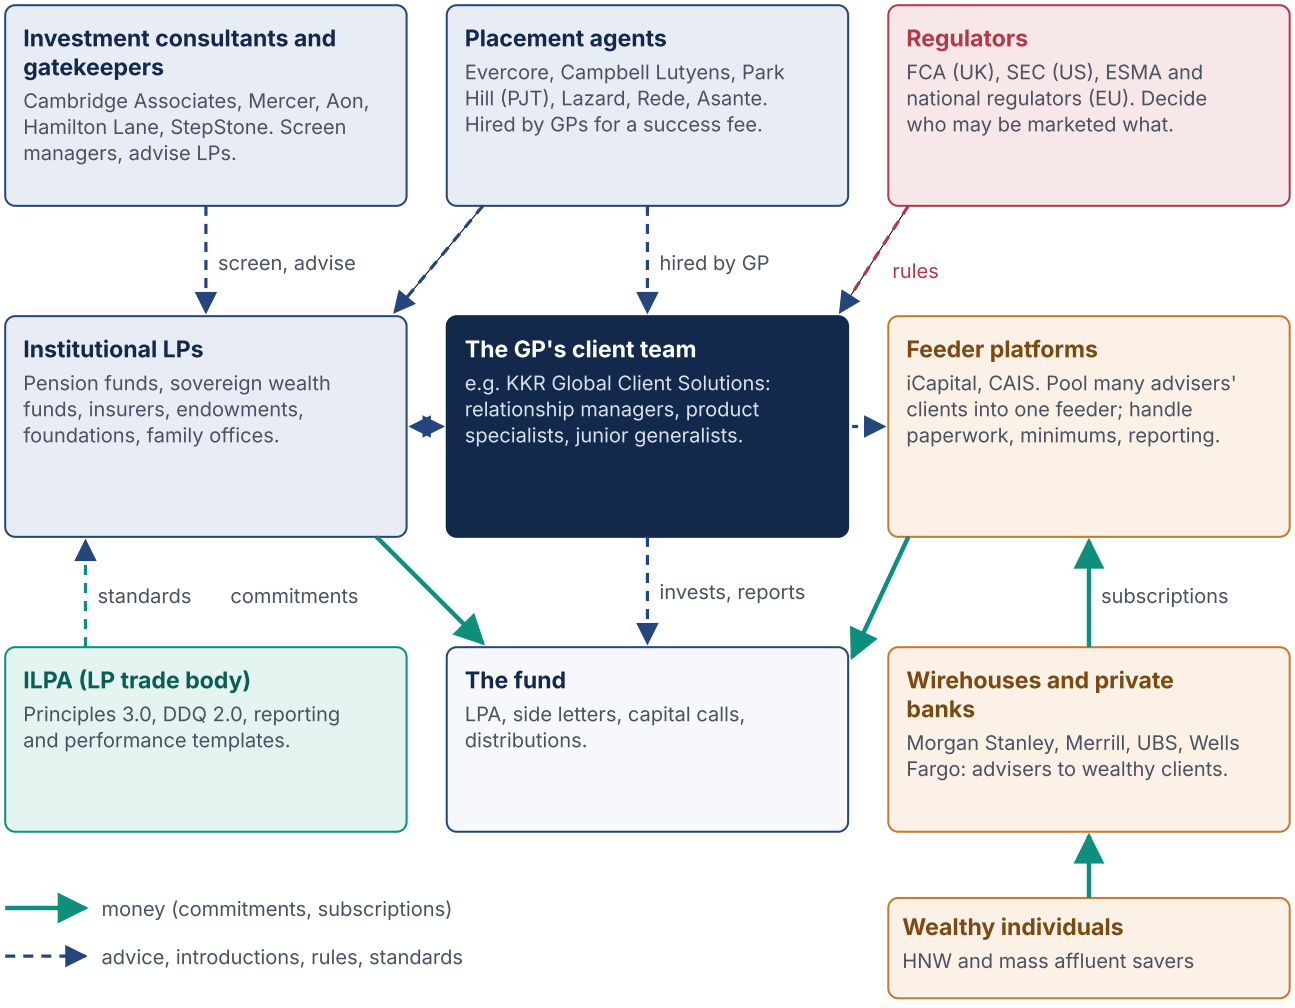

**Figure 63. The fundraising ecosystem.** Institutional money arrives directly; wealth money arrives through advisers and feeder platforms. Placement agents also introduce new LPs directly (diagonal arrow). Names from WS4 research [S321, S322, S325, S317]; roles are standard industry structure INFERRED.

| Player | What they do, in plain English | Examples and facts |
|---|---|---|
| **GP client team** | Finds, wins and keeps investors. Answers every question after the money arrives. | KKR KCS: relationship managers, product specialists, junior generalists (official team text). Works "in partnership with Capital Markets in the syndication/distribution of product". |

| Player | What they do, in plain English | Examples and facts |
|---|---|---|
| **Placement agent** | An outside firm hired by a GP to raise money, often for mid-sized or first-time managers, or to reach new LP types. | Evercore, Campbell Lutyens, Park Hill (PJT), Lazard, Rede, Asante. PEI's ranking to May 2024 covered 38 agents raising $41bn of "new" capital [S322] REPORTED. Typical success fee around 2% to 2.5% of capital raised (indicative only) [S322] REPORTED. |
| **Investment consultant / gatekeeper** | Advises an LP on which funds to back. Often the first screen a fund must pass. | Cambridge Associates, Mercer, Aon, Hamilton Lane, StepStone (the last two also invest directly) INFERRED. |
| **Feeder platform** | Lets a wealth adviser put many clients into one "feeder" fund that invests in the GP's fund. Handles paperwork, minimums, reporting. | iCapital (founded 2013) raised $820m in July 2025 at a reported $7.5bn valuation [S321] REPORTED. CAIS. |
| **Wirehouse / private bank** | Large brokerages and banks whose advisers sell funds to wealthy clients. | Morgan Stanley, Merrill, UBS, Wells Fargo INFERRED. |
| **ILPA** | The LPs' trade body. Writes best-practice terms and standard templates. | Offices in Toronto, Washington DC and London [S317] CONFIRMED. |

**KEY TERMS**

**Gatekeeper:** anyone who controls access to an LP's money, usually a consultant. **Feeder fund:** a small fund whose only job is to pool many investors and invest in one bigger fund. **Re-up:** an existing LP committing to the manager's next fund. Re-ups are the cheapest money a client team ever raises INFERRED.

## How an institutional LP picks a manager

A pension fund does not wire $200m after one good meeting. Selection takes months and passes through a funnel of checks (see the funnel figure). Each stage creates work for the GP's client team. The KKR EMEA client relations analyst advert lists exactly this work: "investor reporting", "supporting relationship managers in fundraising", "KYC and onboarding", and answering requests with product, investment, operations, finance, legal, compliance and risk teams [S388] CONFIRMED.

**Figure 64. The LP decision funnel.** Many managers enter at the top; few leave with a commitment. Stages follow the standard process described in WS4 INFERRED; ILPA DDQ 2.0 [S320]; ILPA reporting templates [S318].

## The stages in words

1. **Screening.** The LP or its consultant filters by track record, strategy fit and team stability INFERRED.
2. **Investment due diligence.** Deal-by-deal attribution (which deals made the money), DPI (cash actually returned divided by cash paid in), PME (a comparison with a stock index), and reference calls INFERRED.
3. **Due diligence questionnaire (DDQ).** A long standard form, often the ILPA DDQ. The first ILPA DDQ came out in 2013, was updated in 2016 and 2018, and DDQ 2.0 arrived in November 2021 with new sections on succession planning, co-investment, GP-led secondaries, credit facilities and cybersecurity [S320] REPORTED.
4. **Operational due diligence (ODD).** A separate team checks the back office: valuation policy, cyber, compliance, administrator, auditor. The FCA's March 2025 review of private market valuations found weaknesses in governance records, conflicts, independence and ad hoc revaluations [S310] REPORTED. Expect ODD teams to ask about exactly those.
5. **Investment committee.** The LP's own board or committee approves INFERRED.
6. **Legal.** LPA terms and a **side letter**: a private contract giving one LP extra terms such as fee breaks, reporting rights, co-investment rights or the right to skip certain deals. A **most-favoured-nation (MFN)** clause lets an LP claim terms given to similar or smaller LPs INFERRED.
7. **Commitment and monitoring.** Quarterly reports, annual meetings, a seat on the LP advisory committee (LPAC) for big LPs, and in time the next re-up INFERRED.

## ILPA: the rule book written by the clients

ILPA's three guiding principles are alignment of interest, governance and transparency, which it says "form the essence of an effective private equity partnership" [S317] CONFIRMED. ILPA has no legal power. Its weight comes from the fact that its members are the LPs.

| Date | ILPA output | What it changed |
|---|---|---|
| Sep 2009 | Principles 1.0 | First LP best-practice terms [S317] CONFIRMED |
| Jan 2011 | Principles 2.0 | Added a clawback appendix (GP repays carry if later losses show it was overpaid) [S317] CONFIRMED |
| 2013, 2016, 2018 | ILPA DDQ | A standard due diligence questionnaire [S320] REPORTED |
| Jun 2019 | Principles 3.0 | "Fostering Transparency, Governance and Alignment of Interests"; grew from 24 to 44 pages; added GP-led secondaries and subscription credit lines [S317] CONFIRMED |
| Nov 2021 | DDQ 2.0 + Diversity Metrics Template | ESG section based on the PRI questionnaire [S320] REPORTED |
| Jan 2025 | Reporting Template v2.0 + new Performance Template | Voluntary. Reporting template covers funds starting on or after 1 Jan 2026 (first delivery Q1 2026); performance data capture from Q1 2026, first delivery Q1 2027 [S318] CONFIRMED |
| 2026 | Draft continuation vehicle guidance | Process, election options, conflicts, pricing, transparency. Still a draft [S319] REPORTED |

**SOURCE UNCERTAIN**

No "Principles 4.0" or 2025 Principles update was found. Do not claim one exists [S317] INFERRED.

## What LPs value in 2026

**~14%**
Distributions as a share of NAV in 2025; below 15% for four years running (Bain) [S262] CONFIRMED

**53%**
LPs saying undrawn commitments limit new PE commitments, up 15 points (ILPA survey via Bain) [S262] CONFIRMED

**$37.5bn**
Co-investment fundraising, 12 months to June 2026 (PitchBook) [S260] CONFIRMED

- **Cash back (DPI).** Exits have been slow, so LPs are short of distributions. This is the most-watched number in every meeting [S262] CONFIRMED.
- **A clear, repeatable strategy.** Bain: "Investors more than ever are focused on funds that have a clear, repeatable, and easily explained strategy" [S262] CONFIRMED. This is a communication skill as much as an investment one.
- **Co-investment** (investing directly next to the fund, usually at low or no fee) [S260] CONFIRMED.
- **Fewer, bigger relationships.** PitchBook notes "ongoing consolidation of LP relationships" [S260] REPORTED.
- **Standard reporting.** The ILPA templates [S318] CONFIRMED.
- **ESG and diversity data**, built into ILPA DDQ 2.0 [S320] but politically contested in the US in 2025 to 2026 INFERRED.

# Regulation in one picture: who may be marketed what

All fundraising rules answer one question: *who is this investor, and where are they?* Professional investors are assumed to look after themselves. Ordinary savers are protected, so they can only buy private assets through special, regulated products. The map below is the one to carry into an interview.

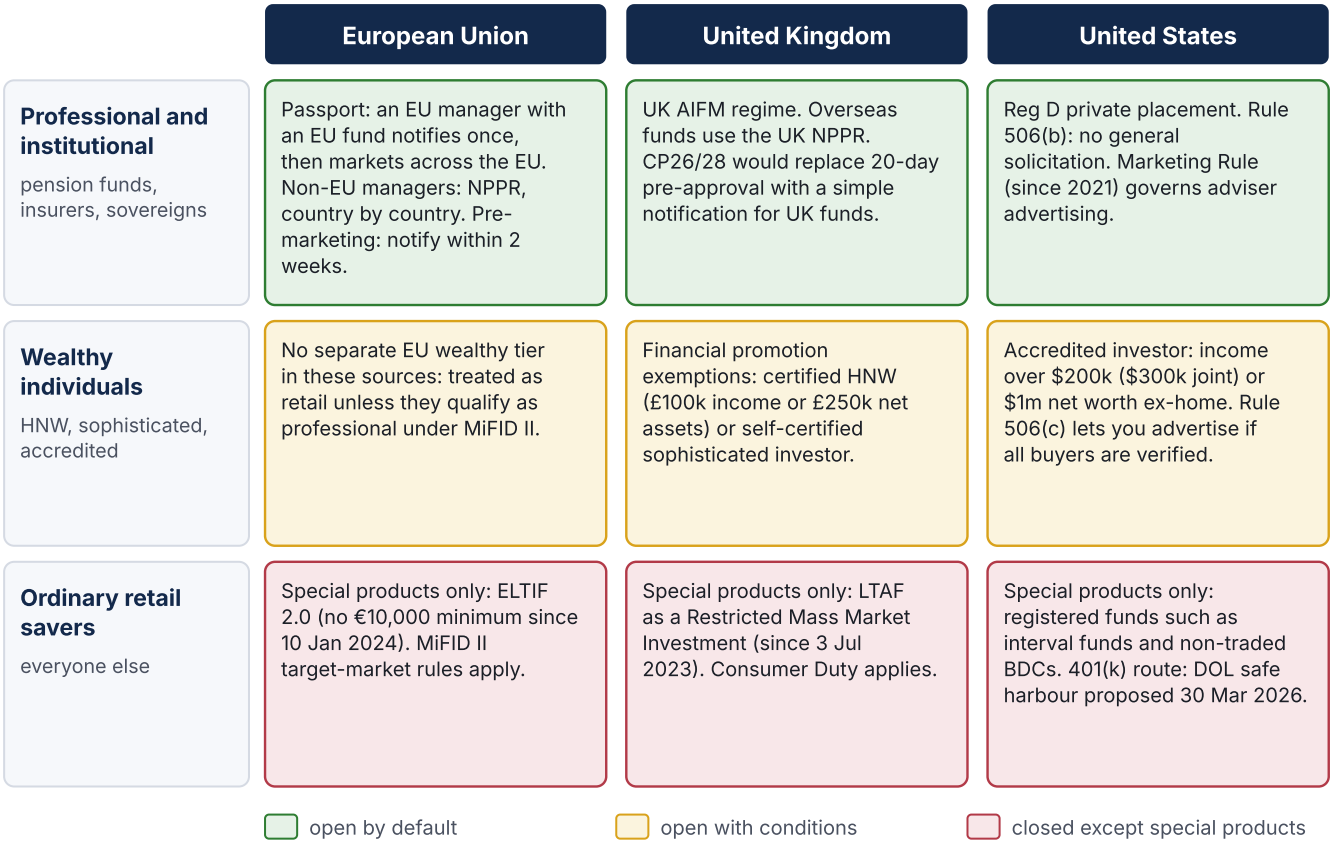

**Figure 65. Who may be marketed what, by investor type and region.** Simplified; real rules have many exceptions. Sources: AIFMD and pre-marketing [S300, S299]; CP26/28 [S303]; UK financial promotion thresholds [S307]; LTAF [S305]; Reg D and accredited investor [S314]; ELTIF 2.0 [S301, S302]; DOL proposal [S272, S274]. MiFID II row is INFERRED. As of 11 Oct 2026.

# The European Union

## AIFMD: the base law

The **Alternative Investment Fund Managers Directive (AIFMD), Directive 2011/61/EU**, regulates managers of "alternative" funds: private equity, credit, real estate and hedge funds. It was signed on 8 June 2011, entered into force on 21 July 2011 (some sources say 22 July), and had to be in national law by 22 July 2013 [S300] CONFIRMED.

- **Marketing passport.** From 22 July 2013 an EU manager could sell an EU fund to professional investors across the EU after a notification [S300] CONFIRMED.
- **NPPR (national private placement regime).** Non-EU managers have no passport. They use each country's own private placement rules under Article 42, country by country [S300] CONFIRMED.

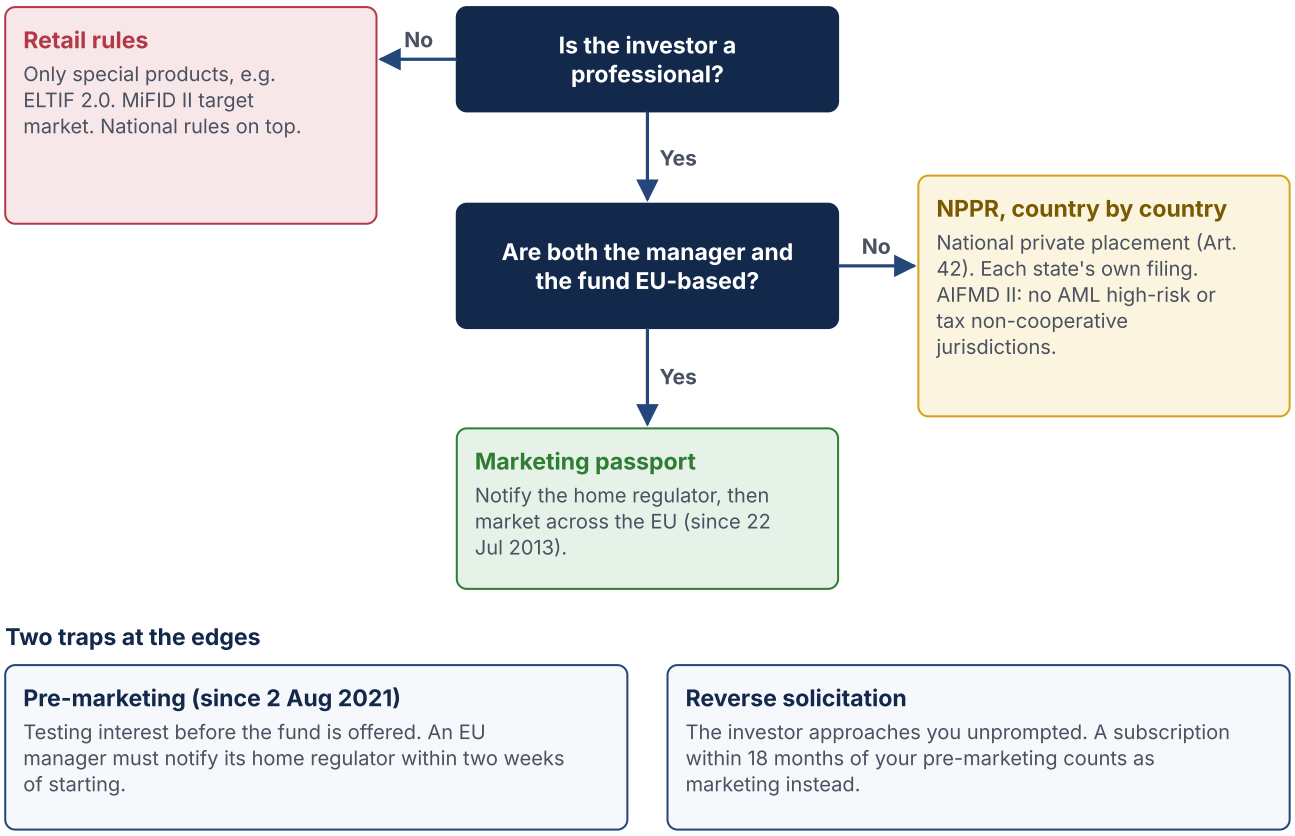

**Figure 66. Can I market this fund to this EU investor?** A simplified decision tree for professional-investor marketing in the EU. Sources: AIFMD [S300]; AIFMD II NPPR change [S294]; Cross-Border Distribution package [S299]; ELTIF 2.0 [S301]. Retail branch simplified INFERRED.

## Pre-marketing and reverse solicitation

The **Cross-Border Distribution package (Directive (EU) 2019/1160 and Regulation (EU) 2019/1156)** was published on 12 July 2019, came into force on 1 August 2019 and applied from 2 August 2021 [S299] CONFIRMED. It defined **pre-marketing**: testing investor interest before a fund is set up or notified, without an offer. An EU manager must tell its home regulator within two weeks of starting. AIMA's summary: "Within two weeks of starting to pre-market, an EU AIFM must send an informal letter or email to its home regulator" [S299] CONFIRMED.

**Reverse solicitation** means the investor approached the manager on its own initiative, so no "marketing" happened. The package closed the loophole: any subscription by a professional investor within 18 months of pre-marketing counts as marketing [S299] CONFIRMED. For a client team, this means every early conversation in Europe is logged and timed.

## AIFMD II

**Directive (EU) 2024/927** was published in the Official Journal on 26 March 2024, entered into force on 15 April 2024, and had to apply from 16 April 2026 [S296, S294] CONFIRMED. Linklaters marked the day: "AIFMD II takes effect at last" [S344] CONFIRMED.

| Change | Detail | Why a client team cares |
|---|---|---|
| Loan-originating funds | Leverage caps of 175% (open-ended) and 300% (closed-ended); 20% limit per financial borrower; keep 5% of each loan sold; no "originate-to-distribute"; closed-ended unless liquidity fits [S295, S297] CONFIRMED | Shapes how European direct-lending funds are built and described |

| Change | Detail | Why a client team cares |
|---|---|---|
| Liquidity management tools (LMTs) | Open-ended funds must pick at least two from a list: gates, notice periods, redemption fees, swing pricing, and others [S295, S294] CONFIRMED. Commission adopted the LMT standards on 17 Nov 2025; ESMA guidelines published 12 Mar 2026 [S298] REPORTED | Explains to wealth clients why they cannot always exit when they want |
| Delegation | More reporting on delegation; at least two full-time EU-resident people running the business [S294] REPORTED | Affects where European fund entities sit |
| NPPR tightening | Non-EU managers and funds must not be in EU AML high-risk or tax non-cooperative lists [S294] REPORTED | Fund domicile choice |
| Grandfathering | Loan funds set up before 15 Apr 2024 are exempt until 16 Apr 2029 [S297] CONFIRMED | Older funds behave differently |

Not every country was ready: Belgium, for example, had not published its law by the deadline [S294] REPORTED. New reporting starts on 16 April 2027, and the Commission said non-essential Level 2 detail would wait until after 1 October 2027 [S344, S298] CONFIRMED.

### ELTIF 2.0 and MiFID II

The **European Long-Term Investment Fund regulation, revised as Regulation (EU) 2023/606 ("ELTIF 2.0")**, applies from 10 January 2024. It removed the €10,000 minimum for retail investors and widened eligible assets. Its technical standards became Commission Delegated Regulation (EU) 2024/2759, published on 25 October 2024 [S301, S302] CONFIRMED. Morningstar counts 189 new ELTIFs since the start of 2024; Scope counts a record 113 launches in 2025 and about €34bn of assets at end-2025, up 55% [S302] REPORTED.

**MiFID II (Directive 2014/65/EU)** has applied since 3 January 2018. Its product governance rules make manufacturers and distributors define a "target market" for each product, so a fund is only sold to the kind of client it was designed for INFERRED (dates not re-verified).

## The United Kingdom

### The UK AIFM regime and its rewrite

The UK put AIFMD into law in 2013 and kept it after Brexit. Overseas funds still reach UK investors through the UK NPPR [S304] REPORTED. HM Treasury and the FCA opened a reform consultation on 7 April 2025 [S304] CONFIRMED. Then came **FCA CP26/28 "The UK AIFM Regime"**, published in July 2026 (14 July per Macfarlanes; Debevoise's note is dated 23 July) [S345, S303] CONFIRMED.

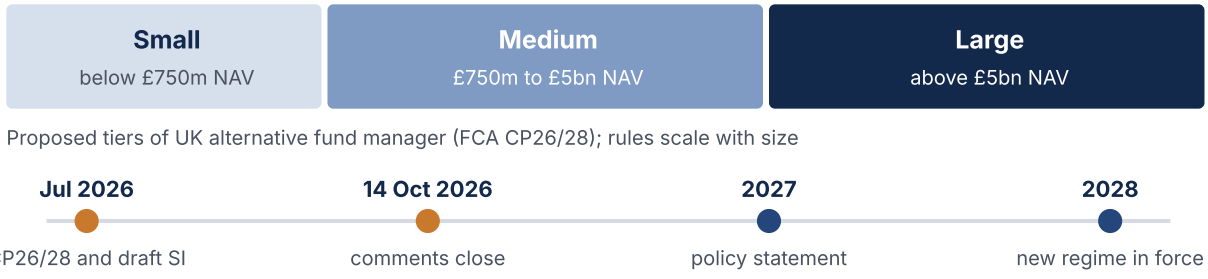

**Figure 67. The proposed UK AIFM tiers and timetable.** Rules scale by net asset value (NAV). Sources: FCA CP26/28 via Debevoise [S303] and Macfarlanes [S345], as of 11 Oct 2026.

- A new "ALTS" sourcebook. Investor disclosures become less prescriptive; firms choose how to disclose leverage [S303, S345] CONFIRMED.

- UK managers marketing UK funds move from a 20-day pre-approval to a simple notification. NPPR kept with limited changes [S303] CONFIRMED.
- Companion papers: CP26/27 on pay (the FCA "does not propose to make malus and clawback mandatory") and CP26/26 on reporting [S303] CONFIRMED.
- Comments close on 14 October 2026, three days after this pack was written. Policy statement in 2027; rules in force 2028 [S303] CONFIRMED.

### Retail and wealth routes in the UK

- **LTAF (Long-Term Asset Fund).** Rules in force 15 November 2021. **PS23/7** (29 June 2023) made LTAF units "Restricted Mass Market Investments" from 3 July 2023, opening them to retail investors with protections, and to self-select DC pensions and SIPPs [S305, S306] CONFIRMED.
- **Financial promotions exemptions.** On 31 January 2024 the high-net-worth thresholds rose to £170,000 income or £430,000 net assets. After an industry backlash a new order from 27 March 2024 restored £100,000 and £250,000 and brought back the "two or more unlisted investments" test for self-certified sophisticated investors [S307] CONFIRMED. A good example of rules moving twice in two months.
- **Consumer Duty.** Applied to open products from 31 July 2023 and closed products from 31 July 2024. It requires firms to deliver good outcomes for retail customers [S308] CONFIRMED.
- **SMCR (Senior Managers and Certification Regime).** Extended to FCA solo-regulated firms, which include most UK private markets managers, on 9 December 2019 (PS19/20) [S309] CONFIRMED. It makes named senior people personally accountable.

### UK pensions: the Mansion House Accord and the Pension Schemes Act 2026

The **Mansion House Accord** (13 May 2025) is voluntary. 17 workplace pension providers, covering about 90% of active defined contribution (DC) savers, pledged to put at least 10% of DC default funds into private markets by 2030, with at least 5% in the UK. It could unlock up to £50bn, about £25bn in the UK [S315] CONFIRMED. HM Treasury: "At least 5 percent of these portfolios will be ringfenced for the UK" [S315] CONFIRMED.

The **Pension Schemes Act 2026** received Royal Assent on 29 April 2026 after the Bill was introduced on 5 June 2025 [S316, S346] CONFIRMED. Main points:

- Large multi-employer DC schemes need a default fund of at least £25bn by 2030 ("megafunds"); a transition route exists for schemes of £10bn or more that can reach £25bn by 2035 [S346] CONFIRMED.
- A **reserve power** lets the government, once and not before 1 January 2028, require megafunds to hold "qualifying assets" (private equity, venture capital, private credit, land, infrastructure, unlisted shares). Cap: 10% of the default fund, of which no more than 5% UK-specific. Trustees can opt out if compliance is "likely not to be in the best interests of members". The power lapses at end-2032 if unused [S346] CONFIRMED.
- Separately, the Local Government Pension Scheme (over £400bn across 86 funds in England and Wales) is consolidating from eight pools into six [S347] REPORTED.

## The United States

- **Regulation D.** Rule 506(b) allows private offerings with no general solicitation (advertising). Rule 506(c), effective 23 September 2013 under the JOBS Act, allows general solicitation if every buyer is a verified accredited investor [S314] CONFIRMED.

- **Accredited investor.** An individual with income over $200,000 ($300,000 joint) in each of the last two years, or net worth over $1m excluding the home [S314] CONFIRMED. August 2020 amendments added professional licence routes (Series 7, 65, 82) [S275] REPORTED. Around 30 September 2026 the SEC proposed a FINRA-developed accredited investor exam (pass valid ten years) plus Series 79, 86 and 87, CPA, CFA and CFP routes, with a 60-day comment period [S275] REPORTED. Chairman Paul Atkins: "accredited investor access to private offerings should not be limited solely to individuals satisfying financial thresholds" [S275] REPORTED.
- **Marketing Rule (Rule 206(4)-1).** Adopted 22 December 2020, effective 4 May 2021, compliance from 4 November 2022. It replaced the old advertising and cash solicitation rules [S313] CONFIRMED. It governs how performance is shown in any pitch book.
- **Private Fund Adviser Rules.** Adopted August 2023 (quarterly statements, audits, restricted activities, preferential treatment, adviser-led secondaries). Vacated in full by the Fifth Circuit on 5 June 2024 in *National Association of Private Fund Managers v. SEC* [S311, S312] CONFIRMED. Much of what they required now travels through ILPA templates and side letters instead INFERRED.
- **401(k) access.** Executive Order 14330, "Democratizing Access to Alternative Assets for 401(k) Investors", signed 7 August 2025 [S273] CONFIRMED. The Department of Labor proposed a process-based safe harbour on 30 March 2026, with six factors: performance, fees, liquidity, valuation, benchmarks and complexity. Comments closed 1 June 2026 [S272, S274, S342] CONFIRMED. No final rule found as of 11 October 2026 [S343] REPORTED.
- **SEC retail agenda.** A roundtable on retail access to private investments on 4 March 2026 [S277] REPORTED; in early October 2026 the SEC reportedly voted to propose wider retail access through regulated funds [S368] REPORTED.

# The regulation timeline, 2011 to 2028

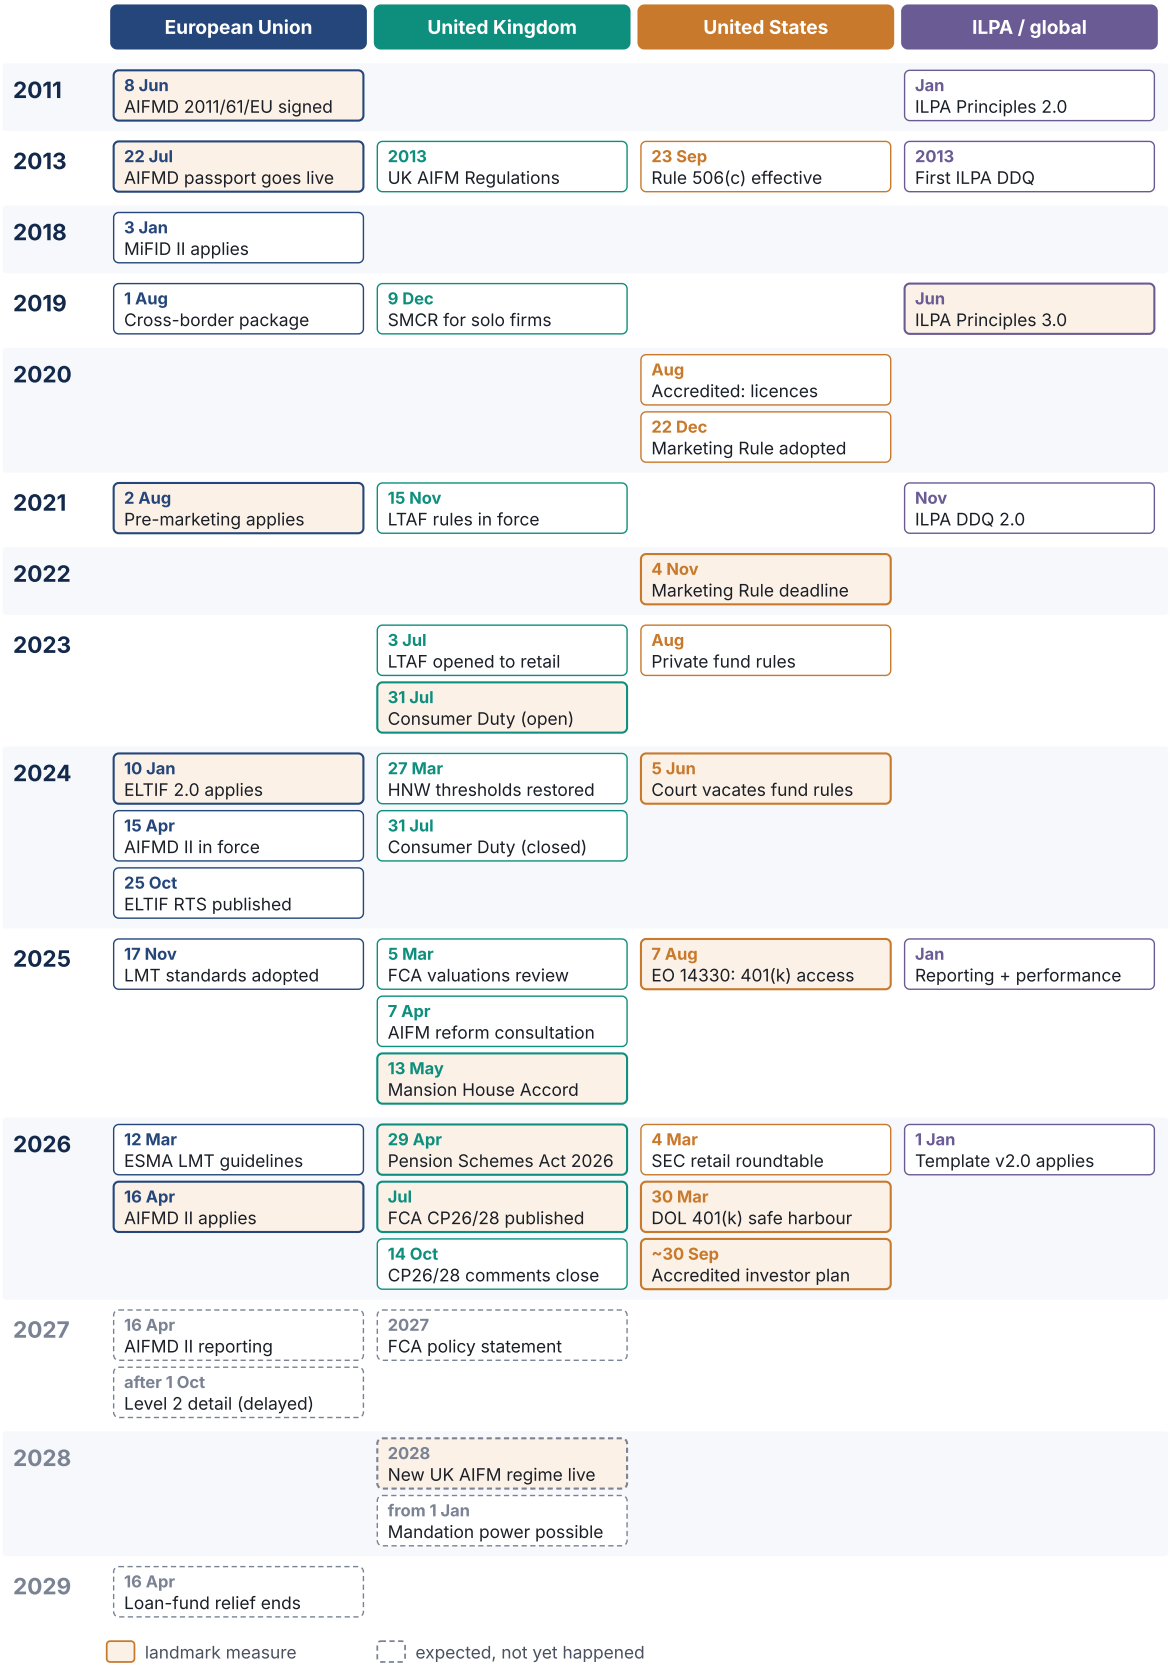

**Figure 68. Fifteen years of fundraising rules on one page.** Read across a row to see what happened in each region in the same year. Direction of travel since 2023: wider retail access (LTAF, ELTIF 2.0, EO 14330, DOL, SEC) with tighter rules on credit and liquidity (AIFMD II). Sources: WS4 timeline [S294-S320], [S272-S277]. MiFID II (2018) and UK AIFM Regulations (2013) dates are background knowledge, not re-verified INFERRED. As of 11 Oct 2026.

