

The Advisor, the Private Bank, and JPMorgan Chase

A zero-knowledge, in-depth briefing for the 2027 Global Private Bank Advisor Summer Internship, London. What the role is, how the client and internal work flows, what the firm is and why it is built the way it is, how it compares with its rivals, and what its values mean once the marketing is stripped away.

Prepared: 8 September 2026, for the application closing 1 November 2026 (rolling).

Companion: Guide 2 covers the firm's strategy from the 2021 to 2025 Form 10-Ks and shareholder letters, and drills into Asset & Wealth Management and the International Private Bank.

How to read: Sections 1 and 2 first (the role). Then 6 (the division). Then 3 to 5 (the firm and its rivals). Section 7 last. Anything marked "assumption" or "unverified" should be checked with a recruiter or alumnus before you repeat it.

Sources: JPMorgan Chase Form 10-K filings (FY2021 to FY2025), shareholder letters, Investor Day transcripts (2022 to 2025), the February 2026 Company Update, quarterly earnings through Q2 2026, J.P. Morgan Private Bank websites, and the press. Full list in Appendix B. Figures are as reported by the firm unless stated; peer figures come from their own reports.

1. The role, explained from zero

ASSUMPTIONS MADE IN THIS SECTION

The job posting is deliberately non-technical, so this section fills gaps using (a) J.P. Morgan's own descriptions of its Private Bank team model, (b) the Private Bank "Advisor" analyst programme it runs for graduates, and (c) how comparable private banks run summer programmes. Where I infer rather than quote, I say so. Anything marked **assumption** should be verified with a recruiter or an alumnus before you repeat it in an interview.

1.1 One paragraph, no jargon

J.P. Morgan's Private Bank looks after very wealthy families: people who have typically built or inherited tens of millions of pounds, dollars or euros. Those families need someone to invest their money, lend them money against what they own, keep their cash safe, move it across borders, and plan how it passes to the next generation without being wasted or fought over. The **Advisor** (J.P. Morgan's name for the private banker) is the person the family actually talks to. The Advisor finds the family in the first place, earns their trust, understands what they want, and then brings in J.P. Morgan's specialists (investors, lenders, trust lawyers) to deliver it. The summer internship is a nine-week trial of whether you can learn to be that person.

1.2 What the words in the job title mean

Global Private Bank (GPB)

The part of J.P. Morgan that serves ultra-wealthy individuals, families and their family offices worldwide. It sits inside the firm's Asset & Wealth Management (AWM) division. "Private" is historical: it means banking done privately for individuals, as opposed to for corporations or the public.

Advisor

At J.P. Morgan this is the client-facing relationship role. At other banks the same seat is called Private Banker, Relationship Manager or Client Advisor. J.P. Morgan itself has used "Banker" for the same seat and still does internally; the careers pages now say "Advisor". It is a sales-and-relationship job with technical content, not a research or trading job.

Summer Internship Program

Nine weeks in London, starting with a one-week induction. Interns are placed with a team of advisors and specialists. Strong performers are offered a place on the full-time Advisor programme after graduation.

London, 60 Victoria Embankment

J.P. Morgan's EMEA headquarters on the Thames, opposite Blackfriars. The Private Bank's international (non-US) business is run largely from here; EMEA private banking has offices in roughly 17 locations across 11 countries per the posting.

1.3 What the Advisor is, and is not

The Advisor IS

- The **owner of the relationship**: one name the family can call at 7am when a deal is closing or a child is starting university abroad.
- A **business developer**: finding new families and persuading them to move assets to J.P. Morgan. This is sales, and the firm says so ("relationship building and sales capacity" is in the posting).
- A **diagnostician**: listening well enough to work out what the family actually needs (often not what they first ask for).
- A **coordinator** or "quarterback": pulling in the Investor, Capital Advisor, Wealth Advisor and product specialists, and owning the answer that goes back.
- A **generalist** who must be conversant in markets, credit, tax and estate structuring, without being the deepest expert in any of them.

The Advisor IS NOT

- A portfolio manager. The Investor (investment specialist) builds and manages the portfolio.
- A trader or research analyst. Execution and research sit in other teams.
- A retail bank adviser selling products from a menu. Every client's solution is bespoke and the firm uses both in-house and external products.
- A lawyer or accountant. Advisors work with the family's own professionals, and with J.P. Morgan's in-house trust and planning specialists.
- A desk job. Much of the week is meetings, calls, travel, events and prospecting.

1.4 The basics of the business, for someone who has never studied finance

WHO THE CLIENTS ARE

The Private Bank's clients are described as **high-net-worth (HNW)** and **ultra-high-net-worth (UHNW)**. There is no legal definition, but the industry convention is HNW = more than \$1 million of investable assets, UHNW = more than \$30 million. J.P. Morgan's Private Bank pitches well above the HNW floor: in the US it has historically focused on clients with \$10 million or more, and in international markets the effective floor is typically around \$5 million with a bias to much larger relationships. In practice, London clients include:

- **Entrepreneurs and founders**, before and after selling a business (the sale itself is often the moment they first need a private bank).
- **Senior executives** of listed companies, with stock, options and concentrated positions.
- **Multi-generational families** and their **family offices** (a family's own in-house investment team).
- **Financial professionals**: private equity and hedge fund partners with carried interest and lumpy cash flows.
- **International families** from the Middle East, Africa, continental Europe and Asia who use London as a hub.
- **Sports, entertainment and media figures**, and **foundations and endowments**.

WHAT THEY NEED (THE FIVE VERBS)

Need	What it means in practice	What J.P. Morgan sells to meet it
------	---------------------------	-----------------------------------

Grow	Invest so that wealth compounds ahead of inflation and tax, without taking risks the family cannot survive.	Portfolios in public equities and bonds, hedge funds, private equity, private credit, real estate; delivered as discretionary (the bank decides), advisory (the bank recommends, client decides) or brokerage (client instructs) mandates.
Preserve	Avoid permanent loss: concentration in one stock, one currency, one country or one bank.	Diversification, hedging, structured notes, multi-currency accounts, and the "fortress balance sheet" of the bank itself as a safe place for cash.
Borrow	Wealthy people borrow rather than sell: selling triggers tax and loses the asset's future growth.	Mortgages on prime property, loans secured on investment portfolios (Lombard or securities-based lending), and loans against art, aircraft, yachts or private company shares.
Transfer	Pass wealth to children, spouses, charities, with minimum tax and family conflict.	Trusts, wills, family governance, philanthropy structures, next-generation education. J.P. Morgan owns trust companies that can act as trustee.
Run life	Pay bills, move money across countries, hold cash, exchange currencies, get paid.	Deposits, payments, foreign exchange, custody (safekeeping of securities), reporting across all holdings.

HOW THE BANK MAKES MONEY FROM ALL OF THIS

The Private Bank earns in four ways, and an Advisor is judged on growing all four for each family. First, **fees on assets**: an annual percentage of the money the client has invested with the bank, quoted in basis points (one basis point is 0.01%; 100 basis points is 1%). A £50 million portfolio at, say, 60 basis points earns £300,000 a year, whether or not any trade happens. Second, **net interest income** on deposits and loans: the bank pays the client one rate on cash and charges a higher rate on loans, and keeps the spread. Third, **transaction and placement fees**: commissions on trades, fees for placing clients into private equity or hedge funds. Fourth, **trust and planning fees**. The mix matters strategically: fee income is stable and scales with markets, interest income rose sharply when rates rose in 2022 and 2023, and lending makes a client far less likely to leave. Section 5 gives the actual numbers from the 10-K.

WHY THEY COME TO A BANK LIKE J.P. MORGAN RATHER THAN A BOUTIQUE

- **Balance sheet**: a boutique cannot lend £100 million against a portfolio of private company shares; J.P. Morgan can, and can do it in several currencies.
- **Access to the rest of the firm**: the investment bank that might sell the client's company, the trading desks, the asset manager's private funds, and the research.
- **Safety**: in the 2023 US regional bank crisis wealthy clients moved deposits to the largest banks. Being "too big to fail" is, for a client with £200 million in cash, a feature.
- **Global reach**: a family with members in London, Dubai, Geneva and New York can be served by one bank with a consistent view.
- **Brand and longevity**: the name signals seriousness to the client's own advisers, counterparties and children.

The honest counter-arguments (which a good interviewer will probe) are that a large bank can be slower, more bureaucratic, more compliance-heavy, and that clients sometimes fear being sold the house product. J.P. Morgan's answer to that last point is its **open architecture**: the Private Bank uses external fund managers as well as its own, chosen by a separate Manager Selection team, and the Advisor is held to a fiduciary-style standard. Whether that is fully lived is a fair interview question to ask them.

2. How the work actually flows: client, Advisor, and the firm behind them

2.1 The team around one client

The single most important structural fact about J.P. Morgan's Private Bank is that no client "belongs" to one banker. Every relationship is served by an integrated team, and the Advisor is its captain. Pablo Garnica, who runs the EMEA Private Bank from Madrid, describes the pod as a banker (captain of the relationship), an investor (portfolio decisions), a capital advisor (cash, deposits and lending), a wealth advisor (trusts, estates and structuring) and a client service specialist (transactions). The job adverts use the same language: interns "work with a team of bankers, investment specialists, wealth advisors, and lending specialists".

Figure 1. The integrated team around one client. The Advisor is the single point of accountability; the specialists are shared across a team's clients. The client experiences one relationship, not five product salespeople.

