

HSBC Video Interview — The Complete Playbook

Contents

How to read this

Executive summary — the 12 things that matter most

1. What the video part actually is (and a vendor nuance that trips people up)
2. Exact mechanics — how the recording works
3. How a single video answer is scored
4. What sinks people on video (the screen-out patterns)
5. Integrity on the video — don't trip it by accident
6. Delivery technique — set-up and performance

Set-up (fix this during the warm-up)

Performance (while recording)

Using the ~2-minute prep window

If you blank or fumble (remember: no re-record)

7. The video question bank (CIB-weighted)

The eight you should definitely prepare

Full bank by category

8. Answer frameworks — skeletons to rehearse (not scripts)

Tell me about yourself (~90–120 s) — Present → Path → Future

Why HSBC? (~90 s) — three layers, then make it personal

Why CIB / this division? (~90 s)

Joining a new senior team — introduce yourself & build relationships (~90 s) — forward-looking, no STAR

Behavioural (teamwork / leadership / failure / conflict) (~2 min) — STAR(+R)

Strengths / weakness (~75–90 s)

Recent macro event & market impact (~90–120 s) — analyst mini-structure

A recent deal / industry you find interesting (~90 s)

Weaving the four values (every answer)

9. A focused video rehearsal plan (inside your ~10-day window)

What I could not verify

Source list (grouped by reliability)

Tier 1 — Official (HSBC & Cappfinity)

Tier 2 — Industry / prep guides (secondary; 2025–2026)

Tier 3 — Genuine candidate voice (gated; snippet-only)

Tier 4 — Context (CIB)

For: Janak · **Role:** Corporate & Institutional Banking (CIB) — Graduate Insight Programme · **Focus:** the recorded **video** answers inside the Cappfinity Job Simulation · **Prepared:** 10 August 2026.

This is everything about the part you said is hardest — the recorded video interview: exactly how it works, how a human/marker scores a single video answer, what sinks people on camera, the integrity rules, the full CIB-weighted question bank, and answer skeletons + delivery technique so you can rehearse and land it.

One-line strategy for video: each answer is **one take, no re-record**, scored mainly on the **content and structure of what you say** (not your looks). Win by using the prep time to build a tight **STAR / point-first** skeleton, speaking to the **camera lens** in a calm, specific, first-person voice, and **evidencing an HSBC value** in every answer. Authenticity is scored — deliver *your* examples, not a memorised script.

I did not open your assessment link. Everything here is from independent research; your `apitake.cappassessments.com` link is single-use and I won't touch it.

How to read this

Labels on every claim: **OFFICIAL** (HSBC/Cappfinity primary) · **CORROBORATED** (multiple independent sources) · **ANECDOTAL** (single/second-hand) · **INFERRED** (my reasoning). Citations `[n]` → Source list at the end. Candidate forums (Reddit, WSO, The Student Room, Glassdoor, YouTube) are login/bot-gated, so candidate detail is via search snippets, not full pages — weigh accordingly. The strongest anchors here are **HSBC's own video-interview PDFs** and **Cappfinity's help-desk/product pages**.

Executive summary — the 12 things that matter most

1. **It's Cappfinity, one take.** Your video answers sit inside the Cappfinity Job Simulation; Cappfinity states plainly that "**video responses for assessed questions cannot be re-recorded**" **OFFICIAL** ^[8]. Treat every recording as live.
2. **Timing:** expect **~2 minutes to prepare and up to ~2 minutes to record** per question (HSBC's likely setting; Cappfinity's generic default is 30 s prep / up to 3 min — the on-screen timer is

