EXPERIENCE GUIDE · PREPARED 12 OCTOBER 2026

From Pictet to KKR: your experience, decoded

What Pictet is, what its client group does, what you actually learned in six weeks there, and exactly how each skill transfers to KKR Global Client Solutions. Built to answer: "What previous internship experience do you have that will be useful for this internship?"

Target: KKR London 2027 Summer Internship (6 Jun to 29 Jul 2027), Client Solutions ("KCS"), via SEO London Alternative Investments
Applications close: 18 October 2026 · rank six teams 1 to 6
Method: seven research workstreams, about 380 public sources, every figure tagged with a source ID and a confidence level (Confirmed, Reported, Inferred)
Companions: the KCS Deep Dive, the Complete Interview Pack and the technical guide "What you will learn"

Built only from public information. Not produced by, endorsed by or affiliated with KKR or SEO London. Check any figure against its source before quoting it.

PART 0

The question, and three answers built from your Pictet seat

"What previous internship experience do you have that will be useful for this internship?" 1,000 characters.

What the question is really testing

The reader wants proof of three things: that you have done real client work, that you understood it rather than just did it, and that you can see how it maps onto KCS. Most applicants list tasks ("I helped with onboarding and client queries"). A strong answer turns each task into a **lesson** and each lesson into a **KKR use**, and is honest about what is new INFERRED.

Did

Name the real tasks: servicing, onboarding, relationship management. Only the ones you did.

Learned

Say what each taught you about how a client firm works. One line each.

Transfers

Tie it to KCS: a product (K-PEC), a task (DDQs, onboarding LPs), or a client type (private banks).

THE HONESTY RULE (READ BEFORE YOU EDIT)

These drafts use the three areas you said you worked in: client servicing, client onboarding and client relationship management. Some phrases describe tasks that such work normally includes (KYC documents, share class eligibility, CRM records, platform queries). **Delete any task you did not personally do**, and swap in what you did. An interviewer will ask "talk me through an onboarding you worked on", and the answer must come from memory, not from this guide. Public sources do not use the name "Global Client Group", so the drafts say "client group"; if your contract or email signature used the full name, use it (see Part 1).

Three answers, each under 1,000 characters

VERSION A: THE TECHNICAL BRIDGE (RECOMMENDED) · 960 CHARACTERS INCLUDING SPACES

At Pictet Asset Management I spent six weeks in the client group, working across client servicing, onboarding and relationship management for institutions and intermediaries investing in Pictet's Luxembourg UCITS funds. Onboarding taught me that nothing happens until the detail is right: classifying the client, checking KYC documents and share class eligibility, and chasing each step until the account could trade. Servicing taught me speed with accuracy: answering client queries and keeping CRM records clean, so the next conversation starts from the right place. Above all, I saw that a relationship rests on the teams behind it: sales, product specialists, operations and compliance. KCS is built the same way, around products that work differently. A UCITS fund deals daily; KKR's K-PEC strikes NAV monthly and limits repurchases to 5% a quarter. Explaining that difference clearly to a private bank is where my Pictet experience gives me a head start.

VERSION B: THE PERSONAL AND PARTNERSHIP ANGLE · 894 CHARACTERS INCLUDING SPACES

My six weeks in Pictet Asset Management's client group were my first look at how a fund manager earns a client's trust day to day. I worked on onboarding, servicing and relationship management, and learned that the unglamorous parts matter most: a missing KYC document stops an account, a wrong figure in a reply undoes a good meeting, an untidy CRM record costs the next person time. I also saw how a partnership thinks long term. Pictet has been owned by its partners since 1805, and its client group is built for relationships that last decades, which is why KKR's "like and trust" resonates with me. What I want to add is the private markets side. Pictet is moving that way itself, with an ELTIF and a $1.5bn co-investment fund, while KKR is bringing private assets to wealth clients through the K-Series. I would bring a traditional manager's client discipline to a team doing the reverse.

VERSION C: THREE SKILLS, CLEANLY STRUCTURED · 930 CHARACTERS INCLUDING SPACES

Three things from my six weeks in Pictet Asset Management's client group carry straight into KCS. First, onboarding: how a new client becomes investable, from KYC and client categorisation to share class eligibility, and why one missing document holds up everything. KCS onboards LPs and wealth distributors with the same discipline, using subscription documents and investor eligibility tests. Second, servicing: answering client and platform queries quickly and accurately, and keeping CRM records clean, the daily rhythm of any client team. Third, working across teams: seeing sales, product specialists, operations and compliance serve one client, which is what KCS means by bringing all of KKR to a client. The big difference is the product. Pictet's UCITS funds deal daily; KKR's evergreen funds price monthly with quarterly repurchase limits, and drawdown funds call capital over years. That is the side I am keen to learn.

Anatomy of Version A: every claim and its evidence

Phrase	Evidence or what you must be able to say	Learn it in
"institutions and intermediaries investing in Pictet's Luxembourg UCITS funds"	Pictet AM serves pension funds, financial institutions and intermediaries [S491]; its main fund range is the "PICTET" Luxembourg SICAV, a UCITS umbrella [S524].	Part 1
"classifying the client, checking KYC documents and share class eligibility"	Client categorisation under the FCA's COBS 3 (retail, professional, eligible counterparty) decides what a client may buy [S543]. **Keep only if you did it.**	Part 2
"until the account could trade"	UCITS dealing runs on daily NAVs, forward pricing and cut-off times [S527].	Part 2
"keeping CRM records clean"	KKR postings name Salesforce for KCS meeting notes and follow-ups [S103]. **Keep only if you used a CRM.**	Parts 2 and 3
"sales, product specialists, operations and compliance"	KKR's KCS description: "Relationship managers in direct outreach to clients; Product specialists providing specific support and expertise" [Advert].	Part 3
"KKR's K-PEC strikes NAV monthly and limits repurchases to 5% a quarter"	K-PEC: NAV determined monthly; quarterly repurchases up to 5% of NAV [S420, S551].	Part 3
"explaining that difference clearly to a private bank"	KKR sells K-Series through private banks and wealth platforms; private wealth is 18% of KKR's AUM [S71, S157].	Part 3

Version B adds: Pictet owned by its partners since 1805 [S490]; Pictet's ELTIF (launched April 2024) and sixth co-investment fund at USD 1.53bn (June 2026) [S531, S529]; KKR's "like and trust" [S384]. Version C adds: drawdown funds call capital over years (see the technical guide).

The follow-up questions this answer invites

> **"Walk me through one onboarding you worked on."**
> Tests: was it real?
> Scaffold: client type, what was missing or tricky, who you went to, how it was resolved, how long it took, what you would do differently. Use a real case with names removed.

> **"What is the difference between a retail and a professional client, and why does it matter?"**
> Tests: technical understanding.
> Under COBS 3, a professional client (per se, such as a pension fund or bank, or elective, if tests are met) gets less protection and can access more complex products and institutional share classes; retail clients get the most protection [S543]. At KKR, the same logic decides who may be offered a private fund INFERRED.

> **"Why would a client accept a 5% quarterly limit on getting their money out?"**
> Tests: whether you understand the KKR side.
> Because the assets underneath are private companies that cannot be sold quickly; the gate protects investors who stay from fire sales. In exchange they get private market exposure without capital calls [S420] INFERRED. Then the duty: explain it before they invest, which is what UK Consumer Duty calls consumer understanding [S542].

> **"Pictet is a traditional manager. Why should that help you at KKR?"**
> Tests: whether you can turn a perceived weakness into a strength.
> "The clients overlap: pensions, insurers and private banks. KKR is selling private assets to wealth clients that have mostly bought daily-dealing funds, so knowing how those clients and platforms work is useful. And the two worlds are converging: Pictet now runs an ELTIF and co-investment funds, KKR runs interval funds with Capital Group" [S531, S529, S426].

> **"What did you find hardest at Pictet?"**
> Tests: self-awareness.
> Pick a true, specific difficulty (learning a dealing calendar, chasing a document across time zones, getting a factsheet number checked). Say what you changed. Never pick "nothing".

PART 1

Pictet from zero: the firm you worked for

What Pictet is, who owns it, how it makes money, what its asset management arm sells and to whom, and the parts of its record you should know before an interviewer does.

KKR's question is "What previous internship experience do you have that will be useful for this internship?" A good answer starts with one confident sentence about where you were. You cannot write that sentence until you understand the firm better than the person reading it. This part gives you that understanding, from first principles, with every fact sourced.

What kind of firm Pictet is

Pictet is a Geneva-based group that does four related jobs for other people's money: it advises wealthy families, it runs investment funds, it invests in private assets, and it holds and administers assets for other financial firms [S491] CONFIRMED. It says plainly what it does not do: "The Pictet Group does not engage in investment banking, nor does it extend commercial loans" [S490] CONFIRMED. So it does not advise on takeovers and it does not lend to companies. Its income comes from looking after and investing client money INFERRED.

KEY TERMS

- **Private bank:** looks after the whole financial life of a wealthy family: advice, portfolios, safekeeping, succession. Pictet Wealth Management is one [S491] CONFIRMED.
- **Asset manager:** paid a fee to invest clients' money through pooled funds (many investors, one portfolio) or mandates (one client, one portfolio). Pictet Asset Management, where you interned, is one [S491] CONFIRMED.
- **Custody:** safekeeping and administering assets that belong to someone else (settling trades, collecting dividends, keeping records). Pictet Asset Services does this [S491] CONFIRMED.
- **AuM:** assets under management, the money a firm invests for clients. Pictet's headline figure is "assets under management or custody", which also counts assets it only holds [S492] CONFIRMED. Always say which one you mean.

Traditional versus alternative: where Pictet sits and where KKR sits

Investment firms split roughly into two families. **Traditional** managers buy shares and bonds that trade on public markets, so their funds can be priced and dealt every day. **Alternative** managers buy things that do not trade on an exchange: whole private companies, infrastructure, property, private loans. Their funds lock money up for years because the assets cannot be sold quickly INFERRED. KKR says its founders launched "what we now know as the alternatives industry" when they started the firm on 1 May 1976 [S13] CONFIRMED. KKR managed $796.5bn at 30 June 2026 [S1] CONFIRMED, and 93% of that was perpetual capital or capital committed for 8+ years at inception [S1] CONFIRMED.

Pictet is mostly traditional, with a growing alternatives arm. Its group total of CHF 810bn (assets under management or custody, 30 June 2026) converts to about USD 1,004bn on Pictet's own site [S493] REPORTED. That looks bigger than KKR, but it is not like for like: Pictet's number includes custody assets it only holds, and listed assets it can sell daily INFERRED.

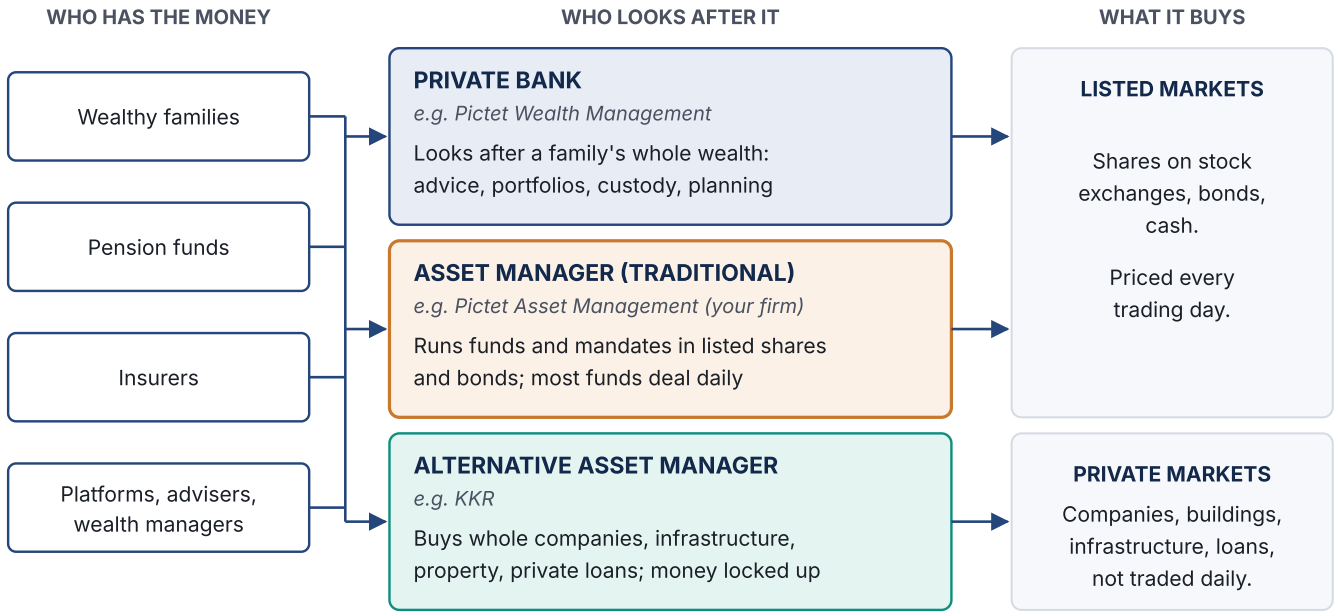

Figure 1. Three kinds of firm look after other people's money. Pictet owns the top two boxes and a growing slice of the third (Pictet Alternative Advisors). KKR is the third box. Note that private banks also buy alternatives for their clients: KKR names "global private banks" as a source of its wealth capital [S70]. Sources: Pictet business lines [S491]; KKR [S13][S70]. Categories are a simplification INFERRED.

The single most useful idea for your answer is **liquidity**: how quickly a client can turn an investment back into cash. It shapes every conversation a client team has, because it decides what you can promise. Figure 2 shows the spectrum from Pictet's world to KKR's.

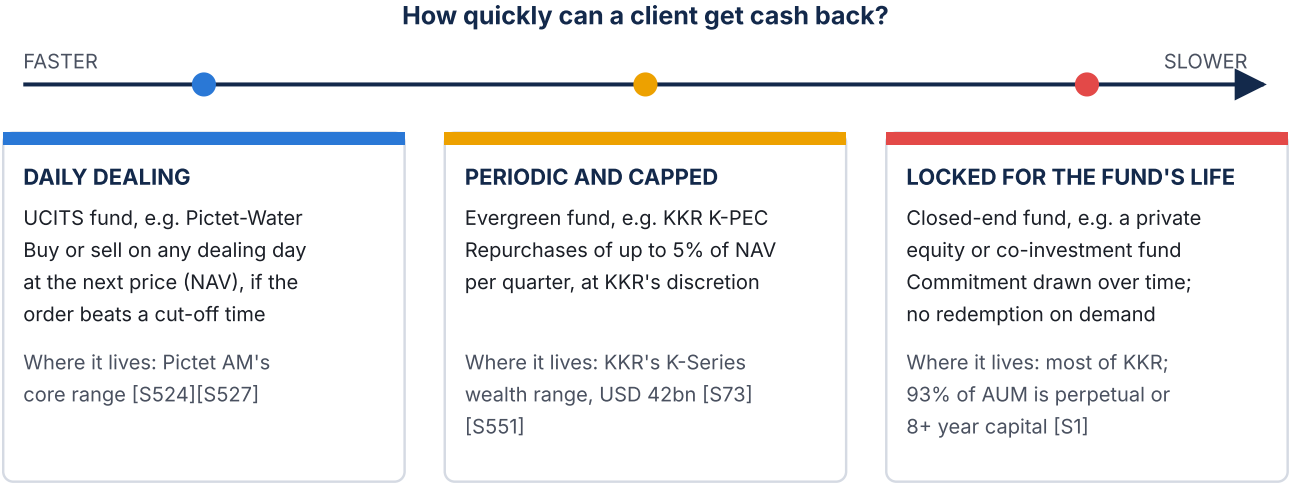

Figure 2. The liquidity spectrum. Your Pictet experience sits on the left; KKR's growing wealth business sits in the middle; KKR's core sits on the right. A client team's job changes as you move right: more explaining, more paperwork, fewer chances to fix a mistake by simply selling. Sources: Pictet SICAV dealing notice [S527]; K-PEC 2026 repurchase schedule [S551]; KKR Q2 2026 release [S1][S73], as of 30 Jun 2026. Closed-end mechanics are general INFERRED.

WHAT THIS MEANS FOR YOUR STORY

You did not intern at "a bank". You interned at the asset management arm of a private partnership that runs funds mainly for institutions and intermediaries [S491] CONFIRMED. The client group there serves people who buy daily-dealing funds. KKR's client team serves people who buy funds that lock money up. Same kind of client, different product. Saying that cleanly shows you understand both sides INFERRED.

HOW IT TRANSFERS TO KKR KCS

KKR says its private wealth capital comes from "wirehouses, independent broker-dealers, registered investment advisers, global private banks, and family offices" [S70] CONFIRMED. Pictet Wealth Management is a global private bank. KKR opened a Zurich office in December 2023 to reach Swiss private banks and wealth managers [S553] REPORTED. You have worked inside the kind of firm KCS sells to INFERRED.

SAY IT IN ONE LINE

"Pictet is a Geneva partnership that runs traditional funds and private banking; I interned in the client group of its asset management arm, which taught me how institutions and intermediaries buy funds, the same clients KKR serves with private market products."

History: 220 years in one picture

Pictet dates itself to 1805, when the de Candolle and Mallet families formed "De Candolle, Mallet & Cie" in Geneva, "the partnership that was to become Pictet" [S491] CONFIRMED. Edouard Pictet-Prevost joined in 1836 and became a Partner in 1841. Between 1848 and 1926 the firm was always headed by a Pictet, and the ninth generation of the family still works in it [S491] CONFIRMED. 2025 was its 220th anniversary, marked by the start of a move into a new Geneva headquarters, the "Campus Pictet de Rochemont" [S490][S491] CONFIRMED.

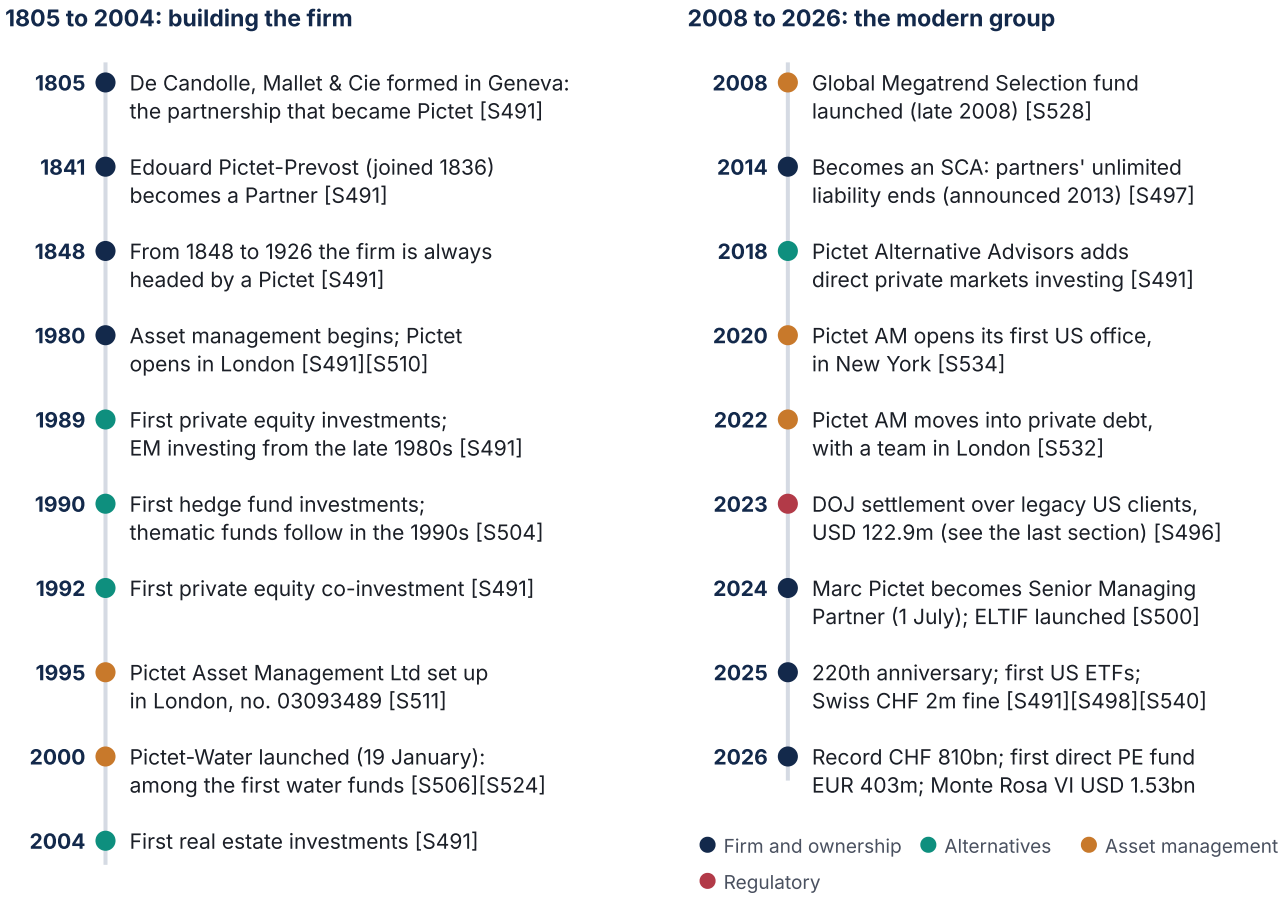

Figure 3. Pictet, 1805 to 2026. Only dates found in sources are shown; the 2026 line draws on **[S493][S529][S530]**. Read the left column as "a family partnership slowly adds new businesses" and the right column as "a large group professionalises its ownership and pushes into private markets". Sources as tagged; group history **[S491]**, as of Annual Review 2025-26.

The modern shape arrived in steps. Pictet has managed assets for institutions since 1980 [S491] CONFIRMED and has been in London since the same year [S510] CONFIRMED. Its alternatives arm made its first private equity investments in 1989, added hedge funds in 1990, did its first co-investment in 1992 and added real estate in 2004 [S491] CONFIRMED. Its thematic funds, today its flagship, go back to the 1990s [S504] CONFIRMED.

WHAT THIS MEANS FOR YOUR STORY

Two dates carry most of the weight. 1805 tells the reader why Pictet thinks in generations. 1980 is when the asset management business you joined, and the London presence, began [S491][S510] CONFIRMED. A third fact is memorable in conversation: when Raymond Sagayam joined the board on 1 January 2024 he was "the 47th Managing Partner in the 218-year history of the firm" [S501] CONFIRMED.

HOW IT TRANSFERS TO KKR KCS

KKR is also a founder-built firm with a long view: it turned 50 on 1 May 2026 [S5] CONFIRMED, and its first fund is still listed in its 10-K [S2] CONFIRMED. Both firms sell trust built over decades INFERRED.

SAY IT IN ONE LINE

"Pictet has been a partnership since 1805 and has run institutional money since 1980, so I saw how a firm that plans in generations looks after clients."

The partnership model: who owns Pictet and how it decides

Most large financial firms are companies owned by shareholders who can buy and sell their shares on a stock exchange. Pictet is not. Its legal form is a "société en commandite par actions, a partnership limited by shares" [S491] CONFIRMED, abbreviated SCA. The top holding entity is Pictet & Cie Group SCA, and its "significant equity owners are the Managing Partners" [S490] CONFIRMED.

KEY TERM

SCA (partnership limited by shares): a company form with two kinds of owner. Managing partners run the firm and carry the ultimate responsibility; other shareholders own shares but do not manage. Pictet chose it to keep partner control while ending unlimited personal liability [S497] CONFIRMED. **Unlimited liability** means a partner's own house and savings could be taken to pay the firm's debts. Until 2014 that was true for Pictet's partners [S497] CONFIRMED.

The change was announced on 6 February 2013, the same day as fellow Geneva bank Lombard Odier, and took effect on 1 January 2014. The Swiss bank, Banque Pictet & Cie SA, became a limited company and the group moved under an SCA. The new structure required a consolidated annual report and an independent supervisory board [S497] CONFIRMED. In plain words: Pictet kept partner ownership but started publishing group accounts and accepting outside oversight INFERRED.

The people at the top

Managing Partner	Partner since	Worth knowing
Marc Pictet	2011	Senior Managing Partner since 1 July 2024, succeeding Renaud de Planta [S500] CONFIRMED

Managing Partner	Partner since	Worth knowing
Laurent Ramsey	2016	Pictet AM CEO in 2016 to 2017 [S509][S533]; described in Dec 2024 as chairman of the board of Pictet Asset Management SA [S536] REPORTED
Sébastien Eisinger	2019	Managing Partner and Co-CEO of Pictet Asset Management [S504] CONFIRMED
Elif Aktuğ	2021	Ex Goldman Sachs MD in London; ran Pictet AM's Agora European equity strategy; now responsible for alternatives [S503][S491] CONFIRMED
François Pictet	2021	Worked at private equity firm AEA Investors in London, 2012 to 2014 [S490] CONFIRMED
Sven Holstenson	2023	Listed Managing Partner [S490][S491] CONFIRMED
Raymond Sagayam	2024	LSE economics; joined Pictet AM 2010; CIO Fixed Income 2017; Head of Pictet AM London 2022; now Co-CEO of Pictet AM [S501][S507] CONFIRMED

Below the seven sit 42 **Equity Partners** (at 1 April 2026), senior executives of whom "Each Equity Partner leads a strategically important function" [S491] CONFIRMED. A December 2024 interview reposted by Pictet counted 46 equity partners, an average managing-partner tenure of 21 years, no external shareholders, no debt and no listing [S536] REPORTED.

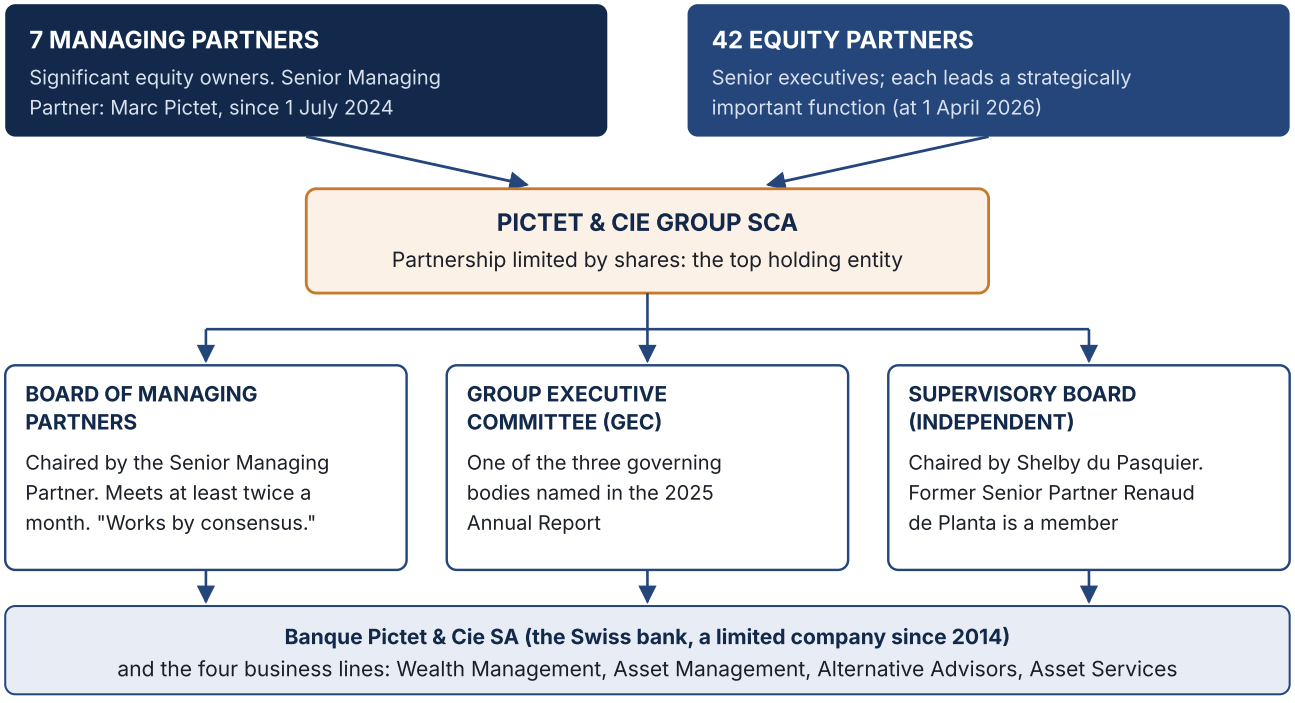

Figure 4. How Pictet is owned and governed. Ownership flows from the partners into the SCA; oversight runs through three bodies; the operating businesses sit underneath. Sources: Pictet Annual Report 2025 [S490], Annual Review 2025-26 [S491], 2013 change of form [S497]. The arrows are a simplification of the legal chain INFERRED.

Partnership versus listed company: why it matters to clients

KKR started as a partnership too, but it listed on the New York Stock Exchange in July 2010 and converted from a partnership to a corporation in July 2018 [S5] CONFIRMED. Its employees still own about 30% of its common stock [S2][S3] CONFIRMED. Figure 5 sets the two side by side. Neither model is "better". They create different pressures, and a client notices those pressures INFERRED.

	PICTET: a private partnership	KKR: a listed company
Who owns it	7 Managing Partners and 42 Equity Partners. No outside shareholders.	Public shareholders (NYSE since July 2010); employees own about 30%
Can outsiders buy in?	No: no listing and no debt [S536]. Equity is held by people in the firm.	Yes: anyone can buy a KKR share. One share, one vote by end 2026 [S2].
Who decides	Board of Managing Partners, by consensus, at least twice a month	Board of directors and Co-CEOs Joe Bae and Scott Nuttall (2021) [S10]
Time horizon	Generations: the ninth Pictet generation still works there [S491]	Quarterly results and share price, but 93% of AUM is long-dated [S1]
Liability and legal form	Partners had unlimited personal liability until 2014; now an SCA	A partnership until July 2018, then converted to a corporation [S5]
Leadership turnover	47 Managing Partners in over two centuries [S501]	Founders Kravis and Roberts were co-CEOs from 1987 to 2021 [S10]

Figure 5. Two ownership models. Pictet's owners are its senior managers; KKR's owners include the public, with employees holding a large stake. Both firms tie pay and ownership to long-term results. Sources: Pictet [S490][S491][S497][S501][S536]; KKR [S1][S2][S3][S5][S10], as of 2026.

Why a client cares: a firm owned by its managers can take decisions that cost growth today to protect trust tomorrow. Pictet AM says: "We always prioritise our clients' interests over asset growth and do not hesitate to soft-close strategies to protect their returns" [S491] CONFIRMED. A **soft-close** means a fund stops taking new money (existing investors stay in) because more money would make it harder to invest well INFERRED. Pictet also says, unusually for a sales organisation, "We do not aspire to be all things to all clients" [S491] CONFIRMED. KKR makes a parallel argument through its "one firm" approach, where pay depends on the performance of the firm as a whole [S2] CONFIRMED.