Seat	What they own	What a client would say they do
Advisor / Banker	Winning the client, the overall relationship, the "whole balance sheet" view. A UK Client Advisor posting lists the duties as "generate business results and acquire new assets", lead "new client acquisition and retention", advise on the "overall balance sheet, including asset allocation, investment management, wealth planning", and "leverage internal specialists".	"My banker. The one I call."
Investor	The investment conversation across a banker's whole book: asset allocation, manager selection, market views, portfolio reviews. In London the Investors sit under Diana Robinson, Head of Investments & Advice UK.	"The one who runs my money and tells me what the bank thinks about markets."

Capital Advisor	Lending against portfolios, property and "specialty" assets (aircraft is named on the EMEA site), structured credit, deposits and liquidity. J.P. Morgan says sports finance alone is "the largest lending business in the private banking space".	"The one who got me the £30m against my shares in a week."
Wealth Advisor	Trusts and estates, philanthropy, family governance, next-generation programmes, cross-border residence planning. Staffed by former attorneys in trusts, M&A and tax. UK head: James Chilvers.	"The one who helped us decide how the children inherit."
Client Service Associate	Onboarding packs, KYC documents, payments, meeting materials, coordination with the specialists.	"The one who actually makes things happen."

WHY THE TEAM MODEL MATTERS FOR YOUR APPLICATION

It tells you what the Advisor is being selected for. Not portfolio maths (the Investor has that), not legal knowledge (the Wealth Advisor has that), but the ability to hold the whole picture of a family, win their trust, and orchestrate experts. The posting's phrase "desire to ultimately work with external clients in a relationship building and sales capacity" is a literal description of the seat.

2.2 How we work with the client: the journey

Figure 2. The client journey from prospect to multi-generational relationship. Steps 1 to 3 are 'sales'; steps 4 to 7 are 'relationship management'. At J.P. Morgan the same Advisor owns both, which is the point of the role.

1 Source

Where clients come from, in order of quality: referrals from existing clients; referrals from inside J.P. Morgan (the investment bank that just sold a founder's company, the commercial bank that lends to their firm, a Chase branch whose customer has outgrown it); "centres of influence" such as lawyers and accountants; events and thought-leadership; and cold prospecting. Mary Erdoes at the 2025 Investor Day: "We are every day investing in the companies that are taken public by the investment bank... helping the CEOs on their personal balance sheets, taking their 10b5-1 programs... or we're taking all the great things in the commercial bank and the leads that they have." Referrals convert at a far higher rate than anything else, which is why a banker's own network compounds over a career.

2 Discover

One or several meetings mapping the family's balance sheet (liquid assets, business stakes, property, existing banks), their tax residence, their family structure, and what they are actually worried about. J.P. Morgan's planning framework uses four "lenses": Liquidity (cash for the near term), Lifestyle (spending), Legacy (heirs and philanthropy) and Growth (long-term appreciation). Most of what is said in these meetings is confidential; discretion is a hiring criterion for that reason.

3 Propose

The Advisor and Investor produce a written proposal: a strategic asset allocation, a critique of the client's existing portfolio (concentration, fees, tax drag), lending capacity, a cash and currency plan, and planning ideas. The analyst or intern does much of the assembly: pulling data, building the deck, coordinating the specialists' sections. This is the "Solutions Team" work the posting describes.

4 Onboard

Know-Your-Customer and source-of-wealth documentation: how the fortune was made (business sale agreements, audited accounts, inheritance papers) and where each deposit comes from. Suitability assessments under UK and EU rules. Account opening in the right legal entity (J.P. Morgan SE in Europe, J.P. Morgan (Suisse) in Switzerland, the UK bank in London). Slow, intrusive and non-negotiable. Analysts spend real hours here.

5 Implement

Assets transfer in, portfolios are built, loans are drawn, trusts are settled, cash and FX arranged. The Investor executes through the firm's trading desks; the Capital Advisor's loan goes through credit underwriting; the Wealth Advisor works with the family's own lawyers.

6 Review

Quarterly reviews, market calls, rebalancing, and responding to life events (a sale, a divorce, a move to Dubai, a child joining the business). The house view arrives through Eye on the Market, the Outlook, Top Market Takeaways and the Global Investment Strategy team. J.P. Morgan's AI tool, Connect Coach, now flags for each advisor which clients are under-exposed to a theme after the morning meeting and drafts the talking points.

7 Deepen

Winning more of the wallet (most UHNW families use two to four banks), onboarding the next generation, and being referred to the client's friends. J.P. Morgan says that when a US Private Bank client also actively banks with it, assets and revenues are on average 65% higher, and only 2% of its clients are credit-only. This is the economic point of the whole model.

2.3 How we work with the internal teams

Read the diagram top to bottom. Clients arrive through the "one firm" referral engine at the top. The Advisor diagnoses the need and pulls in the right internal team. What goes back to the client is always owned by the Advisor, even though most of the technical content was produced by someone else. Three teams deserve special mention because they are what the interview will expect you to know:

- **Global Investment Strategy:** the house view. Co-headed by Grace Peters (London) and Stephen Parker, with Michael Cembalest as Chairman of Market and Investment Strategy writing *Eye on the Market*. Their Outlook and weekly *Top Market Takeaways* are what advisors relay to clients.
- **Alternatives:** run globally by Kristin Kallergis Rowland. The Private Bank places about \$2 billion a month into alternatives, has over \$200 billion of alternatives assets, and runs 850+ external managers on its platform alongside its own private equity and credit funds. About half of the assets of its 200 largest clients are in alternatives.
- **Credit underwriting:** the reason the balance sheet is a differentiator. Erdoes' rule: "97% of what we do is fully collateralized... we want two ways out." A loan is only made if the bank can be repaid from the collateral *and* from the client's cash flow.

Figure 3. How the Advisor works with the firm. The Advisor rarely does the technical work; the job is to know the client well enough to bring the right specialist at the right time, and to own the answer that goes back.

2.4 The internship itself: what nine weeks look like

ASSUMPTION

J.P. Morgan publishes the programme outline but not a day-by-day schedule. The week-by-week picture below combines the posting, the London "Investment Solutions" sister programme, the published duties of Client Advisor Support Associates, and accounts from comparable private bank internships. Treat specific week numbers as illustrative.

When	What happens	What you are being judged on
Week 1	Induction: orientation to the firm's businesses, compliance and conduct training, systems access, the Private Bank's team model, markets and product basics. Interns from all London AWM programmes typically train together.	Attitude, punctuality, curiosity, how you treat everyone from security staff to managing directors.
Weeks 2 to 4	Placement with a client team (a market group such as UK Domestic, UK North, Middle East, Continental Europe, or a specialist group). Shadowing client calls and meetings. Building prospect lists, researching families and companies, preparing meeting briefs, pulling portfolio reports, updating CRM.	Reliability, speed and accuracy on small tasks, listening in meetings, asking good questions afterwards not during.
Weeks 3 to 8	The project. The posting describes collaborating with "market strategy, equity, and alternative investment teams to conduct research and analysis, develop products and respond to client needs as part of a Solutions Team". In practice: a research deliverable or client proposal, sometimes as a group case, presented to senior bankers at the end.	Structured thinking, commercial judgment, presentation quality, teamwork under time pressure.

Throughout	Mentorship pairings, learning sessions (markets, lending, wealth planning, alternatives), senior speaker events, networking with other lines of business, social events. J.P. Morgan runs "850+ events" a year for advisor engagement; interns are invited to some.	Networking with intent: do senior people remember you positively? Did you follow up?
Week 9	Final project presentations, reviews with your manager and mentor, and the conversion decision. "Top performers may receive a full-time offer at the end of the summer."	The overall verdict: would this person become an Advisor we want representing us to a family with £100m?

THE FULL-TIME PROGRAMME YOU WOULD BE CONVERTING INTO

The 2027 Global Private Bank Advisor Analyst Training Program is advertised for London, Manchester and Edinburgh. It opens with regional orientation and then a five-week global training programme with analysts from every region (historically in New York), followed by "exposure to every facet of wealth management, including investments, lending, banking, and trust and estate planning". Forum accounts from London analysts describe roughly two years as Analyst, then Associate, with the formal split between the Banker (Advisor) and Investor tracks made at Associate level, and a working day of about 8am to 6.30pm. Erdoes says "half of our new advisors come from growing them from within" and that home-grown 25-year-olds are now "just as productive as our 30- to 35-year-old mid-career hires". Reported London base pay for first-year analysts is around £60,000 plus a relocation payment; treat that as indicative, since it comes from forum posts rather than the firm. UK advisers must hold an FCA-recognised Level 4 qualification (typically the CISI's) before giving regulated advice; the programme funds the exams.

2.5 A representative week for an Advisor (not an intern)

This is the job you are ultimately applying to become. Assembled from J.P. Morgan job descriptions, Erdoes' Investor Day remarks and industry accounts.

Block	Activity	Share of week (typical)
Prospecting	Working referrals, following up introductions from the investment and commercial banks, calling lawyers and accountants, attending or hosting events, researching families in the news, first meetings.	30 to 40%, higher for junior bankers building a book
Existing clients	Reviews, calls after market moves, relaying the house view, coordinating a loan or a trust, solving problems (a payment stuck, a child's account, a property purchase).	30 to 40%, higher for senior bankers
Internal	Morning markets meeting, team meetings, working with the Investor on proposals, credit committee for a loan, compliance and KYC reviews, CRM notes, training.	15 to 25%
Travel	Clients in the regions, Channel Islands, the Gulf, continental Europe; an international banker may travel a week a month.	Variable

Hours are long but predictable compared with investment banking: roughly 50 hours a week is the industry norm. Erdoes has been blunt that early-career mastery takes intensity: junior bankers, she told a Georgetown audience, work "12-hour days six days a week" to reach "mastery", and the two most valuable skills are "how to pitch and how to negotiate a trade". Whether or not you find that appealing is itself a useful test of fit.