- authoritative on the day) **CORROBORATED** / OFFICIAL configurable^{[13][8]}.
3. **How many:** the video sits in the simulation's final exercise — roughly **~6 questions mixing recorded video, situational-judgement and free text** **ANECDOTAL** /CORROBORATED^[20].
 4. **A warm-up comes first.** Cappfinity gives you a camera/mic set-up where you **record and replay a test video "several times until you can see and hear yourself well,"** and sometimes a non-assessed practice question **OFFICIAL** ^[9]. Use it fully. (One prep source claims the set-up question *is* scored — so treat it as if it counts **ANECDOTAL** ^[13].)
 5. **A human decides.** Cappfinity video can be **"AI-assisted... or human-led"** at the employer's choice **OFFICIAL** ^[7], but **HSBC states the platform makes no automated decisions — all decisions are made by the hiring team** **OFFICIAL** ^[3]. Assume a person watches you.
 6. **Scored on content, not looks.** The dominant factor is a **specific, well-structured answer that evidences the target strength/value** — not your appearance **CORROBORATED** /INFERRED^[7]. Ignore the "smile for the emotion AI" advice on some prep sites — that misattributes an old HireVue feature and isn't supported for Cappfinity (see §3) **ANECDOTAL**, flagged^[16].
 7. **Structure with STAR.** HSBC explicitly recommends STAR: *"explain the situation you faced; the specific task required; the action that you took; and the result of this action"* — examples *"don't have to be drawn from work"* **OFFICIAL** ^[3]. Add a one-line **Reflection** (STAR+R) **CORROBORATED** ^[16].
 8. **Front-load.** Say your point in sentence one and land the result by ~90 s so the 2-minute cut-off never costs you the punchline **CORROBORATED** ^[15].
 9. **Look at the lens.** HSBC: *"Look directly at the camera and avoid looking at yourself on screen, imagine the interviewer... is there and you are talking to that person"* **OFFICIAL** ^[1].
 10. **Environment:** *"a quiet room... well lit and free of distractions,"* notifications closed, dressed *"as you would for a face-to-face interview"* **OFFICIAL** ^[1].
 11. **AI rule:** HSBC forbids using AI to *"generate responses during live or recorded interviews"* — so prep with AI all you like, but **the words you say on camera must be your own** **OFFICIAL** ^[3].
 12. **Evidence a value every time:** We value difference · We succeed together · We take responsibility · We get it done — show them, don't name them **OFFICIAL** ^[5].

1. What the video part actually is (and a vendor nuance that trips people up)

- **CORROBORATED** The recorded video answers are part of the **Cappfinity Job Simulation** (its "Snapshot"/Video Interview product), inside the simulation's storyline — not a standalone

interview [7][20][18].

- **OFFICIAL** **Two different HSBC video systems exist — don't confuse the guidance.** HSBC's public "On Demand" and "Live" video-interview hints PDFs describe a tool called **Modern Hire**, used for *some* roles instead of a phone interview [1][2]. Your graduate Job Simulation video is **Cappfinity**, not Modern Hire. **Why it matters:** HSBC's *delivery* advice (dress, environment, look at the camera, STAR) applies to both, but the **re-record rule differs** — Modern Hire *sometimes* allows a retake; **Cappfinity's assessed questions do not** **OFFICIAL** [8][1]. When in doubt, follow the on-screen instructions in your actual assessment.

2. Exact mechanics — how the recording works

OFFICIAL unless noted [8][9][13][20]:

- **Number of video questions:** the simulation's final exercise contains ~6 questions, a subset recorded on video (the rest SJT/free-text) **ANECDOTAL** [20]. Across sources, plan for **roughly 3–6 recorded video answers**.
- **Prep and record time:** ~2 min to prepare, up to ~2 min to record per question is the HSBC-configured figure most sources report **CORROBORATED** [13]; Cappfinity's generic default elsewhere is ~30 s prep / up to 3 min **ANECDOTAL** [8]. Cappfinity's own line: "**the exact time will be specified as you attempt the question**" **OFFICIAL** [8]. **Read the on-screen timer — it's authoritative.**
- **A countdown is shown**, for both the prep window and the record window; recording auto-starts when prep ends and auto-stops at the limit **CORROBORATED** / INFERRED [8].
- **One take, no re-record (assessed questions):** "*Video responses for assessed questions cannot be re-recorded, but you have time to prepare your answer ahead of the question*" **OFFICIAL** [8]. Do **not** count on a retake.
- **Warm-up / set-up first:** you "*verify that your camera and microphone are working... by recording a short video,*" replay it, and can "*record this video several times until you can see and hear yourself well,*" then sometimes answer a "*non-assessed, timed*" practice question in the real format **OFFICIAL** [9]. **Fix framing, lighting and audio here.** (Conflict: one prep source says HSBC's set-up question *is* scored — so **treat it as if it counts** **ANECDOTAL** [13].)
- **Question format:** the question is typically **shown on screen as text** (sometimes a short clip); you answer by video **OFFICIAL** / **CORROBORATED** [8]. Expect to *read* the prompt, then prep, then record.
- **Pause:** no source indicates you can pause a live recording; the one-take timed design implies you cannot **INFERRED** [8].