WHAT THIS MEANS FOR YOUR STORY

You worked inside a firm where the owners are the senior managers and decisions are taken "by consensus" [S490] CONFIRMED. If your experience matched that (for example, if you saw that client issues were escalated and shared rather than owned by one salesperson), you can describe it. If you did not see it, do not claim it: talk about the model, not your observation INFERRED.

HOW IT TRANSFERS TO KKR KCS

KCS describes its approach as "Relationship-focused, solutions-oriented" and asks staff to "Apply integrated approach by leveraging all KKR executives and capabilities globally" (KKR's KCS team description). KKR's employees own about 30% of its stock and its compensation rewards "the performance of the firm as a whole" [S2] CONFIRMED. Both firms reward a junior who brings the right colleague into a client conversation rather than keeping it INFERRED.

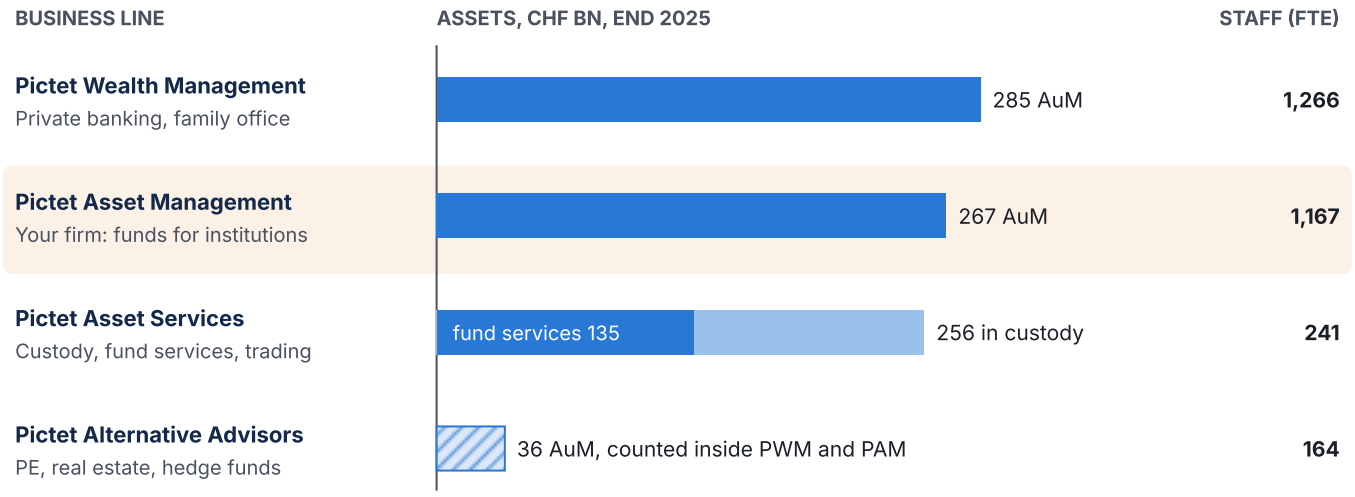

SAY IT IN ONE LINE

"Pictet is owned by seven managing partners who decide by consensus, which helps explain why it is willing to close a fund to new money to protect existing clients."

The four business lines

Pictet groups its work into four business lines [S491] CONFIRMED. Technology and operations, and trading and execution, are support functions, not business lines; Asset Services offers clients "dedicated access to Pictet Trading & Sales" [S491] CONFIRMED.

Line	In Pictet's words	Who it serves
Wealth Management (PWM)	Private banking, investment and wealth solutions, family office services [S491] CONFIRMED	Wealthy individuals and families INFERRED
Asset Management (PAM)	"Specialist investment management for institutions and investment funds" [S491] CONFIRMED	"Pension funds, financial institutions and intermediaries" [S491] CONFIRMED
Alternative Advisors (PAA)	Private equity, real estate, hedge funds [S491] CONFIRMED	Pictet's private and institutional clients [S529] CONFIRMED
Asset Services (PAS)	Custody, fund solutions, trading services [S491] CONFIRMED	Other asset managers and external wealth managers [S522] REPORTED

Also: 22 PWM offices and 346 private bankers; 18 PAM offices and 405 investment professionals; 6 Asset Services offices.

The lines overlap (for example PAA assets sit inside PWM and PAM), so they do not add up to the CHF 757bn group total.

Figure 6. Pictet's four business lines by size. Wealth Management and Asset Management are almost the same size; together they hold CHF 552bn of AuM (derived). Asset Services' custody bar shows the CHF 135bn fund-services part in a darker shade. Source: Pictet Annual Review 2025-26 [S491], as of 31 Dec 2025. Overlap note INFERRED.

The numbers: how big Pictet is and how it earns

CHF 810bn
Assets under management or custody, record, 30 Jun 2026 (+7% in six months) [S493]

CHF 757bn
Same measure, 31 Dec 2025, then a record (+4.5% in 2025) [S494]

CHF 19bn
Net new money in 2025, "across all business lines" [S494]

CHF 371m
Consolidated profit, H1 2026 (+12%); FY2025 CHF 667m [S492][S490]

5,612
Staff (FTE), 30 Jun 2026: 3,313 in Switzerland, 2,299 abroad [S492]

21.9%
Total capital ratio, 30 Jun 2026, versus a 12% FINMA requirement [S492]

All figures are CONFIRMED from Pictet's own reports. Pictet also reported 31 offices in 20 countries at end 2025 [S491] CONFIRMED. It did not publish a net new money figure for the first half of 2026 [S493] CONFIRMED.

KEY TERM

Net new money (NNM): money clients brought in minus money they took out, ignoring market moves. It is the cleanest test of whether clients trust a firm. Assets can rise just because markets rose; NNM cannot INFERRED .

KEY TERM

Cost/income ratio: costs divided by income. Pictet's was 71% in H1 2026 [S492] CONFIRMED : of every CHF 100 earned, CHF 71 went on running the firm. **Capital ratio:** the bank's own capital as a share of its risk-weighted assets; higher means safer INFERRED .

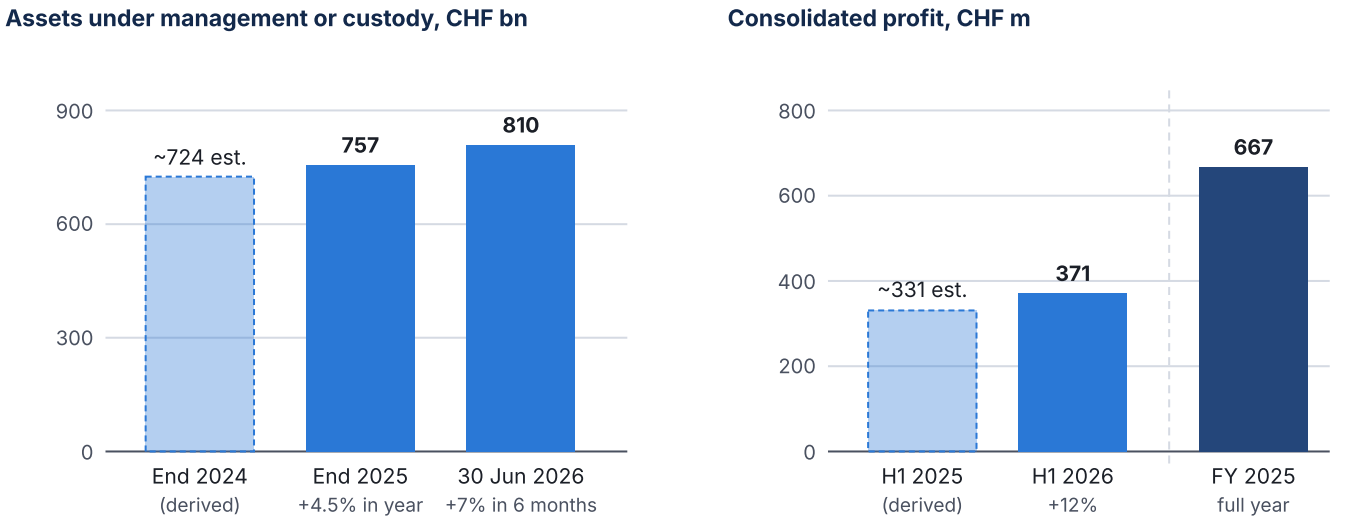

Figure 7. Record assets, rising profit. Left: the group total, with the end-2024 bar derived by reversing the reported 4.5% growth (est.). Right: half-year profits compared like for like, with the full-year 2025 figure shown separately (it covers twelve months, not six). Sources: Pictet H1 2026 report and release **[S492][S493]**; FY2025 release and annual report **[S494][S490]**, as of 30 Jun 2026. Derived bars are INFERRED arithmetic.

Pictet's own explanation of the half year: "In an environment marked by geopolitical uncertainty, the assets clients entrusted to Pictet reached an all-time high" (Marc Pictet) [S493][S495] CONFIRMED . The report names "transit disruption through the Strait of Hormuz and rising energy prices" as the backdrop and says equity markets were "especially supported by an evolving AI environment" [S492] CONFIRMED . Banque Pictet is rated AA- by Fitch and Aa2 by Moody's [S492] CONFIRMED .

How a firm like Pictet turns assets into profit

An asset manager or private bank earns mainly fees charged as a percentage of the assets it looks after, plus some transaction and banking income INFERRED . So assets drive income, and income minus costs drives profit. Figure 8 walks the first half of 2026 through that chain. Only the first and last bars are reported; the middle ones are derived from the 71% cost/income ratio.

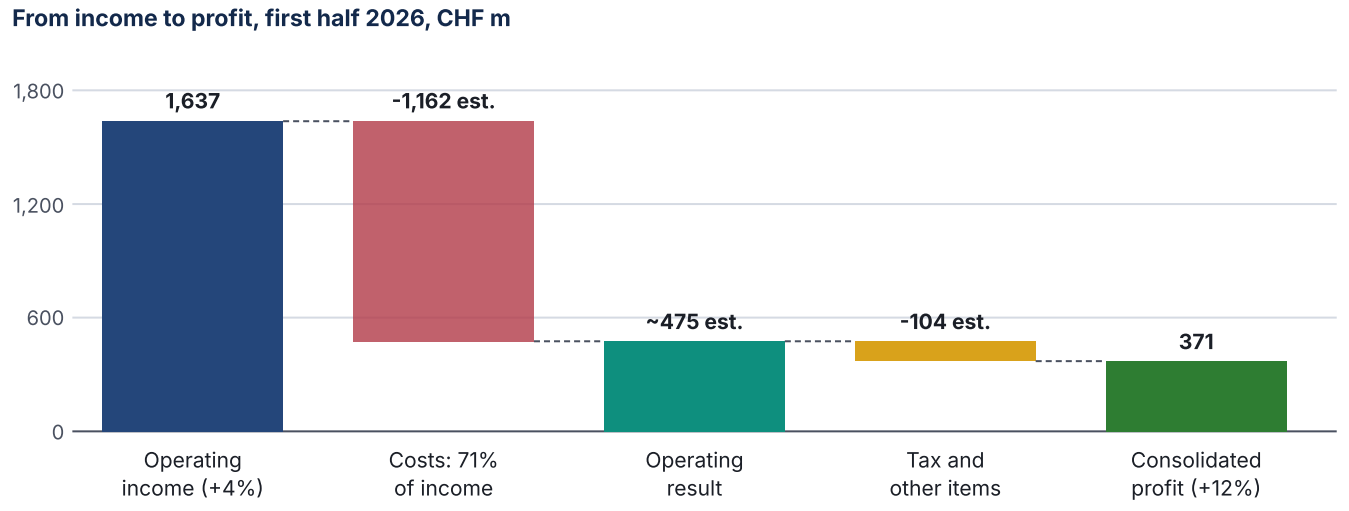

Figure 8. The income-to-profit chain, H1 2026. Reported: operating income CHF 1,637m and profit CHF 371m [S492] CONFIRMED. Derived (est.): costs = 71% x 1,637 = about 1,162; operating result = about 475; the remaining gap of about 104 is tax and other items INFERRED. For reference, the reported FY2025 operating result was CHF 846m [S490]. Source: Pictet half-year report [S492], as of 30 Jun 2026.

WHAT THIS MEANS FOR YOUR STORY

The number to remember is CHF 810bn, a record, at 30 June 2026 [S493] CONFIRMED. The number that tells you about client work is net new money: CHF 19bn in 2025 [S494] CONFIRMED. Net new money is what a client group helps earn and keep, through onboarding new clients smoothly and servicing existing ones well INFERRED. You can link your team's work to that number without claiming you moved it.

HOW IT TRANSFERS TO KKR KCS

KKR tracks the same idea as "new capital raised" and reports it every quarter [S1] CONFIRMED. A KCS London analyst posting lists "Managing a variety of reporting requirements for investors" and "Supporting Relationship Managers in fundraising activities" [S101] CONFIRMED.

SAY IT IN ONE LINE

"Pictet reached a record CHF 810bn in mid-2026 and took in CHF 19bn of net new money in 2025, and the client group I worked in is part of how that money arrives and stays."

Pictet Asset Management in depth

Pictet Asset Management (Pictet AM, sometimes "PAM") managed **USD 354bn** at 30 June 2026, with more than 1,100 employees, more than 400 investment professionals and 18 offices [S504] CONFIRMED. At end 2025 its figures were CHF 267bn, 1,167 FTE, 405 investment professionals and 9 investment centres [S491] CONFIRMED. (The two AuM figures use different currencies and dates.) Its clients are "pension funds, financial institutions and intermediaries" [S491] CONFIRMED, and it says it serves "some of the world's largest financial institutions and their clients" [S504] CONFIRMED.

KEY TERM

Intermediary: a firm that stands between the fund manager and the end investor: a fund platform, a wealth manager, a private bank, a financial adviser. Pictet AM's UK funds reach retail investors through platforms such as Fidelity, Hargreaves Lansdown and AJ Bell [S524][S525][S526] CONFIRMED.

KEY TERM

Multi-boutique: Pictet AM calls itself "a multi-boutique active asset manager" [S491] CONFIRMED. Each investment team works like a small specialist firm with its own process, sharing sales, operations and the brand INFERRED. **Active** means managers pick investments to try to beat a benchmark.

Pictet AM names its strategic capabilities as multi-asset, emerging markets and alternatives, "and are ranked as the global leader for thematic equities" [S491] CONFIRMED. The 2026 site lists thematics, emerging markets, alternatives and multi asset [S504] CONFIRMED.

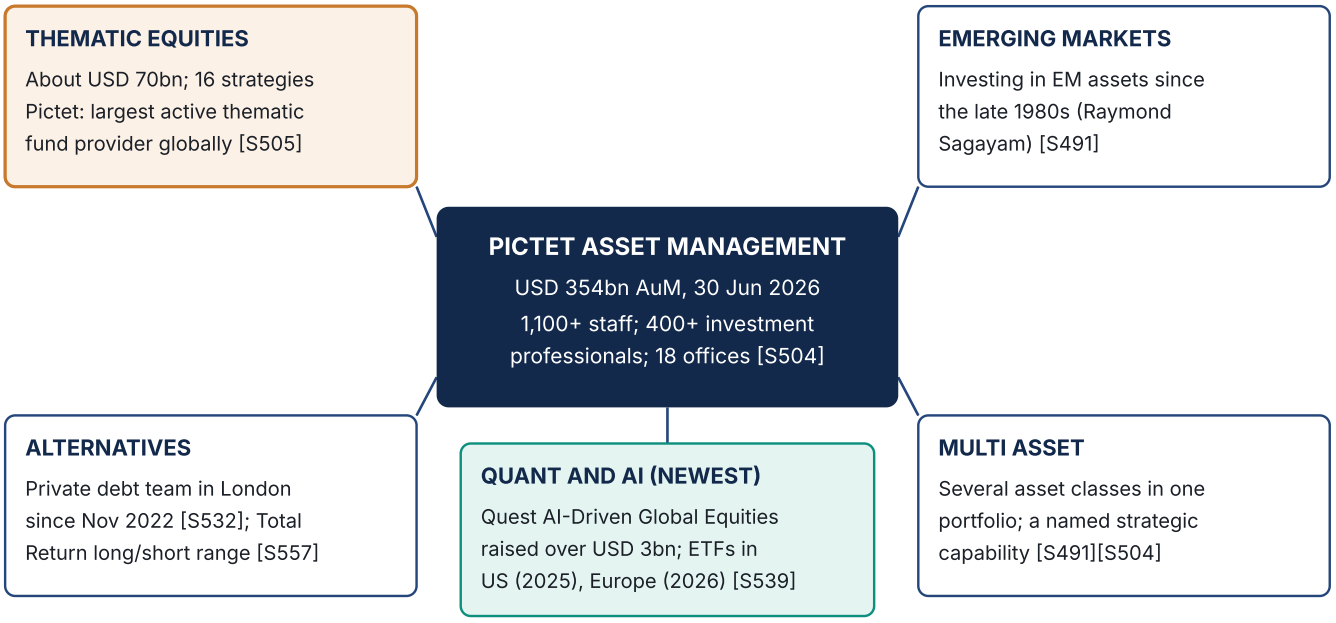

Figure 9. What Pictet AM sells. Four named strategic capabilities around the centre, with the newest growth area (quantitative and AI-driven funds, including ETFs) below. Thematic equities, highlighted, is the franchise most clients know Pictet for. Sources as tagged; AuM as of 30 Jun 2026 [S504]; thematic AuM as of 31 Mar 2025 [S505]. The ETF and Quest figures are REPORTED.

Thematic equities: the flagship, explained from zero

A **thematic fund** buys shares in companies linked to a long-term change in the world (a theme) rather than to a country or an industry index. Pictet had about USD 70bn in thematic equities at 31 March 2025, across 16 strategies built on 14 themes, run by more than 70 dedicated investment professionals [S505] CONFIRMED. It claims to be "the largest active thematic fund provider by AUM globally", citing Broadridge data to end June 2025 [S505] CONFIRMED (Pictet's own claim). Pictet tracks 21 megatrends [S537] CONFIRMED, and each theme has an advisory board of "industry leaders and academics" [S506] CONFIRMED. Pictet-Water launched on 19 January 2000 [S524] CONFIRMED; Pictet says "We were among the very first investment managers to offer a thematic strategy dedicated to the water theme" [S506] CONFIRMED.

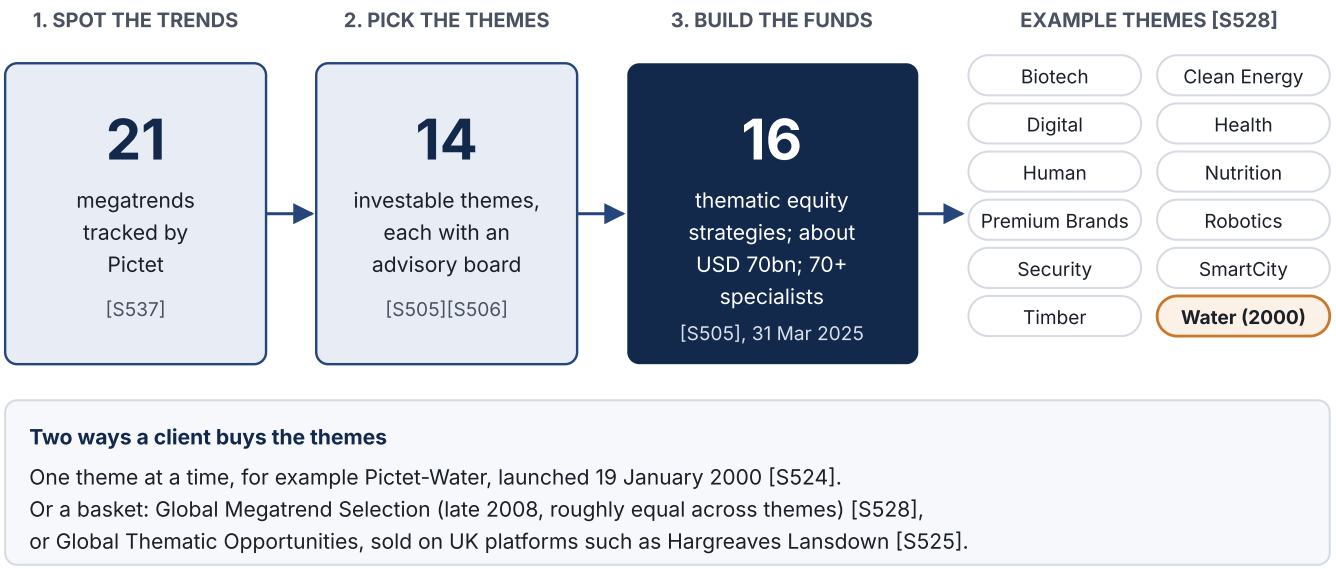

Figure 10. How a thematic range is built. Pictet narrows 21 megatrends to 14 investable themes and runs 16 strategies on them. The theme names on the right come from Pictet marketing for Global Megatrend Selection and are REPORTED. Sources: [S505] (as of 31 Mar 2025), [S506], [S524], [S525], [S528], [S537].

Fund ranges and vehicles: what a client actually owns

Most Pictet AM funds sold in the UK are share classes of a Luxembourg fund company called "PICTET", a **SICAV** (société d'investissement à capital variable, an open-ended investment company). It is registered at 15 avenue J.F. Kennedy, Luxembourg, RCS B 38 034, and each sub-fund is called a "Compartment", for example Pictet - Water, Pictet - Robotics, Pictet - Security and Pictet - Global Megatrend Selection [S527] CONFIRMED. Pictet-Water is a Luxembourg UCITS whose management company is Pictet Asset Management (Europe) SA [S524] CONFIRMED. Pictet also runs a separate Total Return range (Pictet TR) [S557] REPORTED, Swiss funds under "Pictet CH" [S529] REPORTED, and a private-assets umbrella, "Pictet Private Assets SICAV" [S531] CONFIRMED.

KEY TERM

UCITS: the EU rulebook for funds sold to the general public. It limits what the fund may hold, requires diversification and regular dealing, and lets a fund registered in one EU country be sold across others. Since January 2024 the UK treats EEA UCITS as equivalent under its Overseas Funds Regime [S546] CONFIRMED.

KEY TERM

Share class: a version of the same fund with different terms. "P" classes are retail-type and "I" classes institutional; "dy" means distributing (it pays out income) and the suffix gives the currency, as in "Pictet-Water P dy GBP" [S524][S526] CONFIRMED. Minimums sit in the prospectus, which is not covered here.

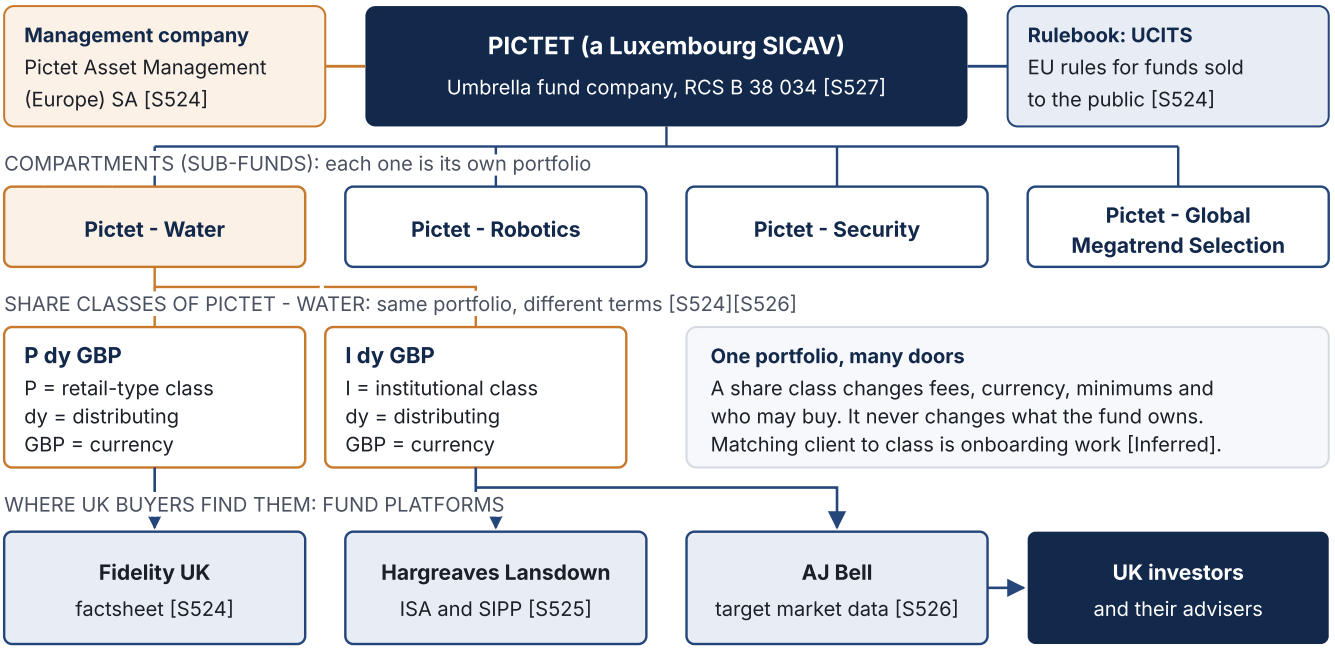

Figure 11. From fund company to UK investor. One Luxembourg SICAV holds many compartments; each compartment has several share classes; platforms list the share classes for UK buyers. The line from the I class to platforms is simplified: platforms list whichever classes they carry (AJ Bell shows I dy GBP; Fidelity shows P dy GBP) **[S524][S526]**. Sources: Pictet SICAV notice **[S527]**; platform pages, data to 9 Oct 2026.

Two mechanics follow from this structure, and a client group meets both. First, **dealing**: a UCITS investor buys or sells at the next price the fund calculates (the net asset value, or NAV), not at a price known in advance. Orders must reach the fund's administrator before a cut-off. A 2018 Pictet notice moved many compartments to a 1:00 pm Luxembourg-time cut-off on the valuation day, with settlement for some within two week days [S527] CONFIRMED (dated 2018). Second, **distribution data**: Pictet sends platforms standard data files describing who each fund is for. AJ Bell shows the target market for Pictet-Water I dy GBP: available to retail, professional and eligible counterparty clients, risk indicator 5 of 7, objective growth, recommended holding period 5 years, and the statement "Product expected to provide fair value for reasonably foreseeable period" [S526] CONFIRMED. The rest of this guide explains these mechanics in full.

Who runs Pictet AM, and where London fits

Pictet AM is led by two Managing Partners as Co-CEOs: Sébastien Eisinger [S504] CONFIRMED and Raymond Sagayam [S507][S508] CONFIRMED. The start date of this co-CEO arrangement was not found. The client-facing leadership was reshaped in 2026. Malick Badjie joined on 1 May 2026 from Robeco, where he had been Global Head of Sales & Marketing for nine years (and before that at BlackRock in London and New York), as Global Co-Head of Sales alongside Niall Quinn; both report to Raymond Sagayam, and Badjie sits on the Pictet AM Executive Committee [S507][S508] CONFIRMED. Sagayam said: "We welcome Malick to our distribution leadership team" [S508] CONFIRMED.

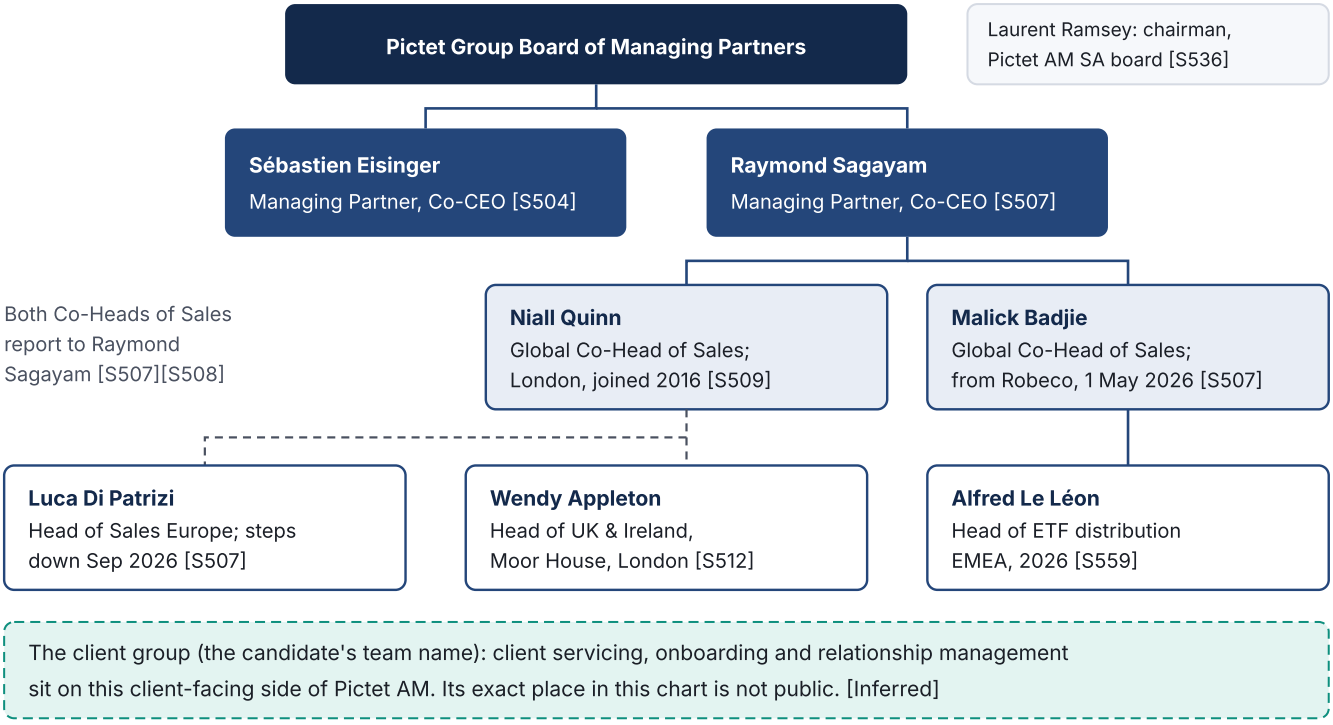

Figure 12. Pictet AM's client-facing leadership, 2026. Solid lines are reported reporting lines; dashed lines mean the reporting line is not public. Le Léon's line to Badjie is REPORTED [S559]. Sources: [S504][S507][S508][S509][S512][S536][S559], as of Oct 2026. Di Patrizi becomes a strategic adviser until retirement [S507].