3. What JPMorgan Chase is

3.1 One paragraph

JPMorgan Chase & Co. is the largest bank in the United States and, by market value, the largest in the world. It does three things at scale: it banks ordinary Americans and small businesses under the Chase brand; it advises, lends to, trades for and moves money for companies, governments and institutions worldwide under the J.P. Morgan brand; and it manages money and advises wealthy people through Asset & Wealth Management. In 2025 it earned \$57 billion of profit on \$186 billion of revenue, has around 320,000 employees in 66 countries, and is worth roughly \$945 billion on the stock market, which is more than Bank of America, Citi, Wells Fargo and Goldman Sachs combined. Its chief executive since 2005, Jamie Dimon, is the most influential banker of his generation and is now in the last few years of his tenure.

\$185.6bn

FY2025 managed
revenue (8th straight
record)

\$57.0bn

FY2025 net income;

\$4.4tn

Total assets at end-2025
(\$5.0tn by June 2026)

318,512

Employees, 66 countries
(Dec 2025)

3.2 Where the firm came from (the short version that matters)

The name carries two histories. **J.P. Morgan** descends from the merchant bank of Junius and J. Pierpont Morgan (Drexel, Morgan & Co., 1871; J.P. Morgan & Co. from 1895), which financed US railroads, US Steel and General Electric, and effectively acted as the American central bank in the Panic of 1907. Its London arm, Morgan Grenfell, and the J.S. Morgan business gave the firm UK roots that the Private Bank dates to 1838. **Chase** descends from Chase National Bank (1877) and Chemical Bank, retail and commercial lenders that merged repeatedly through the 20th century. The two combined in 2000 (Chase Manhattan bought J.P. Morgan & Co.), and the modern firm was shaped by the 2004 merger with Bank One, which brought Jamie Dimon and a management culture of cost discipline, a "fortress balance sheet" and detailed operating reviews. In 2008 the firm absorbed Bear Stearns and Washington Mutual during the financial crisis; in 2023 it absorbed First Republic. Each crisis acquisition was possible because the firm had more capital than its peers when it mattered, which is the practical meaning of "fortress balance sheet" and a story the firm tells about itself constantly.

The phrase every employee learns comes from J.P. "Jack" Morgan Jr., testifying to the US Senate in May 1933 during the Pecora hearings into Wall Street: "the idea of doing only first-class business, and that in a first-class way, has been before our minds." It is quoted in the Private Bank's letters to this day, and 23 Wall Street, the old headquarters opposite the New York Stock Exchange, gives its name to the unit that serves the very largest families.

3.3 The four lines of business

Figure 4. JPMorgan Chase's four lines of business as reported since the 2024 reorganisation. The Global Private Bank sits inside AWM. Chase's own wealth offering for less wealthy clients sits inside CCB, not AWM.

Segment (FY2025)	Revenue	Net income	ROE	Staff	What it does and for whom
Consumer & Community Banking (Chase)	\$76.0bn	\$18.2bn	32%	144,196	Current accounts, cards, mortgages, auto loans and small-business banking for ~87m US consumers and 7.4m businesses through 5,083 branches and the top-rated US banking app. Includes J.P. Morgan Wealth Management (6,049 advisors, \$1.27tn of client investment assets) and the international digital bank (Chase UK, Chase Germany).
Commercial & Investment Bank	\$78.5bn	\$27.8bn	18%	94,563	Advice, capital raising and lending for companies from start-ups to multinationals (Global Banking); market-making in every asset class (Markets); moving ~\$12tn a day (Payments); custody of \$41tn (Securities Services). Since 2024 also includes Commercial Banking, which serves ~60,000 mid-sized companies.
Asset & Wealth Management	\$24.1bn	\$6.5bn	40%	29,722	Asset Management (\$11.7bn revenue) manufactures funds, ETFs, separate accounts and alternatives for institutions and retail distributors. The Global Private Bank (\$12.4bn revenue) advises wealthy families. \$4.8tn under management, \$7.1tn of client assets.
Corporate	\$7.0bn	\$4.5bn	n/m	50,031	Treasury and the Chief Investment Office manage the firm's own \$1.5tn of cash and securities, liquidity and interest-rate risk. Also the central functions: technology, risk, legal, HR, audit.
Firm	\$185.6bn	\$57.0bn	17%	318,512	Managed basis. ROTCE 20%. CET1 ratio 14.5%.

Source: JPMorgan Chase Form 10-K for FY2025 (filed February 2026). Revenue is on the firm's "managed" basis, which grosses up tax-exempt income; reported revenue was \$182.4bn.

FY2025 revenue and net income by segment (\$bn, managed basis)

Figure 5. The CIB is now the largest revenue and profit engine. AWM is small by revenue but earns the firm's highest return on equity (40%).

Two things stand out from the numbers. First, the Commercial & Investment Bank, not Chase, is now the largest profit engine: about 42% of revenue and 49% of profit. Second, AWM is small by revenue (13%) but produces the highest return on equity in the firm (40%), because it needs little capital: it earns fees, not spread on a big loan book. Erdoes calls this the "4 to 6 times multiple lift" that a recurring, capital-light business deserves in a bank's valuation. That is a large part of why the firm keeps pouring investment into hiring advisors.

JPMorgan Chase managed revenue and net income, 2021 to 2025 (\$bn)

Figure 6. Five years of growth. Revenue rose by almost half between 2021 and 2025, driven first by higher interest rates and then by markets and investment banking. Net income dipped in 2022 as loan-loss reserves were rebuilt.

3.4 Each division in plain English, and why sectors sit where they do

CONSUMER & COMMUNITY BANKING: THE DEPOSIT AND DATA MACHINE

Chase is the largest US retail bank by deposits (11.1% of national retail deposits) and the largest US credit card issuer (23.6% of card spending). Its economics are scale economics: 87 million customers generate cheap deposits that fund the firm, and card spending generates fees and interest. Its strategic logic is the "funnel": a customer opens a checking account, gets a card, buys a house, and eventually invests. Marianne Lake, who ran it until June 2026, said the "secret sauce" is that "90% of new advised clients were referred by bankers" in the branches. That is why **J.P. Morgan Wealth Management sits in Chase rather than in AWM**: its clients are acquired through the branch network, the model is scaled and digital, and the product shelf is supplied by AWM. Chase has 5.5 million affluent banking households but only about a fifth of them invest with the firm, which the firm sees as its biggest untapped wealth opportunity. The same logic

explains why Chase UK sits here: it is a digital consumer bank built to be "a multi-country digital bank at the intersection of banking and investing", now in the UK (2.8 million customers) and Germany (launched May 2026).

COMMERCIAL & INVESTMENT BANK: THE CORPORATE LIFECYCLE MACHINE

The CIB serves companies and institutions at every stage. Commercial Banking lends to and banks mid-sized firms and start-ups ("innovation economy"); Global Corporate Banking covers the largest multinationals; Global Investment Banking advises on mergers and raises equity and debt; Markets makes prices in every asset class for institutional investors; Payments moves money and holds \$760 billion of corporate operating deposits (a third of the firm's funding); Securities Services safeguards \$41 trillion of assets for fund managers. In January 2024 the firm merged Commercial Banking into the CIB. Doug Petno's explanation: "Our clients are growing, scaling and expanding globally at an accelerated pace... a single wholesale operating entity, four business units tightly knit... to be our clients' most important financial partner." The logic is client-for-life coverage: the company that Commercial Banking lends to at \$50 million of revenue is the company Investment Banking takes public at \$5 billion. Payments sits in the CIB because it is a wholesale product (treasury services, merchant acquiring) whose deposits fund the Markets business and whose rails Chase and Securities Services also use.

ASSET & WEALTH MANAGEMENT: THE FIDUCIARY MACHINE

AWM is where the firm acts as a fiduciary, managing other people's money for a fee rather than lending its own. It has two halves that share one engine. Asset Management ("J.P. Morgan Asset Management", run by George Gatch) manufactures products: it is the world's largest active ETF manager (\$250 billion), the second-largest separately-managed-account provider (\$434 billion), and runs \$560 billion of alternatives and roughly \$1 trillion of money-market funds. The Global Private Bank (run by David Frame) distributes advice, investments, lending, banking and trust services to wealthy families. Erdoes insists they be seen as "two different businesses", but they sit together because the Private Bank is Asset Management's most important distribution channel and Asset Management's research and products are the Private Bank's raw material. A shared unit, Wealth Management Solutions (Martin Marron), builds the advice platform used by both the Private Bank and Chase's advisors so that "no matter where you come into this institution, you get the best advice." Section 6 goes deep on this division.

CORPORATE: THE BALANCE SHEET'S BALANCE SHEET

Treasury and the Chief Investment Office manage the firm's liquidity (\$1.5 trillion of cash and marketable securities), capital and interest-rate risk. It is where the "fortress" is engineered. It also carries the firm's central costs and one-off items (the 2024 Visa share gain landed here).

3.5 How the pieces link: the "one firm" engine

Dimon's phrasing in every annual letter is that the firm is "not a conglomerate": "we strive to build enduring businesses, which rely on and benefit from one another." CFO Jeremy Barnum in February 2026: "Our completeness, global presence, diversification and scale are not just attributes. They're our competitive advantages... our operating model enables us to support our clients and customers through their entire lifecycle and through multiple generations." The disclosed evidence for the Private Bank specifically:

- "Over 95% of our top 50 AWM clients also work with our other lines of business." (Erdoes, 2025 letter)
- "There are 2,000 private banking clients that walk into those [Chase] branches every day." (Erdoes, Investor Day 2025)
- 42% of the world's venture-backed company cap tables sit in J.P. Morgan's "innovation economy" franchise, built after the collapse of Silicon Valley Bank and First Republic in 2023. Founders on those cap tables are future Private Bank clients.
- 60% of major US sports team owners are Private Bank clients; the firm financed 10 of the last 15 major team transactions by combining Private Bank lending with the investment bank's municipal finance and the commercial bank's real estate expertise.
- Global Shares (bought 2022, now "J.P. Morgan Workplace") administers equity plans for 1.8 million employees and \$372 billion of assets; its explicit purpose is "to give leads... to the whole wealth management continuum".