- **The container is "untimed," the video answers are not.** HSBC says "our online assessments are not timed, but you can ask for additional time during any of the interview stages" — i.e. you control when you sit it within your ~10-day window, but each video answer is individually timed; **extra time is an available adjustment if you need it** **OFFICIAL** [4].

3. How a single video answer is scored

- **AI-assisted or human — HSBC's answer is human.** Cappfinity's product offers "AI-assisted scoring to accelerate reviews, or human-led evaluation when nuance matters most," with "structured questions and scoring criteria to reduce bias" **OFFICIAL** [7]. But the governing HSBC statement is: "The AI-based platform does not make any automated decisions... all decisions will be made by our hiring team" **OFFICIAL** [3]. Net: a human reviews your video; any AI only assists triage.
- **What a marker is actually weighing** (from Cappfinity's strengths methodology + HSBC's stated criteria) **CORROBORATED** / **INFERRED** [7][3]:
 1. **Content / evidence (dominant):** a real, specific example that demonstrates the target strength/competency and answers the actual question.
 2. **Structure:** a clear, logical answer (STAR / point-first).
 3. **Communication / delivery:** clarity, steady pace, articulation, minimal filler.
 4. **Values & motivation:** genuine fit with HSBC's four values and real reasons for the role/bank.
 5. **Authenticity & consistency:** natural, first-person delivery consistent with the rest of your assessment (strengths tests reward what you genuinely do well and flag "gamed" answers).
- **Myth to ignore.** A prep site claims the video "uses an AI feature to track your facial expressions" — that **misattributes an old HireVue-style feature**; HSBC's simulation is Cappfinity and there's no official evidence it scores facial emotion **ANECDOTAL**, flagged [16]. **Don't perform expressions — communicate content clearly.** (Being calm and personable still helps; being *theatrical* doesn't.)
- **No public rubric with weightings exists** — the five factors above are inferred from official methodology, not a leaked scoresheet **INFERRED**.

4. What sinks people on video (the screen-out patterns)

Synthesised from candidate reports + prep guidance **CORROBORATED** unless noted [15][16][3]:

- **Rambling / no structure** — the number-one killer. Without a skeleton you wander and get cut off before the result.
- **Not answering the actual question** — drifting into a rehearsed story that doesn't fit the prompt.
- **Running out of prep or record time** — over-scripting in prep, then reading slowly and getting cut off; or finishing in 30 seconds with nothing of substance.
- **Generic answers** — "HSBC is a big respected bank" / textbook values with no personal specifics.
- **Reciting a script** — reads as robotic and inauthentic; the strengths/consistency checks and a human reviewer both notice.
- **Weak commercial awareness** — for CIB, being unable to discuss a recent market development is a visible gap.
- **Delivery basics** — poor lighting/audio, looking at your own image instead of the lens, low energy/monotone, heavy filler ("um, like").
- **Technical failure** — untested webcam/mic, weak Wi-Fi, notification pop-ups, device dying mid-answer (HSBC literally says "*fully charge your... device*") **OFFICIAL** [1].

5. Integrity on the video — don't trip it by accident

The video runs under Cappfinity's integrity layer (Camera-On recording, Time-Recording, and an Integrity Dashboard that flags likely AI use) **OFFICIAL** [12]. For an honest candidate the risks are *accidental*:

- **Reading a script off-screen / eyes darting** → looks like reading external help. **Look at the lens; glance at your prep notes only briefly.**
- **Another person or voice in frame** → looks like assistance. **Be alone in the room.**
- **AI-generated answers.** HSBC explicitly prohibits using AI to "*generate responses during live or recorded interviews*" and requires you can "*personally explain, validate, or replicate*" what you submit **OFFICIAL** [3]. **Prep with AI; never read AI text to camera.**
- **Timing extremes** — answers that are implausibly polished/fast can look pre-read; work at a natural pace.
- **Read the on-screen declaration/instructions** before you start — those are the binding rules for your sitting.