SOURCE UNCERTAIN: THE TEAM NAME

Public Pictet sources do not use the name "Global Client Group". They use "Sales", "Global Co-Head of Sales", "Head of UK & Ireland", "Intermediaries", "Global Marketing" and "RFP teams" [S504][S507][S509][S512][S521] CONFIRMED (no match in any of them). This guide therefore writes "the client group (the candidate's team name)". In your application, use the exact name on your own offer letter or contract, and add a plain description such as "the client-facing team covering client servicing, onboarding and relationship management" INFERRED.

The UK entity and the London offices

Pictet has been in London since 1980 and has two offices there: Stratton House in Mayfair (wealth management, Pictet Alternative Advisors (UK) Limited and asset servicing) and Moor House, 120 London Wall in the City (asset management and alternative investments) [S510] CONFIRMED. A 2026 job advert says Pictet employs "near 400 people" in London [S520] REPORTED. The UK asset management company is **Pictet Asset Management Limited**, company number 03093489, incorporated on 21 August 1995 and known as Pictet International Management Limited from 1996 to 2006. Its directors include Niall Quinn (since 2 May 2018) and Raymond Sagayam [S511] CONFIRMED. It is authorised and regulated by the Financial Conduct Authority [S510] CONFIRMED; secondary sites give its FCA reference number as 181966 [S554] REPORTED. Wendy Appleton, Head of UK & Ireland, is listed at Moor House [S512] CONFIRMED.

SOURCE UNCERTAIN: YOUR PROGRAMME

Pictet's careers site lists 6 to 12 month internships and 2 to 3 month summer internships in Geneva [S516][S517] CONFIRMED, not a six-week placement. Placements arranged directly with a team often go unlisted INFERRED. Describe yours plainly, with its real length, location and team name.

WHAT THIS MEANS FOR YOUR STORY

Your team's clients did not buy "Pictet". They bought a specific share class of a specific compartment through a specific channel, and they were covered by a sales structure that reports up to a Co-CEO [S507] CONFIRMED. If you worked on onboarding, the technical content was matching the client (institution, intermediary, platform) to the right vehicle and class, and making sure the paperwork and data matched INFERRED. Describe only the parts you actually touched, use this section's vocabulary to name them precisely, and do not imply you worked with any named person unless you did.

HOW IT TRANSFERS TO KKR KCS

KKR's wealth products are also vehicles with classes and channels: the K-Series evergreen range reached $42bn at 30 June 2026 [S73] CONFIRMED, and KKR became the largest manager of European-domiciled evergreen funds, EUR 13.6bn in Q1 2026 [S550] CONFIRMED. A London KCS analyst is expected to be "Partnering with clients to help with KYC & investment onboarding" [S101] CONFIRMED. KCS also has Pictet AM's split: "Relationship managers in direct outreach to clients; Product specialists providing specific support and expertise; Junior resources serving in a generalist capacity" (KKR's KCS team description). Its head, Eric Mogelof, spent 17 years at PIMCO, a traditional asset manager, before joining KKR in 2020 [S79] CONFIRMED.

SAY IT IN ONE LINE

"I interned in the client group of Pictet Asset Management, a USD 354bn manager that sells mainly Luxembourg UCITS funds, including the world's largest active thematic range by its own count, to institutions and intermediaries."

Pictet's private markets: the bridge to KKR's world

Pictet Alternative Advisors (PAA) invests in private equity, real estate and hedge funds for Pictet's private and institutional clients "through direct investments and carefully selected external partners" [S529] CONFIRMED. It managed CHF 36bn at end 2025, counted inside the Wealth and Asset Management totals [S491] CONFIRMED. Pictet's careers page says "over USD 50 billion in assets across nine investment offices" [S514] CONFIRMED; the figures differ because of scope and currency INFERRED. Managing Partner Elif Aktuğ is responsible, and her direct teams focus on the European mid-market in private equity, real estate and private debt [S491] CONFIRMED. Her line: "Pictet's clients can now benefit from a comprehensive direct and multi-manager private asset platform" [S491] CONFIRMED.

KEY TERM

Co-investment: investing directly in one company alongside a private equity firm (the general partner, or GP) that leads the deal, instead of through the GP's main fund. Investors usually pay lower fees and choose deal by deal INFERRED. Pictet has relationships with over 90 GPs and sits on advisory boards of most [S535] CONFIRMED.

KEY TERM

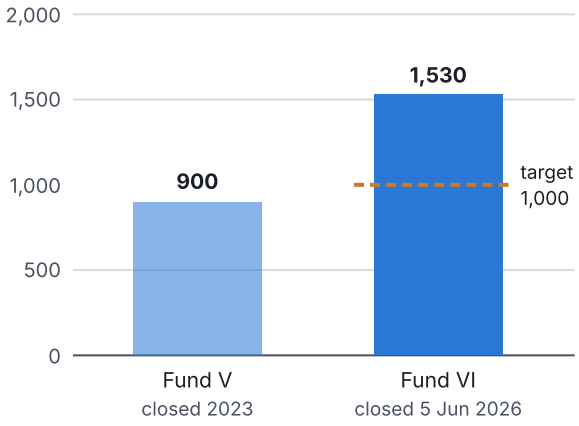

ELTIF (European Long-Term Investment Fund): an EU fund format that lets private-market funds be sold more widely, including to wealthy individuals. Pictet launched an environment-themed co-investment ELTIF on 22 April 2024, targeting 20 to 25 co-investments [S531] CONFIRMED.

Co-investment funnel, per year [S535]

About 8% of what is seen gets invested (derived). Over 90 GP relationships; about USD 2bn committed a year; USD 27bn private equity AuM [S535].

Monte Rosa co-investment funds, USD m [S529]

3.1x multiple on 64 realised co-investments; 210+ co-investments in 15 years [S529]

Figure 13. How Pictet picks co-investments, and how fast the programme is growing. Left: the selection funnel, about 300 to 90 to 25 a year. Right: the sixth fund closed 53% above its target and 70% larger than the fifth (both derived). Investors were insurers, pension funds, family offices and private clients [S529]. Sources: [S535] (Apr 2025), [S529] (5 Jun 2026). Percentages are INFERRED arithmetic.

Two more 2026 milestones complete the picture. On 25 March 2026 Pictet closed its first direct private equity fund, Pictet Private Equity Entrepreneur Capital I, at EUR 403m. It backs lower mid-market founder and family businesses in the DACH region (Germany, Austria, Switzerland) and the UK, with themes of B2B services and education, and is led by Edmund Buckley [S530] CONFIRMED. A job advert describes a London team of 12 investment professionals writing tickets of EUR 20 to 80m into companies with EBITDA of EUR 3 to 15m [S519] REPORTED. Pictet AM itself moved into private debt in November 2022 with a London team led by Andreas Klein, formerly of ICG [S532] CONFIRMED.

Pictet is also cautious about the product KKR is growing fastest. Laurent Ramsey, in a December 2024 interview Pictet reposted, said "you need to be careful when making something illiquid liquid", noted that semi-liquid funds typically allow "3-5% redemption per quarter", and cited the redemption limits at Blackstone's BREIT; he also said such funds can be a stepping stone into private markets with lower minimums [S536] REPORTED.

DON'T SAY THIS

"Pictet invests with KKR" or "Pictet distributes KKR funds." No public source links the two firms; Pictet does not publish its list of GPs [S535] CONFIRMED. It is plausible that a co-investor with 90+ GP relationships has met KKR, but it is unproven INFERRED. If you happen to know otherwise from your placement, it is probably confidential: leave it out.

WHAT THIS MEANS FOR YOUR STORY

Pictet sits on the other side of KKR's table. In co-investment it is the investor (a limited partner, or LP) choosing deals that GPs like KKR bring. Even if your team did not handle private markets, you saw a firm that is moving its clients from daily-dealing funds towards private assets [S529][S530][S531] CONFIRMED. That movement is the reason KKR's client business is growing INFERRED.

HOW IT TRANSFERS TO KKR KCS

KKR is moving the other way: from institutions into wealth, and even into public-private blends. Capital Group and KKR launched interval funds on 29 April 2025 mixing about 60% public and 40% private credit, with quarterly repurchases of up to 10% and a USD 1,000 minimum [S552] CONFIRMED. Your Pictet view of the investor's side is the half KCS needs to understand INFERRED.

SAY IT IN ONE LINE

"Pictet is pushing its clients into private markets just as KKR is pushing private markets to Pictet's kind of clients, and I want to work where those two movements meet."

News you should know: 2025 to 2026

Figure 14. Pictet news, January 2025 to October 2026. Three threads run through it: record results, new products (ETFs and private markets), and a reshaped sales leadership. Sources as tagged; [S540], [S558] and [S559] are REPORTED. Also in 2026: Alfred Le Léon hired as head of ETF distribution EMEA [S559].

The European ETFs launched on 1 July 2026 (tickers PQEU, PQUS, PQWD, PQWX) charge 0.25% a year and aim to beat their MSCI benchmarks by 1 to 1.5% a year after charges; they list on Deutsche Börse/XETRA and Euronext, with the LSE and SIX to follow [S539][S540] CONFIRMED. An **ETF** (exchange-traded fund) is a fund whose shares trade on a stock exchange all day, unlike a UCITS mutual fund that deals once a day at NAV INFERRED. For a client team, a new vehicle means new onboarding routes, new data and new questions INFERRED.

WHAT THIS MEANS FOR YOUR STORY

Pick one item that connects to your team. For a client group, the most relevant is the sales leadership change: a new Global Co-Head of Sales from 1 May 2026 and a long-serving Head of Sales Europe stepping down in September 2026 [S507] CONFIRMED. Mention what you saw of it only if you saw it.

HOW IT TRANSFERS TO KKR KCS

KKR's own 2026 story is the same shape: product innovation for wealth clients (K-Series, $42bn [S73] CONFIRMED) and record European evergreen assets [S550] CONFIRMED. Markus Egloff, who leads Global Wealth Solutions for EMEA and Asia Pacific from London, came from 25 years at UBS [S124] CONFIRMED.

SAY IT IN ONE LINE

"This year Pictet hit a record CHF 810bn, launched AI-driven ETFs and raised USD 1.53bn for co-investment, which shows a traditional manager stretching both towards cheaper public products and towards private markets."

The skeletons, told straight

Every old bank has a record. Pictet's recent one has three items. You should know them precisely, never raise them yourself, and be calm and factual if asked.

1. **December 2023, US Department of Justice.** On 4 December 2023 Pictet resolved a legacy DOJ investigation into its US private banking clients from 2008 to 2014 through a three-year deferred prosecution agreement. It paid USD 122.9m (CHF 106.8m), of which USD 38.9m was a fine. The DOJ recognised Pictet's "substantial assistance" [S496] CONFIRMED. A **deferred prosecution agreement** means prosecutors agree not to pursue charges if the firm meets agreed conditions for a set period INFERRED.
2. **March 2024, US Senate inquiry.** On 21 March 2024 Senate Finance Committee Chair Ron Wyden opened an inquiry into whether Pictet kept helping a US citizen evade tax, writing to Laurent Ramsey. He said: "I also wish to better understand why Pictet only paid a paltry penalty of just $122.9 million" [S499] CONFIRMED. No outcome was found.
3. **June 2025, Switzerland.** On 17 June 2025 the Office of the Attorney General of Switzerland fined Banque Pictet CHF 2m under corporate liability rules in a money-laundering case linked to the "Lava Jato" (Petrobras) investigation. A former relationship manager received a six-month suspended sentence. The OAG found the bank failed to classify the accounts as high risk and failed to properly monitor 54 transfers [S498] CONFIRMED.

The client-risk chain, and where each case touched it

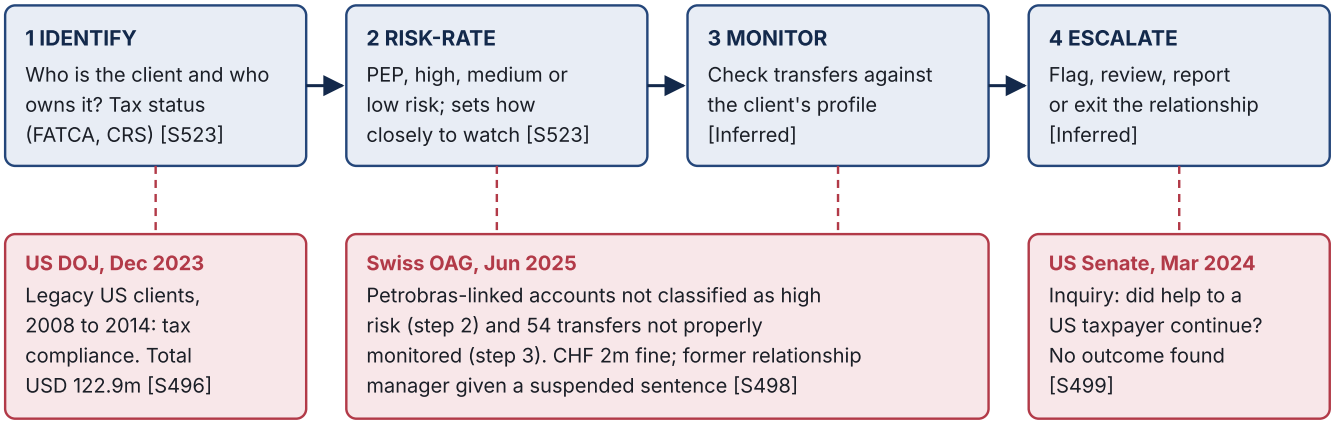

Figure 15. Why onboarding is not paperwork. All three cases are failures somewhere along the chain that client onboarding and servicing teams run every day. Steps follow a Banque Pictet AML onboarding job description [S523] REPORTED; mapping each case to a step is the author's reading INFERRED, except the Swiss case, where the OAG named steps 2 and 3 itself [S498].

HOW TO HANDLE IT IF ASKED

Stay factual, short and unemotional, then turn to what it taught you. For example: "Yes, Pictet settled a legacy US tax case with the DOJ in December 2023 for about USD 123m, covering 2008 to 2014, and in 2025 a Swiss prosecutor fined the bank CHF 2m because some accounts had not been rated high risk. Those cases are why onboarding and KYC checks are taken so seriously: the whole client relationship rests on getting that first step right." Then stop. Thirty seconds is enough.

DON'T SAY THIS

Do not raise these cases yourself. Do not defend or attack Pictet, speculate about the Senate inquiry's outcome (none has been found), or suggest you know anything internal. Do not get the date wrong: the DOJ settlement was December 2023, not 2022 [S496] CONFIRMED.

WHAT THIS MEANS FOR YOUR STORY

These cases make the plainest part of client-group work, checking who a client is and how risky they are, into the part with the highest stakes INFERRED. If you handled onboarding documents, you can say why they matter with real examples. If you did not, the lesson still holds as something you understood about the firm.

HOW IT TRANSFERS TO KKR KCS

KYC onboarding is an explicit task in KKR's London KCS analyst posting [S101] CONFIRMED, and KKR's 10-K notes that "Financial crime laws may limit our investment and capital raising activities" [S70] CONFIRMED. A junior who knows why a subscription waits for a beneficial-owner check explains the delay better to the client INFERRED.

SAY IT IN ONE LINE

"Pictet's 2025 Swiss fine came down to accounts not being rated high risk, which taught me that onboarding is where a client relationship is protected or put at risk."

PART 2

Your role decoded: what a client group at a UCITS manager really does

Every task in a client-facing seat at Pictet Asset Management, explained from zero and step by step: who sits where, how a client is onboarded, how a deal is priced, how a query travels, how a relationship is run, and how to turn each into an honest CV bullet and a story that survives three follow-up questions.

How to read this part

You spent about six weeks in what you call the "Global Client Group" at Pictet Asset Management (Pictet AM) in London, working on client servicing, client onboarding and client relationship management. Public Pictet sources do not use that team name. They talk about "Sales", "Global Co-Heads of Sales", "Head of UK & Ireland", "Intermediaries", "Global Marketing" and "RFP teams" [S504, S507, S512, S521] CONFIRMED. So this part writes **the client group (the candidate's team name)**, and on your CV you should use the exact name on your own contract or offer letter INFERRED.

One rule runs through every page. This guide never says what *you* did. It explains what a team like yours does, and what interns in seats like yours typically see, tagged INFERRED where it is reasoning. You then keep only what is true for you. Every example CV line is marked **Template: keep only if true** and has [square-bracket slots] for your real details.

THE ONE IDEA BEHIND THIS WHOLE PART

An asset manager has two halves. The investment teams decide what the fund owns. The client group decides **who can own the fund, on what terms, with what information, and how they are looked after afterwards**. Almost everything in this part is a rule, a document or a process sitting on that second half. KKR's Global Client Solutions (KCS) is the same second half, attached to private markets products instead of daily-dealing funds INFERRED.

KEY TERMS USED THROUGHOUT

UCITS: "Undertakings for Collective Investment in Transferable Securities". The EU's standard rulebook for funds that ordinary savers can buy. A UCITS must hold mainly liquid securities and let investors buy and sell regularly, usually every business day (standard definition) INFERRED.

SICAV: a Luxembourg open-ended investment company. Pictet's main fund range is one SICAV called "PICTET", and each fund inside it (Pictet - Water, Pictet - Robotics and so on) is a "Compartment", also called a sub-fund [S527] CONFIRMED.

NAV (net asset value): the value of everything the fund owns, minus what it owes, divided by the number of shares. It is the price at which you buy or sell a share of the fund (standard definition) INFERRED.

Transfer agent (TA): the firm that keeps the fund's register of who owns how many shares, takes in buy and sell orders, and issues confirmations. Pictet's current TA for the SICAV is not named in the sources read [Gap].

Intermediary: anyone who sits between the fund and the final saver: a fund platform (AJ Bell, Hargreaves Lansdown, Fidelity), a wealth manager, a discretionary fund manager or an independent financial adviser (IFA) [S513, S524, S525, S526] REPORTED.

1. How the client group is organised

The firm around you

Pictet AM managed about USD 354bn at 30 June 2026, with more than 1,100 employees, more than 400 investment professionals and 18 offices [S504] CONFIRMED. Its clients are "pension funds, financial institutions and intermediaries" [S491] CONFIRMED. It calls itself "a multi-boutique active asset manager": each investment team (thematic equities, emerging markets, multi asset, alternatives and others) runs its own process [S491] CONFIRMED. That matters for you: the client group is the one team that has to speak for all the boutiques at once INFERRED.

At the top of the client-facing side: Pictet AM is run by two Co-CEOs, Sébastien Eisinger and Raymond Sagayam [S504, S507] CONFIRMED. Sales is led by two Global Co-Heads of Sales, Niall Quinn and Malick Badjie (Badjie joined from Robeco on 1 May 2026), who both report to Sagayam [S507, S508] CONFIRMED. In London, Wendy Appleton is listed as Head of UK & Ireland at Moor House [S512] CONFIRMED. Luca Di Patrizi, Head of Sales Europe, steps down in September 2026 after 27 years [S507] CONFIRMED. A head of ETF distribution for EMEA, Alfred Le Léon, was hired in 2026 [S559] REPORTED.

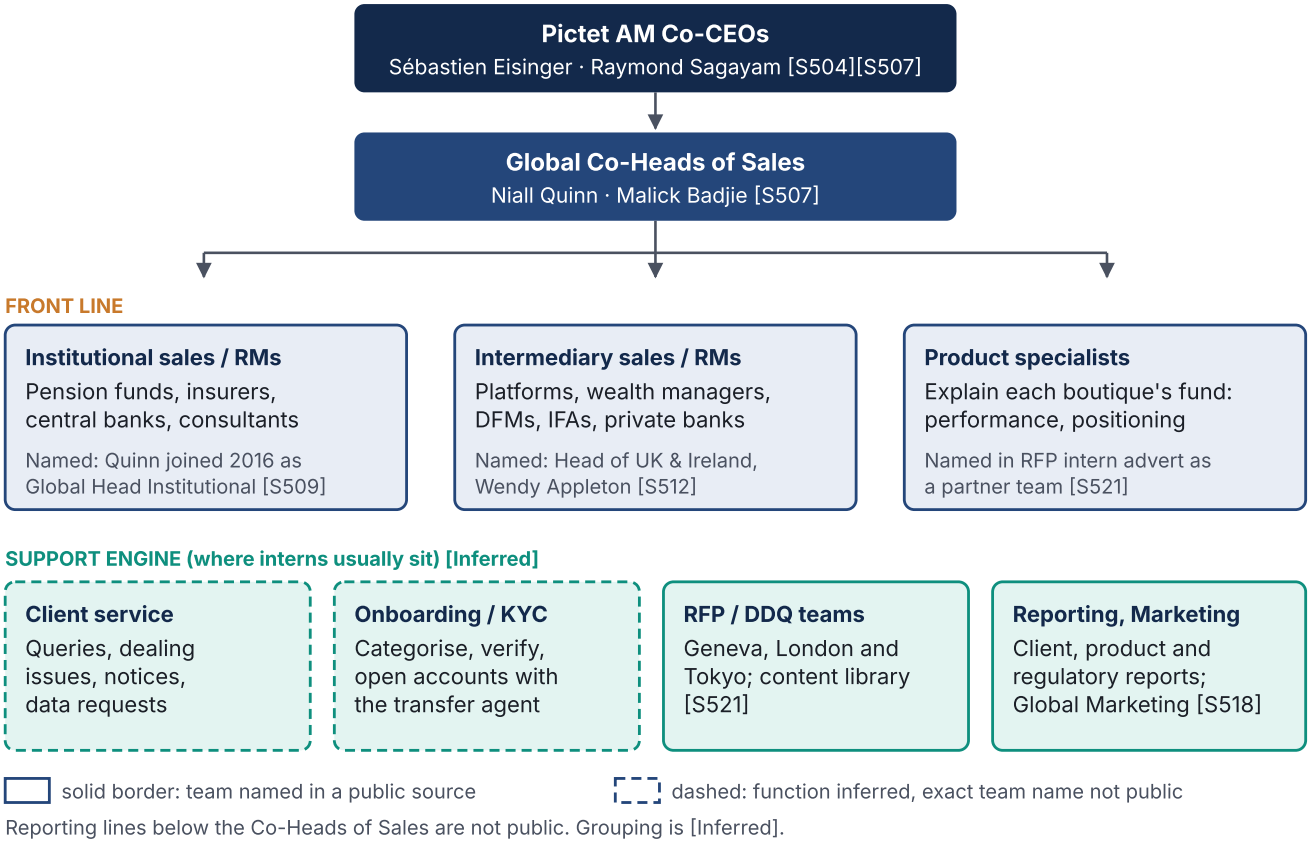

Figure 16. A map of a UCITS manager's client group, as far as public sources show it. Names and the top two layers are sourced. The split into front line and support engine, and the exact reporting lines, are inferred. Sources: Pictet AM [S504]; finews [S507]; Pictet contacts [S512]; Pictet job adverts [S518, S521], as of October 2026.

What each box does

- **Sales / relationship managers (RMs):** own a list of clients and prospects, bring in new money and keep existing money, split by client type and region. Evidence: the Co-Heads of Sales, the Head of UK & Ireland, and a UK intermediaries role covering "wealth managers, asset managers and intermediaries" [S507, S512, S513] REPORTED.
- **Client service:** the day-to-day desk for existing clients: dealing problems, statements, notices, data and documents. The London office houses "client services teams looking after institutions, intermediaries and their clients" [S510] REPORTED.
- **Product specialists:** investment-literate people attached to a strategy who explain performance and sign off technical answers. The RFP intern advert says to "coordinate with product specialists and investment managers" [S521] REPORTED.
- **RFP / consultant relations and marketing:** answer RFPs and DDQs from "central banks, pension funds, insurers and distributors" with "a project management approach", keep the content library current, and support "Global Marketing" [S521] REPORTED.
- **Onboarding / KYC:** check who the client is and whether they may buy, then open the account. At group level, Banque Pictet's AML onboarding team risk-rates files as PEP, High, Medium or Low and checks FATCA and CRS [S523] REPORTED; the asset-management version is INFERRED.
- **Client reporting:** produces "investment, marketing, product and regulatory reports for clients and investors", runs data quality checks and builds automation, with VBA, SQL, Tableau and Python preferred [S518] REPORTED.

Where the client group sits in the machine

The client group is a hub. It does not hold the money, price the fund, approve documents or pick stocks. It connects the people who do. The figure shows the six counterparties and what flows along each line.

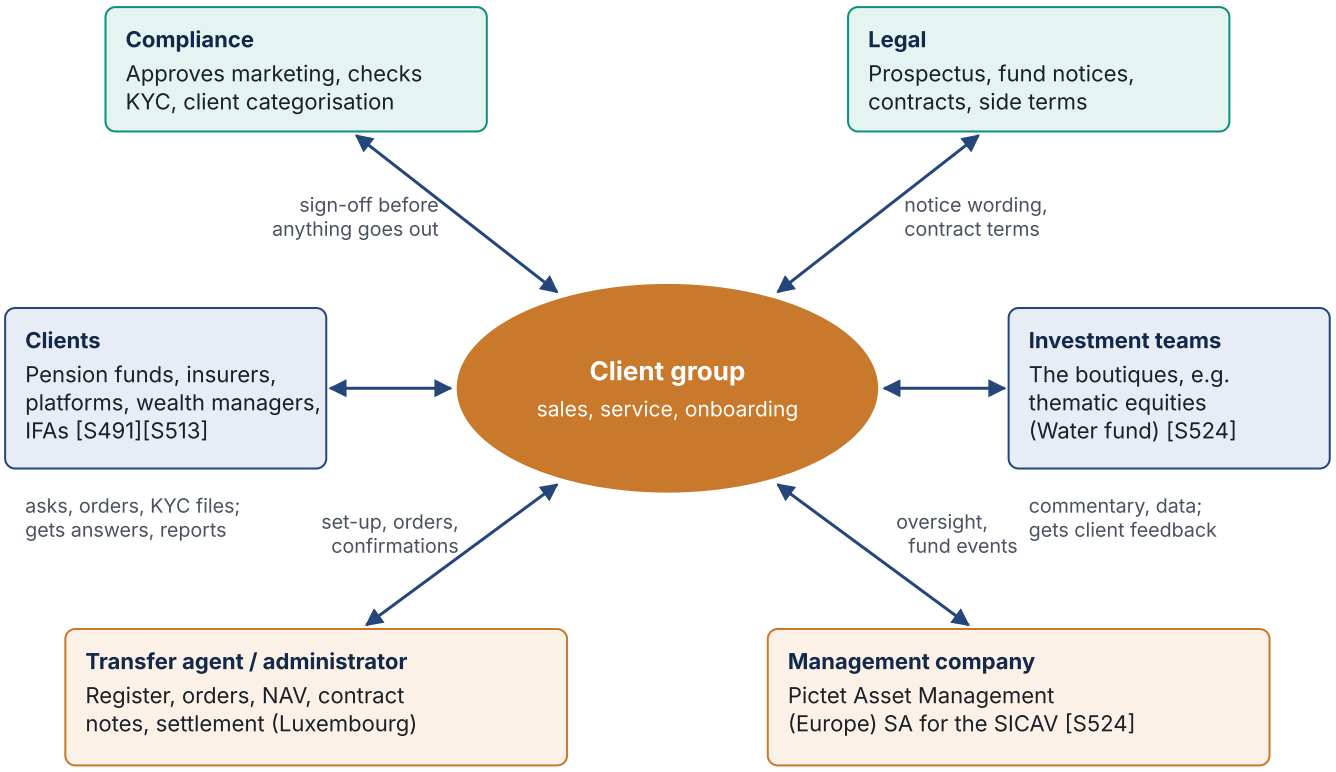

Figure 17. The client group as a hub. Every client request ends up touching at least one of the six counterparties. Notice that the client group owns the relationship but almost none of the answers: its skill is routing and checking. Sources: client types [S491, S513]; management company [S524]; roles of compliance, legal and transfer agent (standard industry structure) INFERRED. TA identity not found [Gap].

WHAT THE WORK REALLY IS

Sitting in a client group means learning who owns which answer. A performance question goes to a product specialist. A missing trade goes to the transfer agent. A request for marketing material goes through compliance. A change to fund terms is a legal notice from the board. The junior's job is to log the request, send it to the right owner, check the answer is accurate and approved, and close the loop with the client INFERRED.

HOW IT TRANSFERS TO KKR KCS

KCS is organised on the same three layers. KKR's own description: "Relationship managers in direct outreach to clients; Product specialists providing specific support and expertise; Junior resources serving in a generalist capacity" (KKR KCS team description, candidate brief). The live London analyst posting lists the same routing job: "Collaborating with various internal divisions globally to answer client requests (Product teams, Investment teams, Operations, Finance, Legal, Compliance, Risk)" [S140] CONFIRMED. And KKR's Client and Product Services team (CAPS) in Dublin and New York answers RFPs and DDQs, the equivalent of Pictet's RFP teams [S146] CONFIRMED.

SAY IT IN ONE LINE

"At Pictet I learned that a client group owns the relationship but not the answers, so the core skill is knowing which of product, operations, compliance or legal owns each question and getting it back to the client accurately and fast, which is exactly the generalist role KKR describes for juniors in KCS."

2. Client onboarding, start to finish

Onboarding is everything that happens between "this client wants to invest" and "this client's first order is accepted". At a UCITS manager it has six questions, asked in a fixed order: **Who is the client legally? Are they who they say they are, and are they clean? What may they buy? What must we give them to read? Where do they deal? Is the data right?** Each question has a rule behind it. This section takes them one at a time.

The whole pipeline on one page

Here is the whole thing first: a seven-stage pipeline in which each stage hands one artefact to the next. The steps below then take the hard ones in turn. Interns in client groups commonly sit at stages 3 to 6: chasing documents, checking forms are complete, and tracking the account at the transfer agent INFERRED.

	Stage	What happens	Output	Owner
1	**Qualify**	RM confirms interest, client type and the fund wanted; logs it in CRM	CRM opportunity	Sales / RM
2	**Categorise**	Retail, per se or elective professional, or ECP (COBS 3)	Category on file [S543]	Compliance
3	**KYC / AML**	Identity, UBO, PEP and sanctions screens, source of funds, FATCA/CRS	Risk rating, Low to PEP [S523]	AML team
4	**Eligibility**	Match the client to a share class and to the fund's target market	Class, e.g. I dy GBP [S526]	Client group
5	**Documents**	Prospectus, KIID or KID (CCI from 2026), application form, terms	Signed application [S544]	Client group, legal
6	**Account set-up**	TA opens the account: dealing contacts, bank, settlement details	Account no., dealing instructions	Transfer agent
7	**First deal**	First order before the cut-off; check the contract note; hand over	Contract note; servicing starts	Client service

Where onboarding usually stalls [Inferred]

Missing ownership documents for the UBO chain · unsigned or outdated forms · unclear tax status · wrong ISIN or share class on the application · dealing contact not yet authorised at the TA

Figure 18. The onboarding pipeline, seven stages. Each stage produces one artefact the next stage needs; a gap anywhere stops the first trade. Sources: categorisation [S543]; risk levels [S523]; class example [S526]; documents [S544]; stage order, owners and bottlenecks INFERRED from standard UCITS distribution practice.