- Payments sweeps about \$175 billion of corporate client balances into AWM's money-market funds.

Figure 7. The referral engine around the Global Private Bank. Every arrow runs both ways: the Private Bank also sends its clients' companies to the investment and commercial banks. No internal transfer pricing is applied to these referrals.

THE CULTURAL RULE THAT MAKES THIS WORK

Most banks have referral programmes that fail because each division fights over who gets credit for the revenue. Erdoes' answer at Investor Day 2025 is the one to remember: "that whole flywheel of people, they don't sit there and count the beans of who gets credit for what... We do not tolerate that here at J.P. Morgan. We do not have side accounting groups that think about where those revenues get counted for. We are trying to win for the client." Whether "OneJPM" is an official slogan is unclear; the phrases the firm actually uses in public are "one face", "client-for-life", "a single wholesale operating entity" and "we are not a conglomerate".

3.6 The wealth ladder: which client goes where, and why

Figure 8. The wealth ladder inside JPMorgan Chase. As a client's assets grow they move from a branch-based, scaled model in CCB to the bespoke, team-based Private Bank in AWM. Thresholds are indicative and vary by market.

The split of wealth clients between Chase (CCB) and the Private Bank (AWM) is deliberate and was formalised in late 2020 when certain wealth clients were moved from AWM to CCB. The logic is that below roughly \$5 to 10 million the economics only work with a scaled, branch-and-app model, while above it they only work with a bespoke team. J.P. Morgan Private Client, launched in 2024 at \$750,000 and up, was built on the First Republic model that the firm acquired in 2023: a dedicated banker, a single point of contact and concierge service, in converted First Republic offices. 23 Wall, at the very top, was created in 2019 and now covers "800+ families" with an average net worth around \$5 billion, offering institutional-style access to the firm's deal flow, balance sheet and research. The Private Bank Advisor role sits in the two gold rows.

3.7 Who runs it

*Marianne Lake (CEO CCB 2024 to Jun 2026) retired when the co-presidents were named. The two co-presidents are the visible successor candidates.
Retention awards (June 2026): ~\$30m each to Petno and Rohrbaugh; \$20m each to Piepszak and Erdoes.*

Figure 9. Senior leadership as of September 2026, after the June 2026 co-president appointments.

Succession is the live story of 2026. Dimon has said he expects to remain CEO for "a few years" and then become Executive Chairman. On 25 June 2026 the board named Doug Petno and Troy Rohrbaugh co-presidents, with Petno as sole CEO of the CIB and Rohrbaugh as CEO of CCB, and Marianne Lake retired. Press reports say Erdoes is no longer considered a candidate for the top job; she received a \$20 million retention award and remains CEO of AWM. For an applicant the point is not the horse race but the pattern: JPMorgan promotes people who have run more than one business, and it treats management change as continuity ("the board meets without me in the room at every meeting since 2000," Dimon said in February 2026).

3.8 Culture and values, stripped of marketing

JPMorgan Chase does not have a catchy mission statement. It has a booklet. *How We Do Business* lists twenty "Business Principles" under four headings, and they date from the "small blue book" Dimon's team sent to employees after the 2004 Bank One merger. They are worth reading in full because interviewers at the firm were trained on them:

Exceptional client service

1. We focus on the customer
2. We are field and client driven; we operate at the local level
3. We build world-class franchises, investing for the long term, to serve our clients

Operational excellence

4. We set the highest standards of performance
5. We demand financial rigor and risk discipline; we will always maintain a fortress balance sheet
6. We strive for the best internal governance and controls
7. We act and think like owners and partners
8. We strive to build and maintain the best, most efficient systems and operations
9. We are disciplined in everything we do
10. We execute with both skill and urgency

Integrity, fairness and responsibility

11. We will not compromise our integrity
12. We face facts
13. We have fortitude
14. We foster an environment of respect, inclusiveness, humanity and humility
15. We help strengthen the communities in which we live and work

A great team and winning culture

16. We hire, train and retain great, diverse employees
17. We build teamwork, loyalty and morale
18. We maintain an open, entrepreneurial meritocracy for all
19. We communicate honestly, clearly and consistently
20. We strive to be good leaders

Separately, the firm's HR brand lists five values, **Heart, Courage, Curiosity, Excellence, Service**, but they barely appear in what executives actually say. What executives actually say, repeatedly, reduces to five ideas:

The idea	What it means when stripped down	How it shows up in the work
Fortress balance sheet	Hold more capital and liquidity than the rules require so that you are the safe place in a crisis and can buy when others must sell. "A bank can't be a fair weather friend."	The firm bought Bear Stearns, WaMu and First Republic in crises. Private Bank clients moved cash to JPMorgan in March 2023. 97% of Private Bank lending is fully collateralised and losses run at one basis point.
Face facts / "cold-blooded"	Look at the numbers as they are, admit mistakes, and say the uncomfortable thing. Dimon's letters spend pages on what could go wrong.	The house view is allowed to disagree with clients. Erdoes: "if a client says, 'I don't like fixed income'... that's not the right answer."

Invest through the cycle	Keep spending on branches, bankers and technology in downturns when competitors cut. "Good expenses" versus "bad expenses".	Private Bank advisor headcount went from 2,500 (2020) to 4,100 (2025) straight through a rate shock and a banking crisis. The 2026 budget's first driver of expense growth is "bankers, advisors and branches".
Kill bureaucracy	Dimon's obsession: "Bureaucracy, complacency, and arrogance will take down a company." Small teams, decisions in the room, no six-month email chains. Five days in the office since March 2025.	A Private Bank team is expected to get a founder a term sheet in days. The "no side accounting groups" rule on referrals is an anti-bureaucracy rule.
Meritocracy and ownership	"Act and think like owners"; promotions on results; leaders who "both play and manage" (the Private Bank's player-coach model).	Advisors are measured on net new assets, new clients and revenue. Half of new advisors are home-grown analysts.

WHAT "ONE JPMORGAN", "COLLABORATION" AND "TEAMWORK" MEAN HERE, SPECIFICALLY

They do not mean niceness. They mean that the firm's economic model depends on referrals flowing between divisions without internal transfer pricing, and on client teams sharing one client without fighting over credit. Dimon's phrase in the 2025 letter is that the firm is "its own strong 'neural network', powerful and healthy connections between our people". The test of whether you understand this: can you explain, in one sentence, why a private banker should introduce a client's company to the commercial bank even though the banker earns nothing directly from it? (Because the company's growth and eventual sale is the source of the family's next liquidity event, and the bank that financed the company is the bank that gets the call.)

4. How JPMorgan stacks up: competitor analysis by division

Numbers are for fiscal 2025 unless stated. Peers report on different bases, so treat comparisons as directional. The point of this section is not the league table but the *reasons* JPMorgan leads or lags, because those reasons are its strategy.

4.1 The group picture

Return on tangible common equity, FY2025 (%)

Company reports; GS and Wells approximate

Figure 10. Only Morgan Stanley, a wealth-heavy firm with far less balance sheet, earns a higher return than JPMorgan. Among universal banks JPMorgan is alone at 20%.

Bank	ROTCE FY2025	Efficiency ratio	Market cap (Sep 2026)	Price / tangible book
JPMorgan Chase	20%	51%	\$945bn	~3.3x
Morgan Stanley	21.6%	68%	\$339bn	~3.5 to 4x

Goldman Sachs	~15 to 16%	n/a	\$300bn	~2.5 to 3x
Bank of America	14.2%	62%	\$436bn	~2.0x
Wells Fargo	~15%	~64%	\$269bn	1.5 to 2.0x
Citigroup	7.7%	65%	\$231bn	~1.0x
HSBC	13.3% (17.2% ex-notables)	n/a	\$366bn	~1.5x
UBS	10.8% (13.7% underlying)	81% (74% underlying)	\$170bn	~1.7x
Barclays	11.3%	61%	\$91bn	~1.0x

Sources: company FY2025 results; market data from CompaniesMarketCap and GuruFocus, 7 September 2026. Some peer multiples are approximate.

The one-line summary: JPMorgan earns Morgan Stanley's returns on Bank of America's balance sheet. A 20% return at a 51% cost ratio, sustained for years, is why the market pays over three times tangible book for it and about one times for Citi or Barclays. Every division below feeds that.