# The walls around a client function

A client team talks to outsiders all day, and it sits inside a firm that holds secrets. Four kinds of wall keep the two apart (see the figure below). The detail differs by firm and is set by each firm's compliance team; what follows is the standard industry pattern, not KKR's internal policy INFERRED.

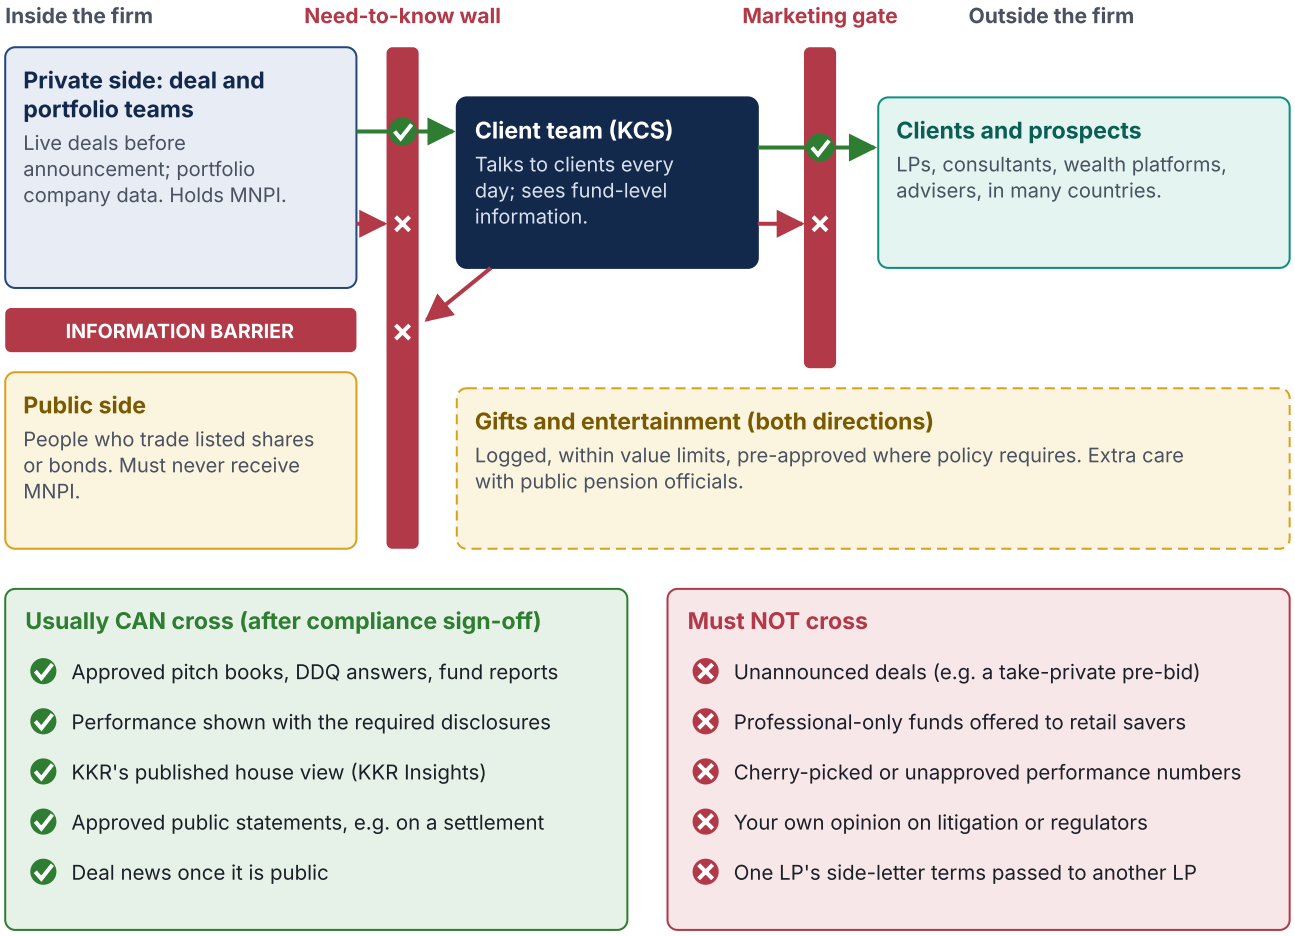

**Figure 69. What can and cannot cross.** MNPI = material non-public information: anything not public that would move a listed security's price. Illustrative structure INFERRED. Examples: DCC take-private was announced on 29 Apr 2026 [S356]; KKR's approved statement on the DOJ settlement [S349]; US Marketing Rule on performance [S313].

- **Information barrier (the "Chinese wall").** Separates people with MNPI from people who trade listed securities. Breaching it risks insider dealing INFERRED.
- **Need-to-know wall.** A client team learns about live deals only when compliance approves it ("wall-crossing"). Example: before DCC confirmed an approach from Energy Capital Partners and KKR on 29 April 2026, any knowledge of the bid would have been MNPI about a London-listed company [S356] REPORTED. The application to KCS is INFERRED.
- **Marketing gate.** Every pitch book, DDQ answer and performance figure is approved before it leaves. It must match the investor type and country (the "who may be marketed what" map), meet EU pre-marketing timing and the Marketing Rule in the US [S299, S313] CONFIRMED; how firms apply them is INFERRED.
- **Gifts and entertainment.** Hospitality given or received is logged, kept within limits and pre-approved where policy requires; extra care applies to public pension officials INFERRED.

**WHY THIS MATTERS**

On governance, litigation and regulation, LP questionnaires want the approved answer. On the August 2026 DOJ settlement, KKR's public line is that the $250m civil penalty "will have no financial impact on the firm, our funds, or any of our investors and will be fully reimbursed by outside law firms" [S349] CONFIRMED. A junior repeats that line and nothing more.

## What to say about all this

### What a candidate should be able to say unprompted

1. "Fundraising is concentrating: funds above $1bn took 78.2% of capital in H1 2026, against 59.1% in 2021." [S260]
2. "LPs choose through a funnel: consultant screen, due diligence, the ILPA DDQ, operational due diligence, investment committee, side letter, then commitment."
3. "In Europe a non-EU manager markets through national private placement; AIFMD II applied from 16 April 2026." [S300, S294]
4. "In the UK, CP26/28 proposes three tiers of manager by size, with new rules in 2028; the Pension Schemes Act 2026 caps any mandation at 10% private, 5% UK." [S303, S346]
5. "In the US the direction is wider access: EO 14330 in August 2025, the DOL safe harbour proposal in March 2026, and the SEC's accredited investor proposal this autumn." [S273, S272, S275]

**SAY THIS IN THE INTERVIEW**

"Regulation is moving in two directions at once. Access is widening for individuals, through ELTIF 2.0, the LTAF and the US 401(k) work. But the rules on credit funds and liquidity are getting tighter, through AIFMD II. A client team has to sell the first while explaining the second."

**DON'T SAY THIS**

"The Mansion House Accord forces UK pensions to invest 10% in private markets." It is voluntary. The legal backstop is a reserve power in the Pension Schemes Act 2026, capped at the same 10% / 5% levels and not usable before 1 January 2028 [S315, S346].

**SAY THIS IN THE INTERVIEW**

"The SEC's private fund adviser rules were vacated in June 2024, so a lot of LP protection now comes from ILPA's templates and from side letters. That puts more of the transparency burden on the client team."

**DON'T SAY THIS**

"Reverse solicitation is an easy way round EU marketing rules." Since August 2021, a subscription within 18 months of pre-marketing counts as marketing [S299]. Calling it a loophole signals you would be a compliance risk.

PART 7

# What is happening right now

The stories from the last six months that a KCS interviewer will expect you to know, and what to say about each.

## The six months in one paragraph

KKR is having a record year while parts of its industry wobble. That tension is the story an interviewer will want you to hold in your head.

KKR raised $34bn of new money in Q2 2026 and $133bn over the 12 months to 30 June, and manages $796bn [S330] CONFIRMED. Co-CEO Scott Nuttall said: "We expect a record fundraising year for the firm" [S362] REPORTED. Two flagship funds closed: North America Fund XIV at about $23bn in April and Global Infrastructure Investors V at $19.2bn in August [S335, S334] CONFIRMED. The private wealth funds (K-Series) reached $42bn [S330] CONFIRMED. Meanwhile wealthy individuals asked to pull more than $20bn out of private credit funds in Q1, and several managers, KKR among them, limited withdrawals [S337, S338] REPORTED. Regulators kept opening private markets to ordinary savers (US 401(k) proposal, SEC accredited investor proposal, UK Pension Schemes Act 2026) while rewriting fund-manager rules (AIFMD II, the new UK AIFM regime) [S342, S275, S346, S344, S345]. Inside KKR, the founders' special control rights end by 31 December 2026 at the latest, and KKR settled a $250m civil case with the US Department of Justice in August [S332, S349] CONFIRMED.

**$796bn**
KKR assets under management, 30 Jun 2026, up 16% [S330] CONFIRMED

**$133bn**
New capital raised, 12 months to 30 Jun 2026 [S330] CONFIRMED

**$42bn**
K-Series private wealth AUM, vs $25bn a year earlier [S330] CONFIRMED

## KKR's scoreboard in four charts

For a client team, these are the numbers that matter most: how much KKR manages, how much it raised, and how fast the wealth channel grows. AUM (assets under management) is all the money KKR looks after. "New capital raised" is the money clients committed in the period: the direct output of KCS's work INFERRED.

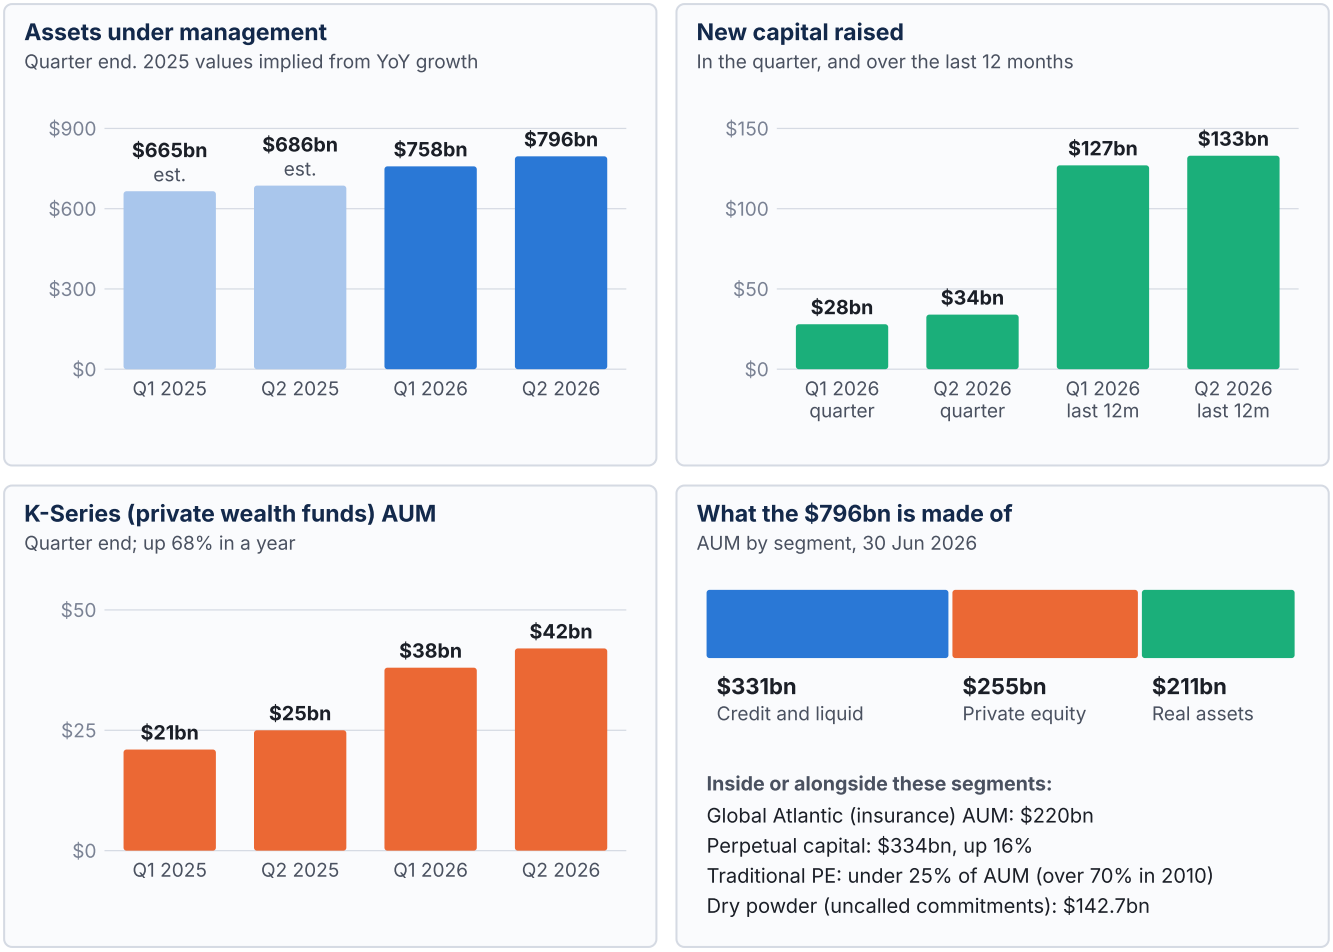

**Figure 70. KKR's growth, Q1 2025 to Q2 2026.** 2025 AUM bars (pale, "est.") are implied by dividing reported 2026 AUM by the reported year-on-year growth (14% and 16%); they are estimates, not reported figures. Sources: Q1 2026 release [S331] (5 May 2026); Q2 2026 release [S330] (30 Jul 2026); Q2 2026 10-Q [S332]. All as of 30 Jun 2026 unless stated. Segments sum to $797bn because of rounding.

**WHY THIS MATTERS**

The fastest-growing line is the wealth channel: K-Series AUM rose 68% in a year, from $25bn to $42bn [S330] CONFIRMED. From Q2 2026 KKR also reports K-Series private equity performance fees (about $160m in Q2) inside Fee Related Earnings, which makes wealth profits look more like steady fees [S332] CONFIRMED. Next results: 9 November 2026 [S333] REPORTED.

## Timeline: April to October 2026

The figure on the next page puts KKR's own news on the left and the industry and regulatory news on the right. Read down both columns together and the pattern appears: KKR closed big funds in the same weeks that the industry argued about redemptions and regulators opened new channels.

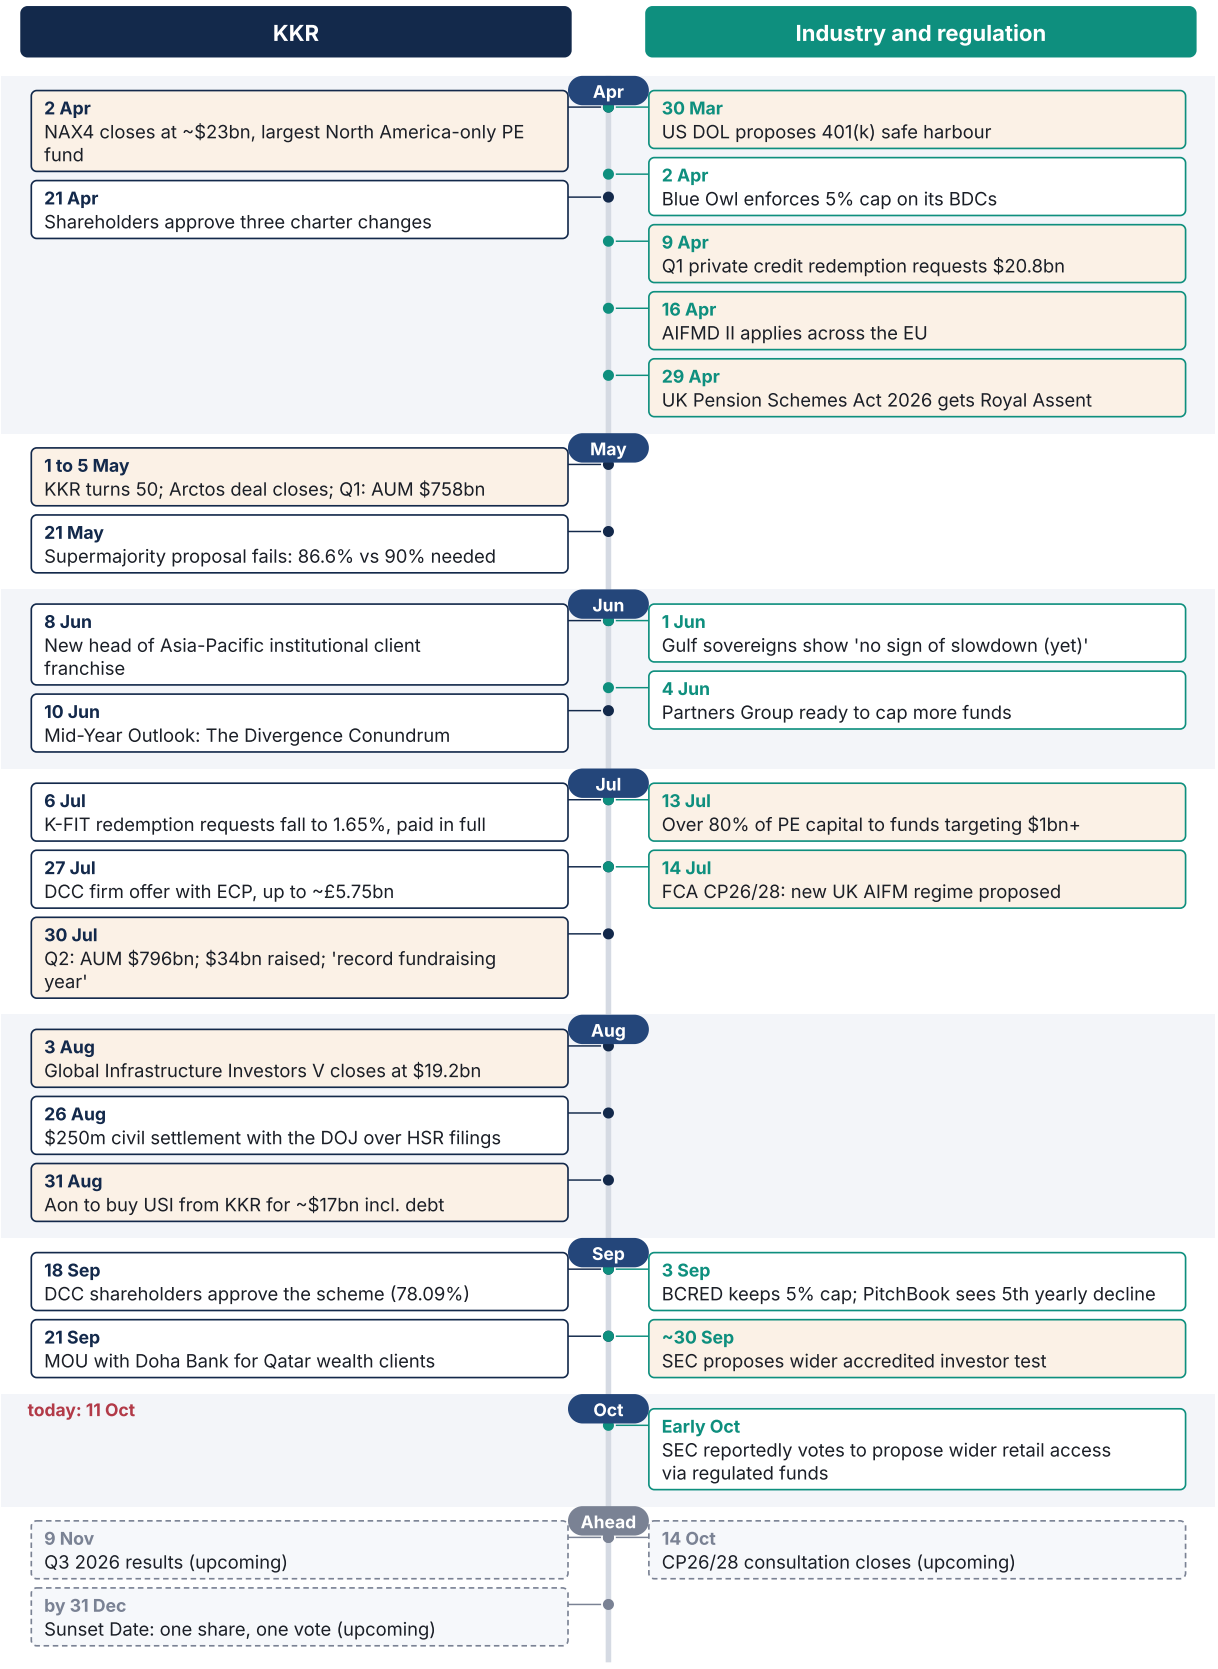

**Figure 71. Six months of news that a KCS interviewer may raise.** Shaded boxes are the stories to know first; dashed boxes are scheduled events. Sources: KKR **[S330-S335, S349-S353, S355, S356, S358, S360, S367]**; industry **[S337, S339, S340, S336, S365]**; regulation **[S342, S344, S345, S346, S275, S368]**; Blue Owl cap **[S278]**. Dates as reported; "~30 Sep" is approximate.

# The KKR stories

Header colours show the tone for KKR: green good news, amber mixed, red pressure or risk. Each block ends with something to raise, phrased the way you might say it.

## 1. KKR posts record Q2 and expects a record fundraising year — 30 JUL 2026

*KKR earnings release (SEC 8-K) and call transcript (The Motley Fool), 30 July 2026.*

**WHAT HAPPENED** AUM $796bn (up 16%); fee-paying AUM $638bn; $34bn raised in the quarter and $133bn in 12 months; Fee Related Earnings (steady profit from fees) $1.2bn, up 37% per share [S330] CONFIRMED. The co-CEOs called it KKR's "strongest monetization quarter ever" (most cash returned from selling investments) [S330] CONFIRMED. Nuttall: "I don't recall a period of time where the external perception is so disconnected from the operating fundamentals" [S362] REPORTED. Traditional PE is now "less than 25%" of AUM, against over 70% in 2010 [S332] CONFIRMED.

**WHY KKR** Fundraising is tomorrow's fees. A record year in a weak market shows clients still trust the platform INFERRED.

**WHY KCS** "$34bn in a quarter" is KCS's scoreboard. The mix (credit, infrastructure, wealth) tells you which products a junior will help explain INFERRED.

**RAISE THIS** "Is the growth coming more from re-ups by existing institutions, or from new channels like wealth and insurance?"

## 2. KKR turns 50 and closes North America Fund XIV at about $23bn — 2 APR 2026

*KKR press release via Business Wire, 2 April 2026; Q1 2026 release, 5 May 2026.*

**WHAT HAPPENED** A "final close" is the last day a fund accepts new money. NAX4 closed at about $23bn, which KKR calls the largest PE fund focused only on North America [S335] CONFIRMED. Investors included pensions, sovereign wealth funds, insurers, endowments, private wealth platforms and family offices [S335] REPORTED. The Q1 release opened: "On May 1st, KKR celebrated its 50th anniversary" [S331] CONFIRMED.

**WHY KKR** Flagships carry the brand. Closing big while the industry's fund count fell shows LPs back the franchise INFERRED.

**WHY KCS** A flagship close is a multi-year KCS project: data rooms, DDQs, LP meetings, side letters. The investor list in the release is the KCS client map INFERRED.

**RAISE THIS** "How much of NAX4's size do you put down to track record, and how much to the breadth of client relationships across the platform?"

## 3. Global Infrastructure Investors V closes at $19.2bn, KKR's largest infra fund — 3 AUG 2026

*KKR press release, New York and London, 3 August 2026.*

**WHAT HAPPENED** Infrastructure means power networks, fibre, data centres and car parks: assets with steady cash flows. Fund V is "Core+" (lower risk than buyouts). It closed at $19.2bn, part of about $45bn raised across KKR's latest infrastructure vintages. KKR now manages about $120bn of infrastructure equity, up from $13bn in 2019 [S334] CONFIRMED. Investors listed: "pension plans, sovereign wealth funds, insurance companies, asset managers, private wealth platforms, and family offices" [S334] CONFIRMED.

**WHY KKR** Ties straight to the house view on "Security of Everything" and power demand [S360] INFERRED.

**WHY KCS** The release quotes the infrastructure business's "Chief Development Officer", a client-facing fundraising role [S334] CONFIRMED. That is the product-specialist side of KCS in action INFERRED.

**RAISE THIS** "How do you present the same infrastructure fund to a Gulf sovereign and to a private bank's wealth platform?"

### 4. K-Series reaches $42bn, but KKR's retail credit fund pro-rated withdrawals in Q1 — JUL 2026

*KKR Q2 release, 30 July 2026; Bloomberg Law, "KKR's Private Credit Clients Slow Down Their Redemption Requests", 6 July 2026.*

**WHAT HAPPENED** K-Series are KKR's evergreen funds for wealthy individuals: always open, monthly subscriptions, quarterly withdrawals usually capped near 5% of the fund. AUM $42bn, up from $25bn [S330] CONFIRMED. At K-FIT, KKR's retail private credit fund, investors "tried to redeem 6.3% of shares" in Q1, so it paid about 80% of requests; in Q2 requests fell to 1.65% and were paid in full [S338] REPORTED. Nuttall: "What you don't read about in the articles is the inflows" [S362] REPORTED.

**WHY KKR** Wealth is the fastest-growing channel, with stickier fees but redemption and reputation risk INFERRED.

**WHY KCS** Juniors write the investor letters, FAQs and adviser material when redemptions spike. Gates and pro-rating are basic vocabulary for the role INFERRED.

**RAISE THIS** "The Q1 episode looks like a stress test the model mostly passed. Did it change how KCS sets liquidity expectations at the point of sale?"

### 5. Capital Group partnership: KKR's road to US advisers and 401(k)s — DEC 2025 TO JUL 2026

*AlternativesWatch, 3 December 2025; Q2 2026 call, 30 July 2026.*

**WHAT HAPPENED** Capital Group (American Funds) and KKR build "public-private" funds mixing listed bonds or shares with private assets. Two credit interval funds launched in April 2025; in December 2025 they announced a 401(k) target-date fund, model portfolios and a real asset strategy aimed at late 2026 [S363] REPORTED. Nuttall: Capital Group has "relationships with 220,000 of the 300,000 advisers in the United States" [S362] REPORTED. One analysis puts the funds at about $703m combined in June 2026 [S364] REPORTED (low-authority source).

**WHY KKR** Distribution it could not build alone, and a position ready for 401(k) money INFERRED.

**WHY KCS** This is what "deliver customized products" and partnership "in the syndication/distribution of product" look like in practice INFERRED.

**RAISE THIS** "Is the partnership judged on near-term AUM, or on the option value of the 401(k) channel?"

### 6. Arctos acquisition closes and becomes "KKR Solutions" — 4 MAY 2026

*Business Wire via Rutland Herald, 5 May 2026; KKR Q2 release.*

**WHAT HAPPENED** Arctos buys minority stakes in sports teams and offers "solutions" such as GP-led secondaries (deals that give investors in older funds an early exit). KKR closed the deal on 4 May 2026; Arctos had $20bn of AUM at 30 June [S330, S332] CONFIRMED. The deal was reportedly agreed for $1.8bn; the team forms "KKR Solutions", led by Ian Charles, home to "a scaled multi-asset class secondaries business" [S355] REPORTED.

**WHY KKR** Secondaries are booming because exits are slow: Evercore counts a record $121bn in H1 2026 [S267] CONFIRMED.

**WHY KCS** A new product to explain, and a liquidity tool to offer LPs who are short of cash back INFERRED.

**RAISE THIS** "Do you see secondaries mainly as a product to sell, or as a solution for existing LPs who need liquidity?"

### 7. Founders' control ends by 31 Dec 2026; charter vote; $250m DOJ settlement — APR TO AUG 2026

*KKR 10-Q Q2 2026; 8-Ks of 21 April, 28 May, 29 May and 26 August 2026 (SEC EDGAR).*

**WHAT HAPPENED** KKR Management LLP (including founders Henry Kravis and George Roberts) controls KKR through one special share. On the "Sunset Date", "no later than December 31, 2026", KKR "will cancel the Series I preferred stock, establish voting rights for all common stock on a one vote per share basis, and acquire control of the carry pool" [S332] CONFIRMED. On 21 April shareholders approved three charter changes [S350] CONFIRMED; a fourth, removing a 90% supermajority rule, won 86.60% of outstanding shares and failed [S351] CONFIRMED. Separately, on 26 August KKR settled a DOJ civil case over HSR pre-merger filings for 2021 and 2022 deals: a subsidiary pays $250m, which KKR says "will have no financial impact on the firm, our funds, or any of our investors and will be fully reimbursed by outside law firms". KKR "strongly disagree[s]" with the DOJ's characterisation; court approval is pending [S349] CONFIRMED.

**WHY KKR** A move from founder control to a normal public company, and one legal overhang removed INFERRED.

**WHY KCS** LP questionnaires ask about governance and litigation. Give the approved public facts; never improvise INFERRED.

**RAISE THIS** On governance: "Do LPs who are also KKR shareholders raise the change in fund diligence?" On the DOJ matter: do not raise it; if asked, one factual sentence.

### 8. KKR in the UK: DCC take-private, Norfolk Vanguard, and the $17bn USI exit — JAN TO SEP 2026

*DCC RNS, 18 September 2026; RWE release, 14 January 2026; Claims Journal (citing WSJ) and KKR 8-K, 31 August 2026.*

**WHAT HAPPENED** DCC (London-listed energy distributor) confirmed an approach from Energy Capital Partners and KKR on 29 April; a board-backed cash deal worth up to about £5.75bn followed on 27 July; shareholders approved it with 78.09% on 18 September; completion expected Q1 2027 [S356] REPORTED. RWE agreed to sell KKR 50% of its 3.1GW Norfolk Vanguard offshore wind projects [S357] REPORTED. Aon agreed to buy USI Insurance Services from KKR and co-investors for about $17bn including debt [S354, S353] REPORTED.

**WHY KKR** UK take-privates and energy infrastructure are core European themes. Exits like USI create DPI (cash back to LPs) INFERRED.

**WHY KCS** Exits are the best fundraising argument; a junior may turn USI into an LP update INFERRED.

**RAISE THIS** "How does KCS use a realisation like USI with LPs deciding whether to re-up?"

### 9. KKR builds client coverage in the Gulf and Asia — APR TO SEP 2026

*Bloomberg Law, 8 June 2026; Caproasia, 14 April 2026; AlternativesWatch, 21 September 2026; ADIO summary of Global SWF, 1 June 2026.*

**WHAT HAPPENED** KKR named Bhavit Patel head of its Asia-Pacific institutional and family capital franchise; the memo came from Eric Mogelof, "head of global client solutions" [S358] REPORTED. KKR hired Katrina Wong as a KCS Principal in Hong Kong [S359] REPORTED. On 21 September KKR and Doha Bank signed an MOU to widen access to KKR strategies for eligible Qatari investors, signed by David Petraeus, chairman of KKR Middle East [S367] REPORTED. Despite the US-Iran war, Gulf sovereign funds (about $5.7tn) "have shown no sign of slowdown (yet)" [S365] REPORTED.

**WHY KKR** Gulf and Asian investors are among the world's largest LPs and co-investors INFERRED.

**WHY KCS** These are org-chart facts about the team you want to join INFERRED.

**RAISE THIS** "Has the Iran war changed what Gulf clients ask for: more co-investment, more control, or more energy-security themes?"

# The industry and regulation stories

## 10. Redemption wave hits private credit and evergreen funds — APR TO SEP 2026

*Private Equity Wire (citing the FT), 9 April 2026; Bloomberg via swissinfo, 4 June 2026; BNN Bloomberg, 3 September 2026.*

**WHAT HAPPENED** In Q1 investors asked to withdraw $20.8bn from private credit funds run by Apollo, Ares, Blackstone, Blue Owl, KKR and others; managers with about $300bn paid "just over half" [S337] REPORTED. The trigger was worry about loans to PE-backed software companies, though "underlying loan performance remains largely stable" [S337] REPORTED. Partners Group warned of more caps; requests at its Global Value fund reached an estimated 9.8% and its shares fell as much as 18.2% in a day [S339] REPORTED. In Q3 Blackstone's BCRED reportedly kept its 5% cap with requests near 10% [S340] REPORTED.

**WHY KKR** KKR competes for the same adviser shelf space; behaviour in a queue shapes a brand for years INFERRED.

**WHY KCS** "Can I get my money out?" must be answered the same way to institutions, banks and advisers INFERRED.

**RAISE THIS** "When a fund pro-rates, what do you tell distribution partners first: the numbers, portfolio health, or why gates exist?"

## 11. Fundraising rebounds, but only for the biggest managers — 13 JUL 2026

*Private Equity Wire (citing FT and PitchBook), 13 July 2026; PitchBook Q2 2026 report, 3 September 2026.*

**WHAT HAPPENED** PE fundraising topped $260bn in H1 2026, but only about 310 funds held a final close, on track for the lowest annual count in over a decade; "Funds targeting more than $1bn have attracted more than 80% of all capital raised so far this year" [S336] REPORTED. Executives warn of "zombie" managers that cannot raise again [S336] REPORTED. Across all private capital, the 12 months to June fell 12.7% to $1,348bn [S260] CONFIRMED.