Step 1. Client categorisation: retail, professional or eligible counterparty

UK rules sort every client into one of three boxes. The rulebook is the FCA Handbook's Conduct of Business Sourcebook, chapter 3 (COBS 3), which copies the EU's MiFID II categories [S543] CONFIRMED. The box decides how much protection the client gets, which share classes and documents they can access, and which rules the firm must follow when dealing with them INFERRED.

- **Retail client:** the default. Everyone who is not shown to be something else. Maximum protection: full disclosure documents, suitability or appropriateness checks, Consumer Duty INFERRED.
- **Professional client, "per se":** automatically professional because of what they are. COBS 3.5 lists credit institutions, investment firms, insurers, collective investment schemes, pension funds and large undertakings among others [S543] CONFIRMED.
- **Professional client, "elective":** a retail client who asks to be treated as professional and passes the tests. The firm must run a qualitative test (does the client have the expertise, experience and knowledge?) and, for MiFID business, the client must meet two of three quantitative tests: about 10 significant trades per quarter over the previous four quarters; a portfolio over EUR 500,000; or at least one year working in the financial sector in a relevant role [S543] CONFIRMED.
- **Eligible counterparty (ECP):** the top tier, for certain financial institutions in certain kinds of business such as order execution. Fewest protections, because both sides are professionals (from the COBS structure in S543) INFERRED.

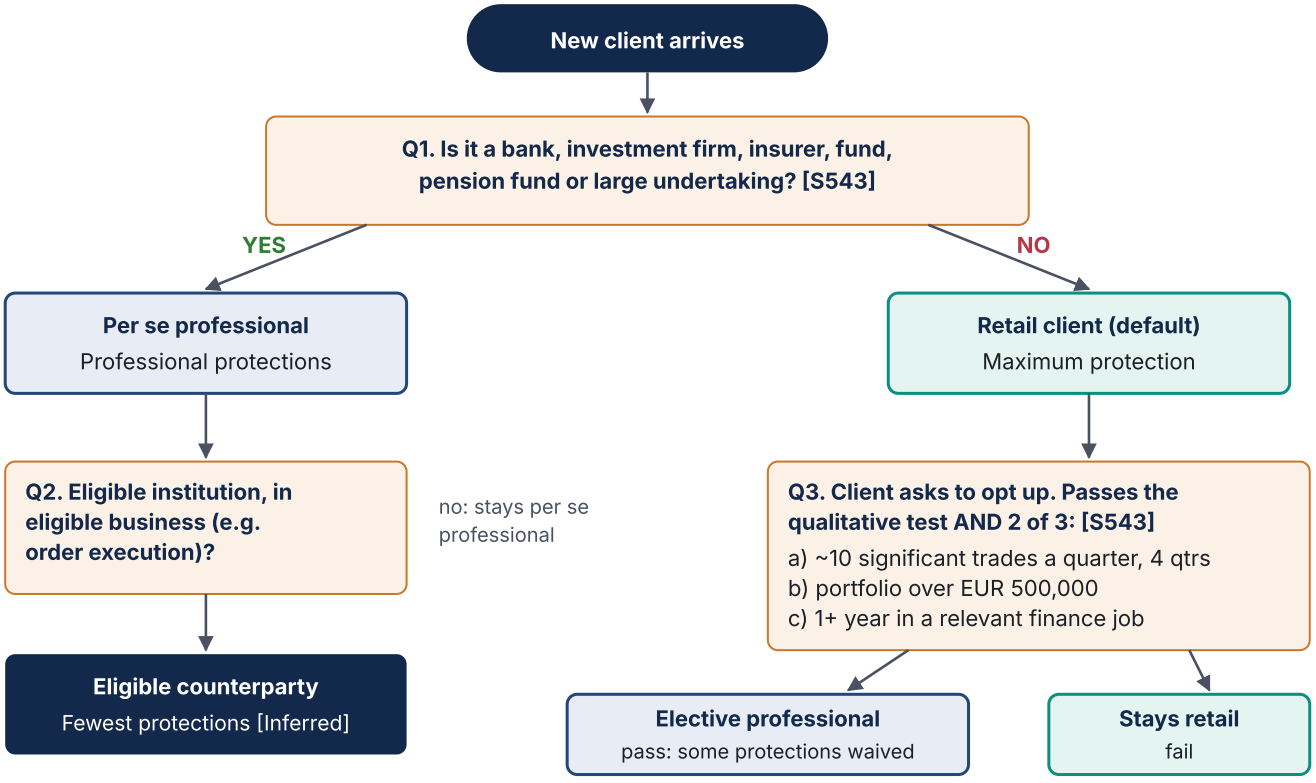

Figure 19. The categorisation decision tree. Two routes lead to "professional": being a certain kind of institution (per se), or a retail client opting up and passing the tests (elective). Source: FCA Handbook COBS 3.5 [S543], accessed October 2026. Eligible counterparty detail simplified INFERRED.

WHY CATEGORISATION COMES FIRST

Everything downstream depends on the box. A retail client must get a retail disclosure document and can only buy share classes open to retail. A pension fund (per se professional) can access institutional classes. The categorisation is recorded on the client file, and if it is wrong, every later step is wrong too INFERRED. In a client group, you meet this as a field in the onboarding form or the CRM, and as a question you must answer before anyone sends a factsheet INFERRED.

Step 2. KYC and anti-money-laundering checks

KYC ("know your customer") means proving who the client is, who ultimately owns or controls it, where its money comes from, and how risky it is. **AML** (anti-money laundering) is the law that requires it. Pictet's own group shows both the process and the penalty for getting it wrong.

- **The process.** A July 2026 advert for Banque Pictet's AML onboarding team describes analysing account-opening files by risk level (PEP, High, Medium, Low), checking tax items (FATCA and CRS) and drafting summaries for committees, under the Swiss AML Act and FINMA's AML Ordinance [S523] REPORTED. A Pictet Asset Services relationship role asks staff to "evaluate end client compliance and tax profiles and ensure document completion" [S522] REPORTED.
- **The penalty.** On 17 June 2025 the Swiss Office of the Attorney General fined Banque Pictet CHF 2m in a money-laundering case linked to Petrobras ("Lava Jato"). It said the bank failed to classify the relevant accounts as high risk and failed to properly monitor 54 transfers. A former relationship manager received a six-month suspended sentence [S498] CONFIRMED. That is a client-facing employee personally sanctioned over a risk rating.

KEY TERMS

PEP (politically exposed person): someone with a prominent public role, or their close family and associates. Higher bribery and corruption risk, so extra checks (standard definition) INFERRED. **UBO (ultimate beneficial owner):** the real person who ultimately owns or controls a company client, found by tracing the ownership chain INFERRED. **FATCA:** the US rule requiring financial firms to report US persons' accounts. **CRS (Common Reporting Standard):** the OECD equivalent for many countries. Both mean collecting a tax self-certification at onboarding (standard definitions; named as checks in S523) INFERRED.

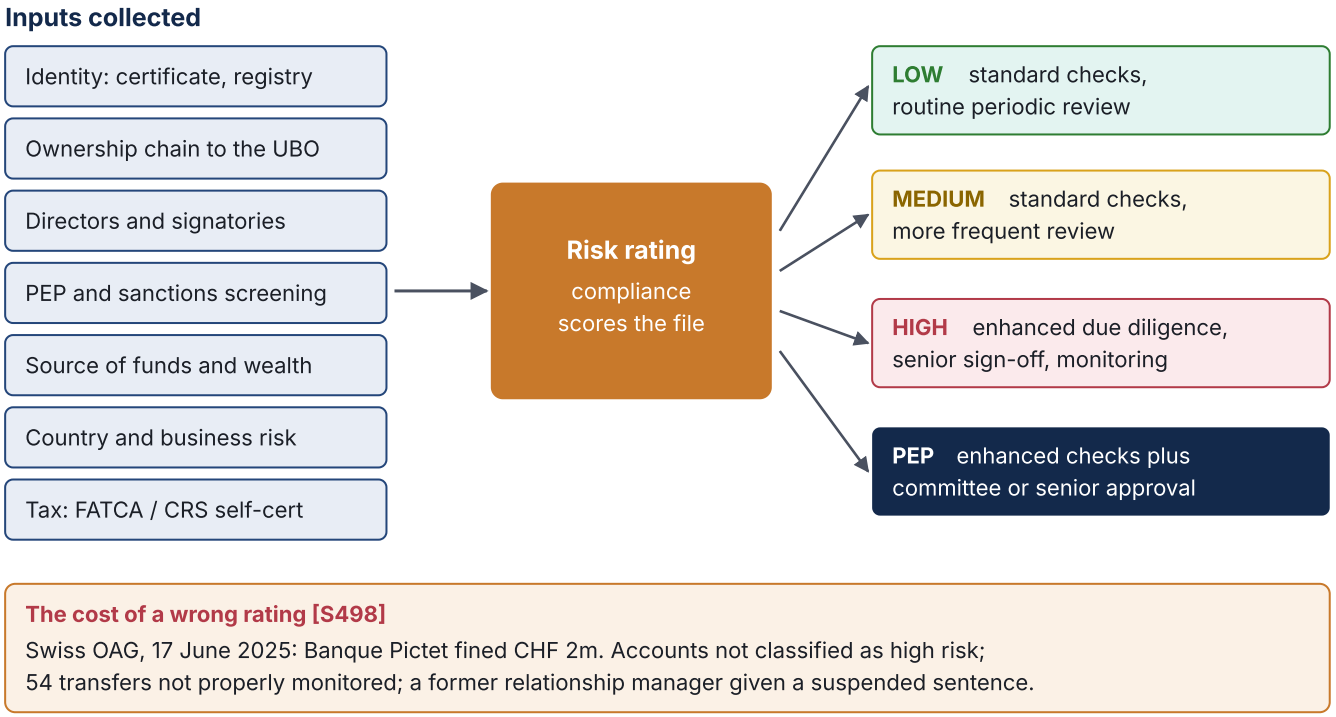

Figure 20. How a KYC file becomes a risk rating. The four rating levels are the ones named in Pictet's own AML onboarding advert [S523]. What each level triggers is the standard risk-based approach INFERRED; Pictet's exact review intervals are not public. Penalty: Swiss Office of the Attorney General [S498], 17 June 2025.

For an asset manager selling through intermediaries, there is a twist. When a platform or wealth manager invests, the fund's register usually shows the intermediary, not the thousands of savers behind it. The manager does KYC on the intermediary (is it regulated, who owns it, is it on a sanctions list?) and relies on the intermediary's own KYC for its end clients INFERRED. That is why onboarding a platform is a firm-level exercise: regulatory status, ownership, signatories, dealing contacts and bank details, rather than passports of individual savers INFERRED.

Step 3. What may they buy? Share classes and eligibility

One fund, many share classes. A share class is a different "wrapper" around the same portfolio, with its own fees, currency, minimum and income treatment (standard definition) INFERRED. Pictet's fund names encode the class in letters. Read one from left to right:

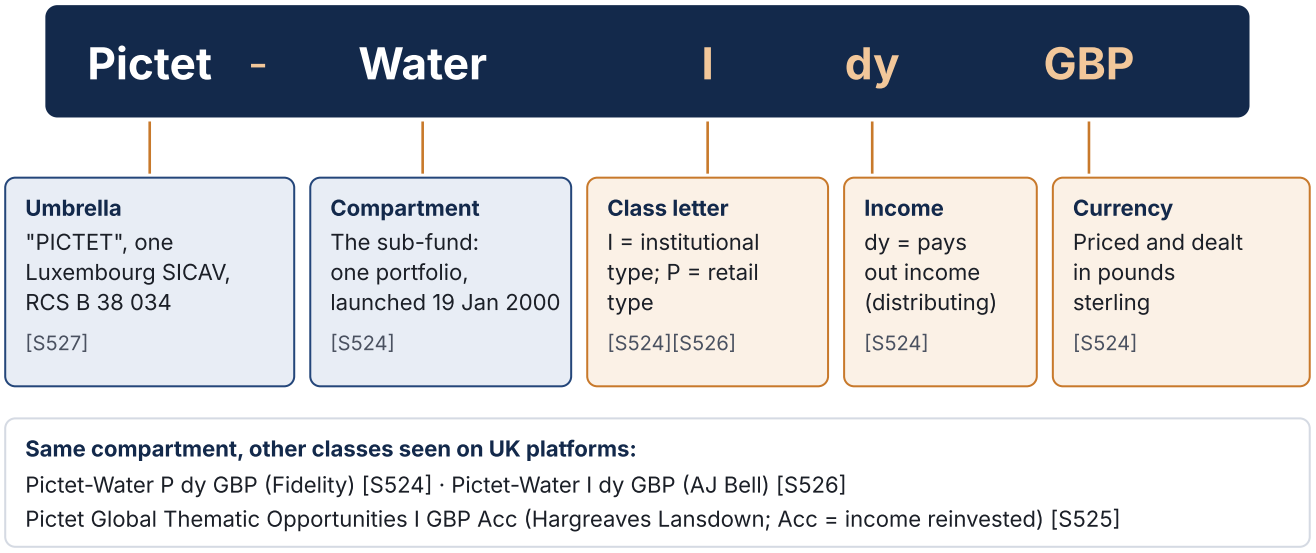

Figure 21. Reading a Pictet share class name. The portfolio is set by the compartment; everything to its right changes only fees, eligibility, income treatment and currency. Sources: Pictet SICAV notice **[S527]**; Fidelity **[S524]**, AJ Bell **[S526]**, Hargreaves Lansdown **[S525]**, data as of October 2026. Minimum investments per class are in the prospectus, which was not read [Gap].

Retail, clean and institutional classes. A "retail" class is built for individual savers, often with a higher fee. A "clean" class is the usual term for a class with no commission to the distributor built into the fee: the platform or adviser charges the client separately. An "institutional" class has the lowest fee and a high minimum, meant for large investors (general industry usage; the research files do not cover Pictet's own class terms) INFERRED. One observation from the sourced data: AJ Bell and Hargreaves Lansdown list Pictet's **I** classes for their retail customers [S525, S526] CONFIRMED, and AJ Bell's target market data for Pictet-Water I dy GBP says the class is open to retail clients [S526] CONFIRMED. The likely reading is that the platform aggregates many savers and meets the institutional class's terms on their behalf INFERRED. The exact minimums and eligibility conditions for each Pictet class sit in the prospectus, which was not read for this guide [Gap]. Never quote a minimum you have not checked.

SOURCE UNCERTAIN

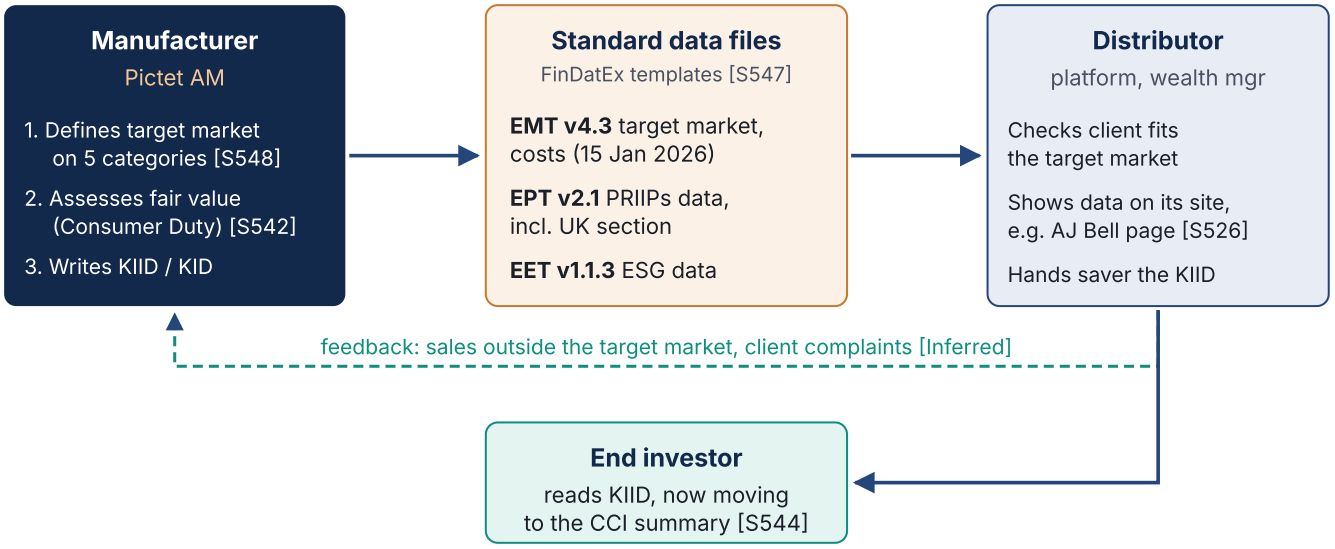

The meaning of each Pictet class letter beyond "P" (retail-type) and "I" (institutional-type) is not established from the sources read, and neither are the minimums. If you saw a share class table during your internship, trust what you saw over this guide, and describe it in general terms unless it is public.

Step 4. What must they read? Target market, EMT and disclosure documents

Before a fund can be sold, two sets of information must flow down the chain from the manager (the "manufacturer") to the distributor (platform, wealth manager, bank) and on to the saver.

First, product governance data. Under MiFID II, manufacturers define a **target market** for each product along five categories: client type, knowledge and experience, financial situation (ability to bear losses), risk tolerance, and objectives and needs (including sustainability preferences) [S548] REPORTED. The industry sends this in a standard spreadsheet format set by FinDatEx: the **EMT** (European MiFID Template, version 4.3 dated 15 January 2026) carries target market and costs; the **EPT** (European PRIIPs Template, version 2.1, with a UK section) carries the data behind the KID; the **EET** (European ESG Template, version 1.1.3 dated 10 April 2026) carries sustainability data [S547] CONFIRMED.

Second, the disclosure document the saver actually reads. For a UCITS sold to UK retail this has been the two-page UCITS KIID (Key Investor Information Document); for other packaged products, the PRIIPs KID (Key Information Document) [S544] REPORTED. That is now changing (see the timeline below).

Where the client group comes in: answering distributor questions about these files, chasing missing fields, explaining the numbers [Inferred].

Figure 22. The product information chain. Product facts flow down from manufacturer to saver in standard files; problems flow back up. Sources: FinDatEx template versions [S547]; target market categories [S548]; Consumer Duty [S542]; CCI [S544]; AJ Bell example [S526]; as of October 2026.

The UK rules are changing right now: CCI and the Overseas Funds Regime

Consumer Composite Investments (CCI). FCA policy statement PS25/20, published 8 December 2025, replaces both the UCITS KIID and the PRIIPs KID in the UK with a new "Product Summary Document". The rules start on 6 April 2026; the UK UCITS exemption expires on 31 December 2026; firms must have moved over by 8 June 2027. The risk indicator moves to a scale of 1 to 10, ongoing costs are shown as one headline figure, and core data is to be supplied in machine-readable form such as the EMT and EPT [S544, S545] REPORTED. So from April 2026 to June 2027, client groups handle two document regimes at once INFERRED.

The Overseas Funds Regime (OFR). Pictet's UK-sold funds are mostly Luxembourg UCITS [S524, S526] CONFIRMED. After Brexit, an EU fund needs UK permission to be marketed to UK retail investors. In January 2024 the UK found EEA UCITS (excluding money market funds) equivalent under the OFR. Funds move from the Temporary Marketing Permissions Regime (TMPR) into the OFR in FCA "landing slots", and the TMPR was extended to the end of 2026 [S546] CONFIRMED. This is the legal route by which a Luxembourg Pictet fund appears on a UK platform INFERRED.

Figure 23. The UK retail fund rulebook, 2018 to 2027. The shaded band is the transition, when KIIDs and the new CCI Product Summary run side by side; if your internship fell in it, you may have seen both. Sources: FCA PS25/20 via Broadridge and Simmons & Simmons **[S544, S545]**; HM Treasury and FCA OFR roadmap **[S546]**; Consumer Duty dates **[S308]**; as of October 2026; landing slot timetable may have moved.

Worked example: a wealth manager onboards into Pictet-Water

Illustrative scenario. "Firm W" is a fictional UK discretionary wealth manager. It runs model portfolios for private clients and wants to add Pictet-Water to its adventurous models through the I dy GBP class. Every firm-specific detail below is invented to show the mechanics; every rule and every Pictet-Water data point is sourced.

#	Stage	What happens for Firm W (illustrative)	Rule or real data
1	Qualify	The RM meets Firm W's fund selector, who likes the water theme for a growth model. The RM logs an opportunity in the CRM: client, fund, class, expected size, next step.	CRM practice INFERRED
2	Categorise	Firm W is an FCA-authorised investment firm, so it is a **per se professional**. Its own clients may be retail, but Pictet's direct client is Firm W.	COBS 3.5 [S543] CONFIRMED
3	KYC / AML	Check Firm W's FCA authorisation, its ownership chain up to the UBOs, its directors and signatories, sanctions and adverse media screens, and its tax status. Rated Low (illustrative).	Risk levels PEP / High / Medium / Low [S523] REPORTED
4	Eligibility	The I dy GBP target market: retail, professional and ECP all "Yes"; knowledge basic, experienced and advanced all "Yes"; risk indicator SRRI 5; objective growth; recommended holding period 5 years; available for "portfolio management". Firm W's adventurous model, with a long horizon, fits.	AJ Bell EMT data for Pictet-Water I dy GBP [S526] CONFIRMED
5	Documents	Firm W receives the prospectus, the KIID (with the CCI Product Summary coming), and the EMT, EPT and EET data files for its own systems. It signs the application form.	FinDatEx templates [S547]; CCI [S544]
6	Account set-up	The transfer agent opens an account for Firm W, records authorised dealers, bank details for settlement, and the dealing route.	Process INFERRED ; TA identity [Gap]
7	First deal	Firm W sends its first subscription before the dealing cut-off. The client group checks the contract note matches the order, then hands the account to client service.	Cut-off and settlement rules [S527], see section 3

WHAT TO NOTICE IN THE EXAMPLE

Three different "clients" appear: Pictet's legal client (Firm W, a professional), Firm W's end clients (probably retail), and the platform or custodian that may hold the units. Each layer has its own KYC and its own suitability duty. Being able to say "the manager does KYC on the intermediary and relies on the intermediary for its underlying clients" shows you understood the structure, not just the paperwork INFERRED.

WHAT THE WORK REALLY IS

Onboarding is a chain of six legal questions, each with its own rulebook: categorisation (COBS 3), identity and risk (AML law), eligibility (prospectus and target market), disclosure (KIID, KID, now CCI), market access (OFR) and account set-up (the transfer agent). The visible task is chasing forms. The real skill is knowing which question each form answers, so you can tell the client exactly what is missing and why it matters INFERRED.

HOW IT TRANSFERS TO KKR KCS

The KKR London KCS analyst posting lists "Partnering with clients to help with KYC & investment onboarding" as a core task [S140] CONFIRMED. The eligibility question is sharper at KKR. K-PEC, KKR's evergreen private equity vehicle, is sold by "a continuous private offering of our Shares on a monthly basis" only to US accredited investors (under Regulation D) and non-US persons (under Regulation S) [S420] CONFIRMED. A US individual is "accredited" with income over $200,000 ($300,000 joint) in each of the last two years, or net worth over $1m excluding the home [S314] CONFIRMED. So the COBS 3 decision tree you learned has a direct cousin: the accredited-investor check in KKR's subscription documents (the forms an investor completes to buy into a private fund) INFERRED. Share classes carry over too: K-PEC offers classes S, D, U and I with different ongoing fees [S420] CONFIRMED, and KKR's real estate vehicle KREST sets a $10,000 minimum for S, D and U and $1,000,000 for I [S424] CONFIRMED.

SAY IT IN ONE LINE

"Onboarding at Pictet taught me that every form answers a legal question, who the client is, what they may buy and what they must be told, and KKR's private funds ask the same questions more strictly, through accredited-investor checks and subscription documents."

3. Client servicing: dealing, reporting, queries and fund events

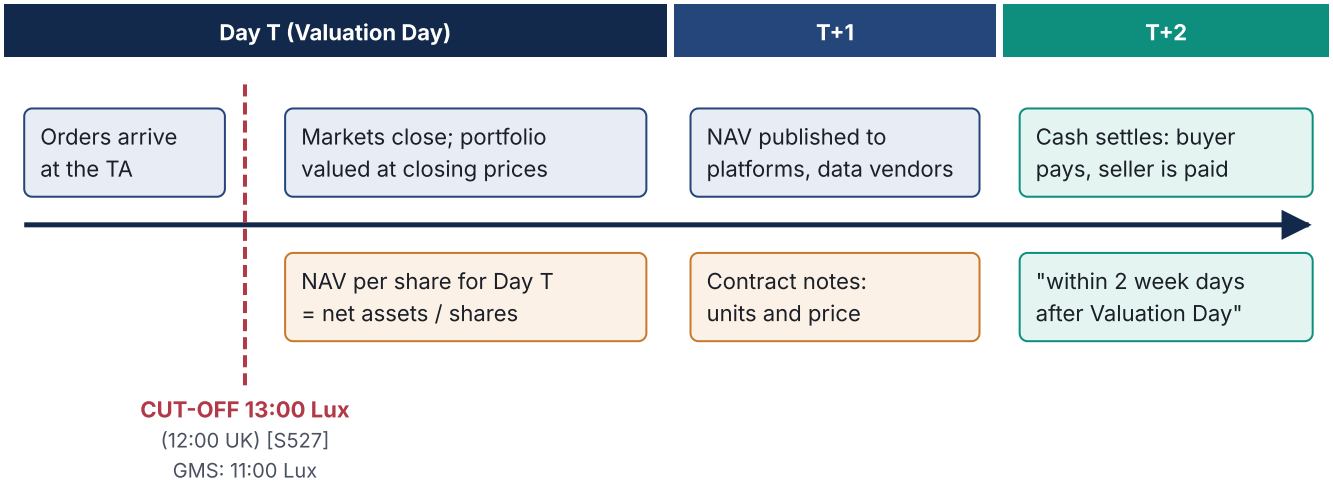

Once a client is onboarded, the client group's job becomes keeping them informed, keeping their transactions clean, and answering whatever they ask. This section explains the machinery underneath: how a UCITS deals every day, why nobody knows the price when they place an order, what goes in a factsheet, how a question travels through the firm, and the two UK value tests that shape what clients ask.

How a daily-dealing fund works

A UCITS like Pictet-Water calculates a NAV on each **Valuation Day** (normally each business day). Investors can subscribe (buy new shares, so the fund grows) or redeem (sell shares back to the fund, so it shrinks). There is no stock exchange in the middle: the fund itself creates and cancels shares at NAV (standard mechanism) INFERRED.

Three rules govern every order:

1. **Cut-off time.** Orders must reach the transfer agent before a fixed time. A July 2018 Pictet notice to shareholders moved many compartments to a **1:00 pm Luxembourg time** cut-off on the Valuation Day, and Pictet - Global Megatrend Selection to **11:00 am**. Hong Kong distributors had a separate 5:00 pm Hong Kong time deadline through Bank Pictet & Cie (Asia) [S527] (dated 2018) CONFIRMED. Current cut-offs are in today's prospectus, which was not read [Gap].
2. **Forward pricing.** An order placed before the cut-off is dealt at the NAV calculated *after* the cut-off, using that day's closing prices. You never know the exact price when you place the order [S527] (the mechanism is INFERRED). This stops anyone trading on yesterday's stale price after news breaks INFERRED.
3. **Settlement.** The cash moves a set number of days later. The 2018 notice moved settlement for some compartments to "within 2 week days after the Valuation Day" [S527] (dated 2018) CONFIRMED, usually written T+2.

Cut-off, settlement: Pictet notice of 13 July 2018 [S527], may have changed. T+1 timing, UK time [Inferred]. Orders after the cut-off roll to the next Valuation Day.

Figure 24. The daily dealing cycle of a Luxembourg UCITS. Everything to the left of the red line is dealt at today's NAV; everything to the right waits for the next one. Source: Pictet notice to shareholders [S527], dated 13 July 2018; T+1 publication and contract-note timing INFERRED.

Worked example: forward pricing in numbers

Use a real published price: Fidelity showed Pictet-Water P dy GBP at **GBP 415.37** on 9 October 2026 [S524] CONFIRMED. Treat it as the Valuation Day NAV for illustration.

Order	Arrives	Dealt at	Calculation	Result
A: subscribe GBP 50,000	12:40 Lux, before cut-off	Day T NAV, 415.37	50,000 / 415.37	**120.3746 shares** (illustrative; real deals round to the class's decimal rule)
B: subscribe GBP 50,000	13:10 Lux, after cut-off	Next Valuation Day's NAV, unknown when placed	50,000 / next NAV	If next NAV were 418.00 (illustrative), 119.6172 shares
C: redeem 500 shares	11:00 Lux	Day T NAV, 415.37	500 × 415.37	**GBP 207,685**, paid around T+2 [S527]

Two lessons sit in this table. A subscription is placed in **money** and the client only learns the number of shares afterwards. A redemption is often placed in **shares** and the client only learns the cash amount afterwards INFERRED. Most dealing queries an intern sees ("why did I get fewer units than I expected?", "why did my order go in tomorrow?") come back to these two facts and the cut-off INFERRED.

WHEN DEALING STOPS

A daily-dealing fund can suspend. In February 2022 the board of Pictet - Russian Equities suspended NAV calculation and dealing [S527] REPORTED (from a separate notice found alongside it). That is the daily-dealing world's version of a "gate": the promise of daily liquidity holds only while the assets can be valued and sold INFERRED. Pictet's annual review also says it will "soft-close strategies to protect their returns" [S491] CONFIRMED, meaning it can stop new money coming into a fund that has grown too large for its market.