4.2 Consumer banking: Chase versus the US banks and the UK challengers

FY2025	Chase (JPM)	Bank of America	Wells Fargo	Citi (US Personal)	Capital One
Consumer net income	\$18.2bn (ROE 32%)	\$12.2bn	group \$21.3bn	\$3.1bn	hit by Discover integration
Deposits	firm average \$2.57tn	consumer \$948bn	consumer \$779bn	\$365bn (+9%)	\$468bn
Card purchase volume	#1, \$1.34tn (2024)	\$1.02tn (credit+debit)	n/a	branded \$243bn	#1 by balances after Discover
Branches	5,083 and growing	3,628	~4,000	n/a	n/a
Active mobile users	61.7m	41.4m	n/a	n/a	n/a

Why Chase leads: it is the only large US bank still opening branches at scale (500 more planned) while also having the most-used app; it is the top card issuer with premium travel positioning (Sapphire, Chase Travel, and from 2027 the Apple Card portfolio bought from Goldman); and its branch-to-wealth funnel turned \$1.3 trillion of client investment assets into a business with 6,000 advisors. **Where it lags:** deposit growth was the slowest of the big four in 2025, card losses are rising (3.3% by mid-2026), and Capital One now owns its own network after buying Discover. **In the UK,** Chase UK has 2.8 million customers and about \$35 billion of deposits and turned its first profit in 2025 (net income £114 million), against Monzo's 15 million customers and Revolut's 13 million UK customers and £1.7 billion of pre-tax profit. Chase UK holds far more deposits per customer than any neobank (around £10,000) but its growth is deliberately constrained: crossing the UK ring-fencing threshold would force a structural change, so the strategy is depth and cross-sell (card, Nutmeg-based investing, pensions via the WealthOS acquisition), with Germany (May 2026) as the first step to a pan-European digital bank.

4.3 Corporate and investment banking: versus Goldman, Morgan Stanley, BofA, Citi and the Europeans

FY2025	JPMorgan	Goldman Sachs	Morgan Stanley	Bank of America	Citi	Barclays / Deutsche / UBS
--------	----------	---------------	----------------	-----------------	------	---------------------------

Investment banking fees	~\$10.1bn, #1 globally, 8.4% wallet share (15+ years at #1)	\$9.3bn (+21%)	\$7.6bn (+23%)	\$6.8bn, #3	\$4.6bn (+20%)	Barclays 6th; Deutsche €1.9bn; UBS smaller
Markets revenue	record; FICC \$22.5bn, Equities \$13.3bn	record equities year	Equities \$15.6bn, FICC \$8.7bn	\$17.8bn	\$22.0bn (FICC \$16.2bn)	Barclays 6th; Deutsche FIC €9.6bn; UBS best since 2013
Payments / treasury	\$19.3bn record; #1 treasury services and #1 US merchant acquirer	n/a	n/a	significant but smaller	TTS \$15.4bn; Services return 28.6%	n/a
M&A announced value	\$1.44tn (#2)	\$1.66tn (#1, 36% share)	\$1.17tn	\$486bn	record advisory year	n/a

Why JPM leads: it is the only bank that is number one *simultaneously* in investment banking fees, in Markets (top two in 11 of 13 product lines), in treasury services, in US merchant acquiring and in middle-market lending. That completeness is the strategy: 80,000 corporate clients covered "for life" across 220 cities, with Payments' \$760 billion of operating deposits funding the Markets business. **Where it lags:** Goldman still out-earns it in pure M&A advice and had the record equities year; Goldman and Morgan Stanley grew investment banking fees faster in late 2025; JPMorgan's fixed-income share is below pre-pandemic levels and management admits "areas of underperformance such as Rates"; and Citi's Services business is the closest rival in treasury. The Europeans (Barclays, Deutsche, UBS) are structurally sixth to ninth and regional. **Why this matters for a private banker:** the strongest investment bank in the world is the strongest source of liquidity-event clients in the world. UBS and Goldman can make the same claim in Switzerland and in US tech respectively; nobody else can make it globally.

4.4 Asset and wealth management: the peer set that matters most to you

Client assets or invested assets, FY2025 (\$tn)

Different definitions; directional only

Figure 11. Scale in wealth and asset management. Morgan Stanley's number is client assets across all its wealth channels; J.P. Morgan's AWM figure excludes Chase Wealth Management's \$1.3tn, which sits in CCB.

FY2025	Client assets / AUM	Revenue	Margin or return	Net new assets	What it is known for
J.P. Morgan AWM	\$7.1tn client assets; \$4.8tn AUM	\$24.1bn	36% pretax margin; 40% ROE	\$553bn	#1 private bank (Global Finance, 7 years); uniform global model; alternatives; active ETFs; 4,100 PB advisors
Morgan Stanley Wealth	\$9.3tn client assets	\$31.8bn	29% margin	\$356bn	Largest US wealth revenue base; E*Trade and workplace (Solium) funnel; ~15,000 advisors

UBS Global Wealth	\$4.8tn invested assets	n/a	PBT \$6.1bn; cost/income 76%	\$101bn	The only "truly global" wealth manager; dominant in Switzerland, Europe, Asia after absorbing Credit Suisse
Goldman Sachs AWM	\$3.6tn supervised; \$420bn alternatives	\$16.7bn	~25% margin; ROE 12.5%	32 straight quarters of inflows	Ultra-high-net-worth focus; alternatives; won Euromoney's 2025 world's best private bank
Bank of America (Merrill + Private Bank)	\$4.8tn balances	\$24.9bn	28% margin	\$82bn	Merrill's mass-affluent adviser army; US-only private bank
Citi Wealth	\$1.1tn balances	\$8.6bn	NI \$1.5bn (+49%)	n/a	Global footprint, Asia and Latin America UHNW, London hub; a turnaround under Andy Sieg
HSBC Global Private Banking	\$2.1tn wealth balances (over \$1tn Asia)	wealth fees \$9.4bn	Wealth PBT \$4.4bn	n/a	Asia and Middle East leader; relaunching UK private banking
Julius Baer	CHF 521bn	n/a	NP CHF 764m (down 25%)	CHF 14bn	Swiss pure-play; London a key booking centre; recovering from the Signa losses
Pictet / Lombard Odier	CHF 757bn / CHF 349bn	n/a	NP CHF 667m / CHF 200m	CHF 19bn / n/a	Geneva partnerships; multi-jurisdiction structuring; discretion
Coutts (NatWest)	£58.5bn AUMA	£1.13bn	Op profit £394m (+49%); ROE 21.7%	£4.6bn	330-year UK heritage; buying Evelyn Partners to become "the UK's leading private bank and wealth manager"
Barclays Private Bank & WM	£52.9bn AuM	£1.38bn	PBT £375m (down 2%); ROTE 26%	£3.3bn	UK plus Crown Dependencies, Switzerland, Dubai, India
BlackRock (asset management only)	\$14.0tn AUM	\$24.0bn	n/a	\$698bn	Passive and ETF scale; Aladdin; private markets via GIP and HPS

4.5 The honest verdict for the UK and EMEA private bank

Where J.P. Morgan wins in London

- **One global model.** "We operate the only private bank in the industry with a uniform business model globally" (Erdoes). A family in London, Dubai and New York gets the same team structure, platform and credit process.
- **Balance sheet.** Lending capacity, in size and across currencies, that Swiss partnerships and boutiques cannot match; the largest sports-finance and jumbo-mortgage franchise in private banking.
- **Alternatives.** Euromoney's world's best private bank for alternatives in 2025 and 2026; over \$200bn of alternatives, evergreen structures, an 18-person in-house structuring team.

Where J.P. Morgan loses in London

- **Scale in Europe.** International Private Bank client assets are about \$750bn across all non-US regions, against UBS's \$4.8tn. UBS is the default for Swiss booking, Gulf family offices and cross-border European families.
- **UK heritage.** Coutts (330 years, royal warrant), Barclays and HSBC own domestic UK private banking: sterling current accounts, mortgages, the "family bank" role. Chase UK and the Private Bank are not yet joined up the way Coutts and NatWest are.
- **Thresholds.** At roughly \$10m and up, J.P. Morgan leaves the £1 to 5m market to Coutts, Evelyn, Rathbones and St. James's Place.

- **Growth and margin.** Advisor headcount up over 60% since 2020, "outpacing major peers", funded by a 36 to 38% margin. Barclays' private bank profit fell and Julius Baer's fell 25% in the same year.
- **Founder connectivity.** The investment bank that sells the company is the bank that meets the founder first.
- **Safety.** Credit Suisse collapsed in 2023 and Julius Baer took heavy losses on Signa; J.P. Morgan's "fortress" is a sales argument in Europe.
- **Sub-scale local coverage.** Erdoes' own words: market share "below 1%" in several international markets. A runway, but also a gap.
- **Non-dom outflows.** The April 2025 tax changes push internationally mobile UHNW families out of London, which hits J.P. Morgan's core international segment harder than a domestic-heavy Coutts.

The strategic response to the "loses" column is exactly what Adam Tejpaal, CEO of the International Private Bank, described in 2026: "in terms of where the biggest opportunity is to grow market share, it's very much within the European franchise", with Europe split into three regions under "almost CEO-like" heads (UK; Continental Europe; Switzerland and the Middle East), 1,000 international relationship managers today with a stated ambition of around 1,900 "over time", and new offices in Manchester, Edinburgh, Glasgow, Munich, Hamburg and Berlin. That is the growth plan your internship class is being hired into.

5. The moves: acquisitions, investments and what the firm has chosen not to do

JPMorgan's deal-making since 2021 follows a pattern: many small technology and capability purchases, one opportunistic crisis acquisition, and a refusal to do large conventional M&A because the law and the CEO's preferences both point to organic growth. Guide 2 covers the strategic narrative year by year; this section is the reference table.

Date	What	Division	Why, and what happened
Dec 2020	55ip; cxLoyalty	AWM; Chase	55ip's tax-aware model portfolio technology became the core of a \$434bn separately-managed-account platform (personalisation). cxLoyalty became the engine of Chase Travel.
Jun 2021	Nutmeg (UK digital wealth manager), reported ~£700m	International Consumer	Bought to give Chase UK an investing arm; 140,000 clients and £3.5bn then, now "J.P. Morgan Personal Investing" with \$12.5bn. Shows the firm's willingness to pay for a UK foothold.
Jun 2021	OpenInvest; Campbell Global	AWM	Values-based portfolio customisation; timberland and forestry for real-assets and carbon strategies. Both are "alternatives and personalisation" plays Erdoes named in her 2021 letter.
2021 to 2023	C6 Bank (Brazil), 40% rising to 46%	International Consumer	A partnership rather than a launch; C6 grew from 8m to 25m clients.
Sep 2021	Frank; The Infatuation	Chase	Frank became a fraud case (its founder was convicted in 2025); a reminder that the firm's own due diligence is fallible.
2022	Global Shares (Ireland), ~\$730m	AWM (Workplace)	Equity-plan administration for 1.8m employees and \$372bn: an engine of future private clients, and a European asset.