**WHY KKR** KKR is a winner of the "flight to scale" INFERRED.

**WHY KCS** The job becomes deepening existing relationships across strategies, KKR's "integrated approach" INFERRED.

**RAISE THIS** "If an LP gives you five mandates instead of one, losing that relationship costs five times as much. Does concentration raise the bar for client service?"

## 12. US retail access: DOL 401(k) proposal and SEC accredited investor plan — MAR TO OCT 2026

*Morrison Foerster, 3 April 2026; Mayer Brown, 2 October 2026; Columbia CLS Blue Sky Blog, 2 October 2026.*

**WHAT HAPPENED** A 401(k) is the main US workplace pension. On 30 March 2026 the Department of Labor proposed a "process-based safe harbor": employers who follow a six-factor process (performance, fees, liquidity, valuation, benchmarks, complexity) get legal protection when offering private assets [S342] CONFIRMED. Comments closed 1 June; no final rule found [S342, S343] REPORTED. Around 30 September the SEC proposed letting people qualify as accredited investors by exam or credentials such as the CFA [S275] REPORTED.

**WHY KKR** Links to the Capital Group target-date fund and K-Series INFERRED.

**WHY KCS** New client types (plan sponsors, record-keepers) with new questions on fees, valuation and liquidity INFERRED.

**RAISE THIS** "If the safe harbour is finalised, does 401(k) money reach KKR first through partners' target-date funds or through direct mandates?"

**13. EU and UK fund rules: AIFMD II goes live; FCA proposes a new UK regime** **APR AND JUL 2026**

*Linklaters, "AIFMD II takes effect at last", 16 April 2026; Macfarlanes on CP26/28, 22 July 2026.*

**WHAT HAPPENED** AIFMD II applied from 16 April 2026: loan-fund leverage caps of 300% (closed-ended) and 175% (open-ended), 5% retention, at least two liquidity tools for open-ended funds [S344] CONFIRMED. The FCA's CP26/28 (14 July) proposes small, medium and large tiers (£750m and £5bn thresholds); comments close 14 October; rules expected 2028 [S345] CONFIRMED. Details in the regulation part.

**WHY KKR** Shapes how European credit funds are built; a lighter UK regime could favour London INFERRED.

**WHY KCS** Explains why a fund reaches one client as a Luxembourg vehicle and another through a different route INFERRED.

**RAISE THIS** "Has AIFMD II changed where KKR builds European credit products for wealth clients?"

**14. UK pensions: Pension Schemes Act 2026, Mansion House Accord, LGPS pools** **29 APR 2026**

*Gateley, 2 June 2026; Alternative Credit Investor, 30 April and 22 May 2026.*

**WHAT HAPPENED** Royal Assent on 29 April 2026. Big DC schemes need a £25bn default fund by 2030; a reserve power from 2028 can require up to 10% in private assets (5% UK) [S346] CONFIRMED. A May 2026 Isio study found 13 master trusts "rapidly increasing" illiquid allocations [S348] REPORTED. The £400bn+ Local Government Pension Scheme is moving from eight pools to six; the 31 March 2026 deadline was missed [S347] REPORTED.

**WHY KKR** Fewer, larger UK buyers who want big managers with infrastructure and credit platforms INFERRED.

**WHY KCS** The most local story for a London team: customised mandates for a handful of giant pools INFERRED.

**RAISE THIS** "The opportunity is not just selling funds but building separate accounts or co-investment programmes for pools, for example in UK infrastructure such as offshore wind."

## KKR's house view in plain English

Henry McVey is KKR's Head of Global Macro and Asset Allocation and CIO of its Balance Sheet [S360] CONFIRMED. His team's outlooks are KKR's public "house view": what the firm thinks about the economy. Clients read them, and client teams use them in meetings INFERRED. KKR's head of talent acquisition told Fortune that KKR wants candidates who "understand how the macro environment is affecting investors" [S393] REPORTED. These two documents are how you show that.

**DEC 2025: "OUTLOOK FOR 2026: HIGH GRADING"**

The economy is fine but the cycle is late. Do not run from risk; **upgrade** what you own, how it is financed and who you deal with, because upgrading is cheap today. "Using an education analogy, we think a B is an A in this environment, but a C could be an F." Calls include: create your own returns through operational improvement; favour firms that use AI to grow margins; "We want to own more Asia at this point in the cycle"; own "collateral-based cash flows" because inflation has a higher "resting heart rate" [S361] CONFIRMED.

**JUN 2026: "THE DIVERGENCE CONUNDRUM"**

"The cycle continues, but the rules of the game are changing." The economy moves from "a low-cost, efficiency-first model" to one where "redundancy, reliability, resilience, and control carry a higher premium". Some sectors attract capital (AI, productivity, national security); others struggle (housing, lower-income consumers, rate-sensitive sectors). "For investors, the implication is not to avoid risk, but to be more disciplined in how that risk is owned" [S360] CONFIRMED.

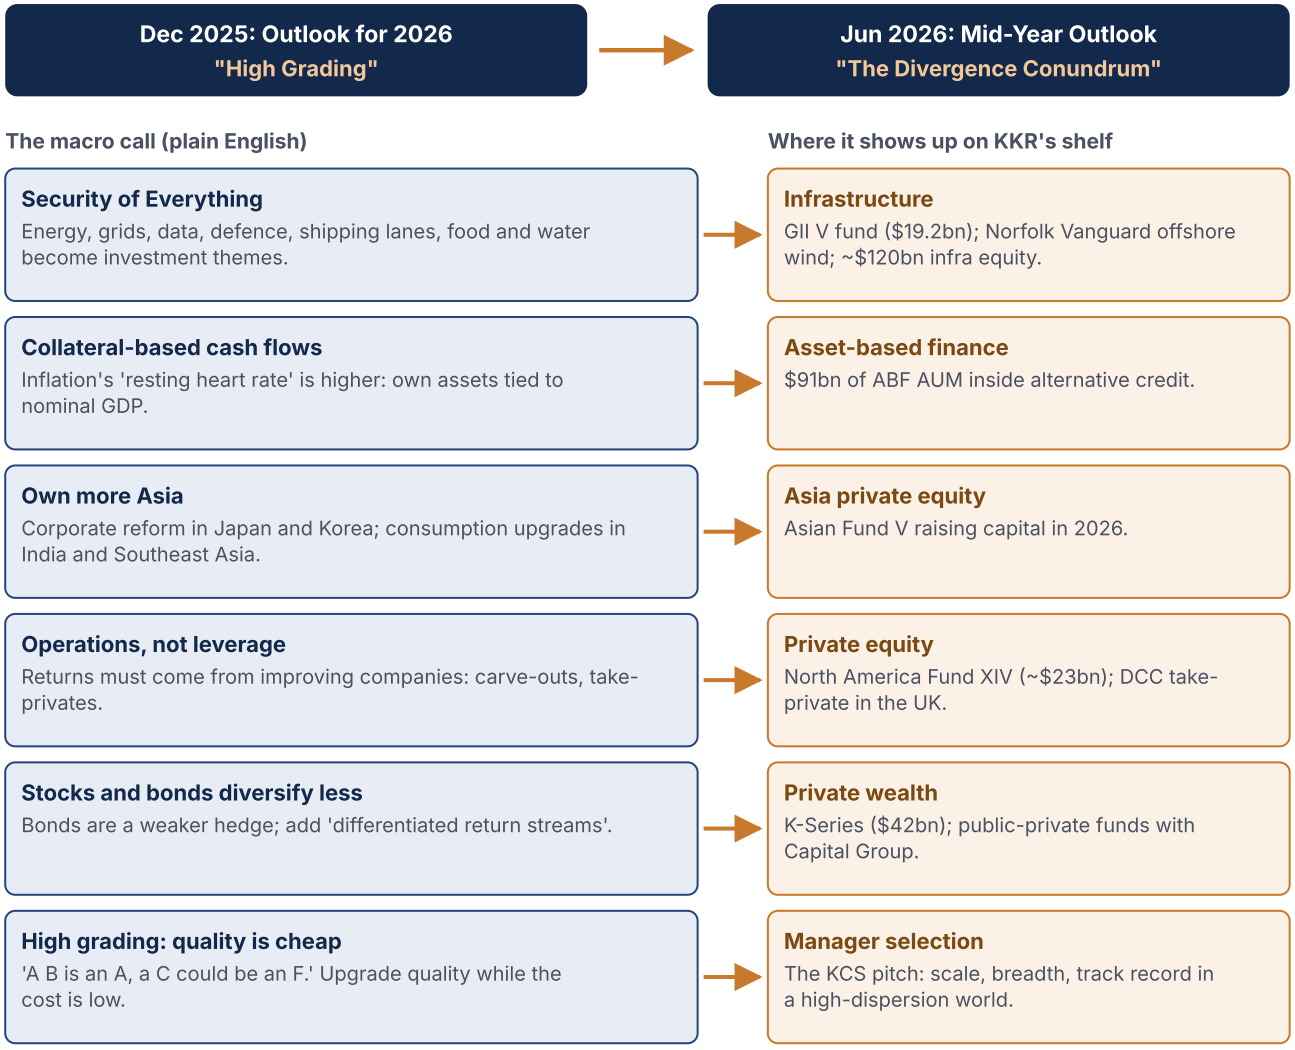

**Figure 72. From macro call to product shelf.** Each house-view call (left) lines up with a strategy KKR is raising or growing (right). The links are this pack's reading INFERRED; the calls are KKR's [S361, S360]; product facts from [S334, S332, S330, S357, S356, S363], as of 30 Jun to Sep 2026.

Other calls worth knowing from the mid-year update [S360] CONFIRMED: since ChatGPT launched, S&P 500 real revenue per worker is up about 8% after 20 years of no growth; goods inflation should settle about 100 basis points (1 percentage point) above pre-pandemic levels; stocks and bonds diversify each other less; in Europe KKR favours infrastructure, defence, grids, logistics and the periphery (Spain, Italy, Poland), not just a weak Germany; and manager selection "is a bigger part of returns" when results vary more between managers.

**SAY THIS IN THE INTERVIEW**

"KKR's mid-year outlook says the cycle continues but the rules are changing, and that manager selection matters more when returns diverge. That is a fundraising argument as much as a macro view: it explains why capital is concentrating in large platforms like KKR."

Source: WS5 reading list, URLs checked 11 Oct 2026 **[S360, S361, S336, S337, S363, S365, S369]**. Cadences are suggestions for a beginner **INFERRED**.

**SAY THIS IN THE INTERVIEW**

"KKR raised $34bn in Q2 and $133bn over 12 months, and Global Infrastructure Investors V closed at $19.2bn with private wealth platforms alongside sovereigns and pensions. To me that shows the client base widening, not just growing."

**DON'T SAY THIS**

"KKR manages over $800bn." The last reported figure is $796bn at 30 June 2026; Q3 comes on 9 November [S330, S333]. And do not confuse FS KKR Capital Corp (FSK, a listed BDC) with K-FIT, KKR's non-traded retail credit fund.

PART 8

# Forming your own view

Both sides of every live argument, so you can hold an opinion and defend it.

## How to hold an opinion in a KKR interview

KKR's EMEA client relations advert asks for the "ability to form and express opinions" [S388] CONFIRMED. This part gives you ten live arguments, both sides with numbers, and a defensible place to stand on each.

A good interview opinion has four parts: **a view**, **one fact that anchors it**, **the best point against it**, and **what would change your mind**. It does not need to agree with KKR. It needs to show you have weighed both sides INFERRED. The map below shows where KKR, regulators and critics roughly sit on each argument.

**Figure 73. The argument map.** Each row is one debate in this part, phrased so that left means "yes, benign" and right means "no, risky". Positions are this pack's judgement from public statements and data INFERRED: KKR from its filings and calls [S330, S332, S362]; regulators and official bodies from EO 14330, the DOL, SEC, IMF, BoE and UK government [S273, S272, S275, S287, S288, S346]; critics from Dimon, IMF-style risk warnings, ILPA's draft CV guidance and press reporting [S280, S286, S319, S337]. As of 11 Oct 2026.

**WHY THIS MATTERS**

Notice that KKR sits on the left of almost every row. That is natural: it is a seller of these products. Your value in an interview is to show you understand why the right-hand side exists, and how a client team answers it honestly INFERRED.

## 1. Is private wealth "democratisation" good for retail investors?

### YES: THE CASE FOR

- Individuals hold about 50% of global assets but only 16% of alternative fund assets [S293] REPORTED. Excluding them from an asset class that big firms use is its own unfairness.
- Regulators on both sides of the Atlantic agree: EO 14330, the DOL safe harbour, the SEC accredited investor proposal, ELTIF 2.0 and the LTAF all widen access [S273, S272, S275, S301, S305] CONFIRMED. SEC Chair Atkins: "financial sophistication can scarcely be measured by income or net worth alone" [S275] REPORTED.
- ELTIF assets grew 55% in 2025 to about €34bn [S302] REPORTED: demand is real.

### NO: THE CASE AGAINST

- In Q1 2026 investors asked for $20.8bn back from private credit funds; managers paid "just over half" [S337] REPORTED. Retail investors met the gate.
- Apollo Debt Solutions received requests of 11.2% and paid 5% [S278] REPORTED.
- The IMF lists semi-liquid vehicles and stale valuations among private credit vulnerabilities [S287] REPORTED; the FCA found weak valuation governance in 2025 [S310] REPORTED.
- PitchBook: evergreen growth "funnels more capital into the hands of the largest GPs" [S260] REPORTED. Good for them; not automatically for savers.

**KKR's position appears to be:** strongly for. K-Series grew to $42bn [S330] CONFIRMED; Nuttall said the turbulence "has not changed our perspective on investing in growth" [S362] REPORTED.

**YOUR OPINION GOES HERE**

**Suggested stance:** "Good for retail investors if the product is sold as what it is: semi-liquid. The gate is the product working, not failing. The risk is in the selling, not the structure." **Anchor fact:** K-FIT received requests for 6.3% in Q1 and paid about 80%; in Q2 requests fell to 1.65% and were paid in full [S338] REPORTED.

## 2. Is private credit a bubble?

### YES: THE WARNING SIGNS

- Jamie Dimon after JPMorgan's $170m Tricolor loss: "when you see one cockroach, there are probably more" [S280] CONFIRMED.
- Tricolor (Chapter 7, Sep 2025) and First Brands (over $10bn of liabilities, alleged double-pledging of invoices; moved to liquidation in Aug 2026) [S282, S283, S284] REPORTED.
- The IMF warned vulnerabilities "could become systemic" [S287] REPORTED. The Bank of England is running a private markets stress scenario

### NO: THE DEFENCE

- Apollo argues private credit is a market of "over $40 trillion", mostly investment grade, with only about $2tn of levered lending [S285] REPORTED (critics say the usual definition is $1.7tn to $3tn [S286]).
- "Underlying loan performance remains largely stable despite the outflows" [S337] REPORTED. BlueBay's Mark Dowding called Tricolor "corporate fraud rather than an underlying symptom" [S281] REPORTED.

worse than the 2008 crisis; final report due early 2027 [S288] REPORTED.
- Software is 64% of one Blue Owl BDC [S279] REPORTED, at a time when AI threatens software borrowers.
- Closed-end private debt funds had a 24.1% distribution rate and record 2025 net cash flow of $39.5bn [S260] REPORTED.
- Private debt is the only strategy where fundraising grew: up 14.0% in the 12 months to June 2026 [S260] CONFIRMED.

**KKR's position appears to be:** not a bubble. Nuttall expects "a record third-party credit fundraising year" and said software is "about 6% of our AUM" [S362] REPORTED. KKR runs $331bn in credit and liquid strategies [S332] CONFIRMED.

YOUR OPINION GOES HERE

**Suggested stance:** "Not a system-wide bubble, but an asset class whose growth has run ahead of transparency. The fraud cases were about collateral checks, and the redemption wave was about software exposure. Underwriting and disclosure are the tests, not size." **Anchor fact:** Q1 2026 redemption requests were $20.8bn, driven by software worries, while loan performance was reported "largely stable" [S337] REPORTED.

## 3. Will the fundraising drought end?

### YES: SIGNS OF THAW

- PE fundraising topped $260bn in H1 2026, a pace 17% above 2025 [S336] REPORTED.
- Average time to close fell to 15.7 months from 19.1; 82% of PE funds closed at or above target, the highest in six years [S266] CONFIRMED.
- 2025 buyout deal value rose 44% and exit value 47% (Bain) [S262] CONFIRMED. Exits refill LPs' pockets.

### NO: STILL DRY

- Total private capital raised in the 12 months to June fell 12.7% to $1,348bn; if the pace holds, 2026 is the fifth straight annual decline [S260] CONFIRMED.
- Only about 310 PE final closes in H1, on track for the lowest count in over a decade [S336] REPORTED; 7,739 funds still on the road [S266] CONFIRMED.
- Distributions were 6% of AUM against a 2015-19 average of 16% (McKinsey) [S261] REPORTED. McKinsey calls the shifts "structural features of a maturing industry" [S263] REPORTED.

**KKR's position appears to be:** for KKR, there is no drought: "We expect a record fundraising year for the firm" [S362] REPORTED.

YOUR OPINION GOES HERE

**Suggested stance:** "It has already ended for the largest platforms. For the rest of the industry it ends only when distributions recover, because LPs fund new commitments with cash returned from old ones." **Anchor fact:** distributions at 6% of AUM against a 16% pre-2020 average [S261] REPORTED.

# 4. Does scale win?

### YES: FLIGHT TO SCALE

- Funds above $1bn took 78.2% of capital in H1 2026, up from 59.1% in 2021 [S260] CONFIRMED. The ten largest funds closed in Q2 took 49% [S266] CONFIRMED.
- Only 36 first-time PE funds closed in H1 2026, raising $7.7bn [S260] CONFIRMED.
- Allocators prefer "GPs with established track records and broad market validation" over the cost of underwriting smaller funds [S260] CONFIRMED.
- Consolidation: BlackRock bought GIP and HPS [S290]; Nuveen bid $13.5bn for Schroders; over 1,500 asset manager deals forecast to 2029 [S291] REPORTED.

### NO: LIMITS OF SIZE

- Bain's "12 is the new 5": deals now need about 12% annual EBITDA growth, against about 5% historically [S262] REPORTED. Big funds must deploy big cheques in that world.
- KKR's own house view says manager selection matters more when results diverge [S360] CONFIRMED: size is not the same as skill.
- Concentration raises the stakes of each relationship: lose one LP and you lose several mandates INFERRED.

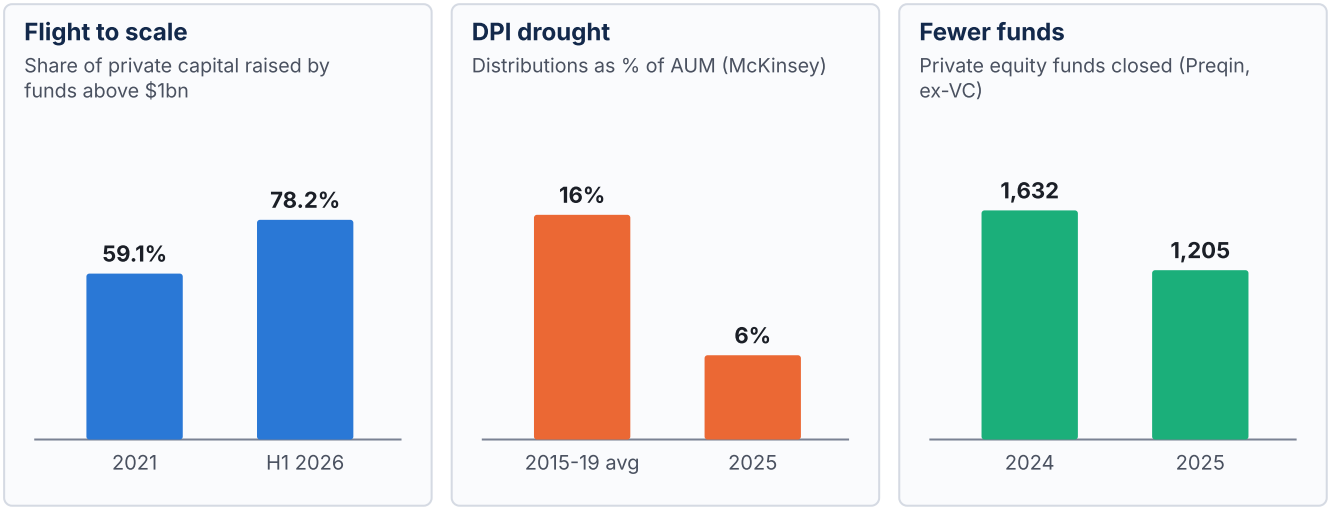

**Figure 74. Three numbers behind three debates.** Capital is concentrating, cash back is scarce, and fund counts are falling. Sources: PitchBook Q2 2026 report [S260] (3 Sep 2026); McKinsey via Dakota [S261] (Feb 2026); Preqin via Paul Weiss [S265] (FY2025). Providers define their universes differently; do not add them together.

**KKR's position appears to be:** a beneficiary. Two of the year's largest closes (NAX4 about $23bn; GII V $19.2bn) [S335, S334] CONFIRMED.

**YOUR OPINION GOES HERE**

**Suggested stance:** "Scale wins the fundraising, but it does not guarantee the returns. The client team's job is to show the scale is earned: breadth across strategies, co-investment, and service no small manager can match." **Anchor fact:** 78.2% of capital to $1bn+ funds in H1 2026, against 59.1% in 2021 [S260] CONFIRMED.

## 5. Should UK pensions be pushed into private assets?

### YES: THE GROWTH CASE

- The Mansion House Accord: 17 providers covering about 90% of active DC savers pledged 10% in private markets by 2030, 5% in the UK, potentially £50bn [S315] CONFIRMED.
- Chancellor Reeves: "we are choosing to back British businesses and British workers" [S315] CONFIRMED.
- A May 2026 Isio study found master trusts "rapidly increasing" illiquid allocations [S348] REPORTED: the pledge is already moving money.

### NO: THE MEMBER'S CASE

- Trustees' first duty is to members. The Act lets them opt out if compliance is "likely not to be in the best interests of members" [S346] CONFIRMED.
- Parliament fought over it: the Bill went through "extended ping-pong" and mandation was limited to Accord levels [S316] CONFIRMED.
- Delivery is slow: the LGPS missed its 31 March 2026 pooling deadline [S347] REPORTED. "I expect any move to internally managed funds to take time, especially in the area of alternatives" [S347] REPORTED.

**KKR's position appears to be:** no direct public statement found in the sources. KKR's UK investments (Norfolk Vanguard offshore wind, DCC) suggest it sees UK assets worth owning [S357, S356] INFERRED.

**YOUR OPINION GOES HERE**

**Suggested stance:** "Encourage, do not mandate. The Act gets the design about right: a reserve power capped at the voluntary levels, not usable before 2028, with a members'-interest opt-out."
**Anchor fact:** any mandation is capped at 10% of the default fund, no more than 5% UK, and lapses at end-2032 if unused [S346] CONFIRMED.

## 6. Are insurer-owned asset managers a good model?

### YES: PATIENT MONEY

- Insurers collect premiums and need long-dated assets; managers originate long-dated private credit. The match is natural [S285] REPORTED.
- It creates "perpetual capital" that never has to be handed back on a fixed date: $334bn at KKR, up 16% [S330] CONFIRMED. That makes fees steadier.
- Apollo argues most private credit is investment grade [S285] REPORTED.

### NO: HIDDEN RISKS

- The IMF warned that insurers have "significantly expanded" holdings of private credit and illiquid assets, citing multiple layers of leverage and stale valuations [S287] REPORTED.
- Critics say the "$40 trillion" figure counts almost everything non-traded [S286] REPORTED.
- The same group originates assets and buys them for its own insurer: a conflict to manage and disclose INFERRED.

**KKR's position appears to be:** committed. Global Atlantic, its insurance company, had $220bn of AUM at 30 June 2026 [S330] CONFIRMED, and Capital Group will manage part of Global Atlantic's fixed income [S363] REPORTED.

**YOUR OPINION GOES HERE**

**Suggested stance:** "A strong model for funding, with a governance question attached. Independent valuation and clear disclosure of the conflicts are what make it defensible to clients and regulators."
**Anchor fact:** KKR's perpetual capital of $334bn [S330] CONFIRMED, set against the IMF's warning on stale valuations [S287] REPORTED.

# 7. Evergreen funds: is the liquidity mismatch a flaw?

An evergreen fund owns illiquid loans or companies but lets investors ask for money back every quarter, usually up to about 5% of the fund. When requests exceed the cap, everyone gets paid a pro-rata share. The chart shows how that played out in 2026.

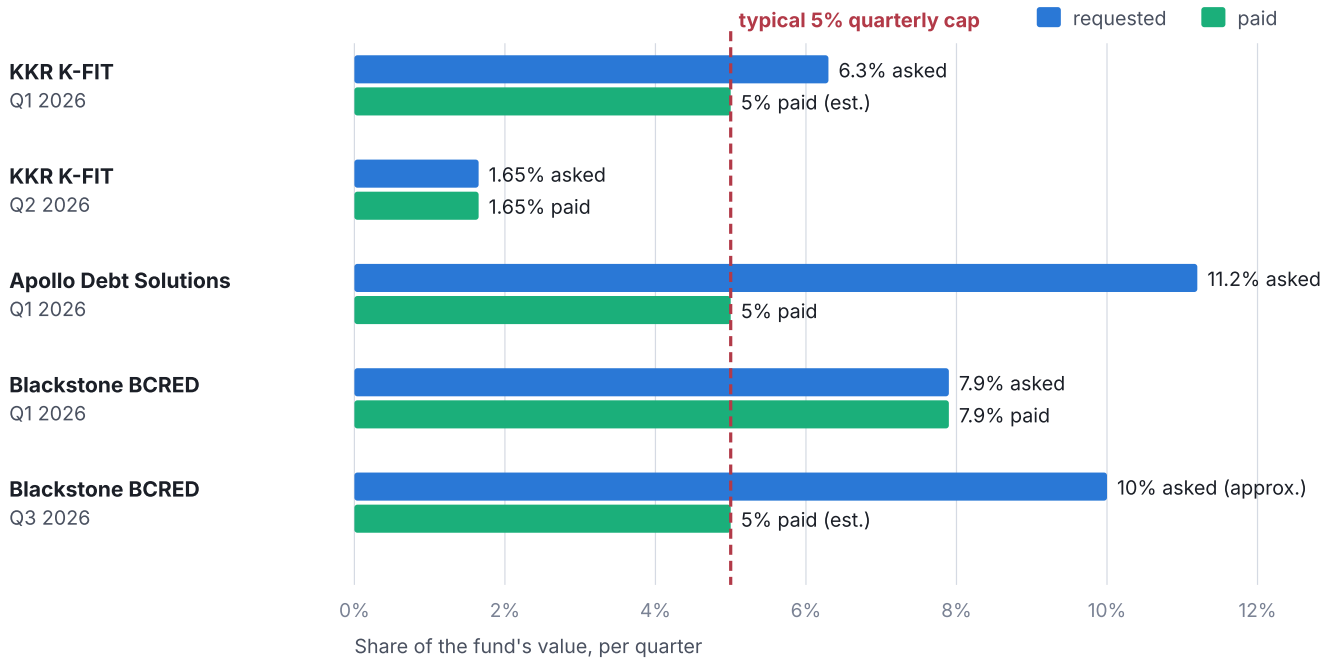

**Figure 75. Asked versus paid in 2026's redemption queues.** K-FIT Q1 "paid" is an estimate: about 80% of 6.3% requested [S338]. BCRED Q3 requests "near 10%" with the 5% cap held, so paid is estimated at 5% [S340]. Apollo and BCRED Q1 from AltsWire [S278], some of whose figures do not reconcile. All REPORTED.

### NOT A FLAW: IT WORKED

- Caps exist precisely so a fund never has to sell assets at fire-sale prices INFERRED. AIFMD II now requires at least two liquidity tools for EU open-ended funds [S295] CONFIRMED.
- Blackstone's BCRED paid 100% of record Q1 requests of 7.9% [S278] REPORTED; K-FIT paid in full in Q2 [S338] REPORTED.
- The model keeps growing: about $500bn in semi-liquid vehicles [S267]; US evergreen PE AUM rose from $51.3bn to $99.3bn [S260] REPORTED.

### A FLAW: THE QUEUE IS THE PRODUCT

- More than $11bn left private credit funds over two quarters; the US Treasury convened regulators on private credit liquidity [S278] REPORTED.
- Blue Owl Capital Corporation II ended quarterly redemption offers in February 2026 [S278] REPORTED.
- Partners Group's shares fell as much as 18.2% in a day on redemption news [S339] REPORTED.

**KKR's position appears to be:** the model is sound; Nuttall: "What you don't read about in the articles is the inflows" [S362] REPORTED.

**YOUR OPINION GOES HERE**

**Suggested stance:** "The mismatch is the design, not the flaw. The flaw appears when a semi-liquid fund is sold as if it were liquid. So the fix sits with the client team: set expectations at the point of sale." **Anchor fact:** closed-end private debt funds kept a 24.1% distribution rate while evergreen vehicles were "battered by outflows" [S260] REPORTED: same assets, different promises.

## 8. Will AI change fundraising and investor relations?

### YES: A BIG SHIFT

- Client work is document-heavy: KKR's KCS intern advert lists due diligence requests, RFPs, portfolio statistics and pitch decks [S390] CONFIRMED. First drafts are what AI does well INFERRED.
- KKR's London client relations advert asks for "Strong working knowledge of AI-enabled productivity tools ... use generative AI effectively and responsibly" [S388] CONFIRMED. KKR's internship text encourages interns "to leverage KKR's approved AI tools" (KKR posting, quoted in this pack's brief) REPORTED.
- Tailoring one message to many audiences is a core skill in the same advert [S388] CONFIRMED; AI makes versioning cheap INFERRED.

### NO: LIMITS THAT MATTER

- Every client document must be approved: the US Marketing Rule, UK Consumer Duty and EU pre-marketing rules do not accept "the model wrote it" [S313, S308, S299] INFERRED.
- Confidential and inside information cannot go into unapproved tools INFERRED.
- Kravis: "Our business really runs on trust" [S384] CONFIRMED. Trust is built person to person.
- AI is also a portfolio risk: worry about AI-disrupted software borrowers drove the Q1 redemption wave [S337] REPORTED.

**KKR's position appears to be:** pro-adoption with controls ("approved" tools, used "responsibly") [S388] CONFIRMED; its house view sees a productivity boom, with "more of this improvement ... now in the price" [S361] CONFIRMED.

> **YOUR OPINION GOES HERE**
>
> **Suggested stance:** "AI takes the first draft of the DDQ answer, the meeting brief and the market summary. Humans own the relationship, the judgement and the compliance sign-off. That frees juniors to spend more time on the client, not less." **Anchor fact:** KKR asks London analysts to "use generative AI effectively and responsibly" [S388] CONFIRMED.

## 9. The founders' control sunset: good for KKR?

### YES: A NORMAL PUBLIC COMPANY

- By 31 December 2026 KKR will "cancel the Series I preferred stock, establish voting rights for all common stock on a one vote per share basis, and acquire control of the carry pool" [S332] CONFIRMED.
- Shareholders approved three charter changes on 21 April 2026 [S350] CONFIRMED, and 86.60% of outstanding shares backed removing the 90% supermajority rule [S351] CONFIRMED: clear support.
- Leadership has already passed to co-CEOs Joseph Bae and Scott Nuttall [S330] CONFIRMED.

### THE OPEN QUESTIONS

- The supermajority proposal still failed because it needed 90% [S351] CONFIRMED. Some protections remain.
- Directors were elected by KKR Management LLP on 29 May 2026, as the current bylaws allow [S352] CONFIRMED.
- The founders' culture ("one compensation pool", "like and trust") was built under founder control [S385, S384] CONFIRMED. Keeping it is a choice, not an automatic result INFERRED.

**KKR's position appears to be:** planned and supportive; the Sunset Date is written into its filings [S332] CONFIRMED.

**YOUR OPINION GOES HERE**

**Suggested stance:** "Good for shareholders and neutral to positive for LPs. The real test is whether the one-firm culture and single compensation pool survive, because that is what clients buy." **Anchor fact:** the Sunset Date falls "no later than December 31, 2026" [S332] CONFIRMED.

## 10. The DPI drought: are continuation vehicles the answer?

### YES: A NEW LIQUIDITY CHANNEL

- GP-led secondaries reached $65bn in H1 2026, up 35%; single-asset continuation vehicles (CVs) were the largest share, "concentrated in high quality assets" [S267] CONFIRMED.
- Evercore: secondaries are evolving "from an episodic liquidity solution into a structural portfolio management channel" [S267] CONFIRMED.
- The backlog is huge: about $5tn sits in funds seven or more years old, 39% of NAV [S260] REPORTED; about 32,000 unsold companies worth $3.8tn [S262] CONFIRMED.

### NO: CONFLICTS AND FAKE EXITS

- In a CV the GP sits on both sides of the sale. ILPA's draft guidance targets process integrity, conflicts and pricing validation [S319] REPORTED.
- The SEC's rules on adviser-led secondaries were vacated in June 2024 [S311] CONFIRMED, so protection rests on ILPA and side letters INFERRED.
- CVs grew 62% in 2025 but were still under 10% of exit value [S262] CONFIRMED. And about two-thirds of LPs would rather wait for a better MOIC than take liquidity now [S262] CONFIRMED.

**KKR's position appears to be:** building in. The Arctos deal created "KKR Solutions", home to "a scaled multi-asset class secondaries business" [S355] REPORTED; Q2 was KKR's "strongest monetization quarter ever" [S330] CONFIRMED.

**YOUR OPINION GOES HERE**

**Suggested stance:** "CVs are a useful tool, not a substitute for real exits. LPs should judge each one on process: independent pricing and a genuine choice to sell or roll. Exits like USI still do more for DPI than any CV." **Anchor fact:** CVs were under 10% of exit value in 2025 even after growing 62% [S262] CONFIRMED.

## Delivering an opinion under pressure

**SAY THIS IN THE INTERVIEW**

"My view is that semi-liquid funds are good for wealth clients if they are sold honestly. The best point against me is the Q1 redemption wave: $20.8bn of requests and only about half paid. What would change my mind is if gates became permanent rather than temporary."

**DON'T SAY THIS**

"Private credit is definitely a bubble" or "private credit has no risk." Absolute claims invite a follow-up you cannot win. Also avoid "KKR is always right": the interviewer wants judgement, not loyalty INFERRED.

**WHY THIS MATTERS**

The same four-step structure (view, fact, best counter-point, what would change your mind) is what a client team does in front of an LP who asks a hard question. Practising it here is practising the job INFERRED.

PART 9

# The application and the interview: KCS edition

What the process looks like, how to write the application, how to rank the six teams, 59 questions with scaffolds, and 10 questions only a researcher could ask.