(Per your ask, nothing here is about defeating detection — it's about not looking dishonest while being honest.)

6. Delivery technique — set-up and performance

Set-up (fix this during the warm-up)

- **Camera at eye level**, laptop raised if needed; you should look slightly *up or level*, not down. Face and shoulders in frame, ~an arm's length away **CORROBORATED** [15].
- **Light in front of you** (a window or lamp facing you), never behind — backlight turns you into a silhouette **CORROBORATED** [15].
- **Look at the lens, not your self-view** — HSBC's explicit instruction; put the question/notes near the webcam so your eyeline stays up **OFFICIAL** [1].
- **Audio**: quiet room, no echo; test in the warm-up and replay it **OFFICIAL** [9].
- **Background**: tidy, neutral, no one walking through. **Close notification apps** **OFFICIAL** [1].
- **Dress** as for a face-to-face interview — smart; it also puts you "in the zone" **OFFICIAL** [1].
- **Device charged / on power; stable connection** **OFFICIAL** [1].

Performance (while recording)

- **Front-load**: first sentence states your answer/point; then evidence; then result. Assume you might be cut at the limit **CORROBORATED** [15].
- **Pace**: steady and clear; slightly slower than feels natural; pause instead of "um" **CORROBORATED** [16].
- **Energy & body language**: sit upright, natural hand gestures, a genuine (not forced) smile, warmth and calm confidence **CORROBORATED** [16].
- **Length**: aim to fill most of the ~2 minutes with substance; land the result by ~90 s. Don't pad to hit the limit.
- **Voice**: first person — "I did", not "we"; specific numbers and outcomes beat adjectives.

Using the ~2-minute prep window

Jot a **skeleton, not a script** **CORROBORATED** [15]: - Behavioural → one keyword per **S-T-A-R(-R)** letter + the number you'll land on. - "Why" / motivational → your 2–3 points + opening line. - Pick **one** specific example; note how it evidences a value.

If you blank or fumble (remember: no re-record)

- **Pause, breathe, continue** — a brief natural recovery reads fine; don't spiral **INFERRED** [8].

- Fall back to the **STAR spine**: "The situation was... my task was... so I... and the result was..." to get moving.
- **Misspoke? Correct and carry on**: "—to be clear, the result was...". Reviewers expect natural speech.
- Watch the countdown and give a **clean one-sentence close** before it ends rather than trailing off.

7. The video question bank (CIB-weighted)

Labels: **CORROBORATED** = across multiple sources / candidate reports · **ANECDOTAL** = single report · **INFERRED** = prep-list guess, not confirmed from an HSBC candidate. **Practice prompts to build your material — not a leaked paper.** Highest-confidence set first.

The eight you should definitely prepare

1. Tell me about yourself **CORROBORATED** ^[21] — the opener/warm-up.
2. Why HSBC? **CORROBORATED** ^{[21][16]} — the most consistently reported prompt.
3. Why Corporate & Institutional Banking / this division? / Why finance? **CORROBORATED** ^{[24][21]}
4. Joining a new team of senior people you've never met — how do you introduce yourself and build relationships/trust? **CORROBORATED** for the "building trust with a new team" wording; the exact "senior people you've never met" phrasing is ANECDOTAL/plausible — forums were gated ^[21]
5. Tell me about a recent macro/economic event and how it impacted markets **CORROBORATED** — the key CIB/GBM commercial-awareness prompt ^[23]
6. Tell me about a time you worked in a team to achieve a common goal / showed leadership **CORROBORATED** ^{[16][21]}
7. What are your strengths? / What's your greatest weakness? **CORROBORATED** ^{[21][18]}
8. How do you stay up to date on financial news? / a deal or industry you find interesting **CORROBORATED** / INFERRED for the deal wording ^{[21][23]}

Full bank by category

- **Motivational**: Why HSBC · Why CIB/division · Why finance · Where will an HSBC career take you (5–10 yrs) · Why hire you over another / what value do you add · What do you know about HSBC's history **CORROBORATED**, last one ANECDOTAL ^{[21][24]}.