2022	Viva Wallet (Greece), 48.5% for ~\$1bn; Volkswagen Payments majority stake; Renovite; Frosch (travel)	Payments; Chase	Payments bets. Viva turned into a legal dispute with its founder from 2024; the VW payments venture was wound down from November 2025. Not everything works, and Dimon says so: "We've done several, some did not work."
Mar 2023	Aumni (~\$230m reported)	CIB	Venture-capital deal analytics for the innovation-economy franchise.
1 May 2023	First Republic Bank , from the FDIC	Chase and AWM	\$10.6bn paid, \$92bn of deposits, \$173bn of loans, an FDIC loss-share on 80% of credit losses, a \$2.7bn day-one gain. Bought because First Republic "had done an outstanding job serving high-net-worth clients". Its brokerage advisors (~200, ~\$200bn) went into Chase's J.P. Morgan Advisors; its private banking clients went to the Private Bank; its service model became "J.P. Morgan Private Client". The only kind of bank acquisition the firm is legally allowed to make.
Oct 2024 to Feb 2025	Direct-lending partnerships (Cliffwater, FS Investments, Shenkman, Octagon, Soros and others)	CIB with the Private Bank	\$50bn of balance sheet plus ~\$15bn of partner capital for private credit, to win back leveraged-finance share lost to private-credit funds; \$12 to 14bn deployed by end-2025. The Private Bank is a co-owner of the joint venture.
2025 to 2026	Anthropic (debt, then equity in the \$30bn Series G); Coinbase partnership; JPMD deposit token and Kinexys blockchain	Corporate; Chase; Payments	Positioning for AI and for tokenised money. Kinexys has processed over \$3tn cumulatively.
Oct 2025	Security & Resiliency Initiative: \$1.5tn over ten years, up to \$10bn (Dimon: "could do \$20bn") of direct equity	Corporate	Defence, energy, supply chain and frontier technology; Todd Combs left the board to run it. The clearest signal of how the firm wants to deploy its ~\$40bn of excess capital.
Jan 2026	Apple Card portfolio (from Goldman), ~\$20bn of receivables; WealthOS (UK pensions technology)	Chase; International Consumer	The Apple deal closes around late 2027 and was described as "patient and thoughtful deployment of excess capital". WealthOS adds pensions to the UK investing app.

WHAT THE FIRM HAS NOT DONE, AND WHY

- **No US bank acquisitions.** Federal law bars a bank holding more than 10% of US deposits from buying another deposit-taker except in a failure. JPMorgan is over the cap, so Bear Stearns, Washington Mutual and First Republic are the only kind of bank deal it can do. This is why "excess capital" is deployed into branches, advisors, technology and now equity stakes instead.
- **No large asset or wealth management acquisition.** Erdoes told the February 2026 Company Update that her finance head "signed a different NDA once every two weeks last year... about 25 of them. Most of the big deals... we had seen and turned down." Dimon: "I'd love Mary to buy something if it made sense." The bar is high because AWM's organic flows (\$553bn in 2025) already exceed what any purchase would add.
- **Maybe something abroad.** Dimon in May 2026: "There might be, in the next couple years, a chance to put \$10 or \$20 billion to work buying something... we are on the lookout." Speculation has centred on custody or international

franchises. Nothing announced.

6. The division's work: the Global Private Bank in depth

6.1 The numbers that frame everything

Asset & Wealth Management: revenue (\$bn), client assets (\$tn) and Private Bank advisors (thousands), 2021 to 2025

Figure 12. Three measures of AWM's growth on one scale for compactness (units differ per series; read each series against its own label). Revenue up 42%, client assets up 65%, advisors up roughly 50% in five years.

The firm discloses the Private Bank inside AWM. AWM's revenue rose from \$17.0bn in 2021 to \$24.1bn in 2025, its client assets from \$4.3tn to \$7.1tn, its advisors from roughly 2,700 to 4,101, and its return on equity from 33% to 40%. AWM's internal targets, set in 2020 and never raised (5% revenue growth, 25% pretax margin, 25% ROE, 4% flows), have been beaten every year. Erdoes' explanation for not raising them: "I don't want anyone on the management team to have anything else in their head except for growth."

6.2 Who the clients are

J.P. Morgan's EMEA site names five groups: individuals and families; family offices; "institutional families" (the 23 Wall segment); business owners, founders and entrepreneurs; athletes and entertainers. In practice the London book is a mix of domestic UK wealth (entrepreneurs, private equity and hedge fund partners, executives, landed and inherited wealth) and international families using London as a hub: Gulf, Indian, African, Greek, Italian, Nordic and Israeli families among them. Thresholds are not published; third-party guides put the US Private Bank floor at \$10 million of investable assets and the UK at around £10 million, with the internal "UHNW" segment starting around \$25 million and family-office coverage from around \$100 million. The Private Bank's own family-office page says family offices usually have "at least a few hundred million".

Two facts about the client base explain the sales approach. First, J.P. Morgan's Global Family Office Report (2026 edition, 333 family offices, average net worth \$1.6 billion) found that these families hold roughly 40% in public equities, 35% in alternatives, under 15% in bonds and 8% in cash, that 86% have no formal succession plan, and that their top worries are geopolitics (74%) and trade policy (60%). Second, four in five North American ultra-wealthy people are self-

made. The typical new client is therefore not a dynasty; it is a founder who just sold something, is over-concentrated, under-planned, and being courted by five banks.

6.3 What we help them with, and why they come to J.P. Morgan rather than elsewhere

Client problem	What J.P. Morgan does	What J.P. Morgan offers that most competitors cannot
"I just sold my company. I have £80m in cash and no idea what to do."	Discovery, a goals-based plan across the four lenses, a strategic allocation built from the firm's Long-Term Capital Market Assumptions, phased deployment, tax-aware structuring (ideally begun 18 to 24 months <i>before</i> the sale).	The investment bank probably ran the sale. The Private Bank's "Private Business Advisory" team does pre-sale planning. Alternatives access at institutional terms.
"All my wealth is in one stock and I can't sell."	Hedging and monetisation strategies, 10b5-1 share-sale programmes executed through the firm's trading desks, securities-based loans against the position, diversification over time.	Trading desks, structuring and lending under one roof; the desk that executes the founder's programme is the one Erdoes described "sending them through Troy's trading desks".
"I want to buy a £15m house without selling investments."	A mortgage or a loan secured on the portfolio, sized so the bank has "two ways out".	Balance sheet: the Private Bank is the number one originator of \$3m+ mortgages in the US and the largest sports lender; UK and European lending is booked in J.P. Morgan SE and the UK bank.
"How do my children inherit without it destroying them, or the tax destroying it?"	Trusts and estates, family governance, next-generation programmes ("Rising Generation"), philanthropy structures, family constitutions.	In-house wealth advisors who are former partner-level lawyers; the firm can act as corporate trustee; a global view of cross-border families.
"I'm moving to Dubai / Milan because of the non-dom changes."	Residence and structuring advice, multi-booking-centre accounts (London, Geneva, Luxembourg, Dubai), consistent advice in each place.	The "uniform global model": the same team structure and platform in every office, which UBS also has and most UK and boutique banks do not.
"I run a family office and want deal flow, not products."	23 Wall: institutional-style coverage, co-investments, access to the firm's balance sheet, research, and the investment bank's flow.	The only private bank attached to the number one investment bank and a \$4.8tn asset manager.
"Where is it safe to keep £200m of cash?"	Deposits at a bank with a 14.5% CET1 ratio and \$1.5tn of liquidity, plus the largest institutional money-market platform.	Size as safety: in March 2023 the largest banks gained deposits while regional and some Swiss banks lost them.

6.4 From sales to relationship: what the journey looks like in revenue terms

Figure 13. The four revenue legs of a private bank relationship. A client with only an investment account is easy to lose; a client with investments, cash, lending and a trust is deeply embedded. This is what 'share of wallet' means in practice.

AWM's income statement has four lines that map onto the client relationship: asset management fees (\$15.5bn in 2025), commissions and other fees (\$1.2bn), net interest income (\$6.8bn) and other income (\$0.6bn). Net interest income was about a quarter of AWM revenue in 2022, rose to 40% in 2024 as rates went up, and fell back to 28% in 2025 as loan spreads narrowed. In 2022 and 2023 clients moved deposits into money-market funds ("cash sorting"); Private Bank deposits fell from \$282bn to \$233bn while AWM's money-market assets rose to nearly \$1tn. Management's framing: "They can move from one to the other, but they generally don't leave the bank." Deposits had recovered to \$257bn by the end of 2025 and loans reached \$266bn.

The "sales" phase (steps 1 to 3 of the journey) is measured in **new clients** and **net new assets**. The "relationship" phase (steps 4 to 7) is measured in **share of wallet**, **revenue per client** and **retention**. J.P. Morgan's disclosed facts: more than 95% of Private Bank clients stay; when a US Private Bank client also actively banks with the firm, assets and revenue are on average 65% higher; only 2% of clients are credit-only; revenue per producer runs around \$3 million; and revenue per average banker rose 15% between 2020 and 2025 even as the number of bankers grew 64%. A junior banker's book is built by "seeding", not by buying: "This is where we don't buy books of business. We seed books of business" (Erdoes, 2022).