You have seven days. Applications through SEO London close on 18 October 2026 and today is 11 October. No interview is booked and you do not know who will interview you. So this part does two jobs. First, it gets the application right this week. Second, it builds a question bank you can rehearse from now until the first call.

## The process, stage by stage

KKR's head of talent acquisition, Grace Koo, told Fortune in September 2024 that KKR gets about 7,000 campus applications a year and fewer than 1% receive an offer [S393] REPORTED. Candidates "typically" meet 6 to 8 executives, including the managing director or partner of the hiring team [S393] REPORTED. That is the US-led campus picture. The figure below shows the stages as best the research can piece them together, and how sure we are about each one for London.

**Figure 76. The funnel, with your position and our confidence at each stage.** Stage list from Fortune on KKR's campus process [S393], Leland [S394] and Extern [S395] (both commercial prep sites, medium to low reliability), SEO London's sponsor page [S371], and forum anecdotes [S402] [S403]. Deadline from the candidate brief. Offer timing is an estimate with no source, as of 11 Oct 2026. Scale: about 7,000 KKR campus applications a year and fewer than 1% offers (US-led, 2024) [S393]. Band widths picture the narrowing; they are not measured drop-off rates.

**SOURCE UNCERTAIN: READ THIS FIRST**

The KKR London summer internship run through SEO London is not on KKR's public student job board. On 11 October 2026 that board listed 19 roles and none was a London summer internship [S392] CONFIRMED. The SEO London portal sits behind a login, so the research could not read the real form, its questions or its word limits. Almost all interview detail in public is from US candidates. Where this part says "London", it is reasoning from KKR's other London postings and from SEO's published training, and it is tagged that way.

| Stage | What is known | What to do about it now |
|---|---|---|
| **1. Application** | Closes 18 Oct 2026. You rank six teams. KKR London's own written ask for a 2027 Real Estate intern was a one-page CV and a one-page cover letter [S391] CONFIRMED. | Draft every answer offline first. Screenshot the form before you submit. The application section below has the structure. |
| **2. Screening** | SEO offers sponsor firms help "with shortlisting" [S371] CONFIRMED. So an SEO reader may see your answers before KKR does INFERRED. | Write for a smart non-specialist. Plain English beats jargon. |
| **3. Online test** | US: a cognitive test lasting nearly an hour; KKR said it is only one data point [S393] REPORTED. Some London roles "reportedly" use a Criteria-style aptitude test [S394] REPORTED, low confidence. | Do two timed practice aptitude tests this month. SEO's Careers training covers psychometric tests [S374] CONFIRMED. |
| **4. HireVue** | "Pre-set behavioral prompts with one attempt per answer" [S394] REPORTED. Extern says 3 to 5 questions, 1 to 2 minutes to prepare, 2 to 3 minutes to answer, unsourced [S395]. | Rehearse: tell me about yourself, why KKR, why KCS, a team project, a time you led. Two minutes each, on camera. |
| **5. First round** | One or two live interviews with associates or principals: behavioural, technical, CV walk-through [S394] REPORTED. Intern anecdotes: "two or three people take turns interviewing you for 20 minutes each" [S403] REPORTED. | Use the question bank later in this part. The CV grill is covered in another part of this pack. |
| **6. Superday** | 3 to 6 interviews from junior staff to MDs [S394] [S395] REPORTED. For a KKR Client Solutions associate role a prep site lists a possible "Case Study/Writing Exercise" of 1 to 2 hours [S397] REPORTED, low-medium. | Practise the KCS case formats in the question bank (pitch, explain, write, handle a complaint). |
| **7. Offer** | No public source on when London or SEO offers go out [S393] (US only). Estimate: first rounds late October to December 2026, offers from late 2026 to early 2027 INFERRED. | Keep reading the news. KKR's Q3 results are due on 9 November 2026 [S333] REPORTED. |

**WHY THIS MATTERS**

Koo said KKR wants candidates who "understand how the macro environment is affecting investors and what that might mean for KKR's businesses" [S393] REPORTED. For most teams that is a nice extra. For Client Solutions it is the job: you explain markets to investors. Treat it as the single most important thing a KCS interviewer will probe.

## KKR's culture is the marking scheme

KKR's founders have written down what they look for. Read this section as the hidden rubric behind every question, including the technical ones.

**HENRY KRAVIS, CO-FOUNDER (KKR.COM, OCT 2024)**

"When we are interviewing candidates wishing to join KKR, we look beyond financial acumen, strategy and leadership skills. We look for like and trust and we look to understand who the person is." [S385] CONFIRMED

"Those who are arrogant fail this test." [S385] CONFIRMED

**ON TRUST AND ARROGANCE**

"People don't want to work with you, let alone entrust you with their capital, if they can't trust you will do what you say." [S384] CONFIRMED

"There is something that eats away at like and trust. It is arrogance." Kravis keeps a framed "Arrogance kills" sign behind his desk [S384] CONFIRMED.

Kravis also says KKR watches how candidates treat people they are not trying to impress, such as waiters or office staff [S385] CONFIRMED. The KCS leadership uses the same words. Jim Burns, Head of Institutional Client Solutions in the Americas: "We subscribe to the view of Henry Kravis and George Roberts that people do business with those they like and trust. Partnership and alignment shape our relationships at every turn" [S386] CONFIRMED. A 2026 KKR Client Solutions intern advert in Singapore says KKR operates "with one P&L where most places have silos. It's not for everyone" [S389] CONFIRMED.

| What KKR says it values | How it shows up in your interview |
|---|---|
| **Like and trust**<br>"People do business with people they like and trust." (Henry Kravis) | Warm, plain, honest answers. Say "I don't know, here is how I would find out."<br>Follow up exactly when you said you would. |
| **Arrogance kills**<br>A framed sign behind Kravis's desk.<br>"Those who are arrogant fail this test." | Courtesy to receptionists, SEO staff and other candidates. No name-dropping.<br>Give credit to others in your stories. |
| **One firm, one P&L**<br>"We all succeed and fail together."<br>Think "we", not "I". | Stories about shared wins. Show you would pull in other teams to help a client.<br>Never rubbish another team or candidate. |
| **Our word is our bond**<br>Walter Industries: 17 years of work to get fund investors their money back. | Accuracy over speed in any task. Never overclaim a number or promise what you cannot deliver. Check figures twice. |

**Figure 77. Culture translated into observable behaviour.** Left column: KKR's own words from Henry Kravis's kkr.com pieces [S384] [S385] and a 2026 KKR job advert [S389], all read in full. Right column: how an interviewer could see each value in the room INFERRED.

**SAY THIS IN THE INTERVIEW (ONE STORY WORTH KNOWING)**

Kravis calls Walter Industries his "best deal", even though the company went bankrupt after KKR bought it in 1987. KKR spent almost 17 years and settled for over $300 million, against $117 million of KKR equity, to get its fund investors their money back plus a small profit [S384] CONFIRMED. For a KCS candidate this is gold: it is a story about keeping promises to investors, which is what Client Solutions does every day. Use it once, briefly, and only if it fits the question.

**DON'T SAY THIS**

"I really embody like and trust." Repeating KKR's slogans back is not evidence. Give your own example of earning someone's trust (a job, a society, a volunteering role) and let the interviewer make the link INFERRED.

# The SEO application and the cover letter

## What we know, and what we do not

- **Known:** you apply through SEO London's Alternative Investments Programme route and rank six teams. KKR was one of the 14 founding steering-group firms when SEO London launched that programme in February 2021 [S381] CONFIRMED. Henry Kravis has chaired SEO's US board since 2014 [S383] CONFIRMED.
- **Not known:** the exact questions, word limits, and whether there is a separate cover letter [S392] (form not public) [Confirmed as a gap].
- **Closest evidence:** KKR's 2027 London Real Estate off-cycle advert asks for a one-page CV and a one-page cover letter that should "address the internship start date you are interested in, your motivation for applying, reasons why you would be a good fit for the real estate team at KKR and briefly elaborate on your interest in real estate" [S391] CONFIRMED. That gives a three-part template: motivation, team fit, interest in the asset class.

**WHY THIS MATTERS**

Whatever SEO's form asks, it will almost certainly probe those same three things: why KKR, why this team, and proof of interest INFERRED. If you write those three blocks well now, you can cut them to fit any word limit you find on the form.

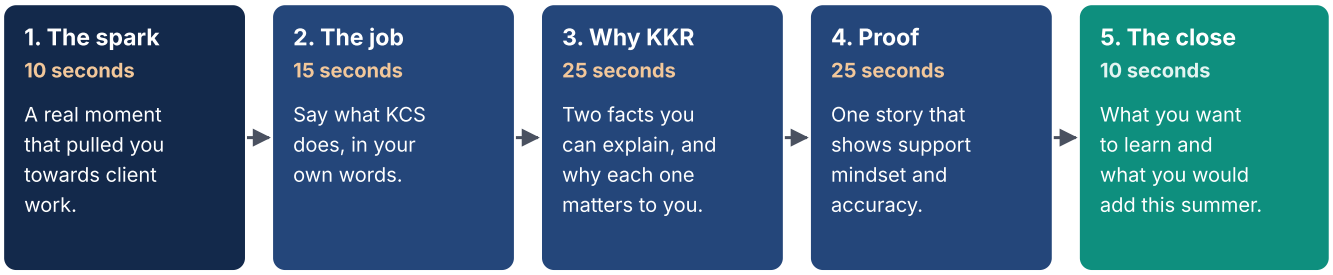

## Cover letter structure inferred from KKR's own advert

| Block | Length | What goes in it | Which KKR words it answers |
|---|---|---|---|
| 1. Opening | 2 lines | Role, programme, dates (6 June to 29 July 2027), KCS as first choice. | "internship start date you are interested in" [S391] |
| 2. Motivation | 5 to 6 lines | Why client-facing work in private markets, through one personal moment. | "your motivation for applying" [S391] |
| 3. Why KKR KCS | 5 to 6 lines | Two facts you understand and why they attract you. | Fortune: recruiters look for familiarity with KKR's recent deals and milestones [S393] |
| 4. Fit | 5 to 6 lines | Evidence of support mindset, accuracy, clear writing, Excel/PowerPoint, responsible AI use. | "reasons why you would be a good fit" [S391]; KCS skills lists [S388] [S390] |
| 5. Market interest | 3 to 4 lines | One view on what investors care about now. | "elaborate on your interest in" the asset class [S391]; Koo on macro [S393] |
| 6. Close | 2 lines | One line on your ranking logic; thanks. | Ranking is part of the SEO form INFERRED |

## How to write the motivation answer for KCS

The same structure works for the written motivation box and the spoken "why KCS?" answer. Budget about 90 seconds spoken, or about 200 to 250 words written INFERRED.

### The five-step motivation answer (about 90 seconds)

**The trap at each step**

| "I have always loved finance." No moment, no memory. | Calling KCS "just sales" or "just admin". | Praise that would fit Blackstone just as well. | Adjectives with no evidence: "I am detail-oriented." | Hinting KCS is a back door into investing. |
|---|---|---|---|---|

Timings are a rehearsal guide for a spoken answer. For a written box, keep the order and cut steps 1 and 5 to one sentence each.

**Figure 78. A scaffold for "why KCS at KKR?".** Structure is this pack's recommendation INFERRED. The genericness test ("if the answer would also fit a VC, hedge fund, or mutual fund application, it's too generic") comes from a prep site [S414] REPORTED; the advice to avoid "generic praise of the firm's reputation" from Leland [S394] REPORTED.

## Firm facts worth weaving in (pick two, not six)

| Fact | Why it helps a KCS answer | Source |
|---|---|---|
| KCS "seeks to 'connect the dots' across all businesses at KKR", from PE to Infrastructure, Real Estate, Credit, Capital Markets and Insurance-Funded Strategies. | Lets you say KCS is the seat that sees the whole firm. | [S390] CONFIRMED |
| KCS was formed in 2009 and has over 300 executives in over 20 cities on four continents. | Shows you know it is a large, established team, not a side desk. | [S390] CONFIRMED |
| Private wealth was 18% of KKR's AUM at end-2025, more than pensions and other institutions at 14%. | A little-known fact that explains why product education matters. | [S71] CONFIRMED |
| K-Series (KKR's evergreen funds for individuals) reached $42bn at 30 June 2026, from about $25bn a year earlier. | Growth you can link to the private wealth channel. | [S73] [S76] CONFIRMED |
| Quilter Cheviot began offering KKR's evergreen private equity strategy to UK clients from January 2026. | A UK, London-relevant wealth milestone. | [S177] CONFIRMED |
| Global Infrastructure Investors V closed at $19.2bn on 3 Aug 2026, KKR's largest infrastructure fund. Investors included private wealth platforms alongside pensions and sovereigns. | Shows the KCS client map in one press release. London has KCS's largest infrastructure product cluster. | [S334] [S176] [S150] CONFIRMED |
| In Europe, Mark Danzey is both European Head of KKR Capital Markets and European Head of Institutional Client Solutions. | Explains why the KCS team text mentions Capital Markets. | [S156] CONFIRMED |
| KKR runs "1 firm with 1 compensation approach. Relationships travel, ideas travel" (CFO Rob Lewin, July 2026). | Why a client gets "all of KKR", not one silo. | [S3] CONFIRMED |

## Annotated skeleton (a scaffold, not a script)

Fill the brackets with your own material. Do not copy the wording: interviewers read hundreds of letters and spot templates INFERRED.

| Skeleton | Annotation |
|---|---|
| I am applying for the KKR London 2027 Summer Internship (6 June to 29 July 2027) through SEO London, with Global Client Solutions as my first choice. | Answers the "start date" line of KKR's advert [S391]. Plain, no flourish. |
| [One concrete moment: a time you explained something complex to someone, or looked after people who relied on you, and found you enjoyed it.] | Step 1. Must be specific: a place, a person, an outcome. One sentence. |
| As I understand it, KCS finds and looks after the investors whose money KKR manages, and matches each one to the right part of the platform. [Add one line on why that appeals: translating, relationships, breadth.] | Step 2. Shows you know the job is both sales and service [S388]. Avoid "investor relations is admin". |
| Two things draw me to KKR in particular. First, [fact A, e.g. the "connect the dots" mandate across PE, infrastructure, real estate, credit and capital markets]. Second, [fact B, e.g. private wealth now larger than pensions in KKR's AUM, which makes explaining products to new kinds of investor central]. | Step 3. Two facts from the table above, each followed by "which matters to me because...". Cite nothing in the letter itself; just be accurate. |
| [Evidence paragraph: one example of support mindset (you made a team member's job easier), one of accuracy (you caught an error), one of communication (you wrote or presented for a mixed audience). Mention Excel, PowerPoint and responsible AI use with a concrete example.] | Step 4. Mirrors KCS adverts: "Strong support mindset", attention to detail, "Technical and aesthetic mastery of PowerPoint and Excel", AI used "effectively and responsibly" [S388] [S390]. |
| [One market view in two sentences, e.g. on what investors want now: cash back (distributions), or the UK pension consolidation creating fewer, larger clients.] | Covers "interest in the asset class" [S391] and Koo's macro point [S393]. Label it as your view. |
| I have ranked [team 2] second because [one honest reason linked to KCS, e.g. KCS works in partnership with Capital Markets on distribution]. Thank you for considering my application. | Step 5 plus ranking logic. Keeps your story consistent (see the ranking section). |

**TRAPS IN THE WRITTEN APPLICATION**

- "KKR is the largest alternative manager." False: Blackstone ($1.35tn) and Apollo ($1.05tn) are larger than KKR ($796bn) [S213] [S220] [S200] CONFIRMED.
- "KKR manages over $800bn." The last reported figure is $796bn at 30 June 2026. Q3 numbers come out on 9 November [S330] [S333].
- Number dumping. Three figures in a paragraph read as a fact sheet. One figure, explained, reads as understanding INFERRED.
- Naming KKR staff you have never spoken to. It reads as name-dropping, which clashes with "arrogance kills" [S384] INFERRED.
- Implying KCS is your route into investing. KCS is a career in its own right; senior KCS leaders came from PIMCO, Goldman Sachs and UBS [S79] [S120] [S124] CONFIRMED.

## How to rank the six teams

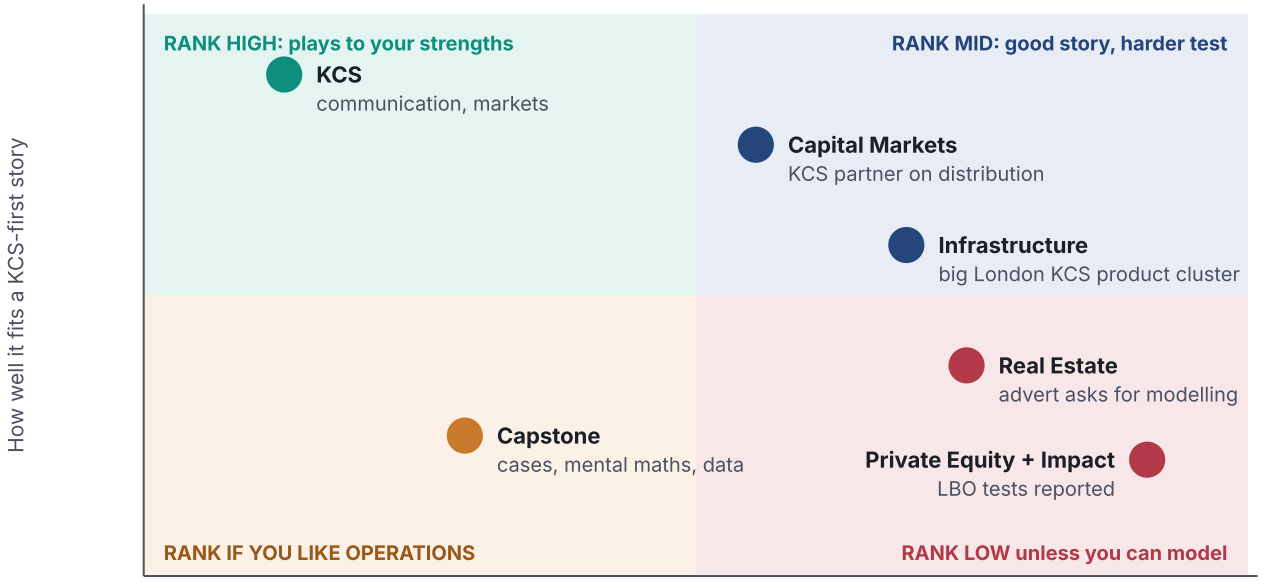

**SOURCE UNCERTAIN**

No public advice exists from KKR, SEO London or forums on how to rank KKR's six London teams [S392] (research gap). It is also not known how KKR uses the ranking. Everything in this section is strategy reasoning INFERRED.

The six teams are Private Equity (including Global Impact, which is off-cycle), Real Estate, Infrastructure, Capital Markets (KCM), Client Solutions (KCS) and Capstone (from the candidate brief). Three principles:

1. **Rank by real fit.** Each team interviews differently. PE and RE are reported as model-heavy; Capstone uses business cases and data; KCS tests communication and markets [S394] [S401] [S405] [S397] REPORTED. A beginner interviews best where the test matches their strengths INFERRED.
2. **Your first choice probably shapes who interviews you.** Have a credible story for at least your top two INFERRED.
3. **Be ready to defend the order.** Expect "why did you rank KCS first?" and "would you be happy in your second choice?". An honest, consistent answer reads as maturity INFERRED.

### Where each team sits for a KCS-first beginner (judgement, not data)

Positions are this pack's judgement from reported interview styles and KKR adverts. Move PE, Infrastructure and RE up if you can already build a simple model; move Capstone up if you love operations problems.

**Figure 79. A fit map for ranking.** Horizontal position uses reported interview styles: PE LBO tests [S394] [S395], RE modelling exercise [S401] and "Strong financial modelling skills" in the RE advert [S391], KCM capital-structure questions [S407], Capstone cases and data cutting [S405] [S406], KCS writing exercise [S397]. Vertical position uses links to KCS: the official KCS text on partnering with Capital Markets, Mark Danzey's dual role [S156], and London's infrastructure product specialists [S150]. All placements INFERRED, as of 11 Oct 2026.

| Team | Link to a KCS-first story | What its interview is reported to test |
|---|---|---|
| **KCS** | Your first choice. Adverts value communication, organisation and curiosity; prior internship "preferred, but not required" [S389] CONFIRMED. | Explaining products and markets; possible writing exercise [S397] REPORTED, low-medium. |
| **Capital Markets** | KCS works "in partnership with Capital Markets in the syndication/distribution of product" (official team text). In Europe one partner leads both [S156] CONFIRMED. | Debt financing, capital structures, a market view or pitch [S407] REPORTED, low. |
| **Infrastructure** | Largest KCS product cluster in London is infrastructure (four specialists) [S150] CONFIRMED. GII V is KKR's strongest 2026 fundraising story [S334]. | No public report. Probably PE-style with a long-life asset angle [S394] INFERRED. |
| **Real Estate** | A London KCS director leads European Real Estate Strategies in KCS [S150] CONFIRMED. | Technical questions, modelling exercise, three-interview superday (full-time anecdote) [S401] REPORTED. |

| Team | Link to a KCS-first story | What its interview is reported to test |
|---|---|---|
| **Capstone** | Weakest public link. Capstone's value-creation work may feature in how KKR explains returns, but no document shows it INFERRED. | Three 30-minute interviews, high-level case with mental maths [S405]; data cutting, not modelling [S406] REPORTED, anecdotes. |
| **PE (incl. Impact)** | KCS raises each European fund, but "I want PE" competes with a KCS-first story INFERRED. | LBO and modelling tests, deal discussion, live mini-cases [S394] [S395] [S402] REPORTED, US-centric. |

**YOUR OPINION GOES HERE**

An example ranking for a KCS-first beginner, built from the map: KCS, Capital Markets, Infrastructure, Real Estate, Capstone, Private Equity INFERRED. The one-line logic: "I ranked by where I can add most from day one and where I would learn the whole platform, starting with the team that connects every other team." Change it if your CV says something different. If you have built a model in a society or course, Infrastructure or PE could rise.

**SAY THIS IF ASKED "WOULD YOU BE HAPPY IN YOUR SECOND CHOICE?"**

"Yes, and here is why it is not random: [second team] is the team KCS works with most closely on [reason]. If I spent the summer there I would learn how the product is made, which would make me better at explaining it later." Then stop. Short and consistent beats long and anxious INFERRED.

## KCS question bank: 59 questions with scaffolds

How to use this bank. Each block gives the question, what it tests, an answer structure, facts you can weave in, and the trap. Tags show where the question comes from: a source ID means it is reported in that source; INFERRED means it is strongly implied by KKR's adverts or culture pages but not seen as a real question. The CV walk-through and live scenario role-plays are covered in other parts of this pack.

**KEY TERM**

**Scaffold:** the skeleton of an answer: the order of points and the facts to hang on it. Rehearse the scaffold, not a word-for-word script. Scripts sound recited on HireVue and collapse when an interviewer interrupts INFERRED.

### A. Motivational (8)

**1. Tell me about yourself.** [S394] [S419]

Tests: can you tell a clear story in 60 to 90 seconds that ends at KCS.

**Structure:** now (degree, one hook), then two past chapters that built the skills KCS needs (explaining, serving people, accuracy), then why you are in this room. **Weave:** nothing numeric; keep facts for later. **Trap:** reading your CV top to bottom. Full CV prep is in the CV part of this pack.

**2. Why KKR?** [S394] [S395] [S402]

Tests: specific interest in KKR, not alternatives in general (Fortune lists real interest in KKR specifically as a recruiter test) [S393].

**Structure:** one structural fact, one recent milestone, one cultural point, each with "which matters to me because".

**Weave:** one firm, one compensation pool [S385]; GII V close [S334]; private wealth 18% of AUM [S71]. **Trap:** praise that fits Blackstone too [S414].

**3. Why Global Client Solutions rather than an investment team?** [S397]
Tests: whether KCS is a real choice or a fallback.
**Structure:** what you enjoy (explaining, relationships, breadth) then what KCS gives that a deal team does not (seeing the whole platform, every asset class) then evidence you have done that kind of work. **Weave:** "connect the dots" across PE, infrastructure, real estate, credit, capital markets and insurance [S390]. **Trap:** "I want to learn about investing first and maybe move later."

**4. Why private markets, rather than a bank or a traditional asset manager?** [S399] [S398]
Tests: do you know what is different about alternatives.
**Structure:** long-term ownership, relationships that last a decade or more, and products that need real explanation. **Weave:** a closed-end fund runs about ten years, so the client relationship does too INFERRED ; KKR's investors span 65 countries [S70]. **Trap:** "the pay is better" or "banking hours are worse".

**5. Why did you rank KCS first, and would you be happy in your second choice?** INFERRED
Tests: consistency and maturity.
**Structure:** use the one-line ranking logic from the ranking section, then a real reason for choice two. **Weave:** KCS partners with Capital Markets on distribution (team text); Danzey's dual role [S156]. **Trap:** sounding as if you would take anything.

**6. Why London, and why apply through SEO London?** INFERRED
Tests: commitment and honesty.
**Structure:** London covers clients across EMEA; SEO trained you and is a long-standing KKR partner. **Weave:** KKR was a founding steering-group firm of SEO London's Alternative Investments Programme in 2021 [S381]; Kravis chairs SEO's US board [S383]. **Trap:** treating SEO as a shortcut. Show what you learnt from its training.

**7. Where do you see yourself in five years?** [S394] [S419]
Tests: realism and long-term motivation.
**Structure:** skills, not titles: deep knowledge of two or three products, trusted by a set of clients, able to run a meeting. **Weave:** KCS career paths run Analyst, Associate, Principal, Director, MD, Partner [S80]; people move between product and coverage roles inside KCS [S132] [S129]. **Trap:** "running my own fund".

**8. What would you add to the team that other candidates would not?** [S393]
Tests: self-awareness. Fortune says KKR asks how your background "complements the team".
**Structure:** one distinct asset (a language, a community you understand, a skill like clear writing), proof, and how it helps a client. **Weave:** London KCS adverts call German or French "a plus" [S388]; KCS covers family offices, private banks and institutions [S150]. **Trap:** generic strengths ("hard-working").

## B. KKR as a firm (7)

**9. What do you know about KKR? Give me 60 seconds.** INFERRED
Tests: can you compress a firm into a clear picture.
**Structure:** founded 1976 with $120,000 [S13]; $796bn AUM at 30 June 2026 [S74]; three segments (asset management, Global Atlantic insurance, strategic holdings) [S1]; less than 25% now traditional PE [S332]; one-firm culture. **Trap:** overclaiming size (KKR is fourth by AUM among big peers) [S213] [S220].

**10. Talk me through a recent KKR deal or fund close you find interesting.** [S393] [S394]
Tests: real curiosity and the ability to say why something matters.
**Structure:** what happened, why KKR did it, why a client would care. For KCS, a fund close often works better than a deal. **Weave:** GII V $19.2bn with private wealth platforms among investors [S334]; North America Fund XIV about $23bn [S335]. **Trap:** picking something you cannot explain past the headline.

**11. What makes KKR different from Blackstone or Apollo?** INFERRED
Tests: balanced judgement.
**Structure:** where KKR is not first (size, wealth scale, insurance scale), then what is distinctive (one compensation approach, capital markets tied to client work, Capital Group partnership, Family Capital segment). **Weave:** Blackstone private wealth about $324bn vs K-Series $42bn [S216] [S200]; Lewin's "1 firm" line [S3]. **Trap:** "only KKR has in-house capital markets" (Blackstone and Apollo do too) [S214] [S220].

**12. What does "people do business with people they like and trust" mean to you?** INFERRED
Tests: whether you understand the culture beyond the slogan.
**Structure:** trust is built by doing what you said (Kravis: "Our word is our bond") [S384], then your own example. **Weave:** Walter Industries [S384]. **Trap:** a speech with no example of your own.

**13. Why does it matter to a client that KKR runs one compensation pool?** INFERRED
Tests: linking internal structure to client value.
**Structure:** teams are paid on the whole firm, so sharing ideas and clients costs nobody anything; a client gets introduced to the right expert. **Weave:** 10-K "single expense pool" [S70]; Kravis "we all succeed and fail together" [S385]. **Trap:** claiming you know how rivals pay (not verified) INFERRED .

**14. What do you think of KKR's push into private wealth?** INFERRED
Tests: forming a view with both sides.
**Structure:** opportunity (growth, stickier capital), risk (redemptions, reputation), what good looks like (honest liquidity explanation). **Weave:** K-Series $42bn [S73]; K-FIT paid about 80% of requests in Q1 2026 and 100% in Q2 [S338] REPORTED ; Nuttall "up 20% net year-to-date" [S77]. **Trap:** one-sided cheerleading.

**15. Have you read any KKR Insights? Do you agree with it?** [S394]
Tests: whether you follow KKR's house view, which clients hear from KCS.
**Structure:** name the piece, its core idea, one part you agree with and one question you have. **Weave:** Mid-Year 2026 "The Divergence Conundrum": "the cycle continues, but the rules of the game are changing" [S360]; Outlook 2026 "High Grading" [S361]. **Trap:** agreeing with everything.

## C. KCS and the role (9)

**16. What does KCS do, in your own words?** [S390] INFERRED
Tests: whether you understand the job.
**Structure:** find investors, explain products, handle due diligence, onboard, report for ten years, raise the next fund. Two halves: developing and servicing. **Weave:** two focus areas, "Sales/Relationship Management and Product/Strategy Management" [S390]. **Trap:** describing only the selling half.

**17. What is the difference between a relationship manager and a product specialist?** INFERRED
Tests: org awareness.
**Structure:** RM owns the client and territory; product specialist owns the fund's story, materials and diligence; juniors support both. **Weave:** product teams "own marketing materials, developing thought leadership and leading investor diligence processes" [S106]. **Trap:** ranking one above the other.

**18. What would you expect to do as a KCS summer intern?** INFERRED
Tests: realistic expectations and "support mindset".
**Structure:** briefing notes before meetings, updating decks, DDQ and RFP coordination, CRM notes, events, research. **Weave:** Frankfurt KCS intern duties: client requests, due diligence and RFPs, pitch decks, investor events [S390]; London analyst: reporting, KYC, investment updates [S388]. **Trap:** expecting to pitch clients yourself.

**19. How is selling to a pension fund different from selling through a private bank?** INFERRED
Tests: audience thinking.
**Structure:** who decides, ticket size, the product (drawdown fund vs evergreen), regulation, what the end client needs explained. **Weave:** institutions mostly use drawdown funds, SMAs and co-investment [S70]; wealth uses wirehouses, private banks, feeders [S70]; EEA retail sales bring suitability rules [S70]. **Trap:** "same pitch, smaller numbers".

**20. What do LPs care about most right now?** [S398]
Tests: market awareness from the client side.
**Structure:** one main point (cash back, measured by DPI), two supporting points (fewer, bigger manager relationships; co-investment and fee terms). **Weave:** distributions about 14% of NAV in 2025 per Bain [S262]; consolidation of LP relationships [S260]. **Trap:** answering with IRR only.

**21. Walk me through a typical fundraising process.** [S398]
Tests: process thinking.
**Structure:** plan and target list, pre-marketing, materials and data room, meetings, DDQ and operational diligence, legal terms and side letters, first close, final close, then reporting [S70] INFERRED. **Weave:** ILPA DDQ format is widely used [S320]. **Trap:** forgetting that service after close is half the job.

**22. What would you put in a quarterly investor report?** [S398]
Tests: client empathy and accuracy.
**Structure:** headline performance (net, with DPI and TVPI), cash flows (calls and distributions), portfolio changes, valuation approach, outlook and risks, contact points. **Weave:** ILPA's Reporting Template v2.0 applies from Q1 2026 for funds in their investment period [S318]. **Trap:** marketing spin in a report.

**23. How would you tailor one message for a German pension and a UK family office?** [S388] INFERRED
Tests: the London advert's "tailor messages to suit different audiences" [S388].
**Structure:** same facts, different emphasis: governance, regulation and long-term liabilities for the pension; flexibility, co-investment and direct access for the family. **Weave:** KKR offers families "Co-Investment Opportunities" and "Bespoke Separately Managed Accounts" [S84]. **Trap:** changing the facts, not the framing.

**24. How does KCS work with KKR Capital Markets?** INFERRED
Tests: whether you read the team description closely.
**Structure:** KCM commits to more of a deal than the fund needs, then syndicates the excess; KCS knows which clients want co-investment and brings them in. **Weave:** 10-K on syndication of co-investments [S70]; Danzey leads both in Europe [S156]. **Trap:** mentioning confidential deal details: information barriers apply INFERRED.

## D. Industry and markets (6)

**25. How is the macro environment affecting investors, and what does it mean for KKR?** [S393]
Tests: Koo's exact criterion.
**Structure:** one macro force, its effect on investors, the KKR product it points to. **Weave:** McVey: inflation's higher "resting heart rate", stocks and bonds diversifying each other less, "Security of Everything" [S360]; infrastructure fits that theme. **Trap:** a macro lecture with no "so what" for a client.

**26. What happened with private credit redemptions this year?** INFERRED
Tests: whether you follow the news that affects KCS clients.
**Structure:** facts, cause, how KKR fared, the lesson. **Weave:** Q1 2026 requests of about $20.8bn across managers, just over half paid [S337] REPORTED ; concern over software exposure [S337]; K-FIT pro-rated in Q1, paid in full in Q2 [S338]. **Trap:** calling it a collapse; underlying loan performance was reported "largely stable" [S337].

**27. What are the UK pension reforms and why do they matter to KKR?** INFERRED
Tests: London-specific awareness.
**Structure:** what changed, who the new buyers are, what they will want. **Weave:** Pension Schemes Act 2026, Royal Assent 29 April 2026; DC megafunds of £25bn+ by 2030; reserve power capped at 10% private assets, 5% UK [S346]; LGPS consolidating into six pools [S347]. **Trap:** calling the Mansion House Accord a law; it is voluntary [S348].

**28. Is a single private capital market, where PE, credit and real assets merge, the future?** [S378] INFERRED
Tests: big-picture thinking. This is an SEO AICON 2027 panel title [S378].
**Structure:** yes-side (clients want whole-portfolio solutions), no-side (different risks and skills), your view. **Weave:** KKR's Total Portfolio Approach work: evaluating opportunities "across the total portfolio rather than through static asset class silos" [S90]. **Trap:** sitting on the fence with no view.

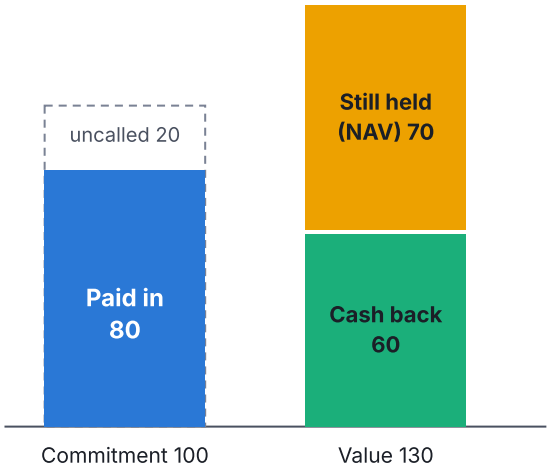

**29. Pick a market trend you follow and tell me why it matters.** [S394]
Tests: genuine curiosity.
**Structure:** trend, two data points, who wins and loses, how you track it. **Weave:** evergreen fund growth: US evergreen PE AUM from $51.3bn to $99.3bn [S260] REPORTED ; UK DC consolidation [S346]. **Trap:** a trend you only read about yesterday.