- **New team / relationships:** How do you build trust with a new team · How do you build relationships with colleagues/clients · Joining a senior team you've never met — introducing yourself **CORROBORATED** / #last ANECDOTAL ^[21].
- **Competency / behavioural (STAR):** a time you took ownership · led by example · an accomplishment you're proud of · something that didn't go to plan (failure/resilience) · someone challenged your direction (openness/influencing) · disagreed with a leader / a conflict (conflict) · a decision made without all the information · adapting to significant change · delivering on a commitment despite obstacles · raising a concern or flagging a risk when uncomfortable (ethics) · what you'd do if you suspected a colleague of unethical behaviour · working under pressure **mostly CORROBORATED, a couple ANECDOTAL** ^{[22][24]}.
- **Strengths-based:** your strengths · greatest weakness (and how you're improving) · how others/managers would describe you · alone vs team · what you do in your free time · comfort in an inclusive/diverse environment **CORROBORATED** ^{[21][18]}.
- **Commercial awareness (heaviest for CIB):** a recent macro event and its market impact · a recent economic development and its implication · current issues facing HSBC · a recent development in the industry and its impact on your division · a deal or industry you find interesting · assessing the creditworthiness of a corporate client · name an HSBC product / challenges facing banking · (long-view) "what will the world look like in 2050" **CORROBORATED** / a couple ANECDOTAL ^{[23][22][24]}.
- **Intro / logistics:** tell me about your education · comfort with background checks **CORROBORATED** / ANECDOTAL ^[21].

Ignore the retail-flavoured items on generic "HireVue" lists (pillars of customer service, teller stress, etc.) — they're US-retail and low-relevance for CIB **INFERRED** ^[21].

8. Answer frameworks — skeletons to rehearse (not scripts)

HSBC recommends **STAR** for behavioural answers and a strengths/values-based approach; deliver in your own words, since authenticity is scored **OFFICIAL** ^[3].

Tell me about yourself (~90–120 s) — Present → Path → Future

- **Now** (1 line): who you are + a hook relevant to CIB.
- **Path** (2–3 lines): two experiences showing the skills the role needs (analysis, stakeholder/client work, teamwork under pressure) — evidence, not your whole CV.

- **Why here/now** (1–2 lines): banking → HSBC → this division, pointing forward.
- Slip in one value implicitly (e.g. an international detail → *We value difference*).

Why HSBC? (~90 s) — three layers, then make it personal

- **HSBC's distinctive edge:** the leading *international* bank — Asia–Europe–Middle East corridors, trade-finance leadership, a global network few peers match (not "big and respected").
- **Division fit:** tie that edge to CIB specifically (cross-border client coverage, trade & payments, markets franchise).
- **You:** one concrete personal reason that proves real research (a language, an international background, a specific HSBC deal/report/strategy you followed).
- Weave *We succeed together* + *We value difference*. Keep to 2–3 points, concrete.

Why CIB / this division? (~90 s)

- **What CIB does,** in one accurate sentence (shows you know it's the wholesale, markets-led + financing bank — not retail).
- **Why it suits you:** the work that genuinely energises you (long-horizon client relationships + analytical rigour; or market/deal tempo) tied to evidence.
- **Why HSBC's version** beats peers (network, sector coverage, East–West clients).
- Forward look: what you want to learn. Map *We get it done* + *We take responsibility*.

Joining a new senior team — introduce yourself & build relationships (~90 s) — forward-looking, no STAR

- **Posture:** brief, confident, humble intro — who you are, what you bring, genuine eagerness to learn; don't over-claim to seniors.
- **Listen-first actions:** ask their priorities, observe how the team works, offer help on small things early, find a buddy/mentor, adapt your communication to each person.
- **Over time:** deliver reliably on your first tasks (credibility), follow up, show you value their expertise.
- **Close on** *We value difference* (learn from varied perspectives) + *We succeed together*.

Behavioural (teamwork / leadership / failure / conflict) (~2 min) — STAR(+R)

- **S** (1–2 sentences, brief context) · **T** (your specific responsibility) · **A** (the bulk, ~50–60% of airtime; "I", concrete steps and *why*) · **R** (quantified outcome + what you learned) · **+R** one-line reflection.

- Choose a story that also demonstrates a value; end failure/conflict on **resolution + learning**, never blame.