6.5 What the team does differently, and what its values mean when you strip them down

The word	What it means at J.P. Morgan specifically	How you can tell it is real (or test it)
Trust	Two things. Toward the client: fiduciary behaviour, meaning the advice must be in the client's interest even when it earns the bank less, and the house is allowed to say no. Toward the bank: "two ways out" on every loan, source-of-wealth checks that are never skipped, discretion with information.	The firm's stated net charge-off rate on Private Bank loans is about one basis point over ten years. Ask an interviewer when the bank last turned down a large, profitable client and why.
Relationship building	Not entertaining. Knowing the family's balance sheet, fears, children and advisers well enough to be called first at a liquidity event, and being useful between transactions. Erdoes' test of a great advisor is that the client thinks "the more you know about me... how could I ever not be with you".	Advisors are measured on net new assets and referrals, not on activity. Ask how a junior banker gets their first ten clients.

Fiduciary	The word that replaced "first-class business" as the anchor of Erdoes' letters after 2022. "Our fiduciary commitment to our clients serves as our north star." The Private Bank uses in-house and external managers and says "we don't believe any fiduciary manager should dictate choice".	Look at whether the proposal you help build includes third-party funds. The EMEA site is candid that the firm "prefers J.P. Morgan managed strategies" and earns more from them; a fair interview question is how the team manages that tension.
"Banking is not a commodity"	The first lesson taught in training, per Erdoes. The bank's argument that a client should pay for advice and access rather than shop each product on price.	Test: can you articulate three things a client gets from J.P. Morgan that they could not assemble themselves from an index fund, a mortgage broker and a lawyer?
Team	"My client... It's our client." One family, five specialists, no one paid to hoard. Player-coach leaders who still carry clients.	Ask who gets credit when a Chase branch refers a client to the Private Bank. The answer should be "nobody counts it".
Solutions, not products	"We don't sell products. We provide solutions." Every engagement starts from the family's goals, not from what the bank wants to sell this quarter.	The Investment Solutions internship exists separately from the Advisor one; the Advisor is not a product specialist.
Grit	Not a published value but the one Erdoes describes most: showing up, "burning the candle at both ends" early in a career to reach mastery fast, and resilience in a sales role where most first meetings go nowhere.	The posting's "highly driven", "thrive in a fast-paced environment" and "sales capacity" are the polite version.

6.6 The London market you would be working in

London is the hub of J.P. Morgan's International Private Bank, which is "the largest international private bank of any of the US-domiciled banks" and, per Erdoes, "the largest U.S. bank in the high-net-worth-plus segment internationally, growing at double-digit rates". The UK business, led since 2025 by Maricé Brown, covers London, Manchester, Edinburgh, Glasgow, Bournemouth and the Crown Dependencies. The EMEA business had revenue growth of about 14%, asset growth of about 25% and advisor growth of 9% in the year to June 2025.

United Kingdom	London (HQ) · Manchester · Edinburgh · Glasgow · Bournemouth
Continental Europe	Paris · Frankfurt · Munich · Hamburg · Berlin · Milan · Madrid · Luxembourg · Brussels · Amsterdam · Stockholm · Copenhagen · Athens
Switzerland	Geneva · Zurich (J.P. Morgan (Suisse) SA booking centre)
Middle East	Dubai (DIFC) · Riyadh (regional HQ licence Oct 2025) · Doha

Figure 14. J.P. Morgan Private Bank's EMEA footprint (offices listed on the firm's EMEA locations pages, 2026).

Three market facts matter for a London applicant:

- **The UK is a large but leaking wealth pool.** About 578,000 dollar-millionaires live in the UK (fifth in the world) and HMRC data show roughly 3,400 people with over £100 million. But the April 2025 abolition of the non-dom regime (replaced by a four-year "foreign income and gains" window and residence-based inheritance tax) has pushed some internationally mobile families to Dubai, Milan, Switzerland and Monaco. Estimates of how many left range from the OBR's 1,200 to Henley & Partners' contested 16,500. J.P. Morgan's EMEA head of wealth advisory, Chris Ottenritter, says the firm was "amazed at how many of our clients who were part of the UK non-domiciled regime have decided to stay. This is going to cost some of them hundreds of millions of pounds." Either way, every London banker is having residence conversations.
- **The Middle East is the growth engine.** J.P. Morgan announced 100+ new AWM hires in the region in 2025, obtained a Saudi regional headquarters licence in October 2025, and has a dedicated Dubai private banking team. Gulf families are served jointly from London, Dubai and Riyadh.

- **Regulation is client-facing work.** The FCA's Consumer Duty (2023) requires fair value and good outcomes for retail clients; a proposed opt-up for clients with around £10 million of investable assets (expected in the second half of 2026) would take much of the UHNW book outside it. Suitability rules under MiFID II govern every recommendation. A private banker in London spends real time documenting why advice was suitable.

6.7 The house view and thought leadership you should be able to name

- **Eye on the Market** (Michael Cembalest, since 2005). The 2026 Outlook, "Smothering Heights", argued that eight AI and semiconductor companies went from \$3tn to \$18tn of market value since 2018 and now make up a fifth of global market capitalisation, and listed four risks: hyperscaler profitability after \$1.3tn of capital spending, US electricity constraints, China's chip self-sufficiency, and Taiwan.
- **Outlook 2026**, "Investing at the Crossroads of AI, Fragmentation and Inflation", and the **Mid-Year Outlook**, "Promise and Pressure" (May 2026), from the Global Investment Strategy team co-led by Grace Peters in London: the risk in AI is being under-exposed rather than over-exposed; the world is fragmenting into regional blocs; inflation is structurally higher at 2.25 to 2.5%; S&P 500 twelve-month target of 7,300; hedges through gold, macro hedge funds, infrastructure and commodities.
- **Long-Term Capital Market Assumptions** (30th edition, October 2025): the firm's 10-to-15-year expected returns used for strategic allocation (US large-cap equities 6.7%, global equities 7.0%, private equity 10.2%, US Treasuries 4 to 5%). Adding 30% alternatives lifts a 60/40 portfolio's expected return from 6.4% to 6.9% with better risk-adjusted returns.
- **Top Market Takeaways** (weekly). Recent titles show what clients are being told in September 2026: "When will the Fed hike? It doesn't matter", "Toto, I don't think it's the Fed anymore", "From Tokyo to London to Washington, debt is in the doghouse", "How much productivity is needed to justify the AI trade?", "The new strategic investment case for emerging markets".
- **Global Family Office Report** (annual, from 2024) and the alternatives guidance that committed clients hold 15 to 30% in alternatives.

7. Turning all of this into your own reasons

The posting says the firm wants to hear from you in a "complete and thoughtful application". The HireVue opener reported by 2026 candidates was: "What attracts you to J.P. Morgan, and specifically, an opportunity in Global Private Bank?" with thirty seconds to prepare and two minutes to answer. This section is not a script; it is the raw material for an answer that only you could give.

7.1 Three questions and the honest logic behind each

Why private banking, not investment banking or asset management?

The true answer, if it applies to you: the work is relationship-led and generalist. You are paid to understand a whole family and to orchestrate specialists, not to be the deepest specialist. It combines sales (finding and winning clients) with markets, credit and planning. It compounds: a banker's network and book grow over decades, and the great wealth transfer (\$124tn in the US through 2048; £5.5tn in the UK by 2047) means the pool grows too. The honest downside is that it is a sales culture with a slow start; say so, and say why that suits you.

Why J.P. Morgan's private bank rather than UBS, Goldman or Coutts?

Pick the two or three reasons that you actually believe and can defend: the integrated team model (you learn every discipline before specialising); the balance sheet and investment bank behind the advice (the client conversations are bigger); the apprenticeship model ("we seed books, we don't buy them", half of advisors home-grown); the growth (advisors up 64% in five years, Europe named as the biggest market-share opportunity, new offices across the UK and Germany); and the fiduciary, open-shelf stance. Avoid "it's the biggest bank" as a reason; the firm itself says size is often a disadvantage.

Why the Advisor track, not Investment Solutions?

Because you want to be the person the client calls, and you accept that this means prospecting, rejection and responsibility for the whole relationship. Evidence from your life: anything where you won trust, sold something, built a network, or kept going through a long run of "no". The posting's own words are your checklist: "relationship building and sales capacity", "genuine interest in financial markets and macro-level economic trends", "good judgment and discretion".

What the firm's thinking tells you it wants to hear

Read the letters and Investor Days together and the firm is telling you what it values in an advisor: a fiduciary who can say no, a team player who does not count credit, someone who prepares for the worst ("prepare for the worst and hope for the best"), someone who shows up and grinds early, and someone curious about markets beyond the headlines. Reflect those in your examples, not in adjectives.

7.2 The application and interview process, as reported

1 Online application

CV plus application questions. Rolling review, so apply early; the London Advisor posting closes 1 November 2026 but classes fill before then. Do not use a .edu email address.

2 HireVue video interview

Typically three to five questions, 30 seconds (sometimes up to two minutes) to prepare, 90 to 120 seconds to answer, one retry each. Reported Private Bank prompts: the "why J.P. Morgan and why Global Private Bank" opener; "tell us about a recent news article you read about financial markets"; behavioural questions on teamwork under a deadline, a difficult client, building trust with someone new, persistence. No technicals, but "some working knowledge about the current market" is expected. Some candidates report a games-based assessment (pymetrics) before HireVue; unverified for this cycle.