**30. Why are the biggest managers winning most of the fundraising?** INFERRED
Tests: understanding of LP behaviour.
**Structure:** LPs consolidating relationships, preference for SMAs and fewer managers, scale in wealth distribution. **Weave:** 10-K on investors "consolidating their capital with fewer alternative asset managers" [S70]; capital concentrating in $1bn+ funds [S336]. **Trap:** smugness about KKR's size.

## E. Technical finance for a client role (11)

A KCS interview is unlikely to ask you to build an LBO INFERRED . Expect instead to be asked to explain fund mechanics in plain English to someone who may not know them. Definitions below are standard industry terms INFERRED unless sourced.

### DPI, RVPI and TVPI from one investor's view (illustrative numbers)

**DPI = cash back / paid in = 60 / 80 = 0.75x**
"Real money." The metric LPs watch most now, because exits and distributions have been slow.

**RVPI = still held / paid in = 70 / 80 = 0.875x**
Value on paper, based on valuations. Not yet turned into cash.

**TVPI = DPI + RVPI = 130 / 80 = 1.625x**
Total value per pound paid in. The investor-level cousin of MOIC.

Illustrative numbers, not any KKR fund.

**Figure 80. Three ratios, one picture.** Definitions are standard industry terms INFERRED. Evidence that DPI is the focus: Bain reports distributions at about 14% of NAV in 2025, below 15% for four years running [S262] CONFIRMED. Numbers in the chart are invented for teaching.

**31. Explain DPI to me. How is it different from TVPI and RVPI?** [S398]
Tests: the most-used metric in today's LP conversations.
**Structure:** one-line definition, the picture above, why LPs care now. **Weave:** distributions about 14% of NAV in 2025 [S262]; KKR called Q2 2026 its "strongest monetization quarter ever" [S74]. **Trap:** mixing up paid-in (cash actually called) with commitment (the promise).

**32. What is a capital call and how does the process work?** [S397]
Tests: fund mechanics.
**Structure:** LP commits a sum; when the GP finds a deal it sends a notice asking for each LP's share; LPs pay within days; uncalled money is "dry powder". **Weave:** KKR had $142.7bn of uncalled commitments at 30 June 2026 [S330]. **Trap:** saying the LP hands over all the money on day one.

**33. What is the difference between an evergreen fund and a drawdown fund?** INFERRED
Tests: the product split at the heart of KCS's wealth channel.
**Structure:** drawdown: commit now, called over 3 to 5 years, about 10-year life, cash back at exits. Evergreen: no end date, invest monthly, ask to redeem periodically up to a cap. **Weave:** K-PEC, K-INFRA, K-FIT; 10-K: "do not have fixed termination dates and provide certain limited opportunities for liquidity" [S70] [S111]. **Trap:** calling evergreen funds "liquid". They are semi-liquid.

**34. IRR versus MOIC: why do both matter to LPs?** [S399]
Tests: understanding of time and money.
**Structure:** MOIC says how many times your money; IRR says how fast. A quick 1.3x can beat a slow 2x on IRR. LPs need both, plus DPI. **Weave:** CalPERS publishes KKR fund IRRs and multiples side by side [S117]. **Trap:** saying higher IRR is always better.

**35. Explain the J-curve to an investor.** [S397] [S398] [S399]
Tests: a classic IR explanation.
**Structure:** early years show negative returns (fees and costs, investments held at cost), then value creation and exits lift returns: the shape of a J. **Weave:** evergreen funds can soften the J-curve for wealth clients because money goes into an existing portfolio INFERRED. **Trap:** promising the upswing.

**36. What is the difference between gross and net returns?** [S397]
Tests: honesty in reporting.
**Structure:** gross is before fees and carry; net is what the LP actually keeps. Always lead with net to a client. **Weave:** NAX4 predecessors: 23% gross, 19% net IRR [S335] REPORTED. **Trap:** quoting gross without saying so.

**37. What is a GP commitment and why does it matter to LPs?** [S397]
Tests: alignment of interest.
**Structure:** the manager invests its own money in the fund, so it shares losses and gains. **Weave:** ILPA lists "alignment of interest" as a guiding principle [S317]; KKR and its people have about $30bn invested in or committed to its own funds and companies [S201]. **Trap:** treating it as a formality.

**38. Explain management fees, carried interest and the hurdle in plain English.** INFERRED
Tests: fee literacy.
**Structure:** a yearly fee (around 1.5% to 2% of commitments) pays running costs; carry (often 20%) is the manager's share of profits; the hurdle (often 8%) is what LPs earn first. **Weave:** K-PEC and K-INFRA charge 1.25% management fees on main classes [S111] [S112]. **Trap:** saying "2 and 20" applies to every fund.

**39. What is a side letter, and what is an MFN clause?** [S399]
Tests: legal-commercial awareness.
**Structure:** a side letter gives one LP extra terms (fee breaks, reporting, co-investment rights); an MFN clause lets an LP claim terms given to similar or smaller LPs. **Weave:** side letters are part of manager selection INFERRED. **Trap:** implying side letters are secret favours; they are negotiated and disclosed under rules INFERRED.

**40. What is a co-investment and why do LPs want them?** INFERRED
Tests: product knowledge tied to KCM.
**Structure:** investing directly in one deal alongside the fund, usually with low or no fees; lowers average fees and lets LPs build exposure. **Weave:** PitchBook tracks $37.5bn of co-investment fundraising in the 12 months to June 2026 [S260]; KCM syndicates co-investments [S70]. **Trap:** forgetting the LP must decide fast.

**41. What is a redemption gate or cap, and how would you explain one to a wealth client?** INFERRED
Tests: honest liquidity communication.
**Structure:** evergreen funds limit how much can leave each quarter (often about 5%); if requests exceed it, payouts are pro-rated. Explain it before the sale, not when the queue forms. **Weave:** K-FIT example [S338]; Blackstone's BCRED reportedly kept its 5% cap in Q3 2026 with requests near 10% [S340] REPORTED. **Trap:** calling a gate a failure or a default.

## F. Behavioural (7)

Answer behavioural questions in this order: Situation in one sentence, your Task, the Actions you took (most of the time), the Result with a number if possible, and what you Learned. Keep "we" for the team and "I" for your own actions INFERRED.

**42. Tell me about a time you explained something complex simply.** [S397] [S399]
Tests: the core KCS skill.
**Structure:** who the audience was, what they misunderstood, how you changed the explanation, how you knew it worked. **Weave:** the London advert's "tailor messages to suit different audiences" [S388]. **Trap:** an example where the audience was already expert.

**43. Tell me about delivering excellent service under pressure.** [S397]
Tests: support mindset.
**Structure:** deadline, a person relying on you, what you did beyond the minimum, the result. **Weave:** KCS adverts list "Strong support mindset" [S390]. **Trap:** making yourself the hero at someone else's expense.

**44. Tell me about a mistake you made, or a time your judgement was wrong.** [S394]
Tests: honesty, ownership, "arrogance kills".
**Structure:** a real error, owned in the first sentence, the fix, the habit you built. **Weave:** optional link to Walter Industries: owning a bad outcome [S384]. **Trap:** a disguised strength ("I work too hard").

**45. How do you manage competing deadlines and keep accuracy high?** [S397] [S398]
Tests: the RFP and DDQ workload.
**Structure:** your system (list, priorities, check step), one example, one error you caught. **Weave:** RFP and DDQ answers become representations to clients, so errors carry risk INFERRED. **Trap:** "I just work late."

**46. Tell me about a time you disagreed with a team.** [S396]
Tests: one-firm behaviour.
**Structure:** the disagreement, how you listened, the evidence you used, the outcome, the relationship afterwards. **Weave:** "think in terms of 'we', not 'I'" [S389]. **Trap:** a story where you were simply right.

**47. Tell me about handling confidential information.** [S398] [S399]
Tests: judgement and discretion.
**Structure:** what the information was (in general terms), what you did to protect it, why it mattered. **Weave:** KYC onboarding is an analyst task [S388]; KCS works next to KCM, where information barriers apply INFERRED. **Trap:** revealing the confidential detail while telling the story.

**48. How have you used AI tools responsibly in your work or studies?** [S388] INFERRED
Tests: a skill KKR now asks for in writing.
**Structure:** the task, the tool, how you checked the output, what you would never hand to a tool. **Weave:** London advert: "use generative AI effectively and responsibly" [S388]; interns "encouraged to leverage KKR's approved AI tools" (brief). **Trap:** "I use it for everything" or "I never use it".

## G. Case formats (5)

### 49. Pitch a KKR fund to a UK pension fund in two minutes — CASE

**TESTS** Structure, audience fit, honesty about risk. No source confirms this exact task at KKR London [S397] (writing or case exercise "may" be set) INFERRED.

**STRUCTURE** (1) The client's need: long-term liabilities, inflation link, new UK rules. (2) The product in one sentence. (3) Why KKR: team, track record, scale. (4) Two risks, said plainly. (5) Next step: a meeting with the product specialist.

**WEAVE** GII V: $19.2bn, Core+ infrastructure in North America and Western Europe; about $120bn infrastructure equity managed; about 160 infrastructure executives [S334]. UK link: KKR and RWE's Norfolk Vanguard offshore wind JV [S181]. UK pensions face a 10% private-asset reserve-power cap [S346].

**THE TRAP** Promising returns. Quote past performance as past, net of fees, and say "not a guarantee".

### 50. Explain private credit to a family office — CASE

**STRUCTURE** Analogy first ("lending to companies directly, instead of a bank"), then why borrowers use it (speed, certainty), why lenders like it (income, floating rates, security), the risks (defaults, liquidity, concentration), and the KKR angle.

**WEAVE** KKR's alternative credit includes $91bn of asset-based finance and $48bn of corporate private credit, of which $39bn direct lending [S332]. McVey favours "collateral-based cash flows" [S360]. Family offices are offered "Comprehensive Debt Solutions" and co-investment [S84].

**THE TRAP** Ignoring 2026's redemption headlines. Raise them yourself, calmly [S337].

### 51. Write a two-paragraph investor update — WRITING

**TESTS** Writing exercises are common in IR: TPG's process includes a writing sample [S399], and a KKR KCS associate guide lists a possible writing exercise [S397] REPORTED.

**STRUCTURE** Paragraph 1: what happened, with two numbers and the date. Paragraph 2: what it means for the reader, one risk, and what happens next. Subject line that says the news. No adjectives you cannot back.

**WEAVE** Practice prompt: KKR's Q2 2026: AUM $796bn, $34bn raised in the quarter, "strongest monetization quarter ever" [S330] [S74]. Next update: Q3 results 9 Nov 2026 [S333].

**THE TRAP** Writing a press release. An investor update answers "what does this mean for my money?".

### 52. A wealth client is angry that redemptions were pro-rated — CASE

**STRUCTURE** Listen and acknowledge. Restate the fund terms factually. Explain why the cap exists (protects remaining investors from forced selling). Give the timeline and what is being paid. Offer a follow-up with the product team. Log it.

**WEAVE** K-FIT paid about 80% of requests in Q1 2026 and 100% in Q2 [S338] REPORTED. Nuttall: "What you don't read about in the articles is the inflows" [S362].

**THE TRAP** Promising an exception you cannot grant. "Our word is our bond" cuts both ways [S384].

**53. A DDQ question arrives that you cannot answer** CASE

**STRUCTURE** Do not guess. Find the owner (product, legal, compliance, risk, operations), check prior approved answers, agree a deadline with the RM, get sign-off, keep a record.

**WEAVE** The London analyst works with "Product teams, Investment teams, Operations, Finance, Legal, Compliance, Risk" to answer client requests [S388]. A Dublin team (CAPS) completes tenders and DDQs [S106].

**THE TRAP** Inventing a plausible answer. A DDQ answer is a representation to a client INFERRED.

### H. Curveballs (6)

**54. What is the best decision you made that turned out badly?** [S384] INFERRED
Tests: whether you judge decisions by process, not outcome.
**Structure:** the decision, why it was sound at the time, what went wrong, what you would keep and change. **Weave:** Kravis's "best deal" was a bankruptcy [S384]. **Trap:** a decision that was simply bad.

**55. What would you change about KKR?** INFERRED
Tests: respectful critical thinking.
**Structure:** acknowledge you see it from outside, pick one area, give evidence, frame it as a question. **Weave:** wealth scale gap with Blackstone [S216]; insurance capital being trimmed [S3]. **Trap:** attacking past scandals or the DOJ matter. If raised, stick to public facts: a $250m civil settlement that KKR says outside law firms will reimburse [S349].

**56. Explain KKR to a 12-year-old.** INFERRED
Tests: plain language under pressure.
**Structure:** "People and pension funds give KKR money to look after for many years. KKR buys and lends to businesses, improves them, and gives the money back with more on top." Then stop. **Trap:** using one acronym.

**57. What is something you have changed your mind about?** INFERRED
Tests: intellectual honesty.
**Structure:** old view, the evidence that changed it, new view, what you do differently. A market example works well. **Trap:** a trivial example.

**58. What would you never say to a client?** INFERRED
Tests: conduct awareness.
**Structure:** anything you cannot back up; a promise of returns; confidential information about another client or a deal. **Weave:** UK rules require financial promotions to be fair, clear and not misleading INFERRED; KKR's wealth site gates content to professional or accredited investors [S83]. **Trap:** a joke answer.

**59. What question should I have asked you?** INFERRED
Tests: self-knowledge and a last chance to add evidence.
**Structure:** name a strength not yet covered, give the 30-second proof, link it to KCS. **Trap:** "None, I think we covered everything."

## Ten questions only a researcher could ask

End every interview with one or two of these. Choose by interviewer: a junior gets the "what does an intern do" style; an MD gets the strategy style. Each is grounded in a public source, so you can say where the idea came from if asked. Never ask about anything personal INFERRED.

| # | Question | Why it is smart |
|---|---|---|
| 1 | "In Europe the European Head of Institutional Client Solutions also leads Capital Markets. How does that shape how London KCS and KCM work together on co-investment?" | Shows you read the bios [S156] and understood the "partnership with Capital Markets" line. |
| 2 | "Four of the seven new KCS managing directors for 2026 were in EMEA. Does that reflect where you expect client growth?" | A fact few candidates will have counted [S165]. Invites a strategic answer. |
| 3 | "After launching evergreen private equity with Quilter Cheviot, how is a UK wealth manager conversation different from a US platform conversation?" | London-specific and recent [S177]. Shows you know the wealth channel. |
| 4 | "Did the Q1 redemption episode in private credit change how KCS educates wealth partners about liquidity at the point of sale?" | Links news to the job [S337] [S338] without being negative. |
| 5 | "As LGPS pools consolidate and DC megafunds form, do you expect UK clients to want more separate accounts and fewer fund tickets?" | Uses UK law and market change [S346] [S347] and the "customized products" line in the KCS text. |
| 6 | "Private wealth is now a larger share of KKR's AUM than pensions. How has that changed a junior's week in London?" | A precise, little-known 10-K fact [S71], turned into a question about the work. |
| 7 | "London has several infrastructure product specialists. On a raise like Global Infrastructure Investors V, how do product specialists and relationship managers split the work?" | Shows knowledge of team shape [S150] and the latest close [S334]. |
| 8 | "KKR said client solutions people will help build the new Milan office. Is the plan to put more coverage on the ground in each country, rather than covering from London?" | Uses the 28 May 2026 announcement [S169]. Shows you think about how coverage is organised. |
| 9 | "Henry McVey's team writes about a Total Portfolio Approach. Are clients now asking KCS for whole-portfolio advice rather than single funds?" | Connects KKR's house view [S90] [S360] to client conversations. |
| 10 | "The London analyst advert asks for generative AI skills. Where has AI changed DDQ or RFP work, and where does the team insist on human checking?" | Grounded in the advert [S388]; shows judgement on accuracy, not just enthusiasm. |

**DON'T ASK**

Anything answered on page one of kkr.com; pay or hours in a first round; questions about a named person's private life; or "what does KKR do?". Also avoid quoting an interviewer's own bio back to them in detail: one light reference is enough INFERRED.

## Seven-day plan to 18 October, then the run-up

| When | Do this |
|---|---|
| 11 to 13 Oct | Open the SEO form, screenshot every question, draft answers offline using the five-step scaffold and the cover letter blocks. Decide your ranking and write the one-line logic. |
| 14 to 16 Oct | Cut to word limits. Check every number against this pack. Ask someone outside finance to read it: if they cannot say what KCS does afterwards, rewrite. |
| 17 Oct | Submit a day early. Save a PDF copy of everything you sent INFERRED. |
| Late Oct onward | Two timed aptitude tests; record five HireVue answers; rehearse questions 16 to 41 aloud; one KKR Insights piece a week [S394] [S374]. |
| 9 Nov 2026 | Read KKR's Q3 2026 results the same day [S333] REPORTED. Update your three headline numbers. |
| 1 Feb 2027 | SEO AICON 2027 runs in London; its panel titles are a free list of what LPs care about [S378] CONFIRMED. |

PART 10

# The scenario playbook: KCS edition

One method for any "what would you do?" question, the order that decides every collision, 33 rehearsed scenarios built on the real KCS job text, five composure tests and a CV grill drill.

Scenario questions are where client-facing interviews are won or lost. The interviewer is not checking whether you know the rulebook. They are checking whether you stay calm, put things in the right order, and say what you would actually do. This part gives you one repeatable method and then makes you practise it on every line of the KCS job description.

**HOW TO READ THIS PART**

Everything labelled **method** is our advice on how to answer: the protocol, the priority order, the counters and the drills. It is not a fact about KKR. Facts about KKR, its rules and the market carry a source ID and a confidence tag, exactly as in the rest of the pack. Where a scenario is invented for practice, it says so. KKR has not published its scenario questions; the closest evidence is the KCS job postings and the prep-site question lists [S397, S399] REPORTED .

### Why scenarios matter more for KCS than for the investing teams

KKR's own adverts for KCS roles ask for judgement in front of clients, not modelling. The London analyst posting wants "Maturity, presence, sound judgment, and ability to form and express opinions" and the "ability to read information/situations from varying perspectives and tailor messages to suit different audiences" [S388] CONFIRMED. The Frankfurt KCS intern posting asks for a "Strong support mindset" and attention to detail, and lists tasks such as client requests, due diligence questionnaires and RFPs [S390] CONFIRMED. A scenario question is the cheapest way for an interviewer to test all of that in two minutes INFERRED.

KKR also tests character directly. Henry Kravis writes that when KKR interviews candidates "we look beyond financial acumen, strategy and leadership skills. We look for like and trust and we look to understand who the person is" [S385] CONFIRMED. He adds, "Those who are arrogant fail this test" [S385] CONFIRMED. A scenario under pressure shows exactly that: whether you stay honest and humble when it would be easier not to.

## The four-step protocol: steady, sort, act, close

**Method.** Every scenario answer has the same skeleton. Four steps, 45 to 75 seconds in total. Shorter than 45 seconds sounds glib. Longer than 75 seconds and you start adding caveats that weaken the answer. Then you stop and let them push.

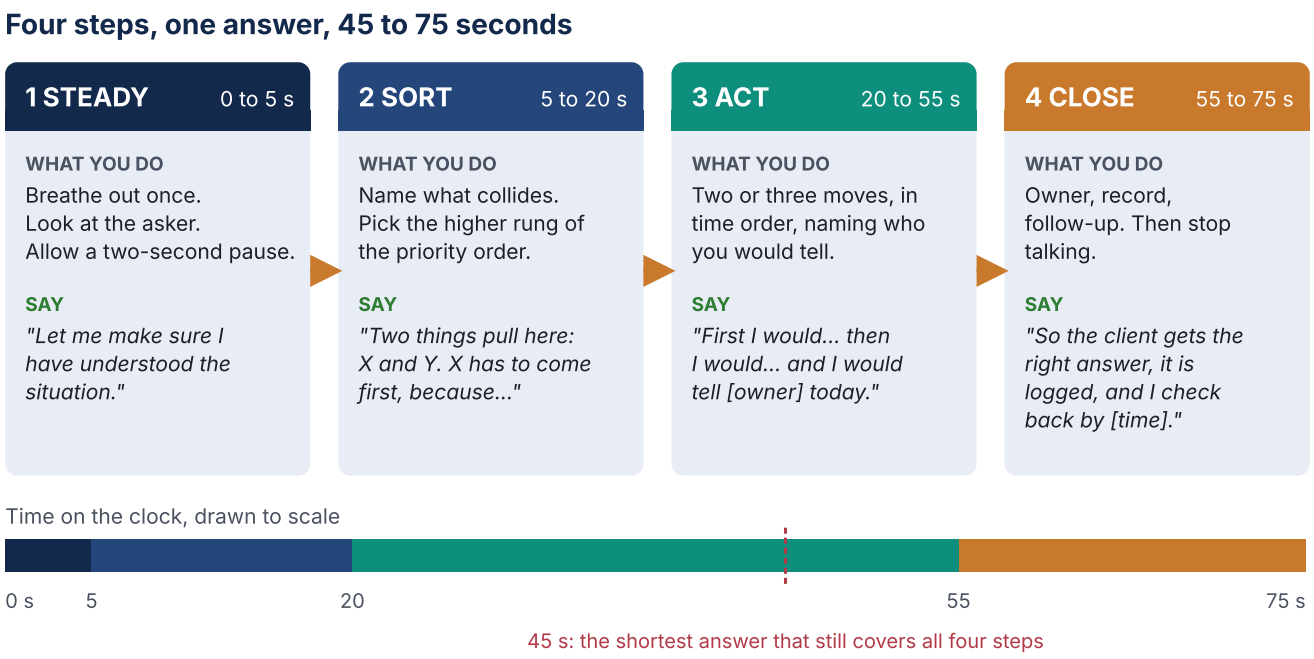

**Figure 81. The four-step protocol.** Most of the time goes on Act, the concrete moves. Steady and Sort are short but they are what make the answer sound calm and ordered. Method, not a KKR rule.

## Step by step, with the exact words

| Step | What it does | Exact phrases (pick one) | Common mistake |
|---|---|---|---|
| **1 Steady**<br>0 to 5 s | Buys two seconds. Shows you heard. Stops you blurting the first idea. | "Let me make sure I have understood." / "So the situation is X, and I have Y minutes." / "Can I check one thing first: is the deck already approved?" | Saying "Great question". It sounds like a stall. A short restatement is better. |
| **2 Sort**<br>5 to 20 s | Names the two good things that collide, then picks the one that ranks higher in the priority order (next section). | "Two things pull here: speed for the client and getting the number right. The number has to come first." / "The tension is between helping my MD and being fair to the other client." | Skipping it. Without Sort, Act sounds like a random list. |
| **3 Act**<br>20 to 55 s | Two or three concrete moves in time order. Each move names a person and a channel. | "First I would email compliance with the deck and the deadline. Then I would tell the MD the ETA. Meanwhile I would send the client the last approved version." | Vague verbs ("I'd escalate it", "I'd communicate"). Say who, how and when. |
| **4 Close**<br>55 to 75 s | Shows the loop is closed: who owns it, where it is recorded, when you check back. Then stop. | "So the client hears from us today, it is logged in the CRM, and I check back at four." / "That way nobody is surprised and there is a record." | Adding "but it depends" after closing. Stop and let them push. |

**WORKED EXAMPLE (PRACTICE SCENARIO, INVENTED)**

**Q:** "A relationship manager asks you to email a client a performance number before a call in ten minutes. You can only find it in last quarter's deck."

**Steady:** "So the call is in ten minutes and the only number I have is a quarter old." **Sort:** "The pull is speed against accuracy. A wrong or stale number is worse than a late one, because the client will use it." **Act:** "First I would tell the RM straight away that I only have last quarter's figure, with its date. Then I would ask the product team for the current approved number. If it does not arrive in time, the RM can say on the call that the updated figure follows in writing." **Close:** "So nothing stale goes out, the RM is not surprised, and I send the right number once approved and log it." (About 55 seconds.)

# The priority order when good things collide

**Method.** Hard scenarios are rarely good against bad. They are good against good: helping your MD against being fair to another client, speed against sign-off. You need a fixed order, decided before the interview, so you never have to invent one under pressure. For a client role at KKR we suggest this order. The lower rung in the picture wins.

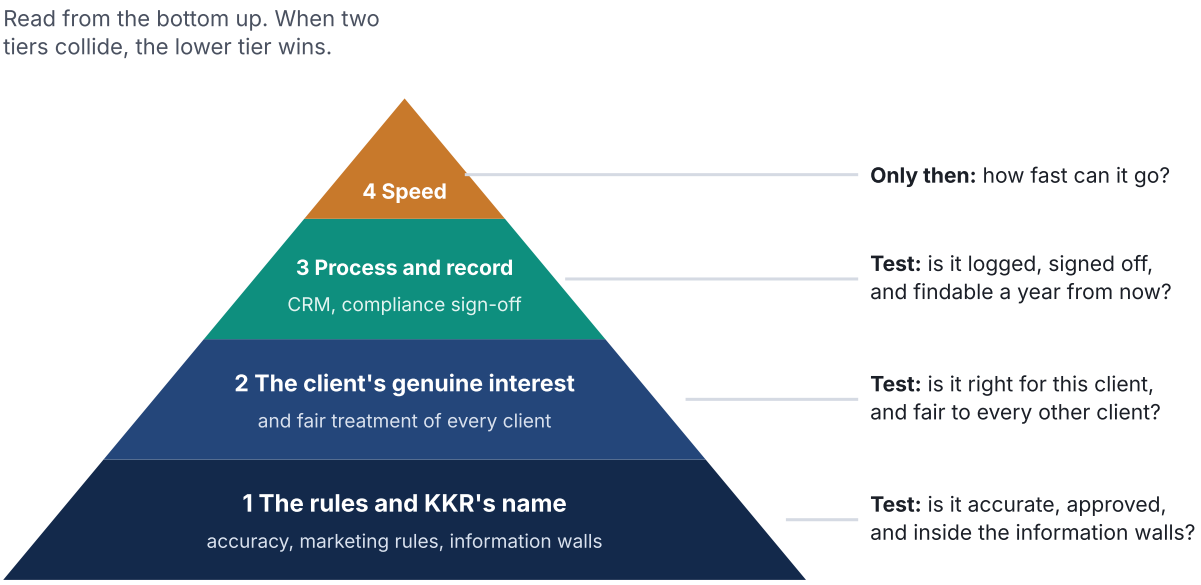

**Figure 82. The priority order for a client role at KKR.** Speed matters, but it is the only tier you may trade away. Method, built on KKR's stated values [S384] and the rules in Part 6.

THE ONE SENTENCE THAT HOLDS EVERY FRAME

**"I would get it right, keep it fair, write it down, and then make it fast."** Learn it word for word. When you lose your thread under pressure, say it to yourself and the answer reorganises itself. Method.

## Why this order, with evidence

| Tier | Why it sits where it does (facts with sources) |
|---|---|
| **1 The rules and KKR's name** | Kravis: "Our business really runs on trust. People don't want to work with you, let alone entrust you with their capital, if they can't trust you will do what you say" [S384] CONFIRMED. Rules on what can be shown to whom are real: KKR's 10-K says EU rules (MiFID II, AIFMD, ELTIF) cover "marketing, investor suitability assessments, and conflicts of interest management" [S70] CONFIRMED, and KKR's wealth site is gated to "Institutional, Professional or Accredited Investors" [S83] CONFIRMED. KCS works next to KKR Capital Markets, which underwrites and syndicates deals [S70] CONFIRMED, so information walls matter INFERRED. Once broken, nothing lower down can repair it. |
| **2 The client's interest, and fairness to all clients** | KKR's client pitch is "Trusted Partner" and "Enduring Relationships" [S81] CONFIRMED. Fairness between clients has been tested: in 2015 the SEC found KKR misallocated more than $17m of broken-deal costs to its flagship funds instead of sharing them with co-investors; KKR paid nearly $30m [S20] CONFIRMED. Helping one client by quietly disadvantaging another fails this tier. |
| **3 Process and record** | KKR wealth postings ask for "meeting/call notes in CRM" (Salesforce) [S103] CONFIRMED. In January 2025 KKR paid $11m in an SEC sweep over staff using unapproved messaging apps for business [S29] REPORTED. Records are how the firm proves tiers 1 and 2 later. |
| **4 Speed** | Speed is real service: the Frankfurt KCS intern supports relationship managers on "ad-hoc client requests" [S390] CONFIRMED. But a fast wrong answer becomes a representation to a client INFERRED. So speed is the tier you trade, never the others. |

**DON'T SAY THIS**

"The client always comes first." It sounds nice and it is the most common trap. If the client wants an unapproved number, or wants to jump ahead of another client, "client first" leads you into the wrong answer. Say instead: "The client's real interest comes first, and that includes getting an accurate answer and being treated the same as everyone else."

## Eight ways interviewers break a frame, and the counter to each

**Method.** Your "frame" is the order you chose in Sort. A good interviewer will try to knock you off it, on purpose, to see whether you fold. They are not being rude; it is the test. Each attack has a counter that keeps the frame and stays warm. The rule for all eight: **acknowledge the pressure, keep the order, offer a better option.**

**1 Interruption**

SOUNDS LIKE
*"Stop. Just tell me what you'd actually do."*

COUNTER
Give the action in one line, then offer the why: "I'd email compliance now. Shall I say why?"

**2 Flat contradiction**

SOUNDS LIKE
*"That's wrong. Surely the client comes first."*

COUNTER
Agree with the true part, keep the order: "They do, and what serves them is an accurate answer."

**3 Silence**

SOUNDS LIKE
*(Nothing. They wait for you to fill the gap.)*

COUNTER
Do not add or retract. Count three, then ask: "Would it help if I went one level deeper?"

**4 Escalation**

SOUNDS LIKE
*"Now the MD is furious and the client is leaving."*

COUNTER
Stakes moved; the order did not: "Then it matters even more that what we send is right."

**5 Authority squeeze**

SOUNDS LIKE
*"I'm the partner. I'm telling you to send it."*

COUNTER
Respect, then the rule: "Understood. I'll get sign-off now so it can go within the hour."

**6 False choice**

SOUNDS LIKE
*"Either you send it now or we lose the client."*

COUNTER
Find the third door: "Could we send the last approved version now and the update once signed?"

**7 Knowledge trap**

SOUNDS LIKE
*"Which FCA rule is that, exactly? Number?"*

COUNTER
Admit the edge, show the method: "I don't know the number. I'd check with compliance before acting."

**8 Invitation to badmouth**

SOUNDS LIKE
*"Your old boss sounds useless. Rivals are worse?"*

COUNTER
Decline, pivot to facts: "I'd rather talk about what I learned, and what we can show on our own."

**Figure 83. Eight frame breakers and their counters.** Top row: pressure on your answer. Bottom row: pressure on you. Every counter acknowledges, keeps the order and offers a better option. Method.

| Attack | What they are really testing | Longer counter, ready to say |
|---|---|---|
| 1 Interruption | Can you lead with the action, the way a busy MD needs it? | "I'd tell compliance before anything goes out. The reason is that once a client has a number, they use it." Then wait. |
| 2 Flat contradiction | Will you abandon a sound answer because someone senior frowns? | "I see why it looks that way. I'd still put accuracy first, because a wrong number hurts the client more than a late one. If I've missed a fact, tell me and I'll rethink." |
| 3 Silence | Do you panic and start retracting? | Hold eye contact, count three, then: "That's my answer. Is there a part you'd like me to go deeper on?" |
| 4 Escalation | Does pressure change your principles, or only your tactics? | "If the client is upset, I'd want the RM to call them today. What I wouldn't do is fix the relationship with something we can't stand behind." |

| Attack | What they are really testing | Longer counter, ready to say |
|---|---|---|
| 5 Authority squeeze | Respect for hierarchy versus spine. In KKR's "Our word is our bond" story, Kravis reprimands an employee who bent a deal in KKR's favour [S384] CONFIRMED. | "You're senior and I'd want to help. The fastest way I can help is to get it signed off now. Can I tell compliance it's for you and it's urgent?" |
| 6 False choice | Can you find the option they hid? | "Those aren't the only two options. We could send the last approved version, or the RM could call with the context, and the new deck follows when it's approved." |
| 7 Knowledge trap | Do you bluff? Bluffing in a client role is the real failure INFERRED. | "I don't know the rule reference. I know that marketing material has to be approved and fair, and I'd check the detail with compliance rather than guess." |
| 8 Badmouth | Professionalism and arrogance. Kravis: "There is something that eats away at like and trust. It is arrogance" [S384] CONFIRMED. | "I don't think that's fair to them, and it wouldn't help the client. I'd compare on public facts, like net returns for the same vintage, and let the client judge." |

## Staying calm physically

**Method.** Composure is partly physical. These are practical, not mystical.

### BEFORE THE INTERVIEW

- **Rehearse out loud, timed.** Use your phone stopwatch. A rehearsed 60-second answer feels short in the room; an unrehearsed one feels endless.
- **Write the one sentence** ("get it right, keep it fair, write it down, then make it fast") on the first page of your notepad.
- **Eat and drink water an hour before.** Low blood sugar shortens your fuse.
- **Be kind to everyone in the building.** Kravis says KKR watches how candidates treat people they are not trying to impress [S385] CONFIRMED.

### IN THE MOMENT

- **One slow breath out** before Step 1. A long exhale is the quickest way to slow down.
- **Feet flat, hands still** on the table or your lap. On video, sit back slightly from the camera.
- **Lower your pace,** not your volume. Pauses read as thought.
- **Write two words** on your pad when the question lands (for example "speed / accuracy"). It anchors Sort.
- **If you blank:** "Can I take five seconds to order my thoughts?" Nobody marks you down for that.

## The scenario ladder: three rungs for every duty line

Below are 33 practice scenarios. They are built on the seven lines of KKR's official KCS team description and on the four intern duty lines. Each line has three rungs: **easy** (tests that you understand the job), **medium** (two good things collide) and **hard** (pressure plus a twist). The scenarios themselves are invented for practice; the facts inside them carry sources.

**WHERE THESE LINES COME FROM**

Every duty and qualification line here is quoted from KKR's own 2027 London internship description, as published on the SEO London listing and the attached team descriptions [Advert]. The core sentence reads: "summer interns will be involved in helping identify attractive investment themes and opportunities, synthesizing industry and market data and analysing potential investments. Interns are encouraged to leverage KKR's approved AI tools to accelerate their work, deepen their learning, and contribute fresh perspectives on how emerging technology can enhance the way we operate." The SEO application form itself sits behind a login and was not read [S392].