Fund events and notices

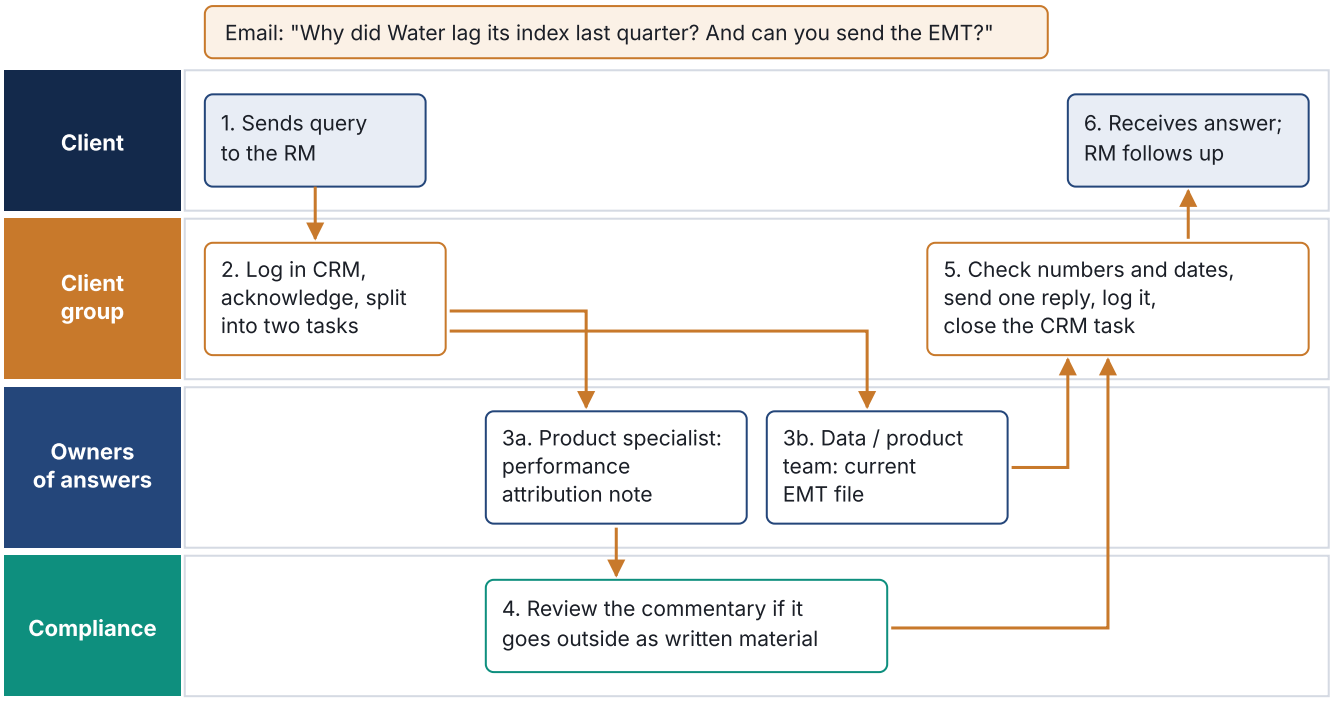

A **fund event** is any change to a fund that existing investors must be told about: a new cut-off time, a change of manager, a fee change, a soft close, a merger of two compartments, a liquidation, or a suspension. The fund's board decides; legal drafts a formal **notice to shareholders**; the client group's job is to make sure every affected client and distributor receives it, understands it and gets answers to their questions before the effective date INFERRED. The 13 July 2018 Pictet notice (cut-off and settlement changes) is a real example of exactly this kind of document [S527] CONFIRMED. A practical intern task in such a week is building the list of affected clients from the CRM and tracking who has acknowledged INFERRED.

Factsheets and reporting

A **factsheet** is the one- or two-page monthly summary of a fund: objective, managers, launch date, size, price, performance against benchmark, top holdings, sector and country weights, charges and risk indicator (standard content) INFERRED. Platforms republish parts of it: Fidelity's page for Pictet-Water P dy GBP shows the managers, launch date (19 January 2000), price and charges [S524] CONFIRMED, and the current managers are listed as Louis Veilleux and Ola Obanubi [S524] CONFIRMED. Behind the factsheet sits a reporting team; Pictet's London reporting internship described producing "investment, marketing, product and regulatory reports for clients and investors", working with Sales and Investment teams before client meetings, and running data quality checks [S518] REPORTED. Institutional clients usually also receive monthly or quarterly portfolio reports tailored to their mandate INFERRED.

The life of a client query

Client service is mostly questions. A good desk treats each one as a small project with an owner, a deadline and an audit trail. Here is a typical two-part query from a wealth manager, traced through the firm.

Flow and approval step [Inferred]; specialist roles [S521]; reporting checks [S518].

Figure 25. The life of a client query. One email becomes two tasks with two different owners, and the answer goes back as one checked reply. The client group touches the query at the start and the end; the value it adds is the split, the chase and the check. Sources: [S518, S521]; flow INFERRED.

Three habits separate a good query handler from an average one INFERRED: (1) acknowledge fast, even before you have the answer, with a date; (2) never forward an investment view to a client without the product specialist's words and any required approval; (3) close the loop in the CRM, so the next person who speaks to the client knows what was said.

Data requests: the EMT in practice, using Pictet-Water

Distributors ask for data constantly: costs, target market, ESG fields, holdings. The most common request at a UCITS manager is "please send the latest EMT" INFERRED. The best way to understand an EMT is to read a real one. AJ Bell publishes the EMT target market for **Pictet-Water I dy GBP**, and every value in the figure below comes from that page [S526] CONFIRMED.

Pictet-Water I dy GBP: target market and value data, as shown by AJ Bell [S526]

1. Client type

Retail	Yes
Professional	Yes
Eligible counterparty	Yes

2. Knowledge and experience

Basic	Yes
Experienced	Yes
Advanced	Yes

3 and 4. Risk

Risk indicator (SRRI) **5 of 7**

Ability to bear losses: not captured in the page as read [Gap]

5. Objectives and needs

Primary objective	**Growth**
Recommended holding period	**5 years**

Channels: execution-only, non-advised, portfolio management, advice: all available

Consumer Duty fair value

Fair value assessment	**Completed**
Review date	**30 Apr 2026**

"Product expected to provide fair value for reasonably foreseeable period"

How to read it as a distributor

A broad target market (all client types, all knowledge levels, all channels) with a growth objective, a 5-year horizon and a high-ish risk score: suitable for long-term growth money, not for short-term cash [Inferred].

Figure 26. A real EMT, decoded. The five MiFID II target market categories [S548] mapped onto the data AJ Bell publishes for Pictet-Water I dy GBP. Source: AJ Bell target market page [S526], accessed 11 October 2026. The SRRI scale is 1 to 7 INFERRED; under the new UK CCI regime it moves to 1 to 10 [S544].

Consumer Duty fair value and the Assessment of Value

Two UK tests decide whether a fund is "worth the money". Clients and distributors ask about both, so the client group needs to know which applies.

Consumer Duty. The FCA's consumer principle reads: "A firm must act to deliver good outcomes for retail customers" [S542] CONFIRMED. It applied to open products from 31 July 2023 and closed products from 31 July 2024 [S308] CONFIRMED. Manufacturers must assess whether each product offers fair value and pass that assessment down to distributors, which is why the AJ Bell page shows "fair value assessment completed" with a review date [S526] CONFIRMED. The pass-down mechanism is INFERRED.

The consumer principle [S542]
"A firm must act to deliver good outcomes for retail customers."

THREE CROSS-CUTTING RULES (how you behave)

- **Act in good faith**
- **Avoid foreseeable harm**
- **Enable customers**

FOUR OUTCOMES (what you must evidence)

- **Products and services** — target market fit
- **Price and value** — fair value assessment
- **Consumer understanding** — clear documents
- **Consumer support** — answer queries well

Where a client group touches each: target market data (EMT), fair value field, KIID/CCI documents, query handling. Mapping of client-group tasks to outcomes is [Inferred].

Figure 27. The Consumer Duty in one picture. One principle, three rules about behaviour, four outcomes a firm must be able to prove. The fourth outcome, consumer support, is the formal name for good client servicing. Source: FCA, About the Consumer Duty [S542], page dated 24 February 2026.

Assessment of Value (AoV). UK authorised fund managers must publish an annual value assessment against seven criteria: quality of service, performance, AFM costs, economies of scale, comparable market rates, comparable services, and classes of units [S549] REPORTED. The FCA found in August 2023 that reports had "significantly improved", but that some independent directors "did not provide sufficient challenge" [S541] CONFIRMED. The key point for Pictet: its UK-sold funds are mostly Luxembourg UCITS, not UK authorised funds, so the AoV rule does not apply to them; the Consumer Duty fair value assessment is the test that matters INFERRED (supported by [S555]). Knowing which value test applies to which fund is a small fact that shows real understanding.

The same servicing job, on a private markets product

The dealing cycle you learned is the best possible starting point for understanding KKR's evergreen funds, because they deliberately borrow some of it and break the rest. The figure compares the two side by side.

	Pictet-Water (Luxembourg UCITS)	KKR K-PEC (evergreen PE)
Who may buy	Retail, professional and ECP (target market) [S526]	US accredited investors (Reg D) and non-US persons (Reg S) [S420]
Price	Daily NAV, forward priced [S527]	Monthly NAV; buy at prior month-end NAV [S420]
How often you can buy	Every Valuation Day, before the cut-off [S527]	Monthly, "continuous private offering" [S420]
How often you can sell	Every Valuation Day; cash within 2 week days [S527]	Quarterly repurchase offers, at the Board's discretion [S420]
Limits on selling	None normally; suspension possible (2022 example) [S527]	Up to 5% of NAV a quarter; 5% fee if sold within 24 months [S420]
What sits inside	Listed shares of water-related companies [S506]	Controlling stakes in private companies, no market price [S420]

Figure 28. Daily dealing versus evergreen private equity. Same vocabulary (NAV, subscription, redemption, share class), very different promises. Explaining the right-hand column clearly before a client invests is the KCS version of client servicing. Sources: Pictet SICAV notice [S527], AJ Bell [S526], Pictet AM [S506]; K-PEC 10-K [S420] and 2026 repurchase schedule [S551], as of 31 Dec 2025 and 2026.

WHAT THE WORK REALLY IS

Client servicing at a UCITS manager is three systems running every day: the dealing system (cut-off, forward-priced NAV, settlement), the information system (factsheets, reports, EMT and other data files, fund notices) and the question system (log, route, check, reply, close). Each has a rulebook behind it: the prospectus, MiFID II product governance and the Consumer Duty. An intern who can explain why an order missed today's price, what an EMT field means, and which value test applies to a Luxembourg fund has learned the technical core INFERRED.

HOW IT TRANSFERS TO KKR KCS

KKR's London KCS analyst role includes "Managing a variety of reporting requirements for investors" and "Ongoing servicing of existing clients including delivering investment updates in meetings" [S140] CONFIRMED. On the wealth side, the dealing mechanics are a slower version of what you know: K-PEC subscribers buy at the prior month-end "Transactional Net Asset Value" (a subscription accepted on 1 September is priced at the 31 August NAV), and the fund "intends but is not obligated to conduct quarterly repurchases for up to 5.0% of the aggregate NAV per calendar quarter" [S420, S551] CONFIRMED. Pictet's own Laurent Ramsey put the servicing risk in one line: "you need to be careful when making something illiquid liquid" [S536] REPORTED. On the institutional side, the ILPA Reporting Template v2.0 applies to funds from Q1 2026 [S318] CONFIRMED, the private markets cousin of a standard factsheet.

SAY IT IN ONE LINE

"At Pictet I saw how a daily-dealing fund handles cut-offs, forward pricing and data requests; KKR's evergreen funds such as K-PEC use the same NAV and share-class language with monthly pricing and a 5% quarterly repurchase limit, and explaining that difference clearly is exactly the kind of servicing I want to do in KCS."

4. Relationship management: CRM, meetings, coverage, pipeline and the thematic pitch

Servicing keeps existing clients happy. Relationship management decides which clients the firm spends time on, what it says to them, and how new money arrives. Juniors do not run relationships, but they build the materials and records that relationships run on INFERRED.

Coverage models: who looks after whom

A **coverage model** is the rule for which salesperson covers which client. Pictet's public titles show two cuts: by **client type** (Niall Quinn joined in 2016 as "Global Head of Institutional Business (excluding Japan)" [S509] CONFIRMED; a 2017 appointment covered "UK intermediaries" [S513] REPORTED) and by **region** (Head of UK & Ireland [S512]; Head of Sales Europe [S507] CONFIRMED). Within a region, firms commonly tier clients: a few strategic relationships get a senior RM and regular meetings with fund managers; a long tail is served by a smaller team, by phone and by email INFERRED. The ETF hire in 2026 [S559] REPORTED shows a third cut: by **product channel**, because ETFs are bought differently from mutual funds INFERRED.

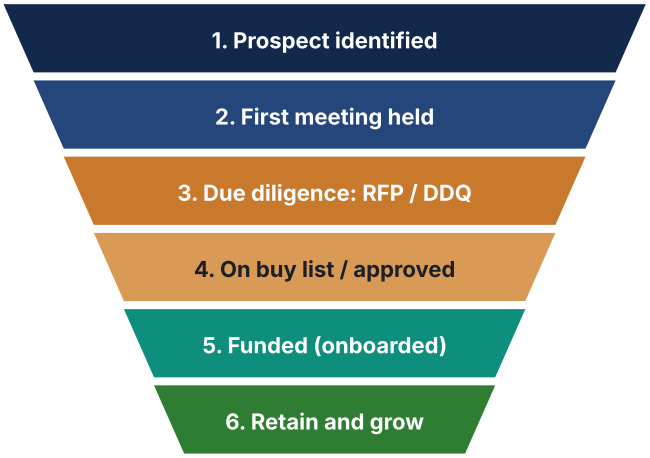

A. Coverage grid (illustrative)

	Institutional	Intermediary
Strategic	Senior RM, PMs quarterly	RM + product specialist
Core	RM, half-yearly review	RM, regular updates
Long tail	Client service desk	Inside sales, email, webinars

Cells illustrative [Inferred]. Columns follow Pictet titles [S509][S512][S513].

Pictet's actual tiering and pipeline stages are not public [Gap].

B. Sales pipeline stages (illustrative)

Each CRM opportunity carries a stage, an expected size, a probability and a next action [Inferred]. RFP stage: [S521].

Figure 29. Coverage and pipeline, the two maps a sales team runs on. The grid says who covers whom; the funnel says where each piece of new business is. Column headings follow real Pictet titles [S509, S512, S513]; the RFP and DDQ stage follows Pictet's RFP team description [S521]; everything else is illustrative INFERRED.

CRM hygiene: the record is the relationship

A **CRM** (customer relationship management system) is the database of every client, contact, meeting, call, opportunity and open query. Which CRM Pictet AM uses is not public [Gap], so on your CV name it only if you used it. "Hygiene" means the data is complete, current and consistent, so that anyone picking up the relationship tomorrow knows exactly where it stands INFERRED.

CRM field group	What good looks like	Why it matters
Organisation	Legal name, type (pension, platform, DFM), client category, region, coverage RM	Drives categorisation, coverage and reporting INFERRED
Contacts	Current people and roles; leavers marked; consent for marketing recorded	Fund selectors move firms; stale contacts lose relationships INFERRED
Holdings and flows	Funds and classes held, size, recent subscriptions and redemptions	Spot a client reducing before they leave INFERRED
Interactions	Every meeting and call: date, attendees, what was said, follow-ups	The audit trail of what the firm told the client INFERRED
Opportunities	Fund, class, size, stage, probability, next step and date	Feeds the pipeline report management reads INFERRED
Onboarding / KYC status	Documents received, risk rating, review date	No trade before the file is complete [S523] REPORTED

Meeting preparation: the briefing pack

Before an RM meets a client, someone builds a **briefing pack**. Pictet's reporting team says it works "with Sales and Investment teams before client meetings" [S518] REPORTED. A typical pack has six parts INFERRED: (1) who is attending and their roles; (2) what the client holds with us and recent flows; (3) notes from the last meeting and open follow-ups; (4) performance of their funds against benchmark and peers, with a short explanation from the product specialist; (5) relevant news (for Pictet in 2026: new hires such as Badjie [S507], the European AI-enhanced ETFs launched 1 July 2026 [S539]); (6) the objective of the meeting and the one ask. After the meeting, the notes and follow-ups go into the CRM the same day INFERRED.

Fund selectors, buy lists and ratings

Most intermediary money is controlled by a **fund selector**: an analyst at a wealth manager, platform or private bank who decides which external funds go on the firm's approved "buy list" INFERRED. Selectors typically judge people, process, performance and price, and look at independent fund research ratings alongside their own work (general industry practice; no specific rating for Pictet funds is in the research files) INFERRED. The visible end of this process is the platform listing: Hargreaves Lansdown lists Pictet Global Thematic Opportunities (I GBP Acc), managed by Hans Peter Portner, Gertjan van der Geer and Jan Andreas Maager in Geneva, as eligible for ISAs and SIPPs [S525] CONFIRMED. Institutional money has its own gatekeepers, the investment consultants, who run RFPs; Pictet's RFP team answers requests from "central banks, pension funds, insurers and distributors" [S521] REPORTED.

How a thematic fund is pitched: Pictet's franchise

Thematic equities are Pictet AM's best-known franchise. It reports about USD 70bn in thematic equities across 16 strategies built on 14 themes, with more than 70 dedicated investment professionals (31 March 2025), and claims to be "the largest active thematic fund provider by AUM globally" (Broadridge, end June 2025) [S505] (Pictet's own claim) CONFIRMED. Its thematic strategies date back to the 1990s [S504, S506] CONFIRMED, Pictet-Water launched on 19 January 2000 [S524] CONFIRMED, and Pictet says "We were among the very first investment managers to offer a thematic strategy dedicated to the water theme" [S506] CONFIRMED. Each theme has an advisory board of "industry leaders and academics" [S506] CONFIRMED, and the house tracks 21 megatrends [S537] CONFIRMED.

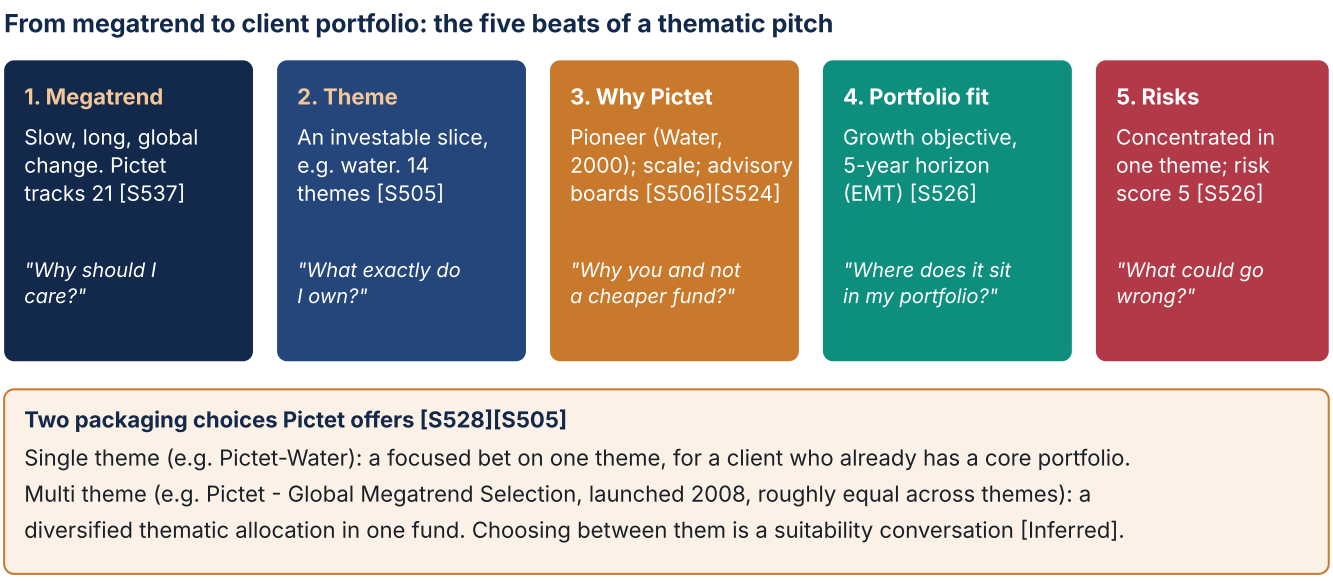

Figure 30. The structure of a thematic pitch. Each beat answers the client's next question. The facts in each beat are Pictet's own **[S505, S506, S524, S537]** or EMT data **[S526]**; the five-beat structure is INFERRED. Pictet - Global Megatrend Selection launch date reported as late 2008 **[S528]**.

WHAT THE WORK REALLY IS

Relationship management is information management with a human face. The coverage grid decides who talks to whom; the CRM records what was said; the pipeline tracks where new money is; the briefing pack makes each meeting count; and the pitch turns a fund into an answer to the client's next question. The junior's leverage is accuracy and preparation: an RM walking in with the right holdings, the right numbers and last meeting's promises remembered INFERRED.

HOW IT TRANSFERS TO KKR KCS

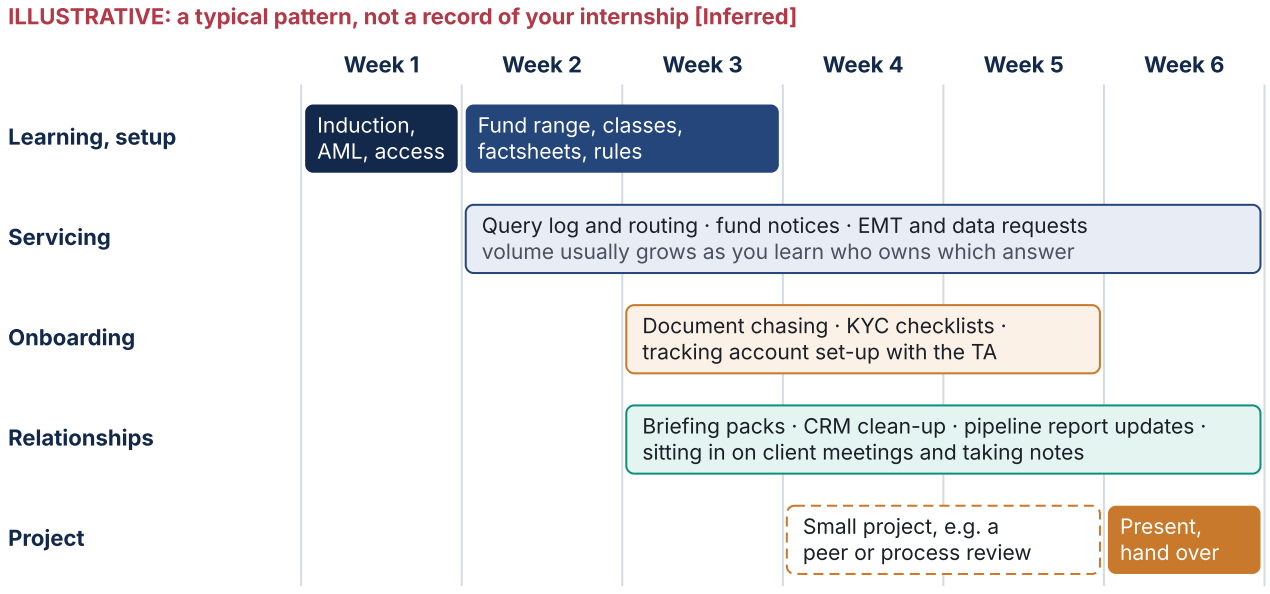

KKR asks for these exact habits. A KKR Global Wealth Solutions posting requires "Proficiency in CRM systems (Salesforce)" and "meeting/call notes in CRM" [S103] CONFIRMED. KKR's Frankfurt KCS intern is asked to "Maintain information on the DACH budgets and pipeline" and to "Coordinate responses to client due diligence requests/RFPs, including underlying portfolio statistics, marketing materials and presentation decks" [S141] CONFIRMED. The London analyst supports "Relationship Managers in fundraising activities" [S140] CONFIRMED. KKR's Credit team works "with the internal CAPS team to complete tenders/Due Diligence Questionnaires" [S106] CONFIRMED; institutional DDQs often follow the ILPA DDQ 2.0 format (November 2021) [S320] REPORTED. And the thematic pitch transfers in shape: KKR's wealth clients also need "why this, why now, why KKR, where does it fit, what could go wrong", for a private product with a 5% quarterly repurchase limit [S420]; that structure is INFERRED.

SAY IT IN ONE LINE

"Pictet showed me that a relationship runs on preparation and records, a briefing pack before every meeting and a clean CRM after it, and KKR asks KCS juniors for exactly that, from Salesforce notes to pipeline tracking and DDQ responses with the CAPS team."

5. A realistic six-week map, and what you probably learned

The map below is **illustrative**. It shows how a six-week client-group placement at a UCITS manager commonly unfolds: a week of induction, then a widening set of support tasks, then a small project. It is built from the team functions in section 1, not from your diary. Overlay your real weeks on it before you write anything.

Lanes follow the functions in section 1. Timing and tasks are illustrative; replace with what you actually did.

Figure 31. An illustrative six-week client-group placement. Induction first, servicing from week two, onboarding and relationship support layered in, a small project to finish. Pattern INFERRED from the team functions in section 1 [S510, S518, S521, S523]; it is not a record of the candidate's internship.

The honest checklist: tick only what you did or clearly saw

Use three marks. **D** = I did this myself. **S** = I saw it done or helped someone do it. **N** = not part of my internship. Only D and S items go into your answer, and S items must be described as "supported" or "observed".

#	Skill or concept	Explained in	D / S / N	Your evidence [slot]
1	Explain retail, per se professional, elective professional and ECP	Section 2	☐	[a client file or form you saw]
2	List the documents in a KYC file and why each is needed	Section 2	☐	[client type you onboarded or saw]
3	Explain how a risk rating is set and what "PEP" triggers	Section 2	☐	[only general terms if confidential]
4	Read a share class name and say who can buy it	Section 2	☐	[funds and classes you worked on]
5	Explain target market, the EMT and why distributors need it	Sections 2 and 3	☐	[a data request you handled]
6	Say what the KIID is and what the CCI regime changes	Section 2	☐	[did you see a KIID or CCI work?]
7	Explain cut-off, forward pricing and T+2 settlement	Section 3	☐	[a dealing query you saw]
8	Track an account opening with a transfer agent	Section 2	☐	[number of accounts, if you can say]
9	Log, route and close a client query	Section 3	☐	[query types and volume]
10	Distribute or track a fund notice or fund event	Section 3	☐	[type of event, if public]
11	Explain Consumer Duty fair value versus Assessment of Value	Section 3	☐	[where you met it]
12	Build or update a meeting briefing pack	Section 4	☐	[meeting type, client type]
13	Clean or update CRM records	Section 4	☐	[records, fields, the system's name]
14	Update a pipeline or activity report	Section 4	☐	[what the report showed]
15	Help on an RFP or DDQ section	Sections 1 and 4	☐	[which section, which client type]
16	Pitch a thematic fund in five beats	Section 4	☐	[which theme you know best]

WHAT THE WORK REALLY IS

Six weeks is short. Nobody expects you to have run a relationship. What makes the internship valuable is that you saw the whole distribution machine of a large asset manager from the inside: rules, documents, systems and people. If you can tick D or S on half the list and explain each item from zero, you understand more about how money reaches a fund than most applicants INFERRED.

HOW IT TRANSFERS TO KKR KCS

Hold the checklist against the KKR London KCS analyst posting: reporting for investors, supporting RMs in fundraising, KYC and investment onboarding, answering client requests across Product, Investment, Operations, Finance, Legal, Compliance and Risk, and servicing existing clients [S140] CONFIRMED. Items 1 to 3 and 8 map to onboarding; 5 to 7 and 9 to 11 to servicing and reporting; 12 to 16 to fundraising support. Every D or S tick is one line of evidence for KCS.

SAY IT IN ONE LINE

"In six weeks I saw the whole distribution chain of a large fund manager, from client categorisation and KYC to dealing, reporting and meeting preparation, and those are the same building blocks KKR lists for its London KCS analysts."

6. The bullet builder: CV lines, STAR stories and the three-levels-deep test

KKR's question is "What previous internship experience do you have that will be useful for this internship?" A strong answer has three layers: a CV bullet that names a real task, a short story that proves it, and enough technical understanding to survive follow-up questions. Interviewers who hear a claim tend to dig: first *what*, then *how and why*, then *so what for us* INFERRED. The figure shows the two tools this section uses: an honest verb scale and the question ladder.

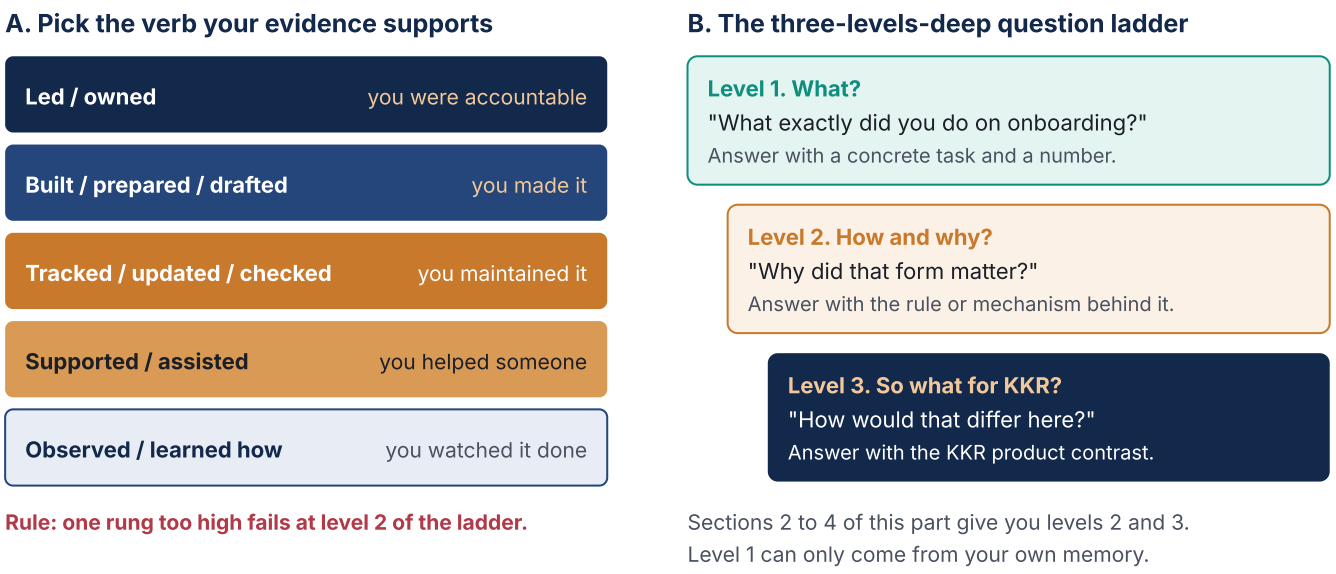

Figure 32. Two tools for honest, deep answers. Left: choose the verb your evidence supports. Right: every claim gets tested three times, and each level needs a different kind of knowledge. Structure INFERRED.

THE HONESTY RULE, IN PRACTICE

Every bullet and story below is a **Template: keep only if true**. Fill each [slot] with a real detail or delete the line. Do not add numbers you did not count, client names you may not share, or systems you did not use. If a detail is confidential, describe it in general terms ("a UK wealth manager", "a few dozen queries") rather than inventing a public-sounding version. Pictet's own careers page warns applicants to make sure their CV and cover letter "genuinely reflect who you are, especially if you used AI to produce your first draft" [S515] CONFIRMED; KKR interviewers will apply the same test.