3 Assessment centre or interviews

Reported as three back-to-back interviews of about thirty minutes with people from the London office, heavily behavioural, plus commercial questions such as "how do banks make money? Specifically, how do investment banking, wealth management, lending and sales and trading make money?" and "how would you assess a client's goals and make recommendations?" A stock-pitch question is possible but not reliably reported for this programme.

7.3 Things to have ready

- ✓ Two or three market views with a "so what" for a wealthy client: for example, why UK gilt yields and the US deficit matter to a family with a £20m mortgage; what the private credit redemption headlines mean for a client in an evergreen fund; how the non-dom changes alter a family's plan.
- ✓ The four lenses (Liquidity, Lifestyle, Legacy, Growth) and the five-seat team model, in your own words.
- ✓ The one-breath explanation of how the bank earns three ways from one client: fees on assets, spread on deposits and loans, placement fees on alternatives.
- ✓ One Erdoes idea you genuinely agree with and one you would push back on. Candidates: "we seed books, we don't buy them"; "banking is not a commodity"; "the more you invest, the more the ecosystem creates a moat" (on AI and advisors).
- ✓ A story of winning someone's trust, a story of persistence through rejection, and a story of coordinating people who did not report to you.
- ✓ The names: Erdoes (AWM), Frame (Global Private Bank), Tejpal (International), Garnica (EMEA), Brown (UK), Peters and Cembalest (house view). Not to name-drop; to show you read.
- ✓ Questions to ask them that show you understood the model: how a junior banker gets first clients; how the team handles the in-house versus third-party product tension; how Connect Coach has changed a banker's day; what the UK business looks like after the non-dom changes.

7.4 Things to avoid

- Reasons that apply to any bank ("global leader", "prestige", "learning opportunities").
- Treating the role as investing. The Investor does that; you are applying to be the Banker.
- Quoting the marketing values (Heart, Courage, Curiosity) instead of the operating ideas (fortress, fiduciary, seed not buy, no side accounting).
- Claiming certainty about thresholds, pay or process details that the firm does not publish; say "as I understand it".
- Pretending to want a "fast-paced" environment without evidence. Show the evidence and let them draw the conclusion.

Appendix A. Glossary (the words you will hear in week one)

AUM / AUS / client assets

Assets under management are money the bank actively invests for clients. Assets under supervision (J.P. Morgan's older term) and "client assets" add money the bank holds or advises on but does not manage, plus deposits and custody. Client assets is the broadest number and the one J.P. Morgan now headlines.

Net new money / net flows

Money coming in minus money going out, excluding market movements. The cleanest measure of whether clients are choosing you. Mary Erdoes' phrase: "clients vote with their feet".

Basis point (bp)

One hundredth of one percent. Fees, spreads and returns are all quoted in bps.

Discretionary / advisory / brokerage

Three ways to run a client's money. Discretionary: the bank decides and executes within an agreed mandate. Advisory: the bank recommends, the client approves each move. Brokerage (execution-only): the client instructs, the bank executes. Fees are highest for discretionary.

Strategic vs tactical asset allocation

Strategic: the long-run mix of equities, bonds, alternatives and cash designed for the client's goals (J.P. Morgan bases it on its annual Long-Term Capital Market Assumptions). Tactical: short-term tilts around that mix based on the house view.

Alternatives

Anything not listed equities, bonds or cash: private equity, private credit, hedge funds, real estate, infrastructure, timber. Illiquid, higher fee, and a strategic priority for every private bank because they lock in assets and differentiate.

Open architecture

Offering external managers' funds, not only the bank's own. J.P. Morgan's Manager Selection team researches third-party managers.

Securities-based lending (SBL) / Lombard loan

A loan secured on the client's investment portfolio. Lets a client raise cash without selling. The bank sets a loan-to-value and can demand more collateral (a "margin call") if the portfolio falls.

Net interest income (NII)

Interest earned on loans and investments minus interest paid on deposits. Rose sharply for all banks in 2022 and 2023 as central banks raised rates.

KYC / AML / source of wealth

Know Your Customer and Anti-Money-Laundering checks. Before a client is onboarded the bank must document who they are and how they made their money. In private banking this is slow, intrusive and non-negotiable; Advisors spend real time on it.

Suitability / Consumer Duty

UK regulatory requirements that products recommended are appropriate for the client and that firms deliver good outcomes. The FCA's Consumer Duty (2023) applies to private banks' retail clients.

Non-dom

A UK tax status for residents domiciled elsewhere, abolished from April 2025 and replaced by a residence-based regime. A live topic for every London private banker because it changed where some wealthy clients choose to live.

Family office

A private company set up by a very wealthy family to manage its investments and affairs. Single-family offices serve one family; multi-family offices serve several. J.P. Morgan's "23 Wall" team covers the largest ones.

Liquidity event

The moment a founder's paper wealth becomes cash: a sale, an IPO, a secondary. The single most important moment for a private banker to be in the room.

Share of wallet

The proportion of a client's total wealth that sits with you. Most UHNW families use two to four banks; the game is to become the primary one.

CET1 / fortress balance sheet

Common Equity Tier 1 capital as a percentage of risk-weighted assets, the core regulatory measure of a bank's safety. "Fortress balance sheet" is Jamie Dimon's phrase for holding more capital and liquidity than required so that the bank is a safe haven in a crisis.

ROTCE

Return on tangible common equity, JPMorgan's headline profitability measure. The firm's stated through-the-cycle target has been 17%; it has run well above that recently.

10-K

The annual report every US-listed company files with the SEC. JPMorgan's runs to several hundred pages and is the primary source for all segment numbers in Guide 2.

Appendix B. Sources

1. JPMorgan Chase & Co., Form 10-K for the fiscal years 2021, 2022, 2023, 2024 and 2025 (SEC EDGAR); Q1 and Q2 2026 earnings releases and supplements (April and July 2026).
2. Jamie Dimon, Chairman & CEO letters to shareholders, 2021 through 2025 annual reports (jpmorganchase.com/ir/annual-report).
3. Mary Callahan Erdoes, Asset & Wealth Management letters, 2021 through 2025 annual reports; Marianne Lake (CCB) and Petno/Rohrbaugh (CIB) letters, 2025 annual report.

4. JPMorgan Chase Investor Day transcripts and presentations, May 2022, May 2023, May 2024, May 2025 (firm overview, CCB, CIB and AWM sessions); "2026 Company Update" transcripts, 23 February 2026.
5. JPMorgan Chase, *How We Do Business: Business Principles*; "Our History" (jpmorganchase.com/about).
6. Press releases: First Republic acquisition (1 May 2023); CIB reorganisation (25 January 2024); senior leadership changes (14 January 2025; 25 June 2026); David Frame appointment (3 July 2025); Security and Resiliency Initiative (13 October 2025); Chase Germany launch (20 May 2026); direct-lending commitment (February 2025); Coinbase partnership (July 2025); Investor Day timing (2025).
7. J.P. Morgan Private Bank websites (EMEA and US): "Who we serve", "Services" (investing, lending, wealth planning), "Our leadership", "Locations: EMEA", "London", "Private Bank careers", "Global accolades", "2026 Global Family Office Report", "Outlook 2026", "Mid-Year Outlook 2026", "Eye on the Market", "Top Market Takeaways", "Thinking of moving to the UK", "A changing world: opportunities for mobile high-net-worths", alternatives guide and webcasts.
8. J.P. Morgan Asset Management, 2026 Long-Term Capital Market Assumptions (October 2025).
9. Job postings: 2027 Global Private Bank Advisor Summer Internship Program, London (job 210773470); 2026/2027 Advisor Analyst Training Program listings (London, Manchester, Edinburgh, Athens); 2026 Investment Solutions Summer Internship, London; UK Client Advisor (Executive Director) and Client Advisor Support Associate postings.
10. Euromoney Private Banking Awards 2022 to 2026 and the 2026 write-up on Europe's best international private bank (interview with Adam Tejpal); Global Finance World's Best Private Banks 2026; PWM/The Banker.
11. Press: Financial Times, Bloomberg, Reuters, Wall Street Journal (via American Banker), CNBC, Fortune, Banking Dive, American Banker, AdvisorHub, Citywire, Private Banker International, WealthBriefing, Family Wealth Report, Financial Planning, Markets Media, The National, Scottish Financial News, eFinancialCareers, Mergers & Inquisitions.
12. Peer results FY2025: Bank of America, Citigroup, Wells Fargo, Goldman Sachs, Morgan Stanley, UBS, HSBC, Barclays, Deutsche Bank, Julius Baer, Pictet, Lombard Odier, NatWest (Coutts), Capital One, BlackRock; Monzo, Revolut and Starling annual reports; Dealogic and LSEG league tables as reported.
13. Market context: Cerulli Associates (wealth transfer, 2022 and 2024); Kings Court Trust (UK wealth transfer); Altrata World Ultra Wealth Report 2026; Henley & Partners Private Wealth Migration Reports 2025 and 2026 and critiques (Tax Policy Associates); HMRC and OBR non-dom statistics; FCA (Consumer Duty, ongoing advice review, CP25/36); Norton Rose Fulbright and Travers Smith briefings.
14. Interview and programme intelligence: Glassdoor, Wall Street Oasis and Reddit summaries; IGotAnOffer, Leland, Interview Guys and OfferTutoring HireVue guides; Bright Network and Prosple listings; Harvard Business School case "JPMorganChase: Leadership in the Age of GenAI" (2025).

Items the research could not verify against a primary source are flagged in the text as "unverified", "indicative" or "reported". They include exact Private Bank asset thresholds, intern and analyst pay, the current-cycle assessment format, some acquisition prices, and several peer valuation multiples.