## The scenario ladder: 11 duty lines, 33 rungs

| Duty line | EASY | MEDIUM | HARD |
|---|---|---|---|
| **KKR'S KCS TEAM DESCRIPTION (7 LINES)** | | | |
| **A Relationship managers in direct outreach to clients** | Brief the RM on a family office | Client asks you for a number directly | Angry client after a redemption is pro-rated |
| **B Product specialists providing support and expertise** | Update figures in a quarterly deck | "Make the fund sound risk-free" | Litigation question in a DDQ, due tonight |
| **C Junior resources serving in a generalist capacity** | Three RMs, three requests, one hour | "Skip the CRM note," says the RM | Senior client insists on WhatsApp |
| **D Relationship-focused, solutions-oriented, customised products** | What could KKR tailor for a family office? | Client wants a fee break you can't give | An SMA that would jump the allocation queue |
| **E Facilitate client access to products across the platform** | Infra client asks about private credit | Private bank wants the institutional deck | LP wants KKR to buy its old fund stake |
| **F Integrated approach: leverage all KKR executives globally** | Bring the house view to a client meeting | Deal team ignores your client question | Client quizzes the investor on a live bid |
| **G Partnership with Capital Markets in syndication and distribution** | Explain syndication in 30 seconds | Co-invest list; one client opted out | Wall-crossed client hits reply-all |
| **INTERN DUTY LINES (4 LINES)** | | | |
| **H Identify investment themes** | Name one theme and who it matters to | Your theme rests on one article | Trustee: "AI data centres are a bubble" |
| **I Synthesise industry and market data** | The fundraising market in 30 seconds | Three AUM figures in one deck | 9am deadline, gaps: "just estimate it" |
| **J Analyse potential investments** | How should a client judge a fund? | "Is our fund better than theirs?" | Explain a 1.0x fund to a re-up prospect |
| **K Use KKR's approved AI tools** | How would you use AI in this job? | Paste a client DDQ into a public chatbot? | AI drafts a number with no source |

**Figure 84. The ladder overview.** Each row is one line of the job; each cell is a scenario card in the pages that follow (A1 to K3). Practise across a row (easy to hard) to feel the pressure build, or down a column to drill one difficulty level. Lines A to G: KKR's KCS team description. Lines H to K: the intern duty lines. Scenarios are invented for practice.

## A. "Relationship managers in direct outreach to clients"

Relationship managers (RMs) own a client list, set meetings and close commitments. A junior supports them. The London KCS analyst "will work closely with Relationship Managers across EMEA" [S101] CONFIRMED, and the Singapore KCS intern prepares "client briefing materials" [S107] CONFIRMED.

### A1. Brief the RM on a family office before tomorrow's meeting — EASY

**SETUP** An RM asks you at 5pm for a one-page briefing on a European family office she meets at 9am. You have never heard of them.

**THE TRAP** Dumping everything you find, including blog rumours, into four pages; or sending it at 8.45am with no time for her to read it.

**SAY** "I'd first ask what the meeting is for: a new fund, a re-up or a check-in. Then one page: who they are, what they already hold with KKR from the CRM, recent public news, and three questions she might want to ask. I'd mark anything I couldn't verify, and send it by 8pm so there is time to correct it."

**WHY IT WORKS** It mirrors the real task list ("preparing client briefing materials", "maintaining CRM data") [S107] CONFIRMED and puts accuracy (tier 1) before polish. Asking the purpose first is the "tailor messages to suit different audiences" skill KKR asks for [S388] CONFIRMED.

**THE TWIST** "She says: no time to check, just send what you've got." **Hold:** "I'd send it, with the unverified lines clearly marked, so she knows which facts she can say out loud."

### A2. A client emails you directly for a number — MEDIUM

**SETUP** The RM is on holiday. Her client emails you (copied on an old thread): "What's the latest net IRR on the infrastructure fund? Need it for our committee paper."

**THE TRAP** Answering from a deck you found on the drive. An intern quoting a performance number to a client is giving a representation the firm has not approved INFERRED.

**SAY** "Two things pull: being responsive and giving a number we can stand behind. The number comes first. I'd reply within the hour to say I've passed it to the right person, then go to the RM's cover and the product team. The figure goes out from them, from approved material, and I'd log the request in the CRM."

**WHY IT WORKS** KKR's London analysts answer client requests by "Collaborating with various internal divisions globally" [S101] CONFIRMED; product teams "own marketing materials" [S106] CONFIRMED. Fast acknowledgement keeps speed in the answer without trading accuracy.

**THE TWIST** "Just give me the rough number, I won't hold you to it." **Hold:** "A rough number from me ends up in your committee paper. I'd rather you have the exact one tomorrow morning."

### A3. An angry client after a redemption is pro-rated — HARD

**SETUP** A private bank that distributes a KKR evergreen credit fund calls the RM line, furious: its clients asked to redeem and only got part of their money. "We want out of everything with KKR."

**THE TRAP** Promising liquidity you can't give, or defending the fund so hard you stop listening. Also guessing figures.

**SAY** "First I'd listen and acknowledge: their clients are upset and they have to face them. Then I'd make sure the RM or product specialist calls back today with the approved explanation: the cap is in the fund terms and protects the investors who stay. I'd offer the approved FAQ and the date of the next window. I wouldn't promise anything myself, and I'd log the call."

**WHY IT WORKS** This happened. In Q1 2026 investors in K-FIT, KKR's retail private credit fund, "tried to redeem 6.3% of shares" and the fund paid about 80% of requests; in Q2 requests fell to 1.65% and were paid in full [S338] REPORTED. Across the industry $20.8bn of redemptions were requested in Q1 [S337] REPORTED. Fairness to every client (tier 2) is the logic of the cap INFERRED.

**THE TWIST** "Blackstone paid above its cap. Why can't you?" (Blackstone and Oaktree did pay above the 5% cap in Q1 [S337] REPORTED.) **Hold:** "Each fund has its own terms, and I won't comment on theirs. What I can do is make sure you have our exact terms and timetable today."

## B. "Product specialists providing specific support and expertise"

Product specialists own the story of each fund. A KKR Dublin posting says the team owns "marketing materials, developing thought leadership and leading investor diligence processes" and completes "tenders/Due Diligence Questionnaires" with the internal CAPS team [S106] CONFIRMED.

### B1. Update the figures in a quarterly deck — EASY

**SETUP** A product specialist asks you to roll the quarterly client presentation forward with new figures.

**THE TRAP** Copying last quarter's file and changing the numbers you notice, or pulling a figure from a news article.

**SAY** "I'd take each number from its owner's approved source, keep a small log of source and as-of date for every figure, and ask someone to check it before it goes to compliance."

**WHY IT WORKS** "Develop and update marketing materials, quarterly presentations, and client reporting documents" is a listed KCS intern task [S107] CONFIRMED. A source log is the cheapest insurance against tier 1 failures INFERRED.

**THE TWIST** "Two internal files give different AUM." **Hold:** "I'd check the dates first. KKR's AUM was $744bn at 31 Dec 2025 and $796bn at 30 Jun 2026 [S70, S74] CONFIRMED, so both can be right. I'd use the one the owner approves and label the date."

### B2. "Make the infrastructure fund sound risk-free" — MEDIUM

**SETUP** An RM wants talking points for a cautious UK pension. "Make the infra fund sound like it has no risk."

**THE TRAP** Writing it. Marketing to investors has to be fair and balanced; under the UK regime financial promotions must be approved and not misleading INFERRED (see Part 6).

**SAY** "I'd change the emphasis, not the facts. For a cautious client I'd lead with what makes infrastructure steadier, long contracted or regulated cash flows, and then state the risks plainly. Balanced material is also more persuasive to a pension's consultant."

**WHY IT WORKS** Facts to use: Global Infrastructure Investors V closed at $19.2bn, KKR's largest infrastructure fund, and is a "Core+" strategy [S334] CONFIRMED. Tailoring the message is the skill KKR names [S388] CONFIRMED; changing facts is not.

**THE TWIST** "Every manager rounds the edges." **Hold:** "Maybe, but our pitch is trust. If the client finds the edge later, we lose more than this fund."

### B3. A litigation question in a DDQ, due tonight — HARD

**SETUP** A due diligence questionnaire (DDQ: the long standard list of questions investors send before committing) is due tonight. One question asks about regulatory and legal matters, including the US Department of Justice case. The product specialist is on a plane.

**THE TRAP** Writing your own summary from news articles, or leaving it blank without telling anyone.

**SAY** "Legal wording is not mine to write. I'd find the firm's approved statement, flag the question to legal and compliance through the CAPS team now, and tell the client's RM. If approval can't land tonight, I'd ask the RM to request a short extension for that one answer rather than send something unapproved."

**WHY IT WORKS** The facts exist and are public: on 26 Aug 2026 KKR settled the DOJ's HSR case for $250m and said the penalty "will be fully reimbursed by outside law firms" [S349] CONFIRMED. Using approved language is tier 1; asking for an extension trades only speed (tier 4).

**THE TWIST** "The client is on the phone asking what you personally think of the case." **Hold:** "My personal view isn't what you need for your file. You'll have the firm's statement in writing, and the RM can take you through it."

## C. "Junior resources serving in a generalist capacity"

Generalist means you serve several RMs and products at once. The London posting lists reporting, fundraising support, KYC onboarding, client requests, investment updates, events and budgeting [S101] CONFIRMED.

### C1. Three RMs, three requests, one hour — EASY

**SETUP** In one hour you get: event logistics for next month's client dinner, a CRM clean-up, and two slides for a client meeting at 3pm.

**THE TRAP** Doing them in the order they arrived, or saying yes to all with no times.

**SAY** "I'd write all three down, check each deadline, and do the client-facing slides first because the meeting is fixed. I'd tell each RM when they'll get theirs. If two clash, I'd ask a more senior person to set the order."

**WHY IT WORKS** It shows multi-tasking by deadline and visibility, not heroics. Telling people the ETA is the "support mindset" KKR asks for [S390] CONFIRMED.

**THE TWIST** "One RM says hers is most urgent but won't give a time." **Hold:** "I'd ask what time the client needs it. A real deadline settles it; if she still can't say, the senior person decides."

### C2. "Skip the CRM note," says the RM — MEDIUM

**SETUP** After a client meeting you attended, the RM says: "Don't bother logging it, I'll remember."

**THE TRAP** Agreeing to be liked. Notes are how the firm remembers clients when people move and how it proves what was said.

**SAY** "I'd offer to draft the note in five minutes for her to check: who attended, what was asked, what we promised and by when. It costs her nothing and it protects her."

**WHY IT WORKS** KKR postings ask for "meeting/call notes in CRM" in Salesforce [S103] CONFIRMED. Process and record is tier 3, above speed.

**THE TWIST** "The client said something sensitive. Leave that out." **Hold:** "I'd keep the note factual and business-only, and if I wasn't sure what should be recorded, I'd ask compliance rather than decide alone."

**C3. A senior client insists on WhatsApp** — HARD

**SETUP** At an event, a senior client takes your number. That evening he messages you on WhatsApp asking for the AGM dial-in and "a quick view on how the fund is doing".

**THE TRAP** Replying on WhatsApp because he is important and it is quick.

**SAY** "I'd reply only through approved channels. I'd move it to work email that evening with the dial-in, say the RM will follow up on performance, and tell the RM what happened."

**WHY IT WORKS** In January 2025 KKR paid $11m as one of 12 firms fined $63.1m by the SEC for staff using unapproved messaging apps for business communications [S29] REPORTED. That is tier 1 and tier 3 together.

**THE TWIST** "He says he only uses WhatsApp and you'll annoy him." **Hold:** "I'd be warm about it: 'Our rules mean I have to keep business on email, so I've sent it there.' A good client respects that."

## D. "Relationship-focused, solutions-oriented approach, able to deliver customised products"

Customised means more than selling a fund: KKR's family capital page lists "Co-Investment Opportunities", "Customized Portfolio Solutions", "Bespoke Separately Managed Accounts", "Two-Way Sourcing Dialogues" and "Comprehensive Debt Solutions" [S84] CONFIRMED. A separately managed account (SMA) is a "fund of one" for a single large client.

**D1. "What could KKR tailor for a family office?"** — EASY

**SETUP** The interviewer asks: "A family office wants something tailored. What could we offer?"

**THE TRAP** Listing products before asking anything. Solutions start with the client's needs.

**SAY** "I'd ask three things first: how much, for how long, and how much liquidity they need. Then the menu is wide: co-investments alongside the funds, a bespoke separately managed account, or debt solutions for their own businesses. Which fits depends on size and eligibility, which the RM would know."

**WHY IT WORKS** The menu is KKR's own [S84] CONFIRMED. Questions before products is "relationship-focused" in action INFERRED.

**THE TWIST** "They only have $5m." **Hold:** "Then I wouldn't promise bespoke. KKR has a wealth channel built for smaller tickets through private banks [S102] CONFIRMED; I'd ask the RM which route fits."

**D2. A client wants a fee break you can't give** — MEDIUM

**SETUP** A client tells you, the intern, that a rival offered lower fees and asks you to "push internally" for a discount.

**THE TRAP** Promising to get it, or hinting what others pay.

**SAY** "I'd thank them, say plainly that fees aren't my decision, and pass the request to the RM the same day with the details. I wouldn't comment on other clients' terms."

**WHY IT WORKS** KKR's own 10-K lists "pricing and fund terms, including fees" among the factors it competes on [S70] CONFIRMED, so the request is serious and belongs with the decision-maker. Silence on others' terms protects fairness (tier 2).

**THE TWIST** "Just tell me if anyone pays less." **Hold:** "I can't discuss other clients, in the same way we'd never discuss yours."

**D3. An SMA that would jump the allocation queue** — HARD

**SETUP** A large pension proposes a big SMA, on one condition: it gets first pick of every new deal before KKR's flagship fund investors.

**THE TRAP** Saying yes to win a large mandate. It helps one client by quietly hurting others.

**SAY** "The size is attractive, but fairness between clients sits above winning one. I'd take it to the RM and compliance as a question about allocation policy, not a yes or no from me, and suggest what we can offer instead, such as a defined co-investment programme."

**WHY IT WORKS** Big investors do want SMAs: the 10-K notes pensions and sovereign funds prefer "separately managed accounts or specialized investment vehicles" [S70] CONFIRMED. But allocation fairness is policed: the SEC's 2015 broken-deal case was about costs not shared fairly between funds and co-investors [S20] CONFIRMED.

**THE TWIST** "Then we'll go to Blackstone." **Hold:** "That would be a real loss, and I'd make sure the RM hears it today. But a promise we can't keep fairly would cost us more clients than this one."

## E. "Facilitate client access to products and services across KKR's platform"

KKR runs many strategies in one firm: at 30 Jun 2026 its AUM split into Credit and Liquid Strategies $331bn, Real Assets $211bn and Private Equity $255bn [S332] CONFIRMED. Access means matching each client to the right part, through the right specialist.

**E1. An infrastructure client asks about private credit** — EASY

**SETUP** At the end of a meeting about infrastructure, a UK insurer's CIO asks: "Do you do anything in private credit?"

**THE TRAP** Pitching a credit fund yourself from memory.

**SAY** "Yes, credit is KKR's largest business by assets. I'd note the interest, tell the RM, and suggest a follow-up with the credit product specialist who can talk about what fits an insurer."

**WHY IT WORKS** The fact is checkable ($331bn in Credit and Liquid Strategies [S332] CONFIRMED) and the action uses the firm's experts, which is what "connect the dots" means in KKR's own KCS posting [S390] CONFIRMED.

**THE TWIST** "Just email me the credit deck tonight." **Hold:** "I'll ask the RM which materials are approved for you and get them to you quickly." Who may receive which material is a compliance question, not a courtesy INFERRED.

**E2. A private bank wants the institutional deck** — MEDIUM

**SETUP** A private bank asks for the institutional pitch book for a flagship fund "to show a few of our wealthy clients".

**THE TRAP** Forwarding it. Material made for professional investors may not be suitable for individuals.

**SAY** "Different audience, different rules. I'd tell the RM and route it to the wealth team and compliance, who decide what can go to that bank's clients and in what form."

**WHY IT WORKS** KKR's wealth site is restricted to "Institutional, Professional or Accredited Investors" [S83] CONFIRMED. EU rules require "investor suitability assessments" and also apply to distributors [S70] CONFIRMED. In the UK the Consumer Duty has applied to retail products since 31 Jul 2023 [S308] CONFIRMED.

**THE TWIST** "Relax, they're all rich, they count as professionals." **Hold:** "They may, but classification isn't my call. UK exemptions have precise thresholds, for example £100,000 income or £250,000 net assets for high-net-worth status [S307] CONFIRMED. Compliance checks it."

### E3. An LP wants KKR to buy its old fund stake — HARD

**SETUP** A pension short of cash wants to sell its stake in an old KKR fund. It asks whether KKR's own secondaries business could buy it, "quickly, at full value".

**THE TRAP** Saying "I'm sure we can", or dismissing it. The firm on both sides of a trade with its own client is a conflict area INFERRED.

**SAY** "The need is real and common. I'd say we want to help them find liquidity, then take it straight to the RM, because when KKR could be the buyer the conflicts team needs to be involved. There are also outside buyers; the market is deep."

**WHY IT WORKS** Secondaries hit a record $121bn in H1 2026, with good buyout stakes clearing around 90% of NAV [S267] CONFIRMED. KKR now has a secondaries unit, KKR Solutions, after buying Arctos [S355] REPORTED. Amy Lesch, KKR's head of product strategy, sits on the "Global Conflicts and Compliance Committee" [S121] CONFIRMED.

**THE TWIST** "So KKR won't help us?" **Hold:** "We will help. Doing it properly means you can trust the price, which is the point."

## F. "Apply integrated approach by leveraging all KKR executives and capabilities globally"

KKR runs on one shared expense pool and one compensation approach. CFO Rob Lewin: "We run KKR as 1 firm with 1 compensation approach. Relationships travel, ideas travel, lessons learned travel" [S3] CONFIRMED.

### F1. Bring the house view to a client meeting — EASY

**SETUP** An RM asks you for three macro talking points from KKR's research for a client lunch.

**THE TRAP** Inventing your own macro story and presenting it as KKR's.

**SAY** "I'd use the published house view and cite it. The Mid-Year 2026 outlook's message is 'the cycle continues, but the rules of the game are changing': divergence across the economy, a higher 'resting heart rate' for inflation, and 'Security of Everything' as a capital allocation theme. I'd pick the points that match this client's portfolio."

**WHY IT WORKS** All three come from Henry McVey's "Divergence Conundrum" outlook [S360] CONFIRMED. Using colleagues' work is the integrated approach.

**THE TWIST** "The client asks you, the intern, what you think." **Hold:** Give a short view, clearly labelled as yours, then hand back: "That's my own read; the house view is in the paper." KKR wants the "ability to form and express opinions" [S388] CONFIRMED.

### F2. The deal team ignores your client question — MEDIUM

**SETUP** A client asks how a portfolio company is coping with higher energy costs. You email the deal team twice. Silence; they are on a live deal.

**THE TRAP** Answering yourself from a news article, or chasing so hard you annoy them.

**SAY** "I'd make the question easy: one line, the deadline, and a draft answer from approved portfolio updates they can check in a minute. If it's still stuck, I'd ask the RM to raise it. Meanwhile I'd tell the client when to expect it."

**WHY IT WORKS** It respects their time and still serves the client. Answering client requests across "Product teams, Investment teams, Operations, Finance, Legal, Compliance, Risk" is a listed London analyst task [S101] CONFIRMED.

**THE TWIST** "A deal team member replies: 'just tell them it's fine'." **Hold:** "I'd ask him to confirm that in writing, or point me to the latest approved update, so the client gets something we can stand behind."

**F3. A client quizzes the investor on a live bid** — HARD

**SETUP** You are taking notes at a client meeting with a KKR infrastructure investor. The client asks about a live takeover of a London-listed company that is in the press.

**THE TRAP** Helpfully adding what you heard in the office. Information about a live deal in a listed company can be inside information INFERRED.

**SAY** Nothing about the deal. "The investor leads. If I'm asked, I'd say we don't comment on live transactions beyond public announcements. Afterwards I'd note in the CRM that the question was asked and declined, and mention it to compliance if anything was said that worried me."

**WHY IT WORKS** KKR does run live UK public deals: for example the DCC takeover with Energy Capital Partners, announced and voted on by shareholders in 2026 [S356] REPORTED. Only what is public can be discussed (tier 1).

**THE TWIST** "The client says: 'come on, it's in the FT anyway'." **Hold:** "Then you'll have all we can say. Anything beyond the announcement isn't ours to share."

## G. "Work in partnership with Capital Markets in the syndication/distribution of product"

KKR Capital Markets (KCM) "provides syndication services for co-investments in transactions participated in by KKR, our investment vehicles, Global Atlantic, and third-party clients" [S70] CONFIRMED. Syndication means KKR commits to a deal and then offers part of it to clients as a co-investment.

**G1. Explain syndication in 30 seconds** — EASY

**SETUP** "What does it mean that KCS works with Capital Markets on syndication?"

**THE TRAP** Jargon, or claiming to know how KKR allocates internally.

**SAY** "Sometimes KKR commits to more of a deal than its fund needs, then offers the extra to clients as a co-investment. KCM structures and places it; KCS knows which clients want what. Clients like it because co-investments usually carry low or no fees."

**WHY IT WORKS** The 10-K says KKR may "syndicate a portion of our capital commitment to third parties" and must fund any part it cannot syndicate [S70] CONFIRMED. Co-investment fundraising was $37.5bn in the 12 months to June 2026 [S260] CONFIRMED.

**THE TWIST** "Why would KKR give away part of a good deal?" **Hold:** "Clients value it, it deepens relationships, KKR can earn fees on syndication [S70] CONFIRMED, and it lets KKR do bigger deals than one fund could."

**G2. A co-invest list, and one client opted out** — MEDIUM

**SETUP** KCM asks for a list of clients who might want a co-investment. Your CRM shows one large client said last month: "no co-invest calls for now".

**THE TRAP** Including them to make the list look long, because "they always change their mind".

**SAY** "I'd respect the record. I'd send the list without them, add a note that they opted out last month, and suggest the RM checks with them directly if KCM thinks this deal is special."

**WHY IT WORKS** The CRM is the firm's memory of what each client wants (tier 3), and the client's wishes are tier 2 INFERRED. It also avoids widening who sees deal information.

**THE TWIST** "An MD says: put them on, I'll take the blame." **Hold:** "Happy to, once the RM has spoken to them. Then the record is right and nobody is surprised."

**G3. A wall-crossed client hits reply-all** — HARD

**SETUP** A client has been "wall-crossed": brought inside the information wall and given confidential deal details. They email a deal question to a thread that includes several KKR people who are not on the deal, and you.

**THE TRAP** Replying to all with the answer, or forwarding it to "the right person" and widening the circle further.

**SAY** "I wouldn't reply or forward. I'd call the KCM deal lead and compliance straight away so they can contain it and answer the client on the right channel. Then I'd do exactly what compliance says about the email I received."

**WHY IT WORKS** Information walls and wall-crossing apply because KCS works next to KCM, which underwrites and syndicates deals [S70] CONFIRMED; the barrier detail is our inference INFERRED. Speed matters here only in reporting, not in answering.

**THE TWIST** "The client is waiting and furious about the delay." **Hold:** "The deal lead can reply within minutes on the right thread. A fast reply on the wrong one is the bigger problem."

## H. Intern duty: "Identify investment themes"

In KCS a theme is useful when you can say which client it matters to and why. KKR's house view names mega-themes such as "Security of Everything" and "Productivity and Worker Retraining" [S361] CONFIRMED.

**H1. Name one theme and who it matters to** — EASY

**SETUP** "Give me one investment theme you find interesting and tell me which client it suits."

**THE TRAP** A theme with no client, or a buzzword ("AI") with nothing behind it.

**SAY** "Security of Everything: energy, grids, data and defence becoming capital allocation decisions. It suits a long-term pension that wants cash flows linked to growth and inflation. KKR's $19.2bn infrastructure fund close in August shows demand for it."

**WHY IT WORKS** Theme from [S360] CONFIRMED; fund fact from [S334] CONFIRMED; the client link is your own reasoning, so say so INFERRED.

**THE TWIST** "Isn't that just KKR's marketing?" **Hold:** "It's KKR's view, yes. What would prove it wrong is falling power demand or policy reversing; I'd watch those."

**H2. Your theme rests on one article** — MEDIUM

**SETUP** You wrote a short theme note for the team. The interviewer asks how you checked it; honestly, it came from one article.

**THE TRAP** Bluffing that you checked more.

**SAY** "Honestly, one source, which isn't enough. I'd go to primary sources such as company filings, then two data providers, noting their definitions differ, and then find the best counter-argument."

**WHY IT WORKS** Industry numbers really do conflict because providers define "private markets" differently [S260, S262] CONFIRMED. Honesty is tier 1.

**THE TWIST** "The RM loves it and wants to send it to clients." **Hold:** "Then it needs checking and compliance approval first. Anything client-facing goes through that."

### H3. A trustee says "AI data centres are a bubble" — HARD

**SETUP** In a role-play, a pension trustee challenges your AI infrastructure theme: "It's a bubble, and you just want our money."

**THE TRAP** Dismissing the worry, or folding completely.

**SAY** "That's a fair worry and I wouldn't dismiss it. There are real warning signs, such as short tenant leases in some deals. There are also long-term contracts and real power demand. My job is to give you both sides so you can decide."

**WHY IT WORKS** Evidence on both sides: Meta's Hyperion campus was financed with $27bn of bonds, and S&P called its four-year lease renewal unusually short [S289] REPORTED; KKR launched Helix Digital Infrastructure with $10bn+ of initial capital [S3] CONFIRMED.

**THE TWIST** "So you agree we shouldn't invest?" **Hold:** "I'm not saying that either. It's your portfolio; we'll show you the risks and the protections, and you decide."

## I. Intern duty: "Synthesise industry and market data"

Synthesis means turning many numbers into a short, honest message with dates and scope.

### I1. The fundraising market in 30 seconds — EASY

**SETUP** "Summarise the private markets fundraising environment."

**THE TRAP** A pile of numbers with no message.

**SAY** "Smaller in total, concentrated at the top. PitchBook has $1,348bn raised in the 12 months to June 2026, down 12.7%, with 78.2% going to funds over $1bn. KKR raised $133bn in the same period, a record. The big platforms are taking share."

**WHY IT WORKS** Industry [S260] CONFIRMED; KKR [S74] CONFIRMED. One message, three numbers, all dated.

**THE TWIST** "Bain says about $1.3tn, flat. Which is right?" **Hold:** "Both, on their own definitions and periods. Bain's figure is calendar 2025 [S262] CONFIRMED. I'd always quote the provider and the scope together."

### I2. Three AUM figures in one deck — MEDIUM

**SETUP** Checking a deck, you find KKR's AUM shown as $744bn on one slide, $774bn on another and $796bn on a third.

**THE TRAP** Picking the biggest, or ignoring it as "rounding".

**SAY** "I'd trace each to its source. $744bn is the 10-K at 31 Dec 2025 and $796bn is 30 Jun 2026. A $774bn figure for 31 Dec 2025 appears in one KKR job advert, which doesn't match the 10-K. I'd flag that one to the owner rather than fix it myself."

**WHY IT WORKS** All three numbers are real: [S70, S74] CONFIRMED and the advert figure [S389] CONFIRMED. This is attention to detail, the trait every KCS posting lists [S390] CONFIRMED.

**THE TWIST** "It's a $30bn difference on $800bn. Leave it." **Hold:** "A client might notice. It's a two-minute fix and it's our credibility."

**I3. 9am deadline, data gaps, "just estimate it"** HARD

**SETUP** You must send an "LP sentiment" one-pager to the team by 9am. Two data points are missing. The associate says: "Just put in a sensible estimate."

**THE TRAP** Inventing a number that looks real, or missing the deadline to chase perfection.

**SAY** "I'd send at 9am with what's verified, and for the two gaps either leave them marked 'not available' or show a clearly labelled estimate with a range, date and method. Never a bare number."

**WHY IT WORKS** It meets speed and keeps tier 1. A labelled estimate is honest; an unlabelled one becomes a "fact" in someone's slide INFERRED.

**THE TWIST** "Labels look messy. Take them off." **Hold:** "I can make it tidier, with a footnote instead of a label. But the reader has to be able to tell."

## J. Intern duty: "Analyse potential investments"

In KCS you analyse investments the way a client would: returns, risks, cash back. Key terms: **net** returns are after fees; **DPI** (distributions to paid-in) is cash actually returned divided by cash paid in.

**J1. How should a client judge a fund?** EASY

**SETUP** "If a pension asked how to judge a private equity fund, what would you tell them?"

**THE TRAP** Only quoting IRR, or gross returns.

**SAY** "Net, not gross: returns after fees. Then both IRR and the money multiple, and especially DPI, the cash actually returned. Then compare against the public market for the same cash flows. KKR's last North America fund close quoted 23% gross and 19% net IRR for the three predecessor funds: the gap is the fees and carry."

**WHY IT WORKS** NAX4 figures [S335] REPORTED. DPI is the metric LPs watch now: distributions have been below 15% of NAV for four years [S262] CONFIRMED.

**THE TWIST** "Which single number matters most today?" **Hold:** "DPI, because exits have been slow and investors want cash back before they recommit."

**J2. "Is our fund better than theirs?"** MEDIUM

**SETUP** A client asks you to compare a KKR fund with a competitor's, "off the record".

**THE TRAP** Badmouthing a rival, or comparing different vintages and gross with net.

**SAY** "I'd compare like with like on public facts: net returns, same vintage years, same strategy, and DPI. I wouldn't speculate about their fund; their team can speak for it."

**WHY IT WORKS** Counter 8 (invitation to badmouth). It stays factual and fair, and leaves the judgement with the client (tier 2).

**THE TWIST** "Off the record, which would you buy?" **Hold:** "There is no off the record for me with a client. I'll give you the facts side by side."

**J3. Explain a 1.0x fund to a re-up prospect** — HARD

**SETUP** The interviewer hands you a public pension's table: KKR Asian Fund II (2013), 1.0% net IRR, 1.0x multiple. "A client considering KKR's new Asia fund asks about this. Go."

**THE TRAP** Hiding it, or blaming the market only.

**SAY** "I'd own it. That fund returned roughly the money invested, and KKR repaid $344m of carry it had already taken on it. Then I'd show the full record, not only the good funds: the same pension shows Asian Fund IV, from 2021, at 16.8% net. And I'd let the client judge."

**WHY IT WORKS** CalPERS data as of 31 Mar 2026 [S117] CONFIRMED; Asian Fund II clawback of $344m in Q4 2025 [S2, S4] CONFIRMED. Volunteering the bad number builds the trust Kravis describes [S384] CONFIRMED.

**THE TWIST** "So why trust Asia now?" **Hold:** "I wouldn't ask them to on faith. KKR's house view is to overweight Asia [S361] CONFIRMED; the client should test that against the full track record."

## K. Intern duty: "Use KKR's approved AI tools"

KKR's internship text encourages interns "to leverage KKR's approved AI tools", and the London KCS analyst advert wants the "ability to use generative AI effectively and responsibly" [S101] CONFIRMED. The key word is **approved**.

**K1. How would you use AI in this job?** — EASY

**SETUP** "How would you use AI tools as a KCS intern?"

**THE TRAP** "It writes my emails," or refusing to use it at all.

**SAY** "First drafts and grunt work, inside approved tools: summarising meeting notes, a first pass at a DDQ answer from the approved answer library, checking a deck for inconsistent numbers. Then I check every fact and number myself before anyone sees it."

**WHY IT WORKS** It matches the posting's "effectively and responsibly" [S101] CONFIRMED and the tasks KCS juniors do, such as DDQs [S106] CONFIRMED.

**THE TWIST** "Isn't that risky?" **Hold:** "Only if I skip the check. The tool drafts; I'm accountable for what goes out."

**K2. Paste a client DDQ into a public chatbot?** — MEDIUM

**SETUP** The approved tool is slow today. A friend says: "Just paste the client's DDQ into a free public chatbot. Faster."

**THE TRAP** Doing it. It sends confidential client information outside the firm.

**SAY** "No. Client documents stay in approved systems. If the approved tool is slow, I'd do the work by hand or ask IT, and tell my manager if it threatens the deadline."

**WHY IT WORKS** Confidentiality is tier 1; speed is tier 4. The same logic as the off-channel messaging fines: the channel itself is the rule [S29] REPORTED.

**THE TWIST** "Everyone does it." **Hold:** "Then they're all taking a risk with someone else's information. I'd rather be slow and right."

**K3. AI drafts a number with no source** HARD

**SETUP** The approved AI tool drafts a DDQ answer that includes a fund return. It looks plausible, but you can't find it in any approved document. A senior colleague wants the DDQ sent now.

**THE TRAP** Trusting it because the tool is approved.

**SAY** "An approved tool isn't approved content. I'd remove the number, tell the senior colleague why in one line, and get the figure from the product team. If it can't be confirmed in time, the answer says the figure follows."

**WHY IT WORKS** DDQ answers become representations to clients INFERRED. Tier 1 beats tier 4, and the answer still offers a way to hit the deadline.

**THE TWIST** "It's probably right. Don't be precious." **Hold:** "Probably isn't good enough for a client's file. It's ten minutes to confirm."

## The composure set: five hard scenarios with decision trees

These five are the scenarios most likely to be used as the "hard one" in a client-role interview, because each pits two good things against each other with a senior person pushing INFERRED. For each: the tree, the answer in protocol form, and the line that holds when they push. Scenarios invented for practice; method throughout.

### Composure 1. Two senior people want the same scarce thing

**Setup.** A co-investment is oversubscribed: clients want more than is available. Two managing directors each tell you to secure the last allocation for their client. (Same shape: two MDs both want the only 9am slot with a visiting sovereign-fund client.)