A. Client servicing

Servicing: CV bullet and STAR scaffold — **TEMPLATE: KEEP ONLY IF TRUE**

CV BULLET [Handled / Supported] [number or "a steady flow of"] client and distributor queries on [funds or range, e.g. thematic equity funds], routing each to [product specialists / operations / the transfer agent] and [sending / drafting] checked replies within [timeframe]; [one outcome, e.g. built a tracker that cut open items from X to Y].

SITUATION [Week], [client type, e.g. a UK platform] asked [the question, in general terms].

TASK I was asked to [log it / find the answer / draft the reply] by [deadline].

ACTION (1) [How you split or classified it]; (2) [who you went to, and why them]; (3) [how you checked the answer: numbers, dates, approval].

RESULT [What the client received and when]; [what you learned, e.g. that most dealing queries come back to the cut-off].

Level	Likely question	How to answer from real experience
1. What	"What kinds of queries came in?"	Name two or three real types (dealing, documents, data, performance) and a rough share of each, only if you noticed it.
2. How, why	"A client says their order went in at the wrong price. What happened?"	Explain cut-off and forward pricing: orders before the cut-off deal at that day's NAV, later orders at the next; the client cannot know the price in advance [S527].
3. So what	"How is that different for our evergreen funds?"	K-PEC prices subscriptions at the prior month-end NAV and offers quarterly repurchases of up to 5% of NAV at the Board's discretion, with a 5% early repurchase fee inside 24 months [S420, S551]. Liquidity has to be explained before the client invests, not after.

B. Client onboarding

Onboarding: CV bullet and STAR scaffold — **TEMPLATE: KEEP ONLY IF TRUE**

CV BULLET [Supported / Coordinated] onboarding of [number] [institutional / intermediary] clients into Pictet's Luxembourg UCITS funds: [collected KYC documents / checked client categorisation and share class eligibility / tracked account opening with the transfer agent], [one outcome, e.g. all accounts live before first trade date].

SITUATION [Client type] was due to make a first investment by [date], but [what was missing].

TASK Get the file complete without [delaying the trade / bothering the client twice].

ACTION (1) [Checklist you used or built]; (2) [the specific gap, e.g. UBO documents, tax self-certification]; (3) [how you worked with compliance or the TA].

RESULT [Account opened on X / first deal placed]; [what you learned about why the rule exists].

Level	Likely question	How to answer from real experience
1. What	"What was in a typical onboarding file?"	List the real items you handled; group them by question: who is the client, are they clean, what may they buy, what must they read.
2. How, why	"Why does KYC on a platform look different from KYC on a person?"	The manager's client is the intermediary, a per se professional [S543]; it does KYC on the firm and relies on the firm's KYC for its own clients INFERRED. Add the risk levels (PEP, High, Medium, Low) [S523] and why ratings matter, citing the 2025 Swiss case only as a public example [S498].

Level	Likely question	How to answer from real experience
3. So what	"What changes when an investor subscribes to a KKR private fund?"	Eligibility is stricter: K-PEC is offered only to US accredited investors and non-US persons [S420]; a US individual qualifies with $200,000 income ($300,000 joint) or $1m net worth excluding the home [S314]. The subscription documents carry that check. The London KCS role names "KYC & investment onboarding" directly [S140].

C. Relationship management and CRM

Relationship management: CV bullet and STAR scaffold — **TEMPLATE: KEEP ONLY IF TRUE**

CV BULLET [Prepared / Supported] [number] client meeting briefing packs for [RMs covering UK wealth managers / institutional clients], combining [holdings, performance, last meeting notes, news]; [updated / cleaned] [number] CRM records and the weekly pipeline report.

SITUATION An RM had a [review / first] meeting with [client type] on [day], and [what made it tricky, e.g. recent underperformance].

TASK Build the pack by [deadline] so the RM could [the meeting objective].

ACTION (1) [Where you pulled holdings and history from]; (2) [how you got the performance explanation from the product specialist]; (3) [how you logged the follow-ups afterwards].

RESULT [What the RM used; any follow-up]; [what you learned about preparation].

Level	Likely question	How to answer from real experience
1. What	"What did you put in a briefing pack?"	Describe the real sections you built. If you did not build one, say you saw them and describe the parts you noticed.
2. How, why	"How would you spot a relationship at risk from the CRM?"	Falling holdings or redemptions, fewer meetings, open queries unanswered, a key contact leaving, the fund removed from a buy list INFERRED. Then say which of these you actually saw tracked.
3. So what	"How would you use that in KCS?"	KKR asks for "meeting/call notes in CRM" in Salesforce [S103] and pipeline tracking for its Frankfurt intern [S141]; the same discipline supports RMs whose clients commit for years, not days INFERRED.

PUTTING IT TOGETHER FOR THE APPLICATION ANSWER

Pick the **one** task family where you have the most D ticks, lead with it in one sentence, prove it with one concrete detail, then add one sentence on the mechanism you understood and one on how it maps to KCS. Example skeleton (**Template: keep only if true**): "At Pictet Asset Management I spent six weeks in [team name], where I [verb] [task] for [client type]. [One concrete detail]. It taught me [mechanism, e.g. how cut-offs and forward pricing drive most client queries]. KCS does the same work on private markets products, [one KKR link, e.g. monthly NAVs and quarterly repurchase limits on K-PEC], which is where I want to build on it." (K-PEC facts: [S420].)

WHAT THE WORK REALLY IS

The bullet builder turns three task families into evidence: servicing (log, route, check, reply), onboarding (categorise, verify, match, document, open) and relationship management (prepare, record, track, pitch). Each has a mechanism underneath. Interviewers do not reward the size of the claim; they reward a small, true claim explained three levels deep INFERRED.

HOW IT TRANSFERS TO KKR KCS

Each ladder ends at a KKR fact: K-PEC's monthly pricing and 5% quarterly repurchases [S420, S551]; the accredited-investor test [S314]; the London KCS analyst's "KYC & investment onboarding" and investor reporting duties [S140]; DDQs with the CAPS team [S106, S146]; Salesforce notes [S103]. Level 3 is where you show you have already started thinking like a KCS junior.

SAY IT IN ONE LINE

"My Pictet internship gave me a small but real set of tasks in servicing, onboarding and client relationships, and I can explain the rule behind each one and how it changes for KKR's private markets funds."

PART 3

The bridge: from Pictet's client group to KKR Client Solutions

Same job family, different product. This part lays the two firms side by side, then walks every bridge a client-group intern can cross: product, onboarding, servicing, relationship and culture, with the gaps stated honestly.

You spent about six weeks in the client group (the candidate's team name) at Pictet Asset Management in London, the team that services, onboards and manages relationships with clients. KKR's question asks what in that experience will be useful in KKR Global Client Solutions (KCS). The honest answer is not "I already know private markets". It is "I know how a client business works end to end in a daily-dealing world, and I know exactly which mechanics change when the product becomes a drawdown or evergreen private fund". This part builds that answer from structure, one bridge at a time INFERRED.

SAY THIS PLAINLY: THERE IS NO KNOWN PICTET AND KKR LINK

The research found no public evidence that Pictet distributes KKR products, that Pictet Alternative Advisors invests in KKR funds, or that the two firms have done deals together. Pictet does not publish its list of private equity managers [S535] CONFIRMED. Pictet Wealth Management's third-party fund shelf is not public, and searches of KKR wealth news and Pictet's US filings found no link [S550, S556] CONFIRMED. So never say "Pictet works with KKR". The bridge in this part is built from **structure**: similar clients, a similar client function, and a product gap that KCS exists to explain INFERRED.

1. Two client businesses, side by side

Start with the facts. Both firms sell investment products to institutions and to wealthy individuals through intermediaries. Both have a dedicated client-facing team. They differ in who owns the firm, how big it is, and above all in what the product does with the client's cash. The figure below puts eleven dimensions on one page so you can see the pattern before the detail.

Five contrasts that matter in an interview

1. **Ownership.** Pictet is a partnership in law and in name: the Managing Partners are the "significant equity owners" [S490] CONFIRMED, and a December 2024 interview reposted by Pictet described "no external shareholders, no debt and no listing" [S536] REPORTED. KKR is a listed corporation, but it keeps partnership-style economics: one P&L, one compensation pool and about 30% employee ownership [S2, S5] CONFIRMED. Its founders' special control (the Series I preferred stock) ends at the "Sunset Date", no later than 31 December 2026 [S2] CONFIRMED.
2. **Size.** KKR's $796bn of AUM [S74] is a little over twice Pictet AM's USD 354bn [S504] CONFIRMED (ratio INFERRED). But KKR's figure includes $220bn of Global Atlantic insurance assets [S175] CONFIRMED.
3. **Product.** Pictet AM's core is the open-ended, daily-dealing UCITS fund [S527] CONFIRMED. KKR's core is the closed-end drawdown fund plus, since 2023, the evergreen K-Series [S70, S73] CONFIRMED. This one difference drives almost every other difference in the client job INFERRED.

4. **Clients.** Overlap is real: pension funds, insurers, financial institutions and intermediaries appear in both firms' descriptions [S491, S70] CONFIRMED. KKR now gets 18% of its AUM from private wealth, more than from pensions (14%) [S71] CONFIRMED.
5. **Client function.** KCS has about 320 employees [S106] REPORTED. Pictet AM does not publish the size of its client-facing teams (a research gap). Both split work between people who own the relationship and specialists who answer the hard product questions: Pictet's RFP teams coordinate "with product specialists and investment managers" [S521] REPORTED; KCS has "Product specialists providing specific support and expertise" (KKR's KCS description) CONFIRMED.

WHAT THE WORK REALLY IS

In both firms the client team does the same four things: find the right clients, get them legally and operationally on board, keep them informed, and bring them back for the next product. The hard knowledge sits in the product: what the client actually owns, when cash moves and how they get out INFERRED.

HOW IT TRANSFERS TO KKR KCS

The KKR London analyst posting (EMEA Institutional Client Relations, 7 Oct 2026) lists "Managing a variety of reporting requirements for investors", "Partnering with clients to help with KYC & investment onboarding" and "Ongoing servicing of existing clients" [S101] CONFIRMED. Those are the same verbs a UCITS client group uses. The nouns change: LPs, capital calls, K-Series share classes INFERRED.

SAY IT IN ONE LINE

"Pictet and KKR serve many of the same kinds of clients; what changes is the product's clock, and I want to learn the private markets clock." INFERRED

Two client businesses, side by side

Pictet Asset Management (left) and KKR (right). Dates as shown; source IDs in brackets.

	PICTET ASSET MANAGEMENT	KKR
Founded	Geneva, 1805: "the partnership that was to become Pictet". Asset manager since 1980; in London since 1980. [S491, S510]	1 May 1976, with $120,000, by Henry Kravis, George Roberts and Jerome Kohlberg. 50th anniversary on 1 May 2026. [S13, S5]
Ownership	Partnership limited by shares (SCA) since 2014. Owned by 7 Managing Partners, plus 42 Equity Partners (Apr 2026). No listing, no external shareholders. [S490, S491, S536]	Listed on NYSE (2010); a corporation since 2018. Employees own about 30% of the stock. Founders' Series I control ends at the Sunset Date, by 31 Dec 2026. [S2, S5]
Money	Pictet AM: USD 354bn AuM (30 Jun 2026). Whole group: CHF 810bn under management or custody (30 Jun 2026). [S504, S493]	$796bn AUM (30 Jun 2026), of which $638bn fee-paying. Perpetual capital $334bn, 42% of AUM. [S74]
How it is run	Board of Managing Partners decides "by consensus", meets at least twice a month. Pictet AM calls itself a "multi-boutique" active manager. [S490, S491]	"One Firm"; "One P&L and compensation pool". A single expense pool across the asset management business lines, so teams do not bill each other. [S5, S70]
People	1,167 FTE; 405 investment professionals; 18 offices, 9 investment centres (end 2025). [S491]	5,043 employees (2,705 asset management, 1,491 insurance, 847 subsidiaries); 36 offices (31 Dec 2025). [S70]
Products	Luxembourg UCITS SICAV "PICTET": each sub-fund is a compartment (Water, Robotics, Global Megatrend Selection). Thematics about USD 70bn (Mar 2025). [S527, S505]	Drawdown funds (GII V, $19.2bn final close, Aug 2026); evergreen K-Series ($42bn, Jun 2026); co-investment; separately managed accounts. [S430, S73, S84]
Liquidity (the big gap)	Daily dealing at the next NAV (forward pricing). 1pm Luxembourg cut-off for many compartments; settlement within 2 week days for some (2018 notice). [S527]	Drawdown: no redemption; cash comes back as assets are sold (infra terms 10 to 13 years). K-PEC: monthly NAV, quarterly repurchases capped at 5% of NAV. [S2, S420]
Clients	"Pension funds, financial institutions and intermediaries". [S491] UK funds sit on Fidelity, Hargreaves Lansdown and AJ Bell. [S524, S525, S526]	Investors in 65 countries. AUM by type: GA balance sheet 22%, private wealth 18%, pensions 14%, sovereign 12%, third-party insurers 11% (Dec 2025). [S70, S71]
Client team (your bridge)	Sales led by Global Co-Heads Niall Quinn and Malick Badjie; RFP teams in Geneva, London and Tokyo. Client-group headcount is not public. [S507, S521]	Global Client Solutions (KCS), formed 2009: about 320 employees (Feb 2026); 232 listed at Principal and above, 19 of them in London. [S103, S106, S80]
Leaders	Co-CEOs Sébastien Eisinger and Raymond Sagayam, both Managing Partners. Sagayam is the 47th Managing Partner in the firm's history. [S504, S507, S501]	Co-CEOs Joe Bae and Scott Nuttall since Oct 2021; Kravis and Roberts are Co-Executive Chairmen. KCS is led by Eric Mogelof, ex PIMCO. [S10, S79]
UK entity and rules	Pictet Asset Management Limited, Moor House, London Wall; FCA authorised. UCITS, MiFID II, Consumer Duty, Overseas Funds Regime. [S510, S511, S542, S546]	Kohlberg Kravis Roberts & Co. Partners LLP, 18 Hanover Square; FCA authorised. AIFMD and private placement, MiFID II, ELTIF rules for EEA individuals. [S23, S70]

Orange rows are where the jobs differ most (liquidity) and connect most (the client team). Pictet AM figures in CHF or USD as published.

Figure 33. Pictet AM and KKR on one page. Read across each row. The client team row is your bridge; the liquidity row is the gap you must learn. Sources: Pictet Annual Report and Review 2025 **[S490, S491]**, Pictet H1 2026 release **[S493]**, Pictet AM site **[S504]**; KKR 10-K FY2025 **[S2, S70]**, Q2 2026 release **[S74]**, proxy deck **[S5]**, KCS postings **[S103, S106]**, kkr.com directory **[S80]**. As of 30 Jun 2026 unless stated.

2. The product bridge: three clocks for the same money

A product, technically, is a set of rules about cash: when it goes in, at what price, what it costs each year, and when and how it comes out. Every client conversation you had at Pictet sat on top of one set of rules, the UCITS rules. KCS sits on top of two other sets: the **drawdown** rules and the **evergreen** rules. The next figure shows the three as clocks that tick at different speeds.

KEY TERMS

UCITS: the EU's regulated open-ended fund format for the general public; Pictet's Luxembourg funds are UCITS [S524] CONFIRMED . **NAV (net asset value)**: the fund's assets minus its debts, divided by the number of shares; the price you deal at. **Forward pricing**: you place an order now and deal at the next NAV, which nobody knows yet [S527] INFERRED . **Drawdown fund**: investors promise ("commit") money now; the manager asks for it ("calls" it) over several years as it finds deals INFERRED . **Evergreen fund**: no end date; investors subscribe periodically at NAV and can ask for limited repurchases [S70] CONFIRMED .

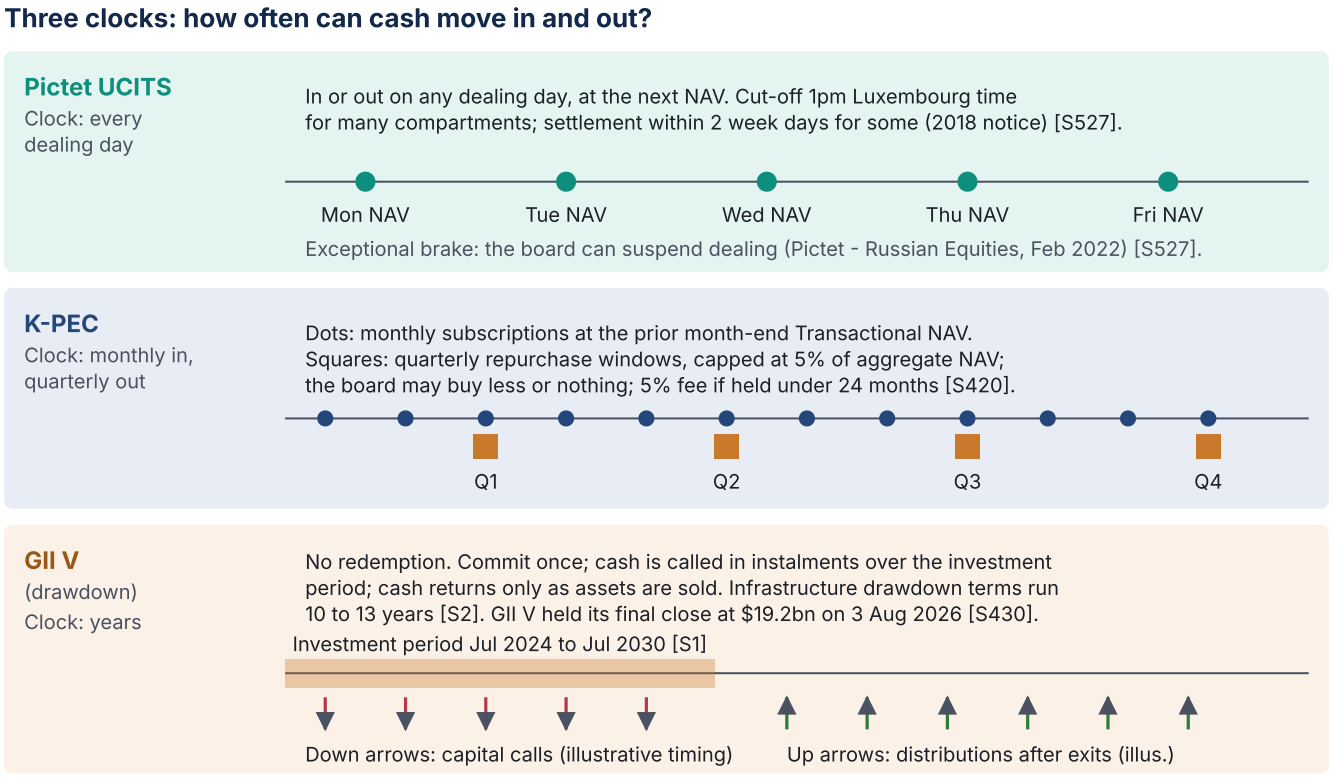

Figure 34. The same client's cash on three clocks. Each lane has its own time scale: days, months, years. Pictet dealing terms are from a July 2018 shareholder notice and may have changed [S527]; K-PEC terms from its FY2025 10-K [S420]; GII V dates from KKR's Q2 2026 vehicle table [S1] and close release [S430]. Arrow timing in the bottom lane is illustrative.

Forward pricing at Pictet, and its cousin at K-PEC

At Pictet you learned that a client never buys "2,500 shares at today's price". The client sends an amount of money before the cut-off, and the transfer agent (the firm that keeps the fund's register of shareholders) works out the share count after the next NAV is struck. Miss the cut-off by five minutes and the order rolls to the next Valuation Day [S527] CONFIRMED (cut-off rule; the mechanics are INFERRED). K-PEC

works on the same principle with a monthly clock: "An investor subscribes a dollar amount and only learns the share count afterwards", and a subscription accepted on 1 September is priced at the 31 August Transactional NAV [S420] CONFIRMED. The figure below puts the two side by side.

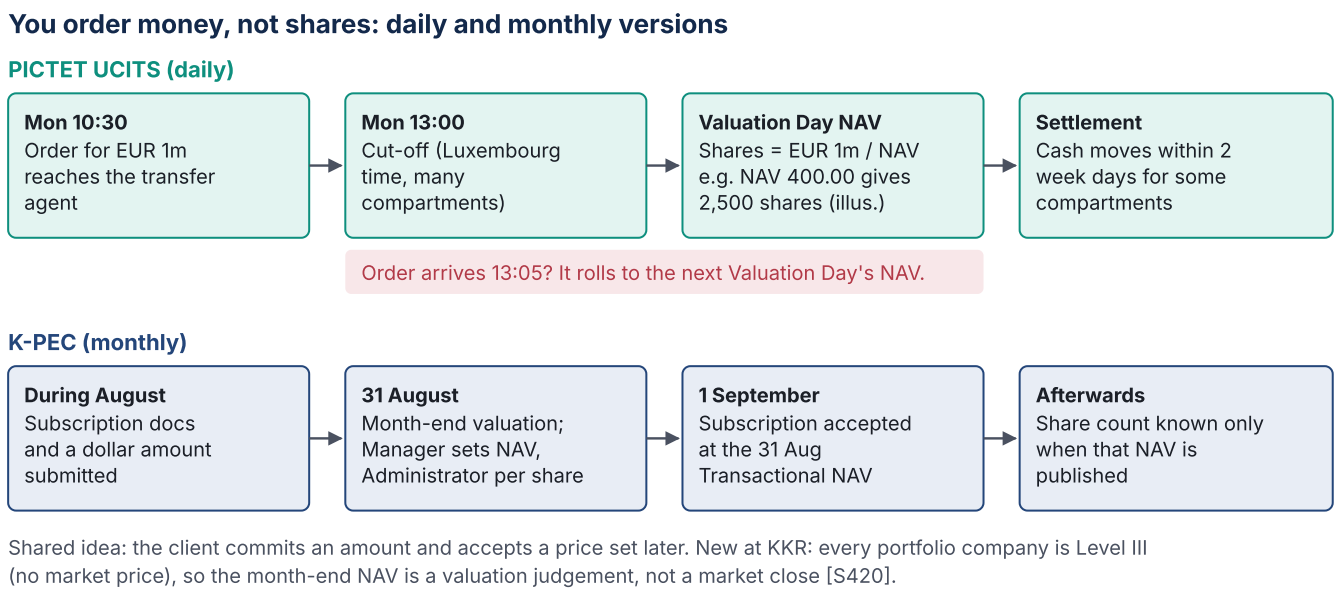

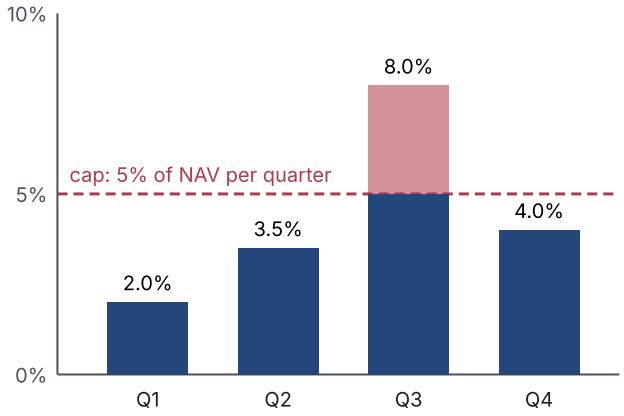

Figure 35. Forward pricing, daily and monthly. Notice that the logic you used at Pictet (order an amount, deal at a price you do not yet know) carries straight across. What changes is the source of the price. Sources: Pictet SICAV notice to shareholders, 13 Jul 2018 [S527]; K-PEC 10-K, 26 Mar 2026 [S420]. The NAV of 400.00 is illustrative.

Liquidity tools: from suspension to the 5% cap

A UCITS promises daily dealing, so its main emergency tool is a suspension. Pictet's board suspended NAV calculation and dealing in Pictet - Russian Equities in February 2022 [S527] REPORTED. K-PEC builds the brake into normal life. Repurchases are quarterly and capped at "no more than 5.0% of our aggregate NAV ... per calendar quarter"; the board can buy back less or nothing; shares redeemed within 24 months pay a 5.0% Early Repurchase Fee, kept by the fund for the remaining holders; if requests exceed 5%, the board may tender for the excess "at or about a 10% discount to the most recent NAV" [S420] CONFIRMED. In Europe, AIFMD II now requires open-ended alternative funds to pick at least two liquidity management tools from a list that includes gates, notice periods and redemption fees [S449] CONFIRMED. The next figure shows what the 5% cap does to one client's request.

The 5% gate in action (illustrative numbers)

Left: total repurchase requests as % of fund NAV, by quarter

Q3: 8% requested, 5% paid, so each request is filled 5/8 = 62.5%

Your client asks for EUR 1m back in Q3

Repurchased: EUR 625,000	Unfilled: 375,000

If the shares are under 24 months old, the 5% Early Repurchase Fee applies: 5% x 625,000 = EUR 31,250 kept by the fund. Cash paid out: **EUR 593,750.**

The unfilled EUR 375,000 can be resubmitted in Q4, or sold in a board-run tender for "Excess Shares" at about 10% below NAV, if the board runs one.

Reality check: K-PEC repurchased about $26.4m in 2025 against $9.9bn of NAV, roughly 0.3% for the year, well inside the cap [S420; ratio Inferred].

Figure 36. A gate is fund-level, and pro rata. The cap limits the total the fund buys back each quarter, not each investor; when requests exceed it, everyone is filled in proportion. Quarterly request levels and the EUR amounts are illustrative; the 5% cap, 5% early fee and 10% overflow discount are K-PEC terms from its FY2025 10-K [S420]. NAV assumed unchanged for simplicity.

Share classes: the same decoding skill, a different fee stack

At Pictet, a share-class name is a compressed label. On UK platforms you see "Pictet-Water P dy GBP" and "I dy GBP": "P" is a retail-type class, "I" institutional, "dy" distributing, and the suffix is the currency [S524, S526] CONFIRMED. Exact minimums sit in the prospectus, which the research did not read (research gap). K-PEC also has letters, but each letter mostly encodes **how the seller is paid**. Class S carries an upfront sales load up to 3.00% plus a 0.50% dealer-manager fee (cap 3.50%); Classes S and U pay 0.85% a year in distribution and servicing fees; D pays 0.25%; I pays none. All four pay a 1.25% management fee [S420] CONFIRMED. The figure below decodes both.

Decoding a share class: Pictet letters versus K-PEC letters

Pictet-Water I dy GBP

Pictet-Water: the compartment (sub-fund) of the Luxembourg SICAV "PICTET"; launched 19 Jan 2000 [S524, S527]

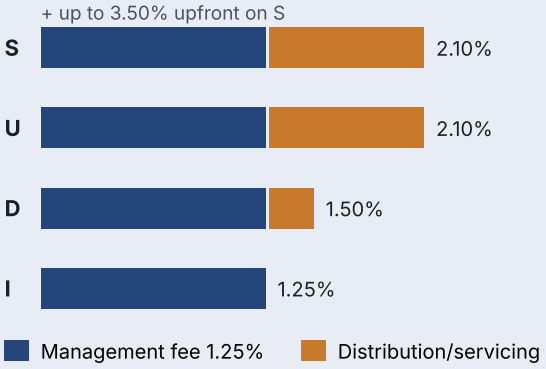

I: institutional class (P = retail-type class)

dy: distributing (pays out income)

GBP: currency of the class [S526]

P dy GBP price: GBP 415.37 on 9 Oct 2026 [S524]

K-PEC: annual fees by class, % of NAV

Plus 15% performance allocation over a 5% hurdle, high-water mark, 100% catch-up [S420]

Figure 37. Same decoding habit, different meaning. Pictet's letters tell you the client type, income treatment and currency; K-PEC's letters tell you the selling channel's economics. Sources: Fidelity UK and AJ Bell platform data for Pictet-Water [S524, S526]; Pictet SICAV notice [S527]; K-PEC 10-K FY2025 [S420]. The 10-K does not define the intended channel per class; reading S as broker-sold and D as fee-based advice follows industry convention INFERRED.

WHAT THE WORK REALLY IS

Product knowledge in a client team means knowing four rules for each product: entry (price and timing), cost (every fee layer), exit (frequency, caps, penalties) and eligibility (who may buy which class). At Pictet those rules were daily and stable. At KKR they vary by wrapper, and the client team must explain each one before money moves INFERRED.

HOW IT TRANSFERS TO KKR KCS

Matt Yates in London is "Head of EMEA Product Development and also responsible for ongoing product management of KKR's Evergreen Private Equity vehicles, K-PRIME and K-PEC" [S133] CONFIRMED. A London KCS junior supporting the evergreen range would answer exactly the dealing, class and repurchase questions above. K-PRIME is the Luxembourg twin with "similar objectives and strategies" [S111] CONFIRMED; its own dealing terms could not be verified from its documents [S429] REPORTED.

SAY IT IN ONE LINE

"At Pictet I learned to read a fund through its dealing rules; at KKR I want to learn the same discipline for monthly NAVs, 5% quarterly caps and capital calls." INFERRED

2b. Worked example: the same EUR 1m order in three wrappers

A client, say a family office already invested in a Pictet thematic fund, wants to put EUR 1m to work. Walk the order through three products. Everything marked illustrative is arithmetic for teaching, not a quoted term. Where a term is not in the research, the table says so, because inventing a minimum or a fee in front of a KCS interviewer is the fastest way to lose trust INFERRED.