Strengths / weakness (~75–90 s)

- **Strength:** name one (max two) relevant to the role → a crisp proof example → why it matters here. Pick something you're genuinely energised by (authenticity is scored).
- **Weakness:** a real, non-fatal one (not a disguised humble-brag) → the concrete steps you're taking → evidence of progress. Avoid anything core to the role.

Recent macro event & market impact (~90–120 s) — analyst mini-structure

- **Event:** name one, precise and recent (a rates decision, an inflation print, a geopolitical/trade shock, a big FX/commodity move).
- **Transmission:** *how* it moves markets — rates → bonds/FX → equities/credit → corporate financing costs.
- **So-what for HSBC/CIB:** impact on clients, deal flow, trade finance, or the markets desks (this connect-back is what separates strong answers).
- **Balanced read:** one risk, one opportunity; show you follow markets habitually. Map *We take responsibility*.

A recent deal / industry you find interesting (~90 s)

- **Name it** (recent, ideally an HSBC/CIB angle) → **facts** (parties, rationale, rough size/structure, 1–2 lines) → **your analysis** (strategic logic, financing, risks, trend) → **HSBC relevance** (adviser/lender/markets) → **personal hook** (why it grabs you).

Weaving the four values (every answer)

Don't announce them — **evidence** them. *We value difference* = cross-cultural examples, seeking other views · *We succeed together* = collaboration, credit to the team · *We take responsibility* = owning outcomes/mistakes, flagging risk, the long view · *We get it done* = pace, decisiveness with limited info, delivering under pressure. Aim for **1–2 values per answer**, never a checklist of all four

OFFICIAL values^[5].

9. A focused video rehearsal plan (inside your ~10-day

window)

- **Day 1 — Material bank.** Write 6–8 STAR(+R) stories that between them cover teamwork, leadership, failure, conflict, ownership, a decision with limited info, and adapting to change. Tag each to a value.
- **Day 2 — Motivation.** Draft your *Tell me about yourself*, *Why HSBC*, *Why CIB* skeletons (bullets, not scripts). Nail one specific HSBC/CIB fact per answer.
- **Day 3 — Commercial awareness.** Prepare 2 recent market stories using the §8 event → transmission → so-what structure. Skim FT/Bloomberg on HSBC and CIB daily from here.
- **Day 4 — Record & review.** Record yourself (phone is fine) answering 5 prompts in ~2 min each, from bullets. Watch back for: eyeline on lens, structure, filler, pace, energy. Redo the worst two.
- **Day 5 — The flagged prompts.** Rehearse the *new senior team* intro (#4) and a *recent macro event* (#5) until they're tight and natural.
- **Day 6 — Delivery polish.** Fix your set-up (camera height, front light, tidy background, quiet room). Practise front-loading and a clean one-sentence close under the timer.
- **Day 7 — Mock under pressure.** Do 6 questions back-to-back, one take each, no restarts — simulate the real constraint.
- **Days 8–9 — Platform dry run.** Register on the Preparation Plus portal, run its practice, confirm webcam/mic/browser, and repeat any weak answers.
- **Day 10 — Sit it fresh,** quiet room, front light, charged device, home connection, on the lens. Do the warm-up properly (record/replay until audio and framing are right), then go.

What I could not verify

- The **exact HSBC-configured** prep/record seconds (best evidence ~2 min / 2 min; generic Cappfinity default 30 s / up to 3 min) — the on-screen timer governs [\[8\]](#)[\[13\]](#).
- Whether the **set-up/practice question is scored** (Cappfinity says non-assessed; a prep site says HSBC scores it) — treat it as if it counts [\[9\]](#)[\[13\]](#).
- The **verbatim wording** of the "new senior team" and "recent deal" prompts — the relatives are corroborated, the exact phrasings are not (candidate forums were gated) [\[21\]](#).
- Whether HSBC uses **AI-assisted or purely human** video review (Cappfinity supports both; HSBC states no automated *decisions*) [\[7\]](#)[\[3\]](#).
- A **published scoring rubric with weightings** (none public) [\[7\]](#).

- The prep-site "**facial-expression AI**" claim — unsupported for Cappfinity; likely a misattributed HireVue feature ^[16].
- **Candidate forums** (Reddit, WSO, The Student Room, Glassdoor, YouTube) were 403/gated — quotes are via search snippets.