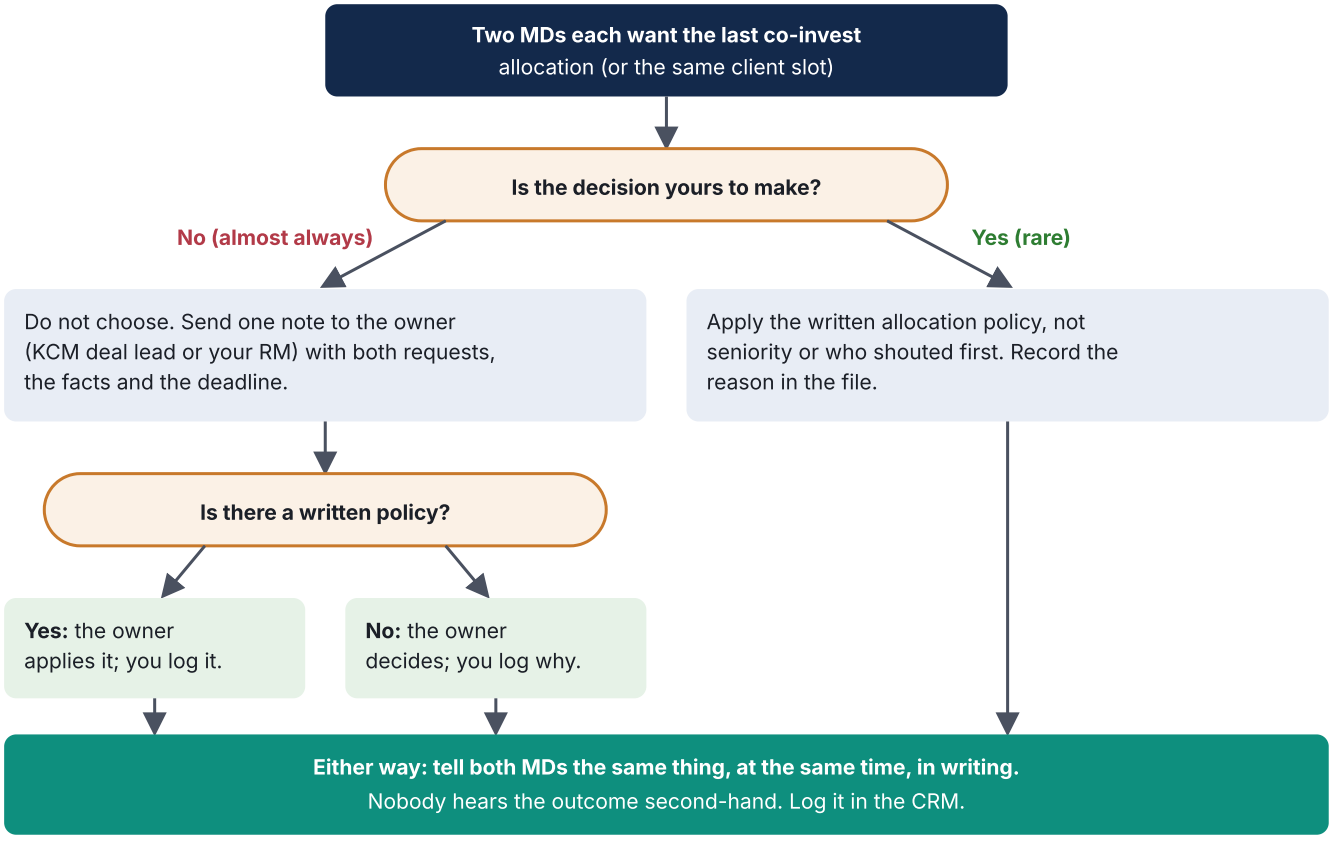

**Figure 85. Decision tree: two seniors, one scarce allocation.** The junior's job is to make the decision visible and fair, not to make it. Method; allocation fairness context from the SEC's 2015 case [S20].

**THE ANSWER, IN PROTOCOL FORM**

**Steady:** "So there is one allocation and two MDs who both want it for good clients." **Sort:** "The pull is between helping colleagues and treating two clients fairly. Fairness has to win, and it isn't my decision to make." **Act:** "I'd send one note to the deal lead at KCM, copying my RM, with both requests, each client's size and history, and the deadline. If there is an allocation policy, it decides." **Close:** "Then both MDs hear the outcome at the same time, in writing, and it is logged."

**When they push** ("Just put my client in, I'm senior"): "I want to help, and the quickest way is to get it in front of the deal lead now. I'm not the right person to pick between two clients."

**Why it works.** KCM syndicates co-investments to "third-party clients" [S70] CONFIRMED; allocation between clients is exactly where the SEC has fined managers before, including KKR in 2015 over cost sharing with co-investors [S20] CONFIRMED. Fairness is tier 2; it beats pleasing a senior colleague.

## Composure 2. "Send the deck before compliance signs it off"

**Setup.** At 4.30pm a senior colleague says: "The client wants the new deck tonight. Compliance hasn't signed it off, but it's basically the same as last quarter. Send it."

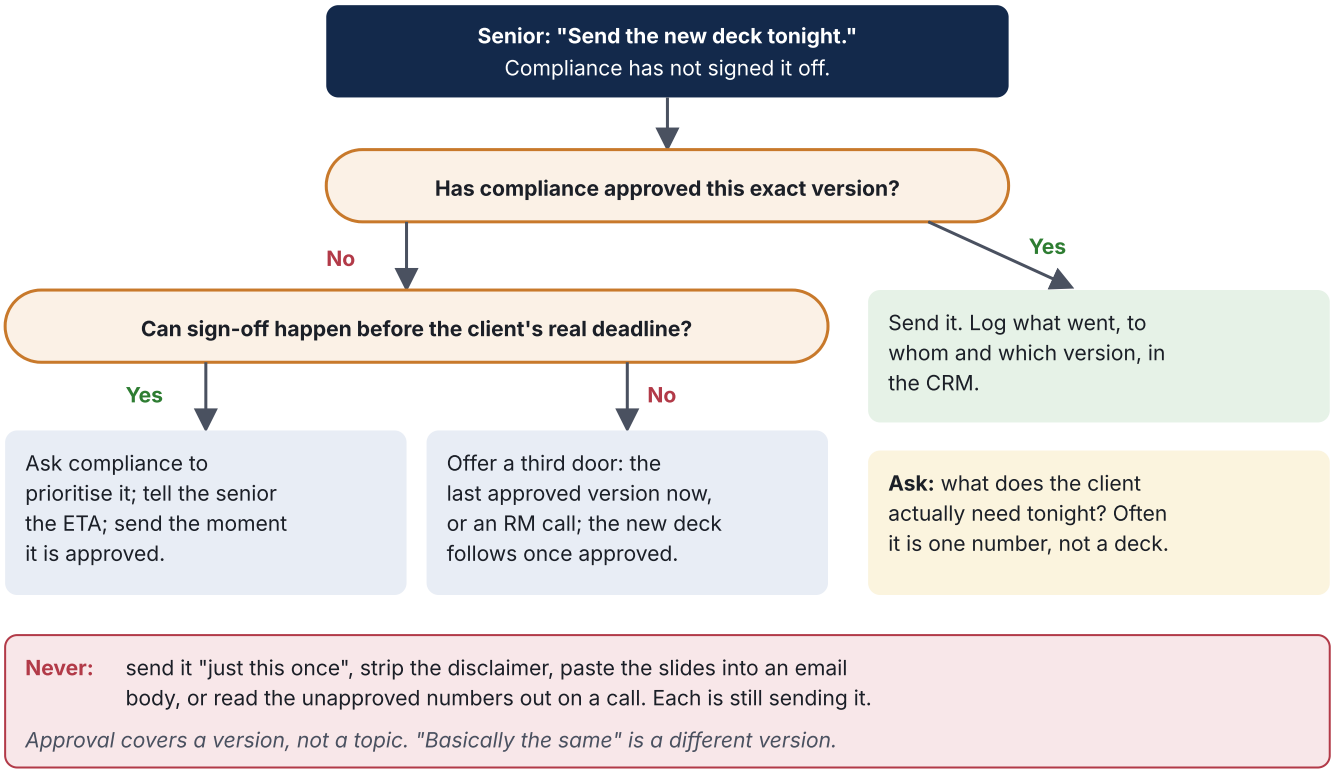

**Figure 86. Decision tree: the deck before sign-off.** The tree always ends with something going to the client; what changes is which approved thing goes. Method; rules context in Part 6 and [S70, S83].

**THE ANSWER, IN PROTOCOL FORM**

**Steady:** "So the client wants it tonight and it hasn't been approved." **Sort:** "Speed against the marketing rules. The rules come first, because once it's sent we can't take it back." **Act:** "I'd email compliance now with the deck, the client and the deadline, and ask if they can prioritise it. I'd tell the senior colleague the ETA. If it can't be done tonight, I'd suggest sending the last approved deck now with a note that the update follows." **Close:** "So the client gets something tonight, nothing unapproved leaves the building, and the send is logged."

**When they push** ("I'll take responsibility"): "I appreciate that. It would still go out under KKR's name, and I'd be the one pressing send. Let me get you the fastest possible sign-off instead."

**Why it works.** KKR's filings say EU rules set requirements for "marketing, investor suitability assessments, and conflicts of interest management" [S70] CONFIRMED; UK individuals at regulated firms are approved and certified, and breaches can lead to "suspension or expulsion from certain 'controlled functions'" [S70] CONFIRMED. A third door keeps the client served.

## Composure 3. Overhearing what might be inside information from the KCM side

**Setup.** In the office kitchen you overhear two KKR Capital Markets colleagues discussing financing for a possible bid for a London-listed company. An hour later a client asks you what you think of that company's shares.

**KEY TERM**

**MNPI (material non-public information), or "inside information":** information that is not public and that a reasonable investor would use to decide whether to buy or sell a security, for example news of a takeover before it is announced. Using it, or passing it on, is market abuse. KCS sits next to KCM, which underwrites and syndicates deals [S70] CONFIRMED, so firms keep "information walls" between teams and log who has been brought "over the wall" INFERRED.

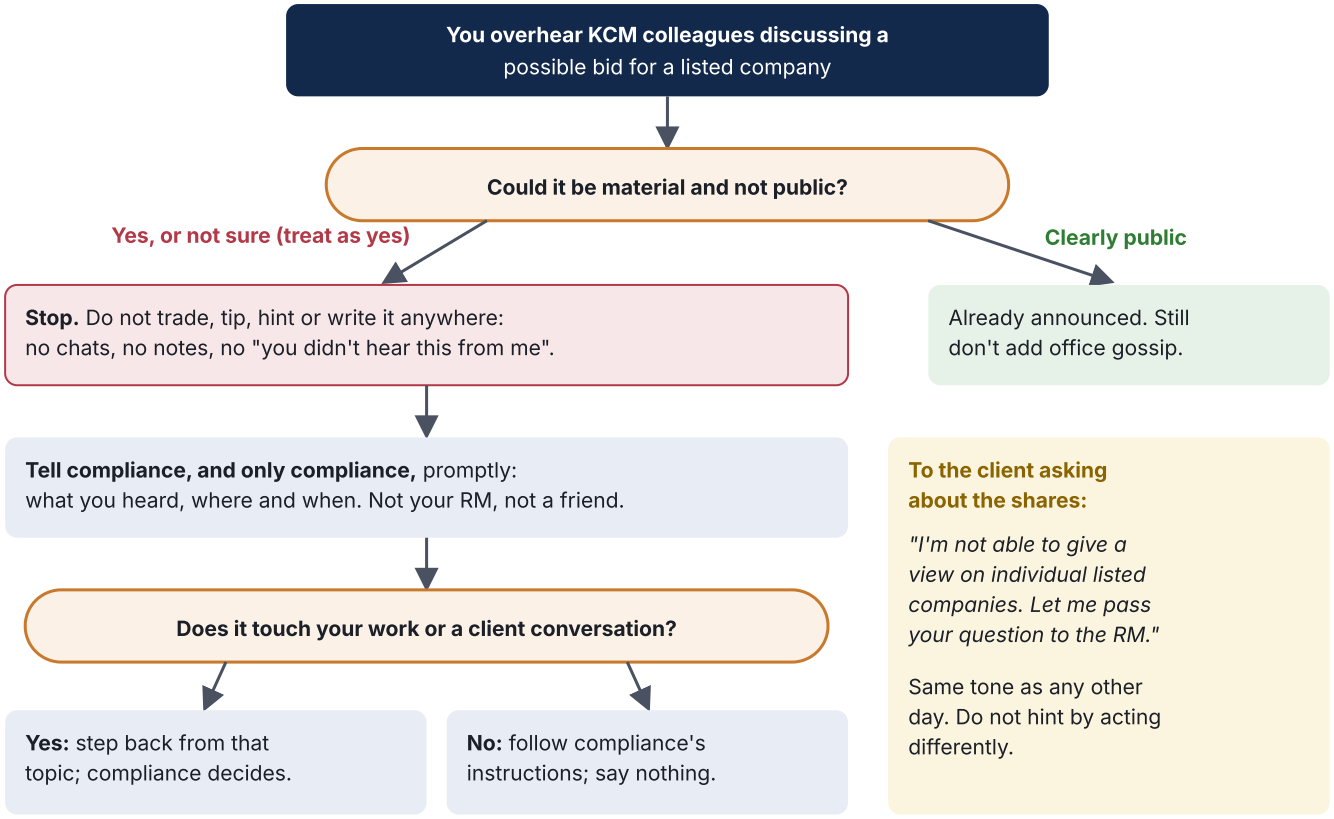

**Figure 87. Decision tree: overheard information.** "Not sure" is treated as "yes". The only person you tell is compliance. Method; KCM's role from [S70], compliance committee from [S121].

**THE ANSWER, IN PROTOCOL FORM**

**Steady:** "So I may have heard something about a listed company that isn't public, and now a client is asking about it." **Sort:** "Being helpful to the client against the information rules. The rules win completely." **Act:** "I'd tell the client I can't give views on individual listed companies and pass the question to the RM. I wouldn't say or write anything about what I heard, and I'd tell compliance straight away: what, where and when." **Close:** "Then I do exactly what compliance says, and I'm careful where I have conversations in future."

**When they push** ("It's only a rumour, and the client is important"): "If it's a rumour, there's no cost to letting compliance decide. If it isn't, telling them is the only safe thing."

**Why it works.** KKR has live UK public-company deals (the DCC takeover with Energy Capital Partners was confirmed as an approach on 29 Apr 2026 and approved by shareholders on 18 Sep 2026 [S356] REPORTED). KKR's head of global product strategy sits on the "Global Conflicts and Compliance Committee" [S121] CONFIRMED. Tier 1, with no trade-off allowed.

## Composure 4. You made a mistake in a number sent to a client

**Setup.** The morning after you helped send a client update, you notice a figure on page 3 is wrong: you copied last quarter's number. Nobody else has noticed. The RM is busy.

| Decision point | Choose this | Not this |
|---|---|---|
| **1 Who to tell?** | Your RM, today, in person or by phone, then in writing. One line: what, where, the correct figure and its source. | Waiting to see whether anyone notices. Fixing it quietly in the master file. |

| Decision point | Choose this | Not this |
|---|---|---|
| **2 Who tells the client?** | The RM decides, usually with compliance, how and when the correction goes out. You prepare the corrected page. | Emailing the client yourself to apologise before the RM knows. |
| **3 Does it matter?** | Treat it as material until the RM and compliance decide otherwise. A small number in a committee paper can matter a lot. | Deciding alone that "it's only a small difference". |
| **4 How do you stop it recurring?** | Name the cause (copying, no source log) and the fix (source log and a second check). Offer it, unasked. | "I'll be more careful." That is not a process. |

**THE ANSWER, IN PROTOCOL FORM**

**Steady:** "So there's a wrong figure with a client, and it's my mistake." **Sort:** "Owning it now against looking good. Accuracy for the client wins, and early is always cheaper." **Act:** "I'd tell the RM this morning, with the correct figure and its source, and a corrected page ready. The RM and compliance decide how to tell the client." **Close:** "Then I'd explain how it happened and add a source check so it can't happen the same way again."

**When they push** ("The RM will be furious. Why not just fix it in next quarter's update?"): "Because the client may be using that number now. The RM would rather hear it from me today than from the client later."

**Why it works.** Kravis tells of reprimanding an employee who "retraded" a deal in KKR's favour and of apologising to the other side: "Our word is our bond" [S384] CONFIRMED. Owning a mistake fast is the same value. In interviews, this scenario also tests the "time your judgment was wrong" question that prep sites report [S394] REPORTED.

## Composure 5. An RFP deadline with incomplete information

**Setup.** An RFP (request for proposal: a formal questionnaire a pension uses to pick managers) is due at noon tomorrow. Three answers depend on the infrastructure team, which has not replied. The RM says: "Fill them in yourself from last year's version."

| Decision point | Choose this | Not this |
|---|---|---|
| **1 What is stale?** | Check each of the three against last year: which facts could have changed (team names, fund sizes, AUM, policies)? | Copying all three wholesale. |
| **2 Unchanged facts** | Reuse approved wording if the owner confirms it is still true; a one-line "still correct?" email is enough. | Assuming it is unchanged because it sounds right. |
| **3 Changed or unknown facts** | Chase the owner with the exact question and deadline; escalate via the RM by 5pm if silent. | Guessing a number. For example, infrastructure AUM moved a lot in a year. |
| **4 Still missing at 11am?** | Ask the RM to request a short extension for those answers only, or submit with "to follow" where the format allows. | Submitting a guess to hit noon. |

**THE ANSWER, IN PROTOCOL FORM**

**Steady:** "So it's due at noon tomorrow and three answers need the infra team." **Sort:** "Deadline against accuracy. RFP answers become representations to the client, so accuracy first, but the deadline matters too." **Act:** "Tonight I'd sort which of the three facts could have changed. Unchanged ones I'd confirm with a one-line email. For the rest I'd send the infra team the exact question and a deadline, and tell the RM if they're silent by five." **Close:** "If anything is still missing at eleven, the RM asks for a short extension on those answers only. Everything else goes at noon."

**When they push** ("Last year's answers were approved, just use them"): "They were approved for last year's facts. I'll reuse every line that's still true, and only chase the ones that may have moved."

**Why it works.** Tenders and DDQs are real KCS work, done "with the internal CAPS team" [S106] CONFIRMED, and coordinating "due diligence requests and RFPs (requests for proposal), including portfolio statistics and pitch decks" is a Frankfurt KCS intern task [S390] CONFIRMED. A concrete example of moving facts: KKR's infrastructure equity under management rose to about $120bn, from $13bn in 2019 [S334] CONFIRMED.

## The CV grill: holding your frame three levels deep

A CV grill is a scenario about your own past. The interviewer picks one line of your CV and keeps asking "and then?" until they reach the edge of what you really did and know. Reports of KKR first rounds include CV walk-throughs [S394] REPORTED, and "tell me about yourself / walk me through your CV" is the first question in every list we found [S394, S419] REPORTED. **Method** from here on.

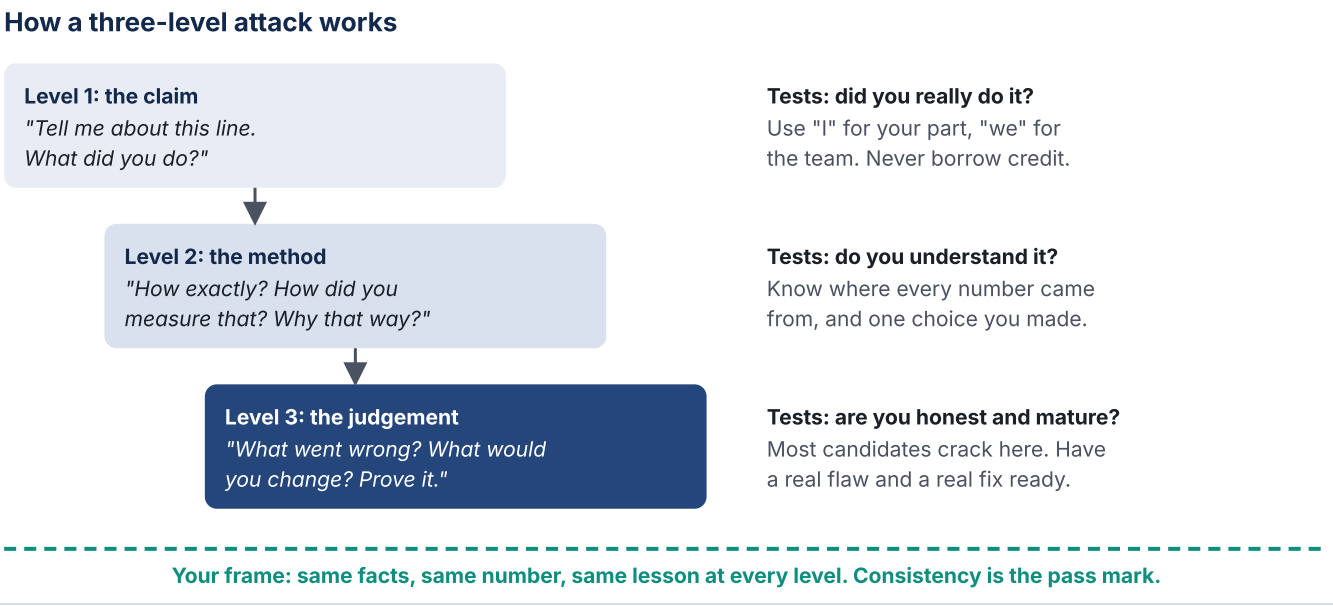

**Figure 88. The three-level CV attack.** Each level goes one step further from what you wrote towards what you actually know. Prepare all three for every bullet. Method.

### Eight CV attacks, and the answer that holds the frame

**1. "So what did you personally do?" (the "we" trap)**
Tests: ownership and honesty.
"The team of four ran the event. My part was the sponsor list and the budget: I built the list of 30 firms and wrote every pitch email." Split "we" and "I" cleanly. Over-claiming is caught at level 3.

**2. "That number sounds high. How did you calculate it?"**
Tests: numeracy and whether the number is real.
Give the base, the end point, the period and the source in one breath: "From £5,000 to £7,000 over one academic year, from the society's bank statements." If it was an estimate, say so first.

**3. "Why only three months there?" / "Why did you leave?"**
Tests: commitment, and whether you blame others.
Fact, reason, what you took from it. No complaints about the employer (counter 8): "It was a fixed summer contract. The most useful thing I took away was how to handle customer complaints calmly."

**4. "This isn't relevant to Client Solutions, is it?"**
Tests: whether you can translate experience into the job.
Bridge to a KCS duty in one sentence: "It is more than it looks: serving customers who were upset about money is the same skill as explaining a redemption cap to a client." KKR asks for the ability to "tailor messages to suit different audiences" [S388] CONFIRMED.

**5. "Your grade in this module is weak."**
Tests: maturity under criticism.
Own it, no excuses, show the fix: "It was my weakest term. I left revision too late; since then I plan backwards from the deadline, and my next two modules went up." Do not argue with the transcript.

**6. "You list Excel. Show me." (a skill check)**
Tests: whether listed skills are real.
Only list what you can demonstrate live. Have one concrete example ready ("I built a lookup to match 400 donations to members"). KKR's London KCS posting asks for "Technical and aesthetic mastery of PowerPoint and Excel" [S101] CONFIRMED, so expect this one.

**7. "You say you follow markets. What happened this week?"**
Tests: whether your stated interest is real.
Have one dated item and one view ready each week. KKR's head of talent acquisition said KKR wants candidates who "understand how the macro environment is affecting investors" [S393] REPORTED. If you missed this week: "I haven't caught up since Monday. The thing I've been following is..." Never bluff.

**8. "What would your team-mates say was your weakness on that project?"**
Tests: self-awareness, the level-3 judgement question.
A real flaw with a real fix, not a disguised strength: "They'd say I took on too much myself at first. Now I split tasks at the start and check in mid-week." Arrogance fails this test [S385] CONFIRMED.

## The four-line drill for every CV bullet

**Method.** For every line on your CV, write four lines on a card. If you can say all four out loud in under a minute, the bullet survives a three-level grill. If you can't, rewrite or cut the bullet before the interview.

**EXAMPLE ONLY. An invented student bullet, not the candidate's CV:**
*"Treasurer, university investment society: grew sponsorship income by 40% in one year."*

| Line (template) | Worked example (invented) |
|---|---|
| **1 CLAIM**<br>What I did, with "I",<br>in one sentence. | "I rebuilt how we approached sponsors: one tailored page per firm instead of a generic pack, and I ran every follow-up myself." |
| **2 NUMBER**<br>Base, end, period, source.<br>Say if it is an estimate. | "From £5,000 to £7,000, September to September, from the society's bank statements. That is the 40%." |
| **3 CHOICE**<br>One decision I made, and<br>the option I rejected. | "I chose 8 well-researched firms over a mass email to 40, because the previous year's mass email had produced one reply." |
| **4 LESSON**<br>What went wrong, and<br>what I changed. | "I nearly lost a sponsor by missing an invoice date. I set up a shared tracker with reminders, and handed it over so it outlived my term." |

**Figure 89. The four-line drill.** Claim answers level 1, Number and Choice answer level 2, Lesson answers level 3. The example bullet, numbers and story are invented to show the format; replace them with your own true details. Method.

**YOUR TURN: FILL THIS IN FOR YOUR TOP THREE BULLETS**

**Bullet:** _____

**1 Claim:** "I ..." _____

**2 Number:** from ____ to ____, over ____, source: ____

**3 Choice:** "I chose ____ over ____ because ____"

**4 Lesson:** "What went wrong was ____; since then I ____"

Then link each bullet to one KCS duty line from the ladder (A to K). That link is your answer to attack 4.

**FIVE-MINUTE REHEARSAL PLAN FOR THE WEEK BEFORE**

- Day 1: say the one sentence ("get it right, keep it fair, write it down, then make it fast") and run all five composure scenarios from memory.
- Days 2 to 4: one ladder row a day (three cards), timed, out loud; get a friend to fire the twist at you.
- Day 5: four-line drill for every CV bullet; have a friend play attacks 1 to 8.
- Day 6: random mix. Pick three cards by number; no notes.
- Day 7: rest. Read only the protocol figure and the priority pyramid.

PART 11

# Why KCS, why KKR: built from mechanism

An answer no other candidate can give, in thirty seconds, two minutes and a close, plus the counter-case.

## The principle: mechanism, not adjectives

Most applicants will say KKR is "a leading global investment firm with a great culture". That sentence could be pasted into a Blackstone or Apollo application without changing a word, and interviewers know it. A mechanism answer names **how KKR is built**, shows **what that structure causes**, and links it to **what you want to do**. If you can swap "KKR" for a rival's name and the answer still works, rewrite it.

Four mechanisms are specific to KKR and directly shape the KCS seat. Each is sourced. Learn them as cause and effect, not as facts to recite.

## Why KKR, why KCS: on one page

Read top to bottom: how KKR is built, what that causes for clients, what it means for the KCS seat, and you.

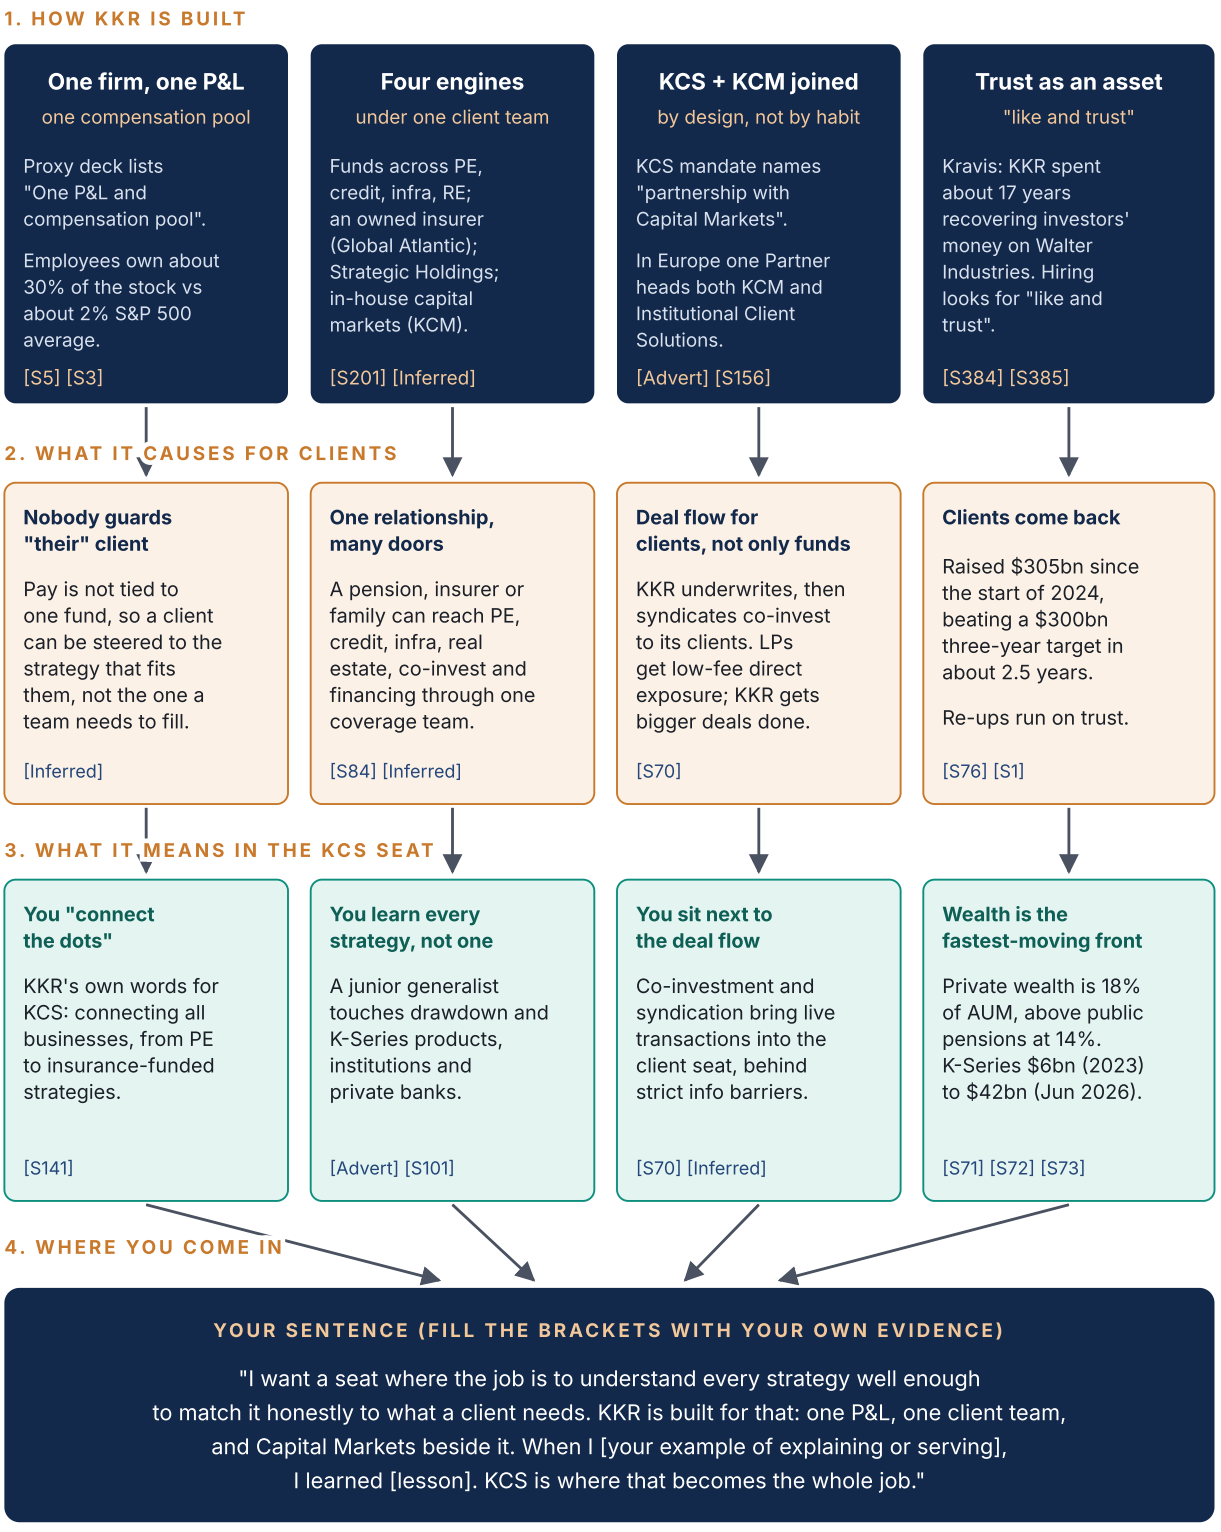

**Figure 90. "Why KKR" on one page.** Each column is a cause-and-effect chain. Sources: KKR 2026 proxy presentation **[S5]**; Q2 2026 call **[S3]**; FY2025 10-K **[S70, S201]**; KKR Frankfurt KCS posting **[S141]**; London analyst posting **[S101]**; KKR people directory **[S156]**; 10-K investor-type chart **[S71]**; Q2 2026 release **[S1, S73]**; Kravis pages on kkr.com **[S384, S385]**. Column-two and column-three links are the author's inference.

# The four mechanisms, explained

## 1. One firm, one P&L, one compensation pool

KKR's 2026 proxy presentation lists its culture as "One Firm", "One P&L and compensation pool", "Collaboration" and "Business building & innovation" [S5] CONFIRMED. Henry Kravis says KKR has always run "with one compensation pool", unlike many asset managers that pay each fund separately: "We all succeed and fail together" [S385] CONFIRMED. Employees own about 30% of KKR's shares; Rob Lewin, the CFO, contrasted this with about 2% insider ownership on average across the S&P 500 [S3] CONFIRMED.

**Why it matters for KCS.** At a firm where every strategy is paid on its own results, a relationship manager feels pressure to push whichever fund is raising now, and teams guard "their" clients. A shared pool weakens both pressures. The client can be pointed at the strategy that fits them, because the firm, and the people in it, win either way INFERRED. That is the structural reason KCS can be "solutions-oriented" rather than product-pushing.

> **DON'T SAY THIS**
>
> "KKR is the only firm that says it works as one team." Apollo job adverts say "we work as one team" and Blue Owl lists "One Team" as a value [S223, S233]. The slogan is common. The *single compensation pool* is KKR's sharper claim, and even that you should state as "KKR says", because rivals' pay structures were not verified [S3] INFERRED.

## 2. Four engines under one client team

KKR runs funds across private equity, credit, infrastructure and real estate; owns an insurer, Global Atlantic; holds long-term stakes on its own balance sheet in a **Strategic Holdings** segment; and has an in-house capital markets business, KCM [S201] CONFIRMED. Apollo has funds, an insurer and a capital solutions arm but no Strategic Holdings-type segment; Blackstone has funds and BXCM but does not own an insurer [S220, S214] [Inferred from segment lists].

**Why it matters for KCS.** KCS sells more kinds of thing than a typical fundraising team: drawdown funds, evergreen K-Series vehicles, separately managed accounts, co-investment, financing for families' own companies, and insurance-linked solutions [S84, S111-S114] CONFIRMED. The skill is matching, not pitching.

## 3. Client Solutions and Capital Markets joined by design

The KCS description in your advert lists "Work in partnership with Capital Markets in the syndication/distribution of product" as a primary activity [Advert]. KKR's 10-K describes KCM syndicating co-investments to third parties [S70] CONFIRMED. In Europe, Mark Danzey is both European Head of KKR Capital Markets and European Head of Institutional Client Solutions [S156] CONFIRMED. Several KCS leaders came from KCM, including Doug Brody, who ran the Credit & Markets Co-investments and Partnerships team before heading Family Capital [S125] CONFIRMED.