Step	Pictet UCITS (e.g. Pictet-Water I dy)	K-PEC (Class I)	GII V (drawdown)
Day 1 action	Send an order for EUR 1m to the transfer agent before the cut-off [S527]	Sign subscription documents; subscribe a money amount; accepted on the 1st of a month at the prior month-end NAV [S420]	Sign the subscription agreement and partnership agreement; commit EUR 1m; no cash moves yet INFERRED
Price known?	No: next NAV (forward pricing)	No: share count known after the NAV is published [S420]	Not applicable: the client buys a promise to fund, not shares
Cash leaves	Within about 2 week days of the Valuation Day for some compartments (2018) [S527]	At subscription, in full	In capital calls over the investment period, Jul 2024 to Jul 2030 [S1]
Who may buy	Retail, professional and eligible counterparty all "Yes" in the EMT for Pictet-Water I dy GBP [S526]	US accredited investors (Reg D) and non-US persons (Reg S) [S420]	"pension plans, sovereign wealth funds, insurance companies, asset managers, private wealth platforms, and family offices" [S430]
Minimum	In the prospectus; not read (research gap)	Not in the filings: do not quote one (gap) [S420]	Not disclosed (research gap)
Ongoing cost	Ongoing charge in the fund's disclosure document; not in the research (research gap)	1.25% management fee; 15% of total return over a 5% hurdle, high-water mark, 100% catch-up; no distribution fee on Class I [S420]	GII V terms not public. KKR's 10-K range for drawdown infrastructure management fees: 0.75% to 1.50%; carry typically 10% to 20% after a 6% to 8% hurdle [S2]

Step	Pictet UCITS (e.g. Pictet-Water Idy)	K-PEC (Class I)	GII V (drawdown)
Getting out	Any dealing day at the next NAV	Quarterly; fund-level cap 5% of NAV; board discretion; 5% fee within 24 months [S420]	No redemption. Wait for distributions, or sell the stake on the secondary market (high-quality buyout interests cleared at about 90% of NAV in H1 2026) [S267]
Open today?	Yes, daily	Yes, monthly. A European client would more often use K-PRIME (Luxembourg), whose terms are not verified here [S429]	No: final close 3 Aug 2026 [S430]. A new client waits for the next vintage or buys a secondary stake INFERRED

The numbers, step by step

K-PEC CLASS I, EUR 1M (ILLUSTRATIVE)

Management fee. 1.25% x EUR 1,000,000 = **EUR 12,500 a year** if NAV stays flat (charged monthly on month-end NAV) [S420].

Performance allocation, good year. Total return 10% = EUR 100,000. The investor first gets the 5% hurdle (EUR 50,000). Then KKR takes 100% ("catch-up") until it holds 15% of everything paid so far, then 15% of the rest. Because 10% clears the hurdle comfortably, KKR ends with 15% of the whole return: **EUR 15,000**; the investor keeps **EUR 85,000**.

Weak year. Return 5.5% = EUR 55,000. The investor gets 50,000; the next 5,000 all goes to KKR as catch-up, which is not complete (15% of 55,000 would be 8,250). So KKR gets **EUR 5,000** INFERRED (arithmetic; high-water mark and loss carryforward ignored).

Early exit at month 18. 5% x 1,000,000 = **EUR 50,000** kept by the fund [S420].

Same order in Class S. Up to 3.50% upfront (up to EUR 35,000) plus 0.85% a year (EUR 8,500) on top of the 1.25% [S420].

GII V-STYLE COMMITMENT, EUR 1M (ILLUSTRATIVE)

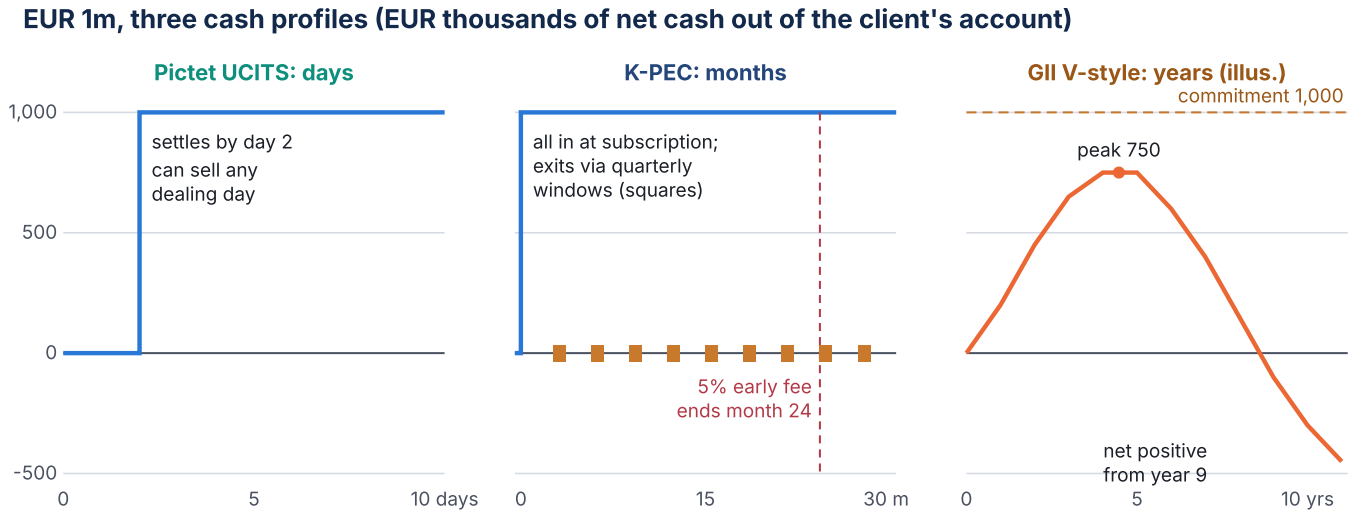

Calls. Year 1: 200k; Year 2: 250k; Year 3: 200k; Year 4: 150k; Year 5: 100k. Total called: 900k (90%); 100k never called.

Distributions. Years 4 to 11: 50k, 100k, 150k, 200k, 250k, 250k, 200k, 150k. Total: 1,350k, so 1.5x the cash called.

Net cash out (calls minus distributions, cumulative): 200k, 450k, 650k, 750k, 750k, 600k, 400k, 150k, then the client is net positive from Year 9.

The lesson. The client never has the full EUR 1m out at once: peak net exposure here is EUR 750k. That is why institutions "over-commit" and run pacing models [S454, S455] REPORTED, and why the KKR TPA paper notes private market distributions have historically averaged about "10-30% of NAV" a year [S436] CONFIRMED.

Fee. At an illustrative 1.0% (inside the 10-K's 0.75% to 1.50% range [S2]) on commitment: EUR 10,000 a year during the investment period.

Each panel has its own time axis. The UCITS and K-PEC lines assume no market move; the GII V-style line uses the illustrative calls and distributions in the box above.

Figure 38. Same EUR 1m, three cash shapes. The UCITS and evergreen positions are fully funded on day one; the drawdown commitment is never fully out at once. Explaining this shape to a client used to daily funds is a core KCS conversation INFERRED. Terms behind the shapes: [S527], [S420], [S1], [S2]. All flows illustrative.

WHAT THE WORK REALLY IS

Walking one order through three wrappers is exactly what a client servicing team does when a client asks "what happens to my money?". The skill is to separate what is a rule (cut-off, cap, fee), what is a judgement (board discretion, valuation) and what is unknown (terms not public) INFERRED.

HOW IT TRANSFERS TO KKR KCS

KKR's GWS internal sales posting asks for "depth of expertise across alternative assets classes in both private and registered structures (interval funds, BDCs, REITs)" [S103] CONFIRMED. Comparing wrappers for one order is that expertise in miniature. The technical guide covers each wrapper in full (Module 1, sections 2 to 4).

SAY IT IN ONE LINE

"The same EUR 1m is fully invested on day two in a UCITS, on the first of the month in K-PEC, and never fully at once in a drawdown fund; explaining that difference is the job." INFERRED

3. The onboarding bridge: from account opening to subscription documents

Onboarding answers three questions in a fixed order: **may we deal with this client**, **who exactly are they**, and **is this product right for them**. A UCITS client group answers them with MiFID client categorisation, KYC and anti-money-laundering checks, tax status, and target market data. A private fund team answers them with marketing permissions, investor eligibility tests, due diligence, subscription documents and side letters. The figure below lines the two processes up.

Two onboarding lines: UCITS account opening and private fund subscription

PICTET UCITS CLIENT (what a client group handles)

1. Categorise	2. KYC and AML	3. Tax status	4. Product fit	5. Open account	6. Deal
COBS 3: retail, professional or eligible counterparty [S543]	identity, owners, PEP check, risk rating H/M/L [S523]	FATCA and CRS checks before approval [S523]	EMT target market; share class eligibility [S526, S548]	register with the fund's transfer agent [Inferred]	order before the cut-off; settle within days [S527]

KKR PRIVATE FUND INVESTOR (what KCS and its partners handle)

1. May we market?	2. Eligible?	3. Diligence	4. Subscribe	5. Negotiate	6. Close, call
AIFMD passport or national private placement (NPPR) [S70, S300]	professional, US accredited, UK high net worth or sophisticated [S307, S314]	DDQ (often ILPA DDQ 2.0) and operational due diligence [S444, S458]	subscription agreement, investor questionnaire, KYC [S101, Inferred]	side letter; MFN election inside a set window [S456]	accepted at a close; first capital call notice [Inferred]

Teal: the same muscle you used at Pictet (categorise, identify, check eligibility, chase documents)

Amber: new at KKR (marketing permissions per country, LP diligence, legal negotiation, capital calls)

KKR's London analyst posting names step 4 directly: "Partnering with clients to help with KYC & investment onboarding" [S101].
For evergreen wealth products, steps 1, 2 and 4 often run through the distributing private bank or a feeder platform [S321, Inferred].

Figure 39. Onboarding, two lines. Two of six steps transfer directly; four are new. The Pictet steps are drawn from the FCA COBS rules **[S543]**, Pictet Group onboarding job text **[S523]** and EMT data **[S526]**; the KKR steps from KKR's 10-K **[S70]**, AIFMD **[S300]**, UK and US eligibility rules **[S307, S314]**, ILPA DDQ 2.0 **[S444]**, CMS on MFN **[S456]** and the KKR analyst posting **[S101]**.

The eligibility tests, with their numbers

At Pictet the key question is "which category is this client in?", because categorisation decides which share classes and documents a client can get [S543] CONFIRMED (the consequence is INFERRED). In private markets the question gets sharper: some clients may not be offered the product at all. The next figure sets the four tests you are most likely to meet in KCS London next to each other.

Four gates a client may need to pass, with the thresholds

UK elective professional
(COBS 3.5; you used this)

Qualitative test of the client's expertise, plus 2 of 3 quantitative tests:

1. about 10 significant trades a quarter for four quarters
2. portfolio over EUR 500,000
3. at least one year in a relevant financial sector role

Per se professionals include pension funds and insurers.
[S543]

US accredited investor
(Reg D; K-PEC route)

Income over $200,000 ($300,000 joint) in each of the last two years, or net worth over $1m excluding the home [S314].

K-PEC sells to accredited investors (Reg D) and non-US persons (Reg S) [S420].

Sep 2026: SEC proposed new routes (an exam, CFA, CPA, CFP) [S275].

[S314, S420, S275]

UK HNW / sophisticated
(financial promotions)

High net worth: income £100,000 or net assets £250,000 (restored on 27 Mar 2024 after a short-lived rise).

Self-certified sophisticated: the "two or more unlisted investments" criterion reinstated.

kkr.com/wealth is gated to "Institutional, Professional or Accredited Investors".

[S307, S83]

AIFMD marketing
(EU and UK)

EU managers: passport to professional investors from 22 Jul 2013.

Non-EU managers: national private placement (NPPR, Article 42).

UK: NPPR under the AIFM Regulations 2013.

ELTIF 2.0 opens EU long-term funds to retail from 10 Jan 2024.

[S300, S304, S301]

Figure 40. The eligibility gates. The first card is the test a UCITS client group applies every day; the other three decide who KKR may even talk to about a private fund. Sources: FCA COBS 3.5 **[S543]**; SEC Regulation D **[S314]** and Mayer Brown on the Sep 2026 proposals **[S275]**; UK financial promotion exemptions **[S307]**; kkr.com/wealth gate **[S83]**; AIFMD and NPPR **[S300, S304]**; ELTIF 2.0 **[S301]**; K-PEC 10-K **[S420]**.

Side letters: the part of onboarding a UCITS never has

A UCITS investor accepts the prospectus as written. A large LP in a drawdown fund often negotiates a **side letter**: a private agreement that adds rights such as fee breaks, extra reporting, ESG terms, co-investment rights or excuse rights INFERRED. A **most-favoured-nation (MFN)** clause then "typically entitles an investor to elect the benefit of rights contained in other investors' side letters"; sponsors "require MFN elections to be submitted within a certain period following closing", and "Late MFN election submissions are at risk of being rejected" [S456] CONFIRMED. Notice the job inside that sentence: a deadline, a list of elections, and a client who must not miss it. That is a servicing task with the same shape as a dealing cut-off INFERRED.

WHAT THE WORK REALLY IS

Onboarding is a control process: classify, verify, document, approve, then let money move. The Swiss Attorney General's CHF 2m fine on Banque Pictet in June 2025 turned on failing to classify accounts as high risk and to monitor 54 transfers [S498] CONFIRMED, which shows the stakes are real. The private-fund version adds legal negotiation and a commitment that lasts a decade INFERRED.

HOW IT TRANSFERS TO KKR KCS

The KKR EMEA Institutional Client Relations Analyst (London) is asked to partner "with clients to help with KYC & investment onboarding" and to collaborate with "Operations, Finance, Legal, Compliance, Risk" [S101] CONFIRMED. KKR's 10-K notes that "Financial crime laws may limit our investment and capital raising activities" [S70] CONFIRMED. KYC discipline from a UCITS seat is directly relevant; subscription documents, eligibility tests and side letters are what you add.

SAY IT IN ONE LINE

"I learned onboarding as a control process at Pictet; at KKR the same controls sit inside subscription documents, investor eligibility tests and side letters." INFERRED

4. The servicing bridge: from factsheets to capital call notices

Servicing is everything that happens after the client has invested. In a UCITS client group it runs on a daily rhythm: prices, dealing queries, platform data, factsheets, regulatory templates. In KCS it runs on an event rhythm: capital call notices, distribution notices, quarterly reports, annual meetings, due diligence questionnaires. The figure below draws one year of each.

One year of servicing: daily rhythm versus event rhythm

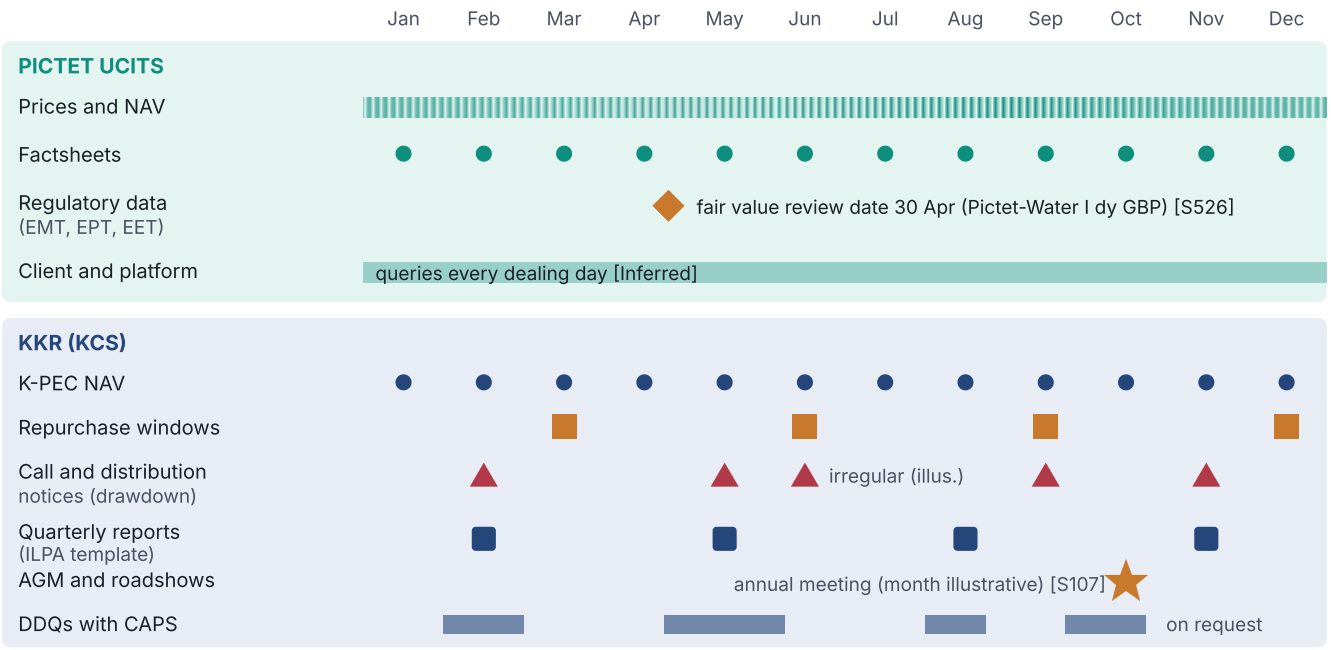

Figure 41. Daily rhythm versus event rhythm. A UCITS servicing year is a steady pulse; a KCS servicing year is a set of events, each with a deadline and a document. Sources: AJ Bell EMT data for Pictet-Water [S526]; FinDatEx templates [S547]; K-PEC 10-K [S420]; ILPA templates [S445]; KKR postings on AGM planning and CAPS DDQs [S107, S106]. Months for calls, reports and the AGM are illustrative.

What each servicing document does

Pictet side (seen in a UCITS client seat)	KKR side (KCS)	What carries over, and what is new
Factsheet and price queries. Platforms show manager, launch date, price and charges, e.g. Pictet-Water P dy GBP at GBP 415.37 on 9 Oct 2026 [S524]	**Quarterly report.** The ILPA Reporting Template (Jan 2025) adds a gross-to-net management fee reconciliation, granular partnership expenses and incentive allocation detail [S445]	Carries over: accuracy, consistency, deadlines. New: fee offsets, carry accounting and valuation commentary on Level III assets [S420, S445]
Dealing query. "Did my order make the cut-off? When does it settle?" [S527]	**Capital call notice.** "How much, by when, for which deal?" LPs must pay within days INFERRED. ILPA refreshed its Capital Call and Distribution Template in 2025 [S446]	Carries over: a time-critical cash instruction that must be right first time. New: the cash is due from the client, not sent by the client at a time of its choosing INFERRED
EMT, EPT, EET files. FinDatEx templates for target market, costs and ESG; EMT v4.3 dated 15 Jan 2026 [S547]	**DDQ and RFP answers.** ILPA DDQ 2.0 has 20 sections, from Firm to ESG, plus 8 appendices [S444]. KCS works "with the internal CAPS team to complete tenders/Due Diligence Questionnaires" [S106]	Carries over: answering standard questions from approved data. New: sections on co-investment, GP-led secondaries and credit facilities [S444]

Pictet side (seen in a UCITS client seat)	KKR side (KCS)	What carries over, and what is new
Fair value and Consumer Duty. "Product expected to provide fair value for reasonably foreseeable period" in Pictet-Water's EMT [S526]; four Consumer Duty outcomes [S542]	**Target market and fair value for wealth distributors.** Private fund managers "may still fall in scope where they sit in a distribution chain to retail customers" [S452]	Carries over almost directly when KKR products are sold through UK wealth managers [S452] REPORTED (link INFERRED)
Client reporting packs. Pictet's reporting team produces "investment, marketing, product and regulatory reports" [S518]	**AGMs and investment updates.** KCS interns "support roadshow and AGM planning" [S107]; analysts deliver "investment updates in meetings" [S101]	Carries over: preparing the pack. New: the client votes, sits on advisory committees and compares you with ten other GPs INFERRED

WHAT THE WORK REALLY IS

Servicing is a promise kept on a schedule. In a UCITS, the schedule is the dealing calendar and the data-template cycle. In private funds the schedule is set by events (deals, exits, quarter-ends) and by the LP's own reporting needs, and each event produces a document the client checks against its own records INFERRED.

HOW IT TRANSFERS TO KKR KCS

KCS juniors "Develop and update marketing materials, quarterly presentations, and client reporting documents" (APAC KCS intern) [S107] and manage "a variety of reporting requirements for investors" (London analyst) [S101] CONFIRMED. CAPS (Client and Product Services) answers RFPs, RFIs and DDQs from Dublin and New York [S146] CONFIRMED. A Pictet servicing seat is the closest daily-dealing analogue to that work INFERRED.

SAY IT IN ONE LINE

"At Pictet servicing ran on the dealing calendar; at KKR it runs on capital calls, quarterly reports and DDQs, and the habit of getting every number right first time carries straight over." INFERRED

5. The relationship bridge: themes, wealth channels and convergence

Selling a theme: Pictet megatrends and KKR's thematic view

Pictet AM's flagship is thematic equity: about USD 70bn across 16 strategies built on 14 themes (31 Mar 2025), and Pictet's claim to be "the largest active thematic fund provider by AUM globally" [S505] CONFIRMED (Pictet's own claim). Pictet tracks 21 megatrends [S537], and Pictet-Water (launched January 2000) was among the first water funds [S506, S524] CONFIRMED. A client group sells these funds by explaining a long-run story (water scarcity, robotics, security) and then showing how a fund captures it INFERRED.

KKR also talks in themes, but it buys whole assets rather than listed shares. Its 2026 Outlook lists mega-themes including "Security of Everything" and "Productivity and Worker Retraining" [S361] CONFIRMED; CFO Robert Lewin named megatrends in "AI, digital and energy infrastructure, defence" as a growth driver in July 2026 [S3] CONFIRMED. KKR's Total Portfolio Approach (TPA) then asks the client a bigger question:

treat portfolio construction like "zero-based budgeting … if every investment had to earn its place in the portfolio today, how would capital be allocated?" [S436] CONFIRMED. A theme sells one fund; TPA sells a relationship across many [S435, S436] INFERRED.

The wealth channel: Pictet is the bank; KKR sells to the bank

Pictet is unusual. The same group owns an asset manager (Pictet AM, CHF 267bn) and a private bank (Pictet Wealth Management, CHF 285bn, 346 private bankers) [S491] CONFIRMED. KKR has no private bank. Its Global Wealth Solutions (GWS) team, part of KCS, sells K-Series and other products through "wirehouses, independent broker-dealers, registered investment advisers, global private banks, and family offices" [S70] CONFIRMED. In the UK, Quilter Cheviot began offering KKR's evergreen private equity strategy from January 2026; Markus Egloff (MD, London, head of GWS for EMEA and Asia Pacific) called it "an important milestone in our efforts to deliver greater access to KKR's strategies" [S177] CONFIRMED (quote as returned by a fetch tool). The release names the strategy, not the vehicle, in the research extract; K-PRIME is KKR's Luxembourg evergreen PE fund, product-managed from London [S133] CONFIRMED. KKR opened a Zurich office in December 2023 to reach Swiss private banks and wealth managers [S553] REPORTED.

Two wealth models: manufacturer and bank in one group, or manufacturer selling to banks

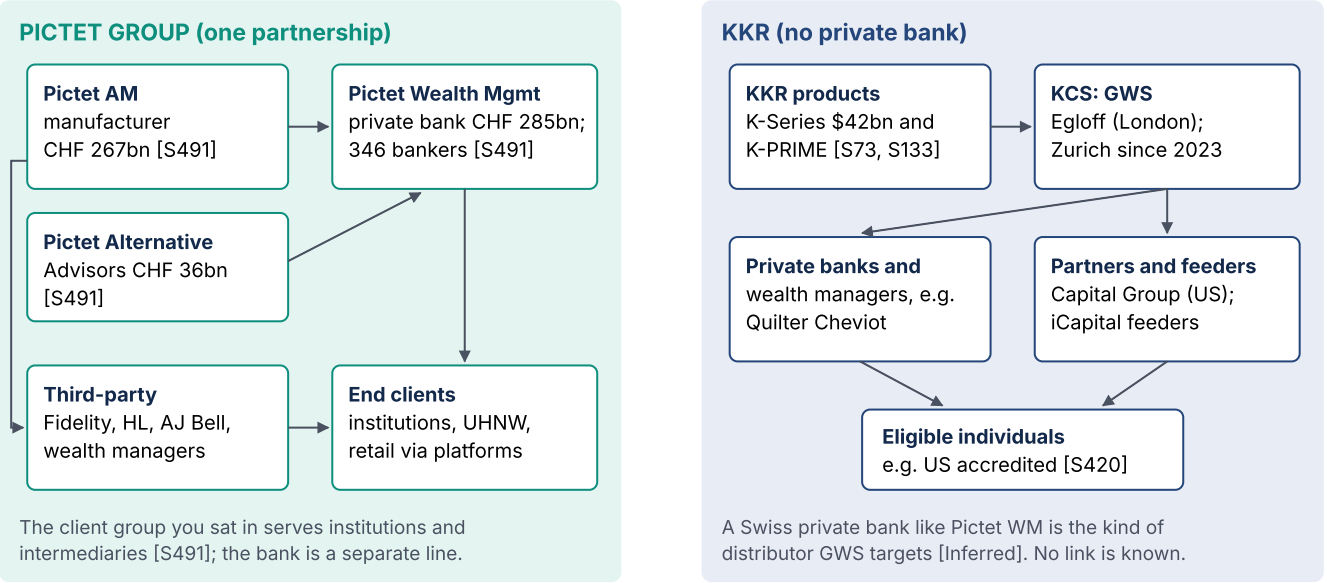

Figure 42. Bank-plus-manager versus manager-to-banks. At Pictet the private bank is in the same partnership; at KKR, KCS's Global Wealth Solutions team must win shelf space at banks it does not own. Sources: Pictet Annual Review [S491]; platform pages [S524]; KKR 10-K [S70], K-Series AUM [S73], Egloff and Yates bios [S124, S133], Quilter Cheviot release [S177], Capital Group release [S92], finews on Zurich [S553].

Convergence: the two firms are walking toward each other

Pictet is moving into private markets: private debt in Pictet AM since November 2022 [S532], an environmental co-investment ELTIF launched in April 2024 [S531], its sixth co-investment fund closed at USD 1.53bn in June 2026 [S529] and its first direct private equity fund at EUR 403m in March 2026 [S530] CONFIRMED. KKR is moving toward wealth and liquidity: K-Series grew from $6bn (2023) to $42bn (June 2026) [S72, S73]; Capital Group KKR interval funds blend about 60% public and 40% private credit with quarterly repurchases of up to 10% and a $1,000 minimum [S552, S426] CONFIRMED. In September 2026 Bloomberg reported that KKR had passed Partners Group as Europe's largest manager of European-domiciled evergreen private markets funds, at EUR 13.6bn (Q1 2026); Egloff: "We recently became the largest manager of evergreen private markets funds in Europe" [S550] CONFIRMED.

The convergence map: what is inside versus how often you can leave

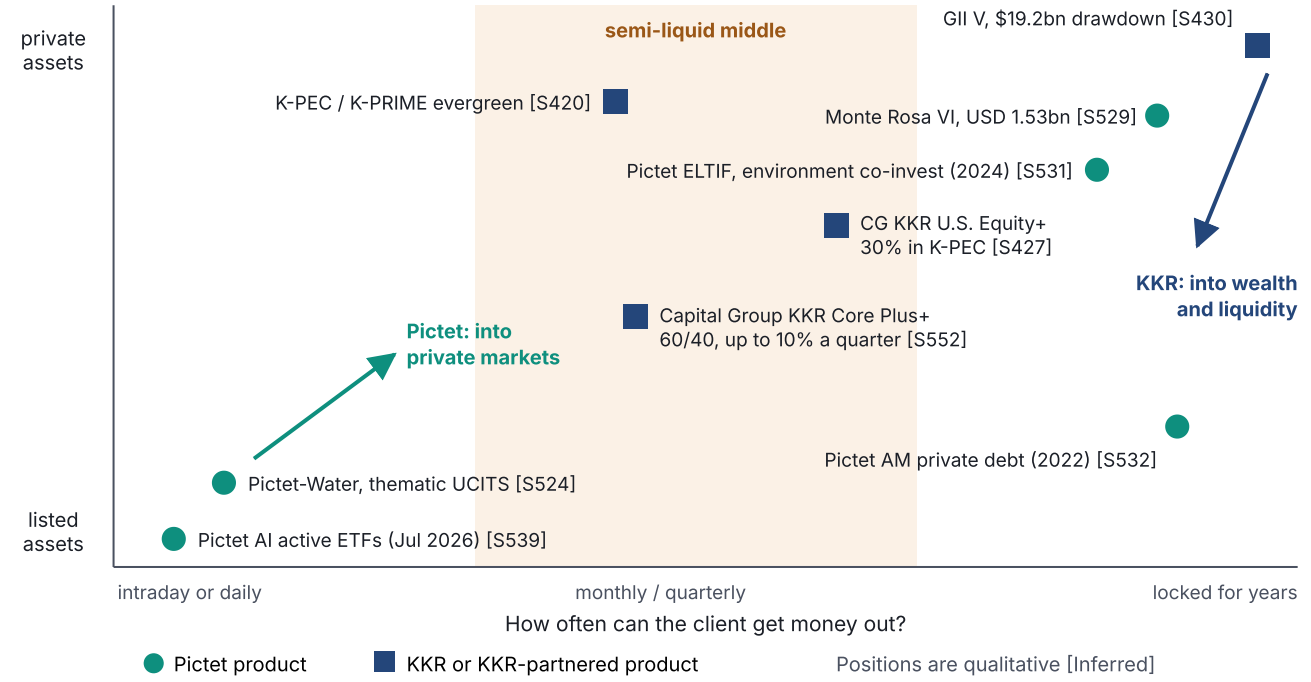

Figure 43. Both firms are moving into the semi-liquid middle from opposite sides. Positions are judgements, not measured values; the Pictet ELTIF and private debt terms are not in the research, so their horizontal positions are approximate INFERRED. Sources as labelled; Capital Group KKR terms **[S552, S426, S427]**; Bloomberg via Swissinfo on Europe's largest evergreen manager **[S550]**.

Pictet's own view on that middle ground is worth knowing. Laurent Ramsey, a Pictet Managing Partner, said in December 2024: "you need to be careful when making something illiquid liquid", noting that semi-liquid funds typically allow "3-5% redemption per quarter", while also calling them a possible stepping stone into private markets [S536] REPORTED. Partners Group saw $3.8bn of redemptions against $4.2bn of evergreen demand in H1 2026 [S239] CONFIRMED; Scott Nuttall said K-Series was "up 20% net year-to-date" [S76] REPORTED. A Pictet alumnus who can hold both views at once (the product works, and the liquidity limits must be explained before the sale) is useful to KCS INFERRED.

WHAT THE WORK REALLY IS

Relationship management is matching a client's goals and constraints to products, then keeping the match true over time. A thematic fund is matched to a belief; a private markets programme is matched to a whole portfolio, its liquidity needs and its pacing INFERRED.

HOW IT TRANSFERS TO KKR KCS

GWS "works with leading private banks and wealth platforms to provide eligible individual investors access to the same investment capabilities ... that KKR has delivered to the world's largest institutional investors for decades" (EMEA Wealth Communications posting) [S102] CONFIRMED. Your Pictet experience is from the manufacturer side of a firm that also owns a private bank; at KKR you would be on the manufacturer side selling to banks INFERRED.

SAY IT IN ONE LINE

"Pictet is moving into private markets and KKR into wealth; I have seen the traditional side of that meeting point and want to learn the private side." INFERRED

6. The skill transfer matrix

Here is the whole bridge as one grid. Rows are skills a client-group seat at a UCITS manager typically uses; columns are the places in KCS where they would be used. Shading is a judgement of how directly the skill transfers INFERRED. Keep only the rows that match what you actually did.