**Why it matters for KCS.** Clients want co-investment because it is cheap exposure to deals they choose INFERRED. A firm that can underwrite a large deal and then offer slices to its clients gives KCS something rivals' fundraisers cannot always offer at the same moment. It also means KCS sits close to sensitive information, so the walls matter (see the regulation part).

**DON'T SAY THIS**

"KKR is the only firm with an in-house capital markets arm." Blackstone (BXCM) and Apollo (Apollo Capital Solutions) both have one [S214, S220] CONFIRMED. Say instead: "What stands out is that KKR writes the KCM partnership into the client team's own mandate."

### 4. Trust treated as an asset

Kravis calls "people do business with those they like and trust" "probably the most apt phrase that speaks both to our culture and our values" [S384] CONFIRMED. His "best deal", he says, was Walter Industries, a 1987 investment that went bankrupt: KKR spent almost 17 years and settled for over $300m against $117m of KKR equity to get fund investors their money back plus a small profit [S384] CONFIRMED. He also says KKR looks for "like and trust" when interviewing [S385] CONFIRMED. Jim Burns, Head of Institutional Client Solutions, Americas, repeats the phrase on kkr.com [S386] CONFIRMED.

**Why it matters for KCS.** Fundraising is a repeated game. The same pension decides on Fund XIV, then Fund XV. KCS's real product is the client's belief that what KKR says in the pitch is what happens in year eight INFERRED. The Walter story is the best single illustration you can tell a KCS interviewer.

## "Why KKR, why KCS" in three lengths

**30 SECONDS**

"KCS is the team that has to understand all of KKR, not one corner of it. KKR is built for that seat: one P&L and one compensation pool, so the client team can point a client to the strategy that fits them, and Capital Markets sits beside it, so clients can be offered co-investment as well as funds. And with private wealth now 18% of KKR's assets, the team is changing fast. I want to learn the whole firm by explaining it to the people who fund it."

**TWO MINUTES (SCAFFOLD: FOUR BEATS)**

**Beat 1, the seat (20s).** "What draws me to KCS is that it is the one team whose job is to understand everything KKR does. KKR's own job adverts say the team exists to 'connect the dots' across private equity, infrastructure, real estate, credit, capital markets and insurance."

**Beat 2, the mechanism (40s).** "That only works because of how KKR is built. It runs as one firm with one P&L and one compensation pool, so nobody is paid to guard a client for one fund. And Capital Markets is written into KCS's mandate: KKR can underwrite a deal and syndicate co-investment to its clients. In Europe the same Partner heads both Capital Markets and Institutional Client Solutions. That combination is what lets KCS offer solutions rather than just products."

**Beat 3, the moment (30s).** "It is also a team in motion. Private wealth is now 18% of KKR's AUM, ahead of public pensions; the K-Series went from $6bn to $42bn in two and a half years; and in Europe KKR has launched evergreen private equity with Quilter Cheviot. Being junior while the client base is being rebuilt is the best time to learn it."

**Beat 4, you (30s).** "Personally, [one concrete example where you explained something complex to someone with different knowledge, or kept a commitment under pressure]. Kravis's Walter Industries story, spending 17 years to get investors their money back, is the clearest description I have read of what a client team is protecting. That is the job I want to learn."

Sources for the facts you use: **[S141]** connect the dots; **[S5]** one P&L; **[S70]** syndication; **[S156]** Danzey; **[S71]** 18% vs 14%; **[S72, S73]** K-Series; **[S175]** Quilter Cheviot; **[S384]** Walter. Only say the ones you can defend.

**THE CLOSE: NAME ONE THING YOU WANT TO WORK ON**

Pick one, say why, and tie it to a source. Examples:

- "I'd like to work on how the K-Series evergreen products, like K-PRIME, are explained to European private banks, because liquidity terms are where client trust is won or lost." [S133] [S111]
- "I'd like to see how a co-investment is allocated to clients when KCM syndicates a deal, because that is where KCS and Capital Markets really meet." [S70]
- "I'd like to help on an RFP or DDQ with the CAPS team, because it forces you to know the product to the last detail." [S106]
- "I'm interested in the UK pensions shift after the Pension Schemes Act 2026, and how KCS would cover the new DC megafunds." [S316]

## What most candidates say versus what you can say

| Most candidates | You |
|---|---|
| "KKR is a leading global investment firm." | "KKR is fourth by headline AUM at $796bn, behind Blackstone, Apollo and Brookfield, and that is not why I'm applying. I'm applying because of how it is built." [S1, S213, S220, S235] |
| "I love the culture." | "One P&L and one compensation pool, and employees owning about 30% of the stock, mean the client team can sell the right strategy, not the one that needs filling." [S5, S3] |
| "I'm interested in private equity." | "I'm interested in how private markets are being opened to individual investors, where KKR's private wealth share is now 18% of AUM." [S71] |
| "Client Solutions is investor relations." | "It is three jobs: covering clients, explaining products, and building new ones, across institutions, families and private wealth." [S103, S84] |
| "KKR has a great track record." | "Kravis's best deal was a bankruptcy: 17 years to make investors whole on Walter Industries. That is what a client team protects." [S384] |
| "KKR is innovative." | "The Capital Group partnership puts KKR private credit inside interval funds with a $1,000 minimum. That tests whether private assets can sit inside everyday retirement products." [S92, S210] |

## The honest counter-case (know it before they raise it)

- **KKR is not the biggest, and not the leader in wealth.** Blackstone has about $324bn of private wealth AUM against KKR's $42bn K-Series [S215, S216, S1] [Reported/Confirmed]. Answer: "KKR is a fast follower in wealth; its case is breadth of product and the Capital Group route, not scale."
- **Evergreen liquidity is a live risk.** K-FIT paid only about 80% of withdrawal requests in Q1 2026 before paying in full in Q2 [S338] REPORTED. Answer: "That is exactly why the client team's job is to explain liquidity terms honestly up front."
- **Regulatory and legal history.** A proposed $250m DOJ settlement over merger filings (Aug 2026), an $11m SEC off-channel communications fine (Jan 2025), and a 2015 SEC broken-deal-expense settlement [S205, S29, S2] CONFIRMED. Answer briefly and factually; never defend, never dwell.
- **One compensation pool has a cost.** A star individual may earn more at a firm that pays each team on its own results, so retention can be harder [Inferred, from S2, S3, S5].

- **KCS is not an investing seat.** If you really want to build models and pick deals, say so honestly when ranking teams; KCS rewards people who enjoy explaining, organising and relationships.
- **Insurance appetite is easing.** KKR's CFO said in July 2026 the firm will allocate "a little bit less capital to insurance" because of competition [S207] CONFIRMED.

**YOUR OPINION GOES HERE**

Write one sentence on whether KKR's one-firm model is a lasting edge or a slogan that every rival will copy. Anchor it in one fact (for example the 30% employee ownership, or Danzey's dual role) and one risk (retention, or wealth redemptions). Interviewers reward a view that admits its weak point.

PART 12

# Cheat sheet

Everything on one page. Also supplied as a separate PDF.

# KKR KCS cheat sheet: one page, read it in the lift

## THE ONE SENTENCE

**"KCS is the team that has to understand all of KKR. KKR is built for that seat: one P&L and one compensation pool, Capital Markets beside it, and a client base that now runs from pensions to private wealth. I want to learn the whole firm by explaining it honestly to the people who fund it."**

## ANSWER PROTOCOL (45 TO 75 SECONDS)

1. **Steady** (3s): pause, breathe. "Let me make sure I understand the situation."
2. **Sort** (10s): name what is at stake. "There are two things here: X and Y."
3. **Act** (30s): what you would do, in order, and who you would tell.
4. **Close** (10s): the principle. "Because accuracy and the client's trust come before speed."

## PRIORITY ORDER WHEN GOOD THINGS COLLIDE

1. The rules and KKR's name (accuracy, marketing rules, information walls)
2. The client's real interest; every client treated fairly
3. The process and the record (CRM, compliance sign-off)
4. Speed

**Holding line:** "I'd rather be a day late than wrong in front of a client."

## NEVER SAY

- "KKR is the biggest" (Blackstone $1.35tn, Apollo $1.05tn; KKR $796bn)
- "KKR leads private wealth" (Blackstone about $324bn vs K-Series $42bn)
- "Only KKR has in-house capital markets" (BXCM, Apollo Capital Solutions)
- "Industrialist vision" as KKR's words (not found in KKR material)
- Anything bad about a rival, a past employer or a client
- A number you cannot source

## FRAME BREAKERS AND COUNTERS

| | |
|---|---|
| **Interruption** | Finish the clause, then answer them |
| **"That's wrong"** | "What makes you see it that way?" then hold or update with a reason |
| **Silence** | Stop. Do not fill it. "Shall I go deeper on any part?" |
| **Escalation** | Same principle, higher stakes, same answer |
| **"The MD says"** | Respect, then the rule: "I'd ask compliance first" |
| **False choice** | "Is there a third option, like..." |
| **Knowledge trap** | "I don't know that; here's how I'd find out" |
| **Badmouth bait** | Describe the trade-off, not the people |

## NUMBERS IF ASKED (30 JUN 2026 UNLESS STATED)

| | |
|---|---|
| AUM / fee-paying AUM | $796.5bn / $638.4bn |
| Capital raised | $129bn in 2025 (record); $133bn last 12m |
| 2024-26 target | $300bn; $305bn raised by Jun 2026 |
| K-Series (wealth) | $6bn (2023) to $42bn |
| Investor mix | Private wealth 18%, pensions 14% of AUM (10-K) |
| KCS | Formed 2009; 300+ people |
| Global Atlantic | $220bn AUM |
| Employees own | about 30% of KKR stock |
| GII V (infra) | $19.2bn close, Aug 2026, KKR's largest |
| London | 18 Hanover Square; EMEA co-heads Davies and Caprioli |

## LINES TO HAVE READY

- **KCS in one line:** covering clients, explaining products, building new ones, across institutions, families and private wealth.
- **KCS and KCM:** KKR underwrites a deal, KCM syndicates co-invest, KCS brings the clients.
- **Culture:** "People do business with those they like and trust" (Kravis); Walter Industries, 17 years to make investors whole.
- **DPI:** cash actually returned divided by cash paid in. The metric LPs care most about now.
- **Evergreen vs drawdown:** continuous entry, limited redemptions (gates) vs commit once, called over years.

## THIS WEEK'S CONTEXT

- Q3 results expected 9 Nov 2026
- Sunset Date: founders' control ends by 31 Dec 2026, one share one vote
- DOJ: proposed $250m settlement over merger filings (Aug 2026)
- UK: Pension Schemes Act 2026; FCA CP26/28 closes 14 Oct
- EU: AIFMD II applied from 16 Apr 2026
- Wealth redemptions: K-FIT paid about 80% in Q1, 100% in Q2

## ONE QUESTION TO ASK

**"Mark Danzey heads both Capital Markets and Institutional Client Solutions in Europe. In practice, when KCM syndicates a co-investment, how does KCS decide which clients see it first, and what does a junior do in that process?"**

Sources for every number are in the body of the pack: Q2 2026 release and 10-Q, FY2025 10-K, KKR people directory and postings, Kravis pages on kkr.com, WS3 peer filings. Prepared 12 Oct 2026; check the latest quarter before any interview.

PART 13

# Glossary

Every term you need, in plain English.

## How to use the glossary

Terms are grouped by theme so you can learn them in clusters, not alphabetically. Bold words inside a definition are themselves defined somewhere on these pages. KKR-specific names carry a source marker; general finance definitions are standard usage.

### 1. The basic cast

| Term | Plain-English meaning |
|---|---|
| **Alternative asset manager** | A firm that invests other people's money in things outside listed shares and bonds: private companies, loans, buildings, infrastructure. KKR, Blackstone and Apollo are the largest. |
| **Traditional asset manager** | A firm that mainly buys listed shares and bonds, often cheaply in index funds (BlackRock, Vanguard). Lower fees, daily liquidity. |
| **General partner (GP)** | The manager that runs a private fund, picks the investments and earns fees and **carried interest**. KKR is the GP of its funds. |
| **Limited partner (LP)** | An investor in a private fund: a pension, insurer, sovereign wealth fund, endowment, family office or wealthy individual. "Limited" because they can lose only what they put in and do not run the fund. |
| **Client / investor** | KKR's own word for LPs and other buyers of its products. KCS calls them clients. |
| **Portfolio company** | A company a private equity fund owns. |
| **Sponsor** | A private equity firm in its role as owner and backer of a deal. "Sponsor-backed" means owned by a PE firm. |
| **Buy side / sell side** | Buy side invests money (KKR, pensions). Sell side sells services to investors (investment banks, brokers). |
| **Family office** | A private company that manages one wealthy family's money. KKR calls this channel **Family Capital** [S84]. |
| **Sovereign wealth fund (SWF)** | A state-owned investment fund, for example in Norway, Abu Dhabi, Saudi Arabia or Singapore. |
| **Endowment** | The investment pot of a university or charity, spent slowly over very long horizons. |
| **Defined benefit (DB) pension** | A pension that promises a set income in retirement. The scheme carries the investment risk, so it invests to meet future payments (**liabilities**). |
| **Defined contribution (DC) pension** | A pension where each saver has a pot and carries the investment risk themselves. Workplace DC pots are the target of the UK Mansion House reforms. |
| **Private wealth** | Wealthy individuals investing through private banks, wealth managers and financial advisers. Smaller cheques, many more investors, stricter consumer rules. |
| **Wirehouse** | A large US brokerage with thousands of financial advisers (for example Morgan Stanley, Merrill). A key gateway to private wealth. |
| **Insurer / annuity** | An insurer collects premiums and invests them to pay future claims. An annuity pays a retiree a fixed income for life. Long-dated promises suit long-dated private assets. |

## 2. How a private fund works

| Term | Plain-English meaning |
|---|---|
| **Closed-end / drawdown fund** | A fund with a fixed size and life (often 10-12 years). Investors promise money up front and hand it over only when the GP asks. |
| **Commitment** | The amount an LP promises to a drawdown fund. Not paid on day one. |
| **Capital call (drawdown)** | The GP's request for part of the commitment, usually with 10 business days' notice, when it needs cash for a deal. |
| **Dry powder** | Money committed to funds but not yet invested. |
| **First close / final close** | The first date the fund can start investing with commitments so far, and the last date new investors can join. |
| **Hard cap** | The maximum size the GP has promised the fund will reach. |
| **Investment period** | Usually the first 4-6 years, when the fund buys new assets. |
| **Harvest period** | The later years, when the fund sells assets and returns cash. |
| **Distribution** | Cash paid back to LPs after a sale or from income. |
| **Exit** | Selling an investment: to another company (trade sale), to another PE firm (secondary buyout), or by listing it (IPO). |
| **Flagship fund** | A firm's main, numbered fund in a strategy, e.g. KKR North America Fund XIV, European Fund VI, Global Infrastructure Investors V [S2]. |
| **Vintage year** | The year a fund starts investing. Used to compare funds fairly. |
| **J-curve** | The shape of an LP's returns over time: negative early (fees, no sales yet), positive later as investments are sold. |
| **Re-up** | An existing LP committing again to the next fund in the series. A core KCS success measure. |
| **Evergreen / semi-liquid fund** | A fund with no end date that takes new money continuously and lets investors redeem, usually monthly or quarterly, up to a limit. The main product for private wealth. KKR's are the **K-Series**. |
| **NAV (net asset value)** | The value of a fund's assets minus its debts. Evergreen funds issue and redeem units at NAV. |
| **Redemption gate** | A cap on how much investors can withdraw in a period (often 5% of NAV a quarter). Protects remaining investors from fire sales. |
| **Interval fund** | A US registered fund that offers to buy back a set percentage of shares at set intervals. The Capital Group KKR funds use this structure [S92]. |
| **BDC (business development company)** | A US vehicle that lends to mid-sized companies and can be sold to retail investors. K-FIT is one [S113]. |
| **Non-traded REIT** | A real estate investment trust that is not listed on an exchange. Sold to wealth clients; KREST is KKR's [S114]. |
| **Feeder fund** | A vehicle that pools many small investors and invests as one LP into the main fund. Platforms like iCapital run them. |
| **Separately managed account (SMA)** | A portfolio run for one large client under its own rules, instead of a pooled fund. One meaning of "customised products". |
| **Co-investment** | An LP investing directly in a specific deal alongside the fund, usually with low or no fees. Highly valued by LPs; at KKR, syndicated with KCM [S70]. |
| **Syndication** | Selling pieces of a deal or a loan the firm has committed to, to other investors. |
| **Secondaries** | Buying or selling existing fund stakes or assets from other investors, often at a discount, to give early liquidity. |
| **Continuation vehicle (CV)** | A new fund a GP sets up to buy one or more assets from its own older fund, so existing LPs can cash out or roll over. |
| **Strategic partnership** | A large multi-strategy mandate with one client across several KKR products, often with fee terms and co-investment rights. |

## 3. Fees and returns

| Term | Plain-English meaning |
|---|---|
| **Management fee** | An annual fee on committed or invested capital (traditionally about 1.5-2% for buyout funds). Pays for the team whatever happens. |
| **Carried interest (carry)** | The GP's share of profits (traditionally 20%) once LPs have their money back plus the hurdle. |
| **Hurdle / preferred return** | The minimum annual return LPs get before carry starts, often 8%. |
| **Catch-up** | After the hurdle, the GP takes a larger share for a while until it has "caught up" to its full 20%. |
| **Waterfall** | The order in which cash is split between LPs and GP: capital back, hurdle, catch-up, then 80/20. |
| **Clawback** | The GP returns carry it was paid early if the fund later underperforms. KKR repaid $344m on Asian Fund II in Q4 2025 [S2]. |
| **GP commitment** | The GP's own money invested in its fund. "Skin in the game". |
| **Side letter** | A private agreement giving one LP special terms (fees, reporting, co-invest rights). |
| **MFN (most favoured nation)** | A clause letting an LP claim terms given to other similar-sized LPs. |
| **Basis point (bp)** | One hundredth of a percent. 84bp = 0.84%. |
| **IRR (internal rate of return)** | The annualised return that accounts for the timing of cash in and out. Sensitive to timing; can flatter quick wins. |
| **MOIC / TVPI** | Multiple on invested capital / total value to paid-in: total value (cash returned plus value still held) divided by money put in. 2.0x = doubled. |
| **DPI (distributions to paid-in)** | Cash actually returned divided by money paid in. The "real money" metric; the word of 2025-26 because exits have been slow. |
| **RVPI** | Residual value to paid-in: the unsold part. TVPI = DPI + RVPI. |
| **PME (public market equivalent)** | Compares a fund's return with what the same cash flows would have earned in a stock index. |
| **Sharpe ratio** | Return per unit of volatility. Higher means a smoother ride for the return earned. |
| **Denominator effect** | When public markets fall, private holdings become a bigger share of an LP's portfolio, pushing it over its target and making it pause new commitments. |

## 4. KKR's own vocabulary

| Term | Plain-English meaning |
|---|---|
| **KCS (Global Client Solutions)** | KKR's fundraising and client team, formed in 2009, about 300+ people, split into sales/relationship management and product/strategy management [S103]. |
| **KCM (KKR Capital Markets)** | KKR's in-house capital markets business: arranges debt and equity financing for KKR deals and portfolio companies and syndicates co-investment. |
| **Capstone** | KKR's in-house team of operating specialists, mostly ex-consultants, who work inside portfolio companies on operational improvements. |
| **Global Atlantic** | KKR's insurance subsidiary (retirement, life and reinsurance). Its policyholder money is a large, long-term source of capital for KKR's credit strategies. |
| **Strategic Holdings** | KKR's segment of long-term stakes in businesses held on its own balance sheet. |
| **AUM / FPAUM** | Assets under management / fee-paying AUM, the part that earns management fees. KKR: $796.5bn AUM and $638.4bn FPAUM at 30 Jun 2026 [S1]. |
| **FRE (fee related earnings)** | Profit from recurring fees after paying the people and costs that earn them. Investors prize it for stability. |
| **ANI (adjusted net income)** | KKR's headline profit measure including carry, insurance and balance sheet income. |
| **K-Series** | KKR's evergreen funds for private wealth: K-PEC/K-PRIME (private equity), K-INFRA (infrastructure), K-FIT/K-FITS (private credit), KREST (real estate) [S111-S114]. |

| Term | Plain-English meaning |
|---|---|
| **Family Capital** | KKR's client segment for family offices, offering co-investment, customised portfolios, SMAs, two-way sourcing and debt solutions [S84]. |
| **CAPS team** | The internal KKR team that completes tenders and due diligence questionnaires with KCS [S106]. |
| **Sunset Date** | The date, no later than 31 Dec 2026, when the founders' special control ends and every KKR share gets one vote. |
| **Investment Committee (IC) memo** | The document a deal team writes to ask senior partners to approve an investment. |

## 5. Fundraising and client work

| Term | Plain-English meaning |
|---|---|
| **Investor relations (IR)** | Keeping existing investors informed and happy. At KKR, part of KCS's "servicing" job. |
| **Capital formation** | Industry word for raising money: new clients, new products, new channels. |
| **Relationship manager (coverage)** | The person who "owns" a set of clients, usually by region or investor type. |
| **Product specialist** | The expert on one strategy (say infrastructure) who explains it in depth to clients. |
| **Pitch book** | The presentation used to market a fund. |
| **PPM (private placement memorandum)** | The formal offering document for a private fund. |
| **LPA (limited partnership agreement)** | The legal contract governing the fund. |
| **Data room** | A secure online folder of fund documents for investors doing diligence. |
| **DDQ (due diligence questionnaire)** | A long standard questionnaire investors send a manager. ILPA publishes a template. |
| **RFP / tender** | Request for proposal: a formal competition where an investor invites managers to bid for a mandate. |
| **ODD (operational due diligence)** | Checking the manager's operations, controls, valuation and compliance, separate from the investment case. |
| **Investment consultant / gatekeeper** | Advisers such as Cambridge Associates, Mercer or Hamilton Lane who recommend managers to pensions and others. |
| **Placement agent** | An outside firm paid to help a GP raise a fund (for example Evercore, Campbell Lutyens, PJT Park Hill). |
| **ILPA** | Institutional Limited Partners Association, the LP trade body that publishes best-practice principles and reporting templates. |
| **AGM / annual meeting** | The yearly meeting where a GP updates its LPs on a fund. |
| **CRM** | Client relationship management software. KKR postings name Salesforce [S103]. |
| **Cross-sell** | Getting a client who invests in one strategy to invest in another. |

## 6. Asset classes and deal words

| Term | Plain-English meaning |
|---|---|
| **Private equity (PE)** | Buying stakes in private companies, usually control, improving them and selling within years. |
| **Leveraged buyout (LBO)** | Buying a company using a lot of borrowed money secured on the company itself. KKR's founding idea. |
| **Growth equity** | Minority stakes in fast-growing companies that need capital to expand. |
| **Impact investing** | Investing for a financial return and a measurable social or environmental result. KKR Global Impact focuses on climate, learning, sustainable living and inclusive growth. |

| Term | Plain-English meaning |
|---|---|
| **Private credit** | Loans made by non-bank funds directly to companies or backed by assets. The fastest-growing private asset class. |
| **Direct lending** | Private credit lent straight to mid-sized companies, mostly floating rate. |
| **Asset-based finance (ABF)** | Lending secured on pools of assets (loans, equipment, receivables) rather than a company's cash flow. |
| **Infrastructure** | Long-life physical assets providing essential services: power, data centres, fibre, transport, utilities. |
| **Core / core-plus / value-add / opportunistic** | The risk ladder for real assets, from stable income (core) to heavy repositioning (opportunistic). |
| **Real estate** | Buildings and land: logistics, housing, offices, data centres. Earns rent and value growth. |
| **ECM / DCM** | Equity capital markets (share issues, IPOs) and debt capital markets (bonds, loans). |
| **Due diligence** | The deep investigation before an investment: financial, commercial, legal, operational. |
| **Value creation** | How an owner makes a company worth more: growth, margins, better capital structure, bolt-on acquisitions. |
| **Investment theme / thesis** | A view about a long trend (say, power demand from data centres) used to find deals. |

## 7. Rules and regulators

| Term | Plain-English meaning |
|---|---|
| **FCA** | Financial Conduct Authority, the UK conduct regulator. KKR's UK LLP is FCA-authorised (FRN 593180) [S23]. |
| **SEC** | US Securities and Exchange Commission, the US securities regulator. |
| **AIF / AIFM** | Alternative investment fund / its manager. Almost every private fund is an AIF. |
| **AIFMD / AIFMD II** | The EU law on alternative fund managers (2011) and its revision, which member states had to transpose by 16 April 2026. |
| **Marketing passport** | The EU right for an authorised EU manager to market a fund to professional investors across the EU. |
| **NPPR** | National private placement regime: country-by-country rules for marketing a fund without a passport (the UK route for non-UK funds). |
| **Reverse solicitation** | An investor approaching a manager on its own initiative, which can fall outside marketing rules. Narrowly interpreted; never rely on it casually. |
| **Pre-marketing** | Testing investor appetite before a fund is formally launched, under strict EU conditions. |
| **ELTIF 2.0** | The revamped EU long-term investment fund regime (applies from 10 Jan 2024) that lets retail investors buy private-market funds. |
| **LTAF** | The UK long-term asset fund (2021), an open-ended fund structure for private assets aimed at DC pensions and, later, wider investors. |
| **Financial promotion** | Any UK communication inviting someone to invest. Must be fair, clear and not misleading, and approved by an authorised person. |
| **Consumer Duty** | The FCA's rule (from July 2023) that firms must deliver good outcomes for retail customers. |
| **Professional / retail client** | The regulatory split: professionals (institutions, some wealthy individuals) can be offered more complex products than retail clients. |
| **Accredited investor** | The US test (income or wealth) for who may buy most private funds. |
| **Marketing Rule** | The SEC's rule on adviser advertising, including how performance can be shown. |
| **MNPI / inside information** | Material non-public information about a listed company. Trading on it or passing it on is illegal. |
| **Information barrier ("Chinese wall")** | Policies separating people who hold MNPI (often capital markets) from others. |

| Term | Plain-English meaning |
|---|---|
| **SMCR** | The UK Senior Managers and Certification Regime, which makes named individuals accountable for conduct. |
| **Mansion House Accord** | A May 2025 voluntary pledge by UK pension providers to put more of their default DC funds into private markets. |
| **Pension Schemes Act 2026** | UK law (Royal Assent 29 Apr 2026) consolidating DC schemes into large funds and allowing government to set private asset allocations. |

PART 14

# Source table

Every [Sxx] in this pack, with outlet, title, date, URL and how fully it was read.

## How to read this table

Every [Sxx] marker in the text resolves to a row below. Status: FETCHED means the full page or document was read; SNIPPET means only a search-result extract was seen (treat as weaker); PAYWALLED means the article itself was not read. All sources accessed between 11 and 12 October 2026. Each workstream had its own ID range, so gaps in numbering are expected.

PART 15

# Gaps, open questions and the self-check

What could not be established, and how to turn it into a question.

## Why this section exists

A pack that hides what it could not find is more dangerous than one that admits it. Everything below was searched for and **not** established from public sources between 11 and 12 October 2026. Do not fill these gaps with guesses in an interview. Several make excellent questions to ask instead.

**SOURCE UNCERTAIN: RESEARCH LIMITS**

The research hit a shared web-search limit partway through four workstreams. Where that happened the researchers switched to direct fetches of primary documents (SEC filings, KKR's own job board and people directory, Companies House), so the core numbers are strong. Trade press, LinkedIn, Glassdoor, Wall Street Oasis and The Student Room were thinly covered; forum material appears only as search snippets and is labelled as anecdote.

## About KCS and the team

- **No named "Head of KCS EMEA".** KKR's directory shows no one with that title. The closest is Mark Danzey, European Head of KCM and European Head of Institutional Client Solutions. Reporting lines in every org chart in this pack are reconstructed, not published.
- **Junior headcount.** KKR's directory lists Principal level and above only. All KCS EMEA and London headcounts are estimates with a method shown, not counts.
- **Client numbers.** KKR does not disclose how many LPs it has, how many invest in more than one strategy, or its re-up rate. The 2024 Investor Day deck, which may contain such a slide, could not be retrieved.
- **Private wealth target.** No single KKR-published private wealth AUM target or wealth capital-raised figure was found; only K-Series AUM and flows.
- **Europe vehicles.** No named KKR ELTIF or UK LTAF was confirmed. K-PRIME is confirmed as the Luxembourg twin of K-PEC. K-PRIME, KREST and K-FITS launch dates and per-vehicle AUM were not extracted.
- **Capital Group U.S. Equity+.** Filed July 2025 for an "early 2026" launch; the actual launch was not confirmed.
- **Career moves.** No public example of someone moving from KCS into an investing seat was found.
- **Tools.** Salesforce is confirmed in KKR postings. DealCloud, eVestment and data-room vendors were not confirmed.
- **Names to avoid.** "Alisa Amarosa Wood" appears in a 2023 press quote but is not in KKR's current KCS directory. Do not present any person's current title unless it is confirmed on kkr.com.

## About the application and interview

- **The SEO London application form** (questions, word limits, cover letter or not) sits behind a student login and could not be read. Screenshot it and draft answers offline.
- **The London summer process.** No public report of KKR's London summer intern interview process was found. Whether there is an online test, a HireVue, or a superday in London is unconfirmed; US evidence suggests a test, a recorded video round and then live rounds.
- **KCS case format.** No source confirms a "pitch a fund" or "write an investor letter" exercise at KKR. One prep site says a writing exercise "may" be asked. The case drills in this pack are preparation, not prediction.
- **Offer timing** for the SEO London cohort, and **intern class sizes** (estimate only: about 6 to 15 across London teams) are not published.
- **How to rank the six teams.** No public advice from KKR or SEO exists; the ranking guidance here is the author's reasoning.

## About the firm

- **"Industrialist vision"** appears in the SEO London listing but was not found in any KKR document read. Do not quote it as KKR's words.
- **Sunset Date.** Filings say "no later than 31 December 2026". No announcement that it has happened early was found. Check KKR's 8-K filings before any interview in late 2026 or early 2027.
- **Total London headcount.** Only the main UK LLP is quantified (182 average employees and 88 members in FY2025). Other UK entities were not fully read. London estimates (about 300 to 400 people) are inferred.
- **Live FCA Register** entries and current approved persons were not checked directly.
- **DOJ settlement** (proposed 26 August 2026): court approval not confirmed. **Kentucky litigation**: 2026 outcome not found.
- **Capstone founding year** (often said to be 2000) was not confirmed in a primary source.
- **European Fund VII** and **Asian Fund V** size and closes: not established. **Real Estate Partners Europe III**: status unclear.
- **Private credit stress at KKR-affiliated vehicles** beyond K-FIT's Q1 2026 pro-rated redemptions (for example FS KKR) was not researched.

## About the industry and rules

- **US 401(k) rule.** Only a Department of Labor proposal (30 March 2026) was found; no final rule as of 11 October 2026. SEC accredited-investor proposals (about 30 September 2026) seen only via law-firm summaries.
- **UK CP26/28** publication date differs between sources (14 or about 23 July 2026); consultation closes 14 October 2026.
- **McKinsey and BCG** private markets reports were not read directly; their figures are not used.
- **LP-type share** of global private capital (pensions vs sovereigns vs insurers vs wealth) for 2026 was not found.
- **Peer facts not verified this session:** rivals' tie-ups with traditional managers (relevant to how unique the Capital Group partnership is); rivals' compensation structures (relevant to KKR's "one pool" claim); London client-function internships at Apollo, Ares, Brookfield, TPG, EQT, CVC.

- **Fee norms** (2 and 20, 8% hurdle) are textbook norms, not 2026 survey data.

## Turn gaps into questions

Several gaps are exactly what an insider can answer and an outsider cannot. Asked well, they show research rather than ignorance:

- "KKR's directory shows coverage by country and by channel in EMEA. Where would a summer analyst sit, and who owns the client when a product specialist and a relationship manager both work on it?"
- "K-PRIME is the Luxembourg twin of K-PEC. Is there a plan for an ELTIF or an LTAF for UK and EU wealth clients?"
- "After the Sunset Date, does anything change for how the client team presents KKR's governance to investors?"

## Final self-check

| Requirement | Status | How it was met, and where it falls short |
|---|---|---|
| Every figure has a source and date; estimates are labelled as estimates on the chart | **Met** | Every data chart caption carries source IDs and an as-of date. Implied or estimated values (for example 2025 AUM bars worked back from growth rates, KCS headcount ranges, intern numbers) carry "est." or a range on the chart and an INFERRED tag in the caption. Conceptual diagrams with no numbers say so ("illustrative"). |
| A total beginner could read the role, firm and industry parts without another source | **Met** | Every term is defined in line on first use and again in the glossary (about 120 terms in seven themes). The basics part starts from "what is investing" before any KKR fact. |
| "Why KKR / why KCS" is mechanism, not adjectives, and would not transplant to a rival | **Met** | The answer rests on four KKR-specific mechanisms (one P&L and compensation pool; four engines under one client team; KCS and KCM joined by mandate and by one European head; trust as an asset, via Walter Industries). Each has a "don't overclaim" box where rivals have something similar. |
| The regulatory section is current and dated correctly | **Met, two caveats** | AIFMD II (OJ 26 Mar 2024, transposition 16 Apr 2026), ELTIF 2.0 (10 Jan 2024), FCA CP26/28 (consultation closes 14 Oct 2026), Pension Schemes Act 2026 (Royal Assent 29 Apr 2026), SEC private fund rules vacated (5 Jun 2024), US EO 14330 (7 Aug 2025) and DOL proposal (30 Mar 2026) were all checked against sources. MiFID II and the UK AIFM Regulations 2013 dates were not re-verified this session. |
| The team section goes beyond the JD, with method shown and thin evidence admitted | **Met** | The KCS EMEA map names 46 senior people from KKR's own directory (20 in London), with an estimate of 55-90 in total and the scaling method shown. No "Head of KCS EMEA" title exists publicly, and reporting lines are marked as inferred. |
| Every JD bullet has three scenarios, and the composure set has decision trees | **Met** | The KCS playbook has 11 lines (the seven KCS description lines and the four intern duty lines) with easy, medium and hard cards each (33 cards), and five composure scenarios, three drawn as decision trees. The complete pack adds 30 scenarios across the general duties and testable qualification bullets. |

| Requirement | Status | How it was met, and where it falls short |
|---|---|---|
| People sections contain only public professional information, with identity uncertainty flagged | **Met** | Names, titles, offices and career paths come from KKR's own biographies and press releases. No personal information. Names that conflict between sources (for example a 2023 press title not in today's directory) are flagged and not presented as current. |
| Research depth (12+ searches, 8+ full fetches per workstream) | **Partly met** | A shared web-search limit cut searches short in four workstreams (as few as 7 queries). Each compensated with many direct fetches of primary documents (over 8 per workstream), but trade-press and forum coverage is thinner than intended. See "research limits" above. |