Where each Pictet client-group skill lands in KCS (judgement, [Inferred])

	Institutional RM support	Wealth (GWS) and platforms	Product spec. and CAPS DDQs	Onboarding and KYC	Reporting and servicing	KCM co-invest syndication
Client categorisation (COBS 3)	Low	**High**	Low	**High**		Low
KYC, AML, FATCA and CRS	Med	Med	Low	**High**		Low
Dealing cut-offs, settlement		**High**	Low	Med	Med	
Target market and EMT data		**High**	Med	Low	Low	
Consumer Duty and fair value		**High**	Low		Low	
RFP, DDQ and factsheets	Med	Med	**High**		Med	Low
Client reporting packs	**High**	Med	Low		**High**	
CRM records, meeting prep	**High**	**High**	Low	Low	Med	Med
Explaining thematic funds	Med	**High**	Med		Low	Low

Blank cells: little use — High: used almost as is — Med: same habit, new content — Low: background only

Figure 44. A heat grid of transfer. The wealth column lights up because KKR's European wealth distribution runs on the same MiFID, target-market and Consumer Duty plumbing a UCITS client group uses every day [S70, S452, S526] INFERRED. Column definitions from KKR's KCS description and postings [S101, S106, S107]. Ratings are the author's judgement.

Skill from the Pictet seat	Where it is used in KCS	What is new at KKR (the gap)	How to phrase it (Template: keep only if true)
Client categorisation (retail, professional, eligible counterparty) [S543]	Checking which K-Series or private fund investors are eligible; GWS distributor onboarding [S420, S83]	US accredited and Reg S tests; UK HNW and sophisticated exemptions; AIFMD marketing and NPPR by country [S314, S307, S300]	*"I checked [number] client files for categorisation before [account opening / share class access]."*
KYC and AML: identity, owners, PEP, risk rating, FATCA and CRS [S523]	"KYC & investment onboarding" in the London analyst role [S101]	Subscription agreements, investor questionnaires, LP entity types such as feeders and trusts [S114] INFERRED	*"I chased and reviewed KYC documents for [client type], working with [compliance / operations]."*
Dealing discipline: cut-offs, forward pricing, settlement [S527]	K-PEC monthly subscriptions and quarterly repurchase windows [S420]	Capital calls, 5% caps, early repurchase fees, overflow tenders [S420]	*"I handled dealing queries on [cut-offs / settlement], so I know why a missed deadline matters to a client."*
Target market and EMT data [S526, S547]	Supplying target market and fair-value data to European and UK wealth distributors [S452]	AIFMD II liquidity tools; ELTIF redemption rules; semi-liquid risk disclosure [S449, S447]	*"I [updated / checked] EMT or platform data for [fund], so I understand what a distributor needs from a manufacturer."*

Skill from the Pictet seat	Where it is used in KCS	What is new at KKR (the gap)	How to phrase it (Template: keep only if true)
Consumer Duty and fair value [S542]	KKR products sold via UK wealth managers such as Quilter Cheviot [S177, S452]	Explaining gates and illiquidity so "consumer understanding" is real [S542, S536] INFERRED	*"I saw how [fair value / Consumer Duty] shaped what we sent to [platforms]."*
RFP, DDQ, factsheets [S521]	Working "with the internal CAPS team to complete tenders/Due Diligence Questionnaires" [S106]	ILPA DDQ 2.0 sections on co-investment, GP-led secondaries, credit facilities [S444]	*"I helped answer [an RFP / DDQ section on X] by finding the right person in [team]."*
Client reporting [S518]	"Managing a variety of reporting requirements for investors" [S101]	ILPA Reporting and Performance Templates; IRR and TVPI "with and without" subscription lines [S445]	*"I prepared [reporting pack / meeting materials] for [client type] to a [weekly / monthly] deadline."*
CRM and meeting preparation INFERRED	"maintaining CRM data", "preparing client briefing materials" (KCS intern) [S107]; Salesforce named in a GWS posting [S103]	Multi-strategy relationships across institutional, family capital and wealth [S70, S84]	*"I kept [CRM records / briefing notes] for [number] client meetings."* Name a CRM only if you used it.
Explaining thematic funds [S505]	Linking KKR mega-themes to products; TPA conversations [S361, S436]	Explaining a theme through whole companies and infrastructure assets, not listed shares INFERRED	*"I learned to explain [Pictet theme] in plain English to [client type]."*

WHAT THE WORK REALLY IS

The matrix shows that most of a client-group seat is **process skill** (categorise, verify, report, prepare, coordinate) and a smaller part is **product knowledge**. Process skill transfers; product knowledge must be rebuilt for private markets. Saying this plainly is more credible than claiming everything transfers INFERRED.

HOW IT TRANSFERS TO KKR KCS

KKR's KCS description lists "Junior resources serving in a generalist capacity" (KKR brief) CONFIRMED. A generalist junior uses the process rows of this matrix across every column. The KCS intern posting's duty list (briefing materials, CRM, research, presentations) maps onto rows 6 to 9 [S107] CONFIRMED.

SAY IT IN ONE LINE

"The process skills from Pictet transfer almost directly; the product knowledge I would rebuild at KKR, and I know exactly which pieces." INFERRED

7. What you have seen that most applicants have not, and what you have not

Most KCS applicants describe client work in general terms. A UCITS client-group seat gives you specifics few students meet: the FinDatEx data templates that travel from manufacturer to distributor [S547]; the dealing calendar and its cut-offs [S527]; the Consumer Duty's four outcomes [S542]; the move from the KIID to the new UK "Product Summary Document" under FCA PS25/20, with rules from 6 April 2026 and firms moving by 8 June 2027 [S544, S545] REPORTED; and real client queries. Equally, a six-week seat at a UCITS manager does not show you illiquidity, capital calls, carried interest or co-investment. The figure below splits the two and points each gap to the technical guide.

Seen, shared and not yet seen

Typically seen in a UCITS client seat [Inferred]	Common ground (the bridge)	Not seen: what you want to learn (technical guide section)
EMT, EPT and EET data files [S547]	Client categorisation and eligibility	Illiquidity, the J-curve, pacing Module 2: commitment pacing
Daily dealing and cut-offs [S527]	KYC and onboarding control	Capital calls and distributions Module 1, section 2
Consumer Duty fair value [S542, S526]	Accurate reporting to a deadline	Carry, hurdles, catch-up, waterfall Module 1, section 2b
KIID to Product Summary Document (CCI regime) [S544]	RFP and DDQ answers from approved content	Evergreen NAV, gates, early fees Module 1, sections 3 and 5
Platform and adviser queries [S524, S525]	Sales, specialists, ops and compliance working together	Co-investment and syndication Module 4: co-investment
Thematic fund storytelling [S505]	Explaining liquidity and costs honestly before a sale	Side letters, MFN, ILPA templates Module 4: side letters
	Same client types: pensions, insurers, intermediaries	Valuing Level III assets Module 2: reading performance

Figure 45. An honest inventory. The left column is what a UCITS client-group seat typically exposes an intern to; keep only what you actually saw. The right column is the "what I want to learn" list, each item pointing to a section of the companion technical guide "What you will learn". Sources as labelled.

DON'T SAY THIS

"I already understand private equity from Pictet." You saw a manager whose private markets arm (Pictet Alternative Advisors) is a separate business line [S491]; unless you worked with it, do not claim it. Also avoid "Pictet is a KKR client" or "I worked on KKR products": nothing in the public record supports either [S535, S550].

SAY THIS IN THE INTERVIEW

"At Pictet I worked in a world where a client can leave tomorrow at the next NAV. What I have not yet seen is the other side: capital called over five years, a 5% quarterly gate, carry on top of a hurdle. That is exactly what I want to learn in KCS, and I have started: I can walk a EUR 1m order through a UCITS, K-PEC and a drawdown fund." [S527, S420, S1] INFERRED

WHAT THE WORK REALLY IS

Knowing the edge of your knowledge is a client skill. A KCS junior who says "I'll check with the product team" instead of guessing protects the firm, because DDQ and RFP answers become representations to clients INFERRED.

HOW IT TRANSFERS TO KKR KCS

Each "not seen" item has a live KKR home: capital calls in GII V [S430]; gates and early fees in K-PEC [S420]; co-investment through KKR Capital Markets, whose fees ($930m in 2025) are not shared with fund investors [S425]; ILPA templates in quarterly reporting [S445]. The technical guide teaches each one with worked numbers.

SAY IT IN ONE LINE

"I bring the regulatory and dealing discipline of a UCITS client team, and I know the four private markets mechanics I still need to learn." INFERRED

8. The culture bridge: partnership, long horizons, "like and trust"

The last bridge is not technical, and it may be the one an interviewer remembers. Pictet calls itself "an independent investment partnership known for our long-term mindset ... These principles have defined us since 1805" [S514] CONFIRMED. Its annual review says: "Partnership embodies respect, trust and interdependence over the long term" [S491] CONFIRMED. Pictet AM adds: "We always prioritise our clients' interests over asset growth and do not hesitate to soft-close strategies to protect their returns" [S491] CONFIRMED.

KKR's words rhyme. Henry Kravis calls "People do business with people they like and trust" "probably the most apt phrase that speaks both to our culture and our values", and adds "Our business really runs on trust" [S384] CONFIRMED. Jim Burns, who leads institutional client solutions in the Americas, repeats it on kkr.com [S81] CONFIRMED. KKR runs "with one compensation pool": "We all succeed and fail together" [S385] CONFIRMED. And Kravis calls his "best deal" one that went bankrupt: Walter Industries, bought in 1987, where KKR spent almost 17 years and settled for over $300m, against $117m of KKR equity, to get fund investors their money back plus a small profit [S384] CONFIRMED. That is a client-solutions story: the firm kept its word to its LPs.

Two long histories (note the broken time axis)

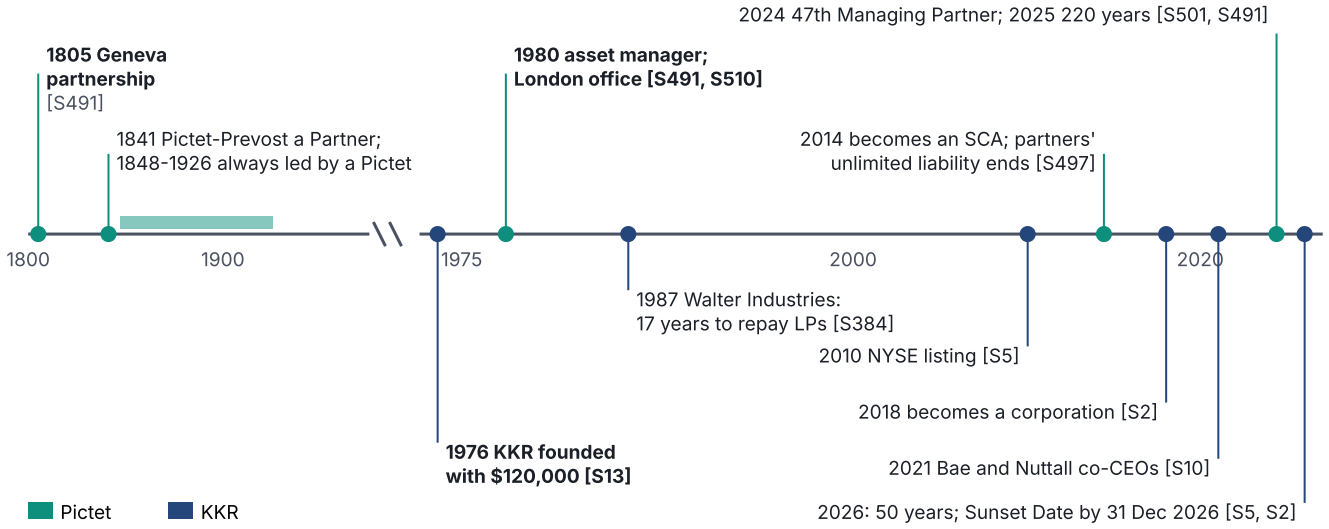

Figure 46. Partnership, then and now. Pictet changed its legal form in 2014 but stayed partner-owned; KKR left the partnership form in 2018 but kept one P&L, one compensation pool and about 30% employee ownership [S2, S5]. Both sit on long histories in which keeping clients' trust is the asset. Sources as labelled; the left part of the axis is compressed.

Value	Pictet's words	KKR's words
Trust over the long term	"Partnership embodies respect, trust and interdependence over the long term." [S491]	"People don't want to work with you, let alone entrust you with their capital, if they can't trust you will do what you say." (Kravis) [S384]
Client first	"We always favour clients' interests over asset growth." [S504]	Values include "Earn Like & Trust Every Day" and "Remember, People are Counting on Us". [S12]

Value	Pictet's words	KKR's words
One team	The Board of Managing Partners "works by consensus." [S490]	"'One Firm,' collaboration, operating with 'like and trust' are core to how KKR operates." (KCS intern posting) [S107, S389]
Humility	"We do not aspire to be all things to all clients." [S491]	"Arrogance kills" sign behind Kravis's desk. [S384]

WHAT THE WORK REALLY IS

In a client business, culture is a product feature. A client commits for ten years to a drawdown fund, or holds a fund through a gated quarter, only if it trusts the people on the other side. Both Pictet and KKR say trust is the asset; the client team is where that trust is earned or lost day to day INFERRED.

HOW IT TRANSFERS TO KKR KCS

Kravis says KKR looks "for like and trust" in candidates and watches how they treat people they are not trying to impress [S385] CONFIRMED. A Pictet alumnus can speak credibly about partnership and long-term client relationships, provided the examples are real and modest INFERRED.

SAY IT IN ONE LINE

"Pictet showed me a 220-year partnership built on client trust; KKR's Walter Industries story shows the same instinct, and that is the part of KCS I most want to be part of." [S491, S384] INFERRED

TEMPLATE: KEEP ONLY IF TRUE

"During about six weeks in the client group at Pictet Asset Management in London, I [supported onboarding: checked categorisation and KYC files for X clients / answered dealing and platform queries / prepared reporting packs and meeting briefs / helped on an RFP or DDQ section]. I learned that a client relationship lasts only if every detail is right first time, and that relationship managers depend on specialists, operations and compliance. KCS uses the same model across a harder product set: capital calls, monthly NAVs and 5% quarterly caps. I would bring the discipline and learn the private markets mechanics." Replace every [slot] with what you actually did; delete any clause you cannot evidence.

PART 5

Glossary

Every term in plain English.

How to use the glossary

Terms are grouped by theme so you can learn them in clusters, not alphabetically. Bold words inside a definition are themselves defined somewhere on these pages. KKR-specific names carry a source marker; general finance definitions are standard usage.

1. The basic cast

Term	Plain-English meaning
Alternative asset manager	A firm that invests other people's money in things outside listed shares and bonds: private companies, loans, buildings, infrastructure. KKR, Blackstone and Apollo are the largest.
Traditional asset manager	A firm that mainly buys listed shares and bonds, often cheaply in index funds (BlackRock, Vanguard). Lower fees, daily liquidity.
General partner (GP)	The manager that runs a private fund, picks the investments and earns fees and **carried interest**. KKR is the GP of its funds.
Limited partner (LP)	An investor in a private fund: a pension, insurer, sovereign wealth fund, endowment, family office or wealthy individual. "Limited" because they can lose only what they put in and do not run the fund.
Client / investor	KKR's own word for LPs and other buyers of its products. KCS calls them clients.
Portfolio company	A company a private equity fund owns.
Sponsor	A private equity firm in its role as owner and backer of a deal. "Sponsor-backed" means owned by a PE firm.
Buy side / sell side	Buy side invests money (KKR, pensions). Sell side sells services to investors (investment banks, brokers).
Family office	A private company that manages one wealthy family's money. KKR calls this channel **Family Capital** [S84].
Sovereign wealth fund (SWF)	A state-owned investment fund, for example in Norway, Abu Dhabi, Saudi Arabia or Singapore.
Endowment	The investment pot of a university or charity, spent slowly over very long horizons.
Defined benefit (DB) pension	A pension that promises a set income in retirement. The scheme carries the investment risk, so it invests to meet future payments (**liabilities**).
Defined contribution (DC) pension	A pension where each saver has a pot and carries the investment risk themselves. Workplace DC pots are the target of the UK Mansion House reforms.
Private wealth	Wealthy individuals investing through private banks, wealth managers and financial advisers. Smaller cheques, many more investors, stricter consumer rules.
Wirehouse	A large US brokerage with thousands of financial advisers (for example Morgan Stanley, Merrill). A key gateway to private wealth.
Insurer / annuity	An insurer collects premiums and invests them to pay future claims. An annuity pays a retiree a fixed income for life. Long-dated promises suit long-dated private assets.

2. How a private fund works

Term	Plain-English meaning
Closed-end / drawdown fund	A fund with a fixed size and life (often 10-12 years). Investors promise money up front and hand it over only when the GP asks.
Commitment	The amount an LP promises to a drawdown fund. Not paid on day one.
Capital call (drawdown)	The GP's request for part of the commitment, usually with 10 business days' notice, when it needs cash for a deal.
Dry powder	Money committed to funds but not yet invested.
First close / final close	The first date the fund can start investing with commitments so far, and the last date new investors can join.
Hard cap	The maximum size the GP has promised the fund will reach.
Investment period	Usually the first 4-6 years, when the fund buys new assets.
Harvest period	The later years, when the fund sells assets and returns cash.
Distribution	Cash paid back to LPs after a sale or from income.
Exit	Selling an investment: to another company (trade sale), to another PE firm (secondary buyout), or by listing it (IPO).
Flagship fund	A firm's main, numbered fund in a strategy, e.g. KKR North America Fund XIV, European Fund VI, Global Infrastructure Investors V [S2].
Vintage year	The year a fund starts investing. Used to compare funds fairly.
J-curve	The shape of an LP's returns over time: negative early (fees, no sales yet), positive later as investments are sold.
Re-up	An existing LP committing again to the next fund in the series. A core KCS success measure.
Evergreen / semi-liquid fund	A fund with no end date that takes new money continuously and lets investors redeem, usually monthly or quarterly, up to a limit. The main product for private wealth. KKR's are the **K-Series**.
NAV (net asset value)	The value of a fund's assets minus its debts. Evergreen funds issue and redeem units at NAV.
Redemption gate	A cap on how much investors can withdraw in a period (often 5% of NAV a quarter). Protects remaining investors from fire sales.
Interval fund	A US registered fund that offers to buy back a set percentage of shares at set intervals. The Capital Group KKR funds use this structure [S92].
BDC (business development company)	A US vehicle that lends to mid-sized companies and can be sold to retail investors. K-FIT is one [S113].
Non-traded REIT	A real estate investment trust that is not listed on an exchange. Sold to wealth clients; KREST is KKR's [S114].
Feeder fund	A vehicle that pools many small investors and invests as one LP into the main fund. Platforms like iCapital run them.
Separately managed account (SMA)	A portfolio run for one large client under its own rules, instead of a pooled fund. One meaning of "customised products".
Co-investment	An LP investing directly in a specific deal alongside the fund, usually with low or no fees. Highly valued by LPs; at KKR, syndicated with KCM [S70].
Syndication	Selling pieces of a deal or a loan the firm has committed to, to other investors.
Secondaries	Buying or selling existing fund stakes or assets from other investors, often at a discount, to give early liquidity.
Continuation vehicle (CV)	A new fund a GP sets up to buy one or more assets from its own older fund, so existing LPs can cash out or roll over.
Strategic partnership	A large multi-strategy mandate with one client across several KKR products, often with fee terms and co-investment rights.

3. Fees and returns

Term	Plain-English meaning
Management fee	An annual fee on committed or invested capital (traditionally about 1.5-2% for buyout funds). Pays for the team whatever happens.
Carried interest (carry)	The GP's share of profits (traditionally 20%) once LPs have their money back plus the hurdle.
Hurdle / preferred return	The minimum annual return LPs get before carry starts, often 8%.
Catch-up	After the hurdle, the GP takes a larger share for a while until it has "caught up" to its full 20%.
Waterfall	The order in which cash is split between LPs and GP: capital back, hurdle, catch-up, then 80/20.
Clawback	The GP returns carry it was paid early if the fund later underperforms. KKR repaid $344m on Asian Fund II in Q4 2025 [S2].
GP commitment	The GP's own money invested in its fund. "Skin in the game".
Side letter	A private agreement giving one LP special terms (fees, reporting, co-invest rights).
MFN (most favoured nation)	A clause letting an LP claim terms given to other similar-sized LPs.
Basis point (bp)	One hundredth of a percent. 84bp = 0.84%.
IRR (internal rate of return)	The annualised return that accounts for the timing of cash in and out. Sensitive to timing; can flatter quick wins.
MOIC / TVPI	Multiple on invested capital / total value to paid-in: total value (cash returned plus value still held) divided by money put in. 2.0x = doubled.
DPI (distributions to paid-in)	Cash actually returned divided by money paid in. The "real money" metric; the word of 2025-26 because exits have been slow.
RVPI	Residual value to paid-in: the unsold part. TVPI = DPI + RVPI.
PME (public market equivalent)	Compares a fund's return with what the same cash flows would have earned in a stock index.
Sharpe ratio	Return per unit of volatility. Higher means a smoother ride for the return earned.
Denominator effect	When public markets fall, private holdings become a bigger share of an LP's portfolio, pushing it over its target and making it pause new commitments.

4. KKR's own vocabulary

Term	Plain-English meaning
KCS (Global Client Solutions)	KKR's fundraising and client team, formed in 2009, about 300+ people, split into sales/relationship management and product/strategy management [S103].
KCM (KKR Capital Markets)	KKR's in-house capital markets business: arranges debt and equity financing for KKR deals and portfolio companies and syndicates co-investment.
Capstone	KKR's in-house team of operating specialists, mostly ex-consultants, who work inside portfolio companies on operational improvements.
Global Atlantic	KKR's insurance subsidiary (retirement, life and reinsurance). Its policyholder money is a large, long-term source of capital for KKR's credit strategies.
Strategic Holdings	KKR's segment of long-term stakes in businesses held on its own balance sheet.
AUM / FPAUM	Assets under management / fee-paying AUM, the part that earns management fees. KKR: $796.5bn AUM and $638.4bn FPAUM at 30 Jun 2026 [S1].
FRE (fee related earnings)	Profit from recurring fees after paying the people and costs that earn them. Investors prize it for stability.
ANI (adjusted net income)	KKR's headline profit measure including carry, insurance and balance sheet income.
K-Series	KKR's evergreen funds for private wealth: K-PEC/K-PRIME (private equity), K-INFRA (infrastructure), K-FIT/K-FITS (private credit), KREST (real estate) [S111-S114].

Term	Plain-English meaning
Family Capital	KKR's client segment for family offices, offering co-investment, customised portfolios, SMAs, two-way sourcing and debt solutions [S84].
CAPS team	The internal KKR team that completes tenders and due diligence questionnaires with KCS [S106].
Sunset Date	The date, no later than 31 Dec 2026, when the founders' special control ends and every KKR share gets one vote.
Investment Committee (IC) memo	The document a deal team writes to ask senior partners to approve an investment.

5. Fundraising and client work

Term	Plain-English meaning
Investor relations (IR)	Keeping existing investors informed and happy. At KKR, part of KCS's "servicing" job.
Capital formation	Industry word for raising money: new clients, new products, new channels.
Relationship manager (coverage)	The person who "owns" a set of clients, usually by region or investor type.
Product specialist	The expert on one strategy (say infrastructure) who explains it in depth to clients.
Pitch book	The presentation used to market a fund.
PPM (private placement memorandum)	The formal offering document for a private fund.
LPA (limited partnership agreement)	The legal contract governing the fund.
Data room	A secure online folder of fund documents for investors doing diligence.
DDQ (due diligence questionnaire)	A long standard questionnaire investors send a manager. ILPA publishes a template.
RFP / tender	Request for proposal: a formal competition where an investor invites managers to bid for a mandate.
ODD (operational due diligence)	Checking the manager's operations, controls, valuation and compliance, separate from the investment case.
Investment consultant / gatekeeper	Advisers such as Cambridge Associates, Mercer or Hamilton Lane who recommend managers to pensions and others.
Placement agent	An outside firm paid to help a GP raise a fund (for example Evercore, Campbell Lutyens, PJT Park Hill).
ILPA	Institutional Limited Partners Association, the LP trade body that publishes best-practice principles and reporting templates.
AGM / annual meeting	The yearly meeting where a GP updates its LPs on a fund.
CRM	Client relationship management software. KKR postings name Salesforce [S103].
Cross-sell	Getting a client who invests in one strategy to invest in another.

6. Asset classes and deal words

Term	Plain-English meaning
Private equity (PE)	Buying stakes in private companies, usually control, improving them and selling within years.
Leveraged buyout (LBO)	Buying a company using a lot of borrowed money secured on the company itself. KKR's founding idea.
Growth equity	Minority stakes in fast-growing companies that need capital to expand.
Impact investing	Investing for a financial return and a measurable social or environmental result. KKR Global Impact focuses on climate, learning, sustainable living and inclusive growth.

Term	Plain-English meaning
Private credit	Loans made by non-bank funds directly to companies or backed by assets. The fastest-growing private asset class.
Direct lending	Private credit lent straight to mid-sized companies, mostly floating rate.
Asset-based finance (ABF)	Lending secured on pools of assets (loans, equipment, receivables) rather than a company's cash flow.
Infrastructure	Long-life physical assets providing essential services: power, data centres, fibre, transport, utilities.
Core / core-plus / value-add / opportunistic	The risk ladder for real assets, from stable income (core) to heavy repositioning (opportunistic).
Real estate	Buildings and land: logistics, housing, offices, data centres. Earns rent and value growth.
ECM / DCM	Equity capital markets (share issues, IPOs) and debt capital markets (bonds, loans).
Due diligence	The deep investigation before an investment: financial, commercial, legal, operational.
Value creation	How an owner makes a company worth more: growth, margins, better capital structure, bolt-on acquisitions.
Investment theme / thesis	A view about a long trend (say, power demand from data centres) used to find deals.

7. Rules and regulators

Term	Plain-English meaning
FCA	Financial Conduct Authority, the UK conduct regulator. KKR's UK LLP is FCA-authorised (FRN 593180) [S23].
SEC	US Securities and Exchange Commission, the US securities regulator.
AIF / AIFM	Alternative investment fund / its manager. Almost every private fund is an AIF.
AIFMD / AIFMD II	The EU law on alternative fund managers (2011) and its revision, which member states had to transpose by 16 April 2026.
Marketing passport	The EU right for an authorised EU manager to market a fund to professional investors across the EU.
NPPR	National private placement regime: country-by-country rules for marketing a fund without a passport (the UK route for non-UK funds).
Reverse solicitation	An investor approaching a manager on its own initiative, which can fall outside marketing rules. Narrowly interpreted; never rely on it casually.
Pre-marketing	Testing investor appetite before a fund is formally launched, under strict EU conditions.
ELTIF 2.0	The revamped EU long-term investment fund regime (applies from 10 Jan 2024) that lets retail investors buy private-market funds.
LTAF	The UK long-term asset fund (2021), an open-ended fund structure for private assets aimed at DC pensions and, later, wider investors.
Financial promotion	Any UK communication inviting someone to invest. Must be fair, clear and not misleading, and approved by an authorised person.
Consumer Duty	The FCA's rule (from July 2023) that firms must deliver good outcomes for retail customers.
Professional / retail client	The regulatory split: professionals (institutions, some wealthy individuals) can be offered more complex products than retail clients.
Accredited investor	The US test (income or wealth) for who may buy most private funds.
Marketing Rule	The SEC's rule on adviser advertising, including how performance can be shown.
MNPI / inside information	Material non-public information about a listed company. Trading on it or passing it on is illegal.
Information barrier ("Chinese wall")	Policies separating people who hold MNPI (often capital markets) from others.

Term	Plain-English meaning
SMCR	The UK Senior Managers and Certification Regime, which makes named individuals accountable for conduct.
Mansion House Accord	A May 2025 voluntary pledge by UK pension providers to put more of their default DC funds into private markets.
Pension Schemes Act 2026	UK law (Royal Assent 29 Apr 2026) consolidating DC schemes into large funds and allowing government to set private asset allocations.

8. Traditional fund terms (your Pictet world)

Term	Plain-English meaning
UCITS	The EU rulebook for funds that ordinary investors can buy across Europe: diversified, liquid, usually dealing daily. Pictet's main fund range is a UCITS umbrella [S524].
SICAV / sub-fund	A Luxembourg open-ended investment company. One SICAV ("umbrella") holds many sub-funds ("compartments"), such as Pictet-Water.
Management company (ManCo)	The regulated company responsible for running a UCITS, e.g. Pictet Asset Management (Europe) SA in Luxembourg.
Transfer agent (TA)	The firm that keeps the register of who owns which fund units, processes subscriptions and redemptions and runs KYC checks on investors.
Forward pricing / cut-off	Orders received before the daily cut-off time are dealt at the next NAV, which is not yet known. Prevents trading on stale prices.
Share class	A version of the same fund with different fees, currency, minimum or eligibility (e.g. retail, clean, institutional).
Client categorisation (COBS 3)	The FCA's split of clients into retail, professional and eligible counterparty, which sets protections and product access [S543].
KYC / AML	Know your client and anti-money-laundering checks: identity, ownership, source of funds, sanctions and politically exposed persons.
EMT / EPT	European MiFID Template and European PRIIPs Template: standard data files a fund manager sends distributors on target market and costs.
Target market	The MiFID II description of who a product is for (client type, knowledge, risk tolerance, horizon).
KIID / KID / CCI	Short disclosure documents for retail investors. In the UK, the new Consumer Composite Investments regime replaces them (start 6 April 2026, firms must comply by 8 June 2027) [S544].
Assessment of Value	An annual FCA-required report in which UK fund managers judge whether each fund gives value for its charges.
Overseas Funds Regime (OFR)	The UK route by which overseas funds such as Luxembourg UCITS can be marketed to UK retail investors after Brexit.
Fund platform	A service (such as AJ Bell) through which advisers and individuals buy many funds; platforms need fund data, prices and documents.
Thematic fund	A fund built around a long-term trend (water, robotics, security) rather than a region or index. Pictet's largest franchise [S505].
SCA (partnership limited by shares)	Pictet's legal form since 2014: managing partners run the firm; their personal unlimited liability ended [S490].

Source table

Every [Sxx] in this guide resolves here.

How to read this table

Every [Sxx] marker in the text resolves to a row below. Status: FETCHED means the full page or document was read; SNIPPET means only a search-result extract was seen (treat as weaker); PAYWALLED means the article itself was not read. All sources accessed between 11 and 12 October 2026. Each workstream had its own ID range, so gaps in numbering are expected.
